However, if such changes can be reasonably expected to materially affect the operating or transmission characteristics of the Casual Calling/Initial Subscription Services or render any Customer equipment or Customer-provided communications system incompatible with Casual Calling/Initial Subscription Services, the Company will provide adequate notice, in writing, to allow the Customer an opportunity to maintain uninterrupted service.

2. GENERAL REGULATIONS

2.7 CONNECTIONS (continued)

2.7.4 Recording of Two-way Telephone Conversations

Casual Calling/Initial Subscription Services is not represented as adapted to the recording of two-way telephone conversations. However, voice-recording equipment which is directly, acoustically or inductively connected with Casual Calling/Initial Subscription Services may be used for the recording of such conversations subject to the following regulations which have been adopted by the F.C.C.:

A. Recording Requirements

The voice recording equipment must be arranged so that it can be connected or disconnected (or switched on or off) at the will of the Customer. In addition, one of the following conditions must apply:

1. All parties to the telephone conversation must give their prior consent to the recording of the conversation, and the prior consent must be obtained in writing or be part of, and obtained at the start of, the recording, or
2. A distinctive recorder tone, repeated at intervals of approximately fifteen seconds, is required to alert all parties when the recording equipment is in use. The distinctive recording tone can be provided as part of (1) the recording equipment, or (2) registered or grandfathered protective circuitry.

A broadcast licensee shall be exempt from the above recording requirements provided at least one of the following requirements is met:

- The licensee informs each party to the call of its intent to broadcast the conversation, or
- Each party to the call is aware of the licensee's intent to broadcast the call, or
- Such awareness of the licensee's intent to broadcast the call may be reasonably imputed to the party.

2. GENERAL REGULATIONS

2.7 CONNECTIONS (continued)

2.7.4 Recording of Two-Way Telephone Conversations (continued)

B. Exceptions

The F.C.C. established the following exceptions to the foregoing requirements:

1. Recordings made of incoming calls to telephone numbers publicized for emergencies involving health or safety of life and property (e.g., emergency situations involving fire, health care, police, public utilities and emergency road service) and outgoing calls made in immediate response to such calls. Included in this exception are:
 - a. Recordings made at the United States Department of Defense Command Centers of emergency communications transmitted over the Department of Defense's private line system when connected to Casual Calling/Initial Subscription Services and,
 - b. Recording made by the United States Nuclear Regulatory Commission of the Department of Energy with respect to the telephone systems located at its Operations Center.
2. Recordings of calls made for patently unlawful purposes, such as bomb threats, kidnap ransom requests and obscene telephone calls. Outgoing calls made in immediate response to such calls are also excepted. Included in this exception are:
 - a. Recordings made by the United States Secret Services of the Department of the Treasury for recording of two-way telephone conversations which concern the safety and security of the person of the President of the United States, members of his immediate family, or the White House and its grounds.
 - b. Recordings of calls made by Federal, State or local law enforcement authorities, or federal intelligence authorities, acting under color of law.

2. GENERAL REGULATIONS

2.7 CONNECTIONS (continued)

2.7.5 Minimum Protection Criteria

A. General

Minimum Protection Criteria have been specified so that Company personnel, equipment, and services will be protected from the harmful effects of signal power overload, hazardous voltages and longitudinal imbalance. Minimum Protection Criteria apply to the direct electrical, acoustic, or inductive connections of Customer equipment, test equipment and Customer-provided communications systems to the network.

B. All Connections

Customer equipment, test equipment and Customer-provided communications systems which are connected to the network on a direct electrical basis or an acoustic or inductive basis, must comply with the following:

1. To protect other Company services, it is necessary that the signal which is applied at the station meets the following limits:

a. Metallic Voltage

- (1) 4kHz to 270 KHz

<u>Center Frequency (f) of 8 KHz Band</u>	<u>Max. Voltage in All 8 KHz Bands</u>	<u>Terminating Impedance</u>
8 KHz to 12 KHz	- (6.4 + 12.6 log f) dBV*	300 ohms
12 KHz to 90 KHz	(23 - 40 log f) dBV	135 ohms
90 KHz to 266 KHz	- 55 dBV	135 ohms

*dBV = 20 log₁₀ voltage in volts

- (2) The root-mean-square (RMS) value of the metallic voltage components in the frequency range of 270 KHz to 6 MHz shall, averaged over 2 microseconds, not exceed -15 dBV. This limitation applies with a metallic termination having an impedance of 135 ohms.

GENERAL REGULATIONS

2.7 CONNECTIONS (continued)

2.7.5 Minimum Protection Criteria (continued)

b. Longitudinal Voltage

(1) 4 KHz to 270 KHz

<u>Center Frequency (f) of 8 KHz Band</u>	<u>Max. Voltage in All 8 KHz Bands</u>	<u>Longitudinal Terminating Impedance</u>
8 KHz to 12 KHz	- (18.4 + 20 log f) dBV*	500 ohms
12 KHz to 42 KHz	(3 - 40 log f) dBV	90 ohms
42 KHz to 266 KHz	- 62 dBV	90 ohms

*dBV = 20 log₁₀ voltage in volts

- (2) The root-mean-square (RMS) value of the longitudinal voltage components in the frequency range of 270 KHz to 6 MHz shall, averaged over 2 microseconds, not exceed -30 dBV. This limitation applies with a longitudinal termination having an impedance of 90 ohms.

C. Signal Power

To prevent the interruption or disconnection of a call, it is necessary that the signal power applied at the station be limited. Specifically, the signal at the station shall at no time have energy concentrated solely in the 2450 to 2750 Hz band. If there is signal power at the station in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

2. GENERAL REGULATIONS

2.7 CONNECTIONS (continued)

2.7.5 Minimum Protection Criteria (continued)

D. Direct Electrical Connections

In addition to the regulations in B. preceding, Customer equipment, test equipment and Customer-provided communications systems which are connected to the network on a direct electrical basis must comply with the following:

1. To prevent excessive noise and crosstalk, it is necessary that the power of the signal presented at the AT&T Central Office not exceed 12dB below one milliwatt when measured over any three second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the Customer equipment, test equipment or Customer-provided communications system to the station will be specified for each Customer location. In no case shall the power exceed one milliwatt.

E. Acoustic or Inductive Connections

In addition to the regulations in B. preceding, Customer equipment and Customer-provided communications systems which are connected to the network on an acoustic or inductive basis must comply with the following:

1. To prevent excessive noise and crosstalk, it is necessary that the power of the signal which is applied by the equipment to the station located on the Customer's or user's premises be limited so that the signal power does not exceed 9dB below one milliwatt when averaged over any three second interval. However, to permit each Customer, independent of distance from the serving office, to supply signal power which at the serving office, approximates 12dB below one milliwatt when averaged over any three-second interval, the Company, at the Customer's request, will specify, for each Customer location, the signal power at the station, which shall in no case exceed one milliwatt.

2. GENERAL REGULATIONS

2.8 PRICE DETERMINATION

The price for a Casual Calling/Initial Subscription Services call is determined by factors such as:

- The distance between the rate centers of the originating (calling) station and the terminating (called) station; and, under certain conditions the distance between the V&H coordinates of an AT&T central office and the rate center of a station of the V&H coordinate of an AT&T central office;
- The time-of-day and the day-of-week; and
- The duration of the call.

The specific factors which apply to a given Casual Calling/Initial Subscription Services call and their application are listed in the Price List section applicable to that type of call. The regulations pertaining to those factors are as follows.

2.8.1 Time-of-Day and Day-of-Week

The price charged for a Casual Calling/Initial Subscription Services call may be determined in part by the day-of-week and the time-of-day at the originating (calling) station or at the AT&T central office associated with the originating (calling) station using special access. Different prices may be applicable to a call at different times of the day and on certain days of the week as specified in the appropriate price section for that call.

2. GENERAL REGULATIONS

2.8 PRICE DETERMINATION (continued)

2.8.2 Determining the Chargeable Time of a Call

The chargeable time for a Casual Calling/Initial Subscription Services call is determined by the duration of the call. Chargeable time includes the initial period plus the additional time involved, if any, and is determined as follows:

- A. On all calls, chargeable time begins when completed connection is established between the calling station and the called station.
- B. Chargeable time ends when the calling station "hangs up". If the called station "hangs up" but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Company operator.
- C. Initial minute rates for all calls are one minute or any fraction thereof.
- D. All additional minute rates are for each additional minute or any fraction thereof that the connection continues beyond the initial minute.

2. GENERAL REGULATIONS

2.8 PRICE DETERMINATION (continued)

2.8.2 Determining the Chargeable Time of a Call (continued)

E. When Casual Calling/Initial Subscription Services are directly connected to a Customer-provided communications system at a Customer's or user's premises, chargeable time begins when a Casual Calling/Initial Subscription Services call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Casual Calling/Initial Subscription Services so that chargeable time may begin.

2.8.3 Determining the Applicable Price In Effect

- A. When a Casual Calling/Initial Subscription call is established in one price period and ends in another price period, the price in effect at the calling station for each price period applies to the portion of the call occurring within that price period. When a unit of time is split between two price periods, the price applicable to that unit of time is based on the price period in which it began.
B. Chargeable time for a price period (e.g., 8:00 A.M. - 5:00 P.M.) begins with the first stated hour (e.g., 8:00 A.M.) and continues to, but does not include, the second stated hour (e.g., 5:00 P.M.).
C. Prices are quoted in terms of initial and additional period for Day, Evening and Night/Weekend time periods in the Price List.

Rate Period Table

Table with 8 columns (MON, TUES, WED, THUR, FRI, SAT, SUN) and 3 rows of rate periods: DAY RATE PERIOD (8:00 AM to 5:00 PM), EVENING RATE PERIOD (5:00 PM to 11:00 PM), and NIGHT & WEEKEND RATE PERIOD (11:00 PM to 8:00 AM). Includes 'EVE' label for Saturday/Evening period.
