SECTION 1 - GENERAL TARIFF INFORMATION

1.1 Tariff Format

- 1.1.1 Page Numbering** - Page numbers appear in the upper right hand corner of each page. Pages are numbered sequentially, when a new page is added between pages it will be numbered with an additional number preceded by a ".". A page inserted between pages 10 and 11 would be page 10.1.
- 1.1.2 Revision Numbers** - Revision numbers also appear in the upper right corner of the page. These numbers are used to determine the most current page version on file. For example, the 4th revised page 34 cancels the 3rd revised page 34. Because of deferrals, notice periods, etc., the most current page revision number on file is not always the tariff page in effect. Consult check sheets and supplements for the page currently in effect.
- 1.1.3 Numbering Sequence** - There are nine levels of alpha-numeric numbering. Each level is subservient to its next higher level. The following is an example of the numbering sequence used in this tariff. Alpha-numeric coding is used for paragraph identification. Each level is subservient to the previous higher number/letter. Following is the sequence used in this tariff.

Calls charged to a commercial credit/charge card must be made from a suitably equipped telephone or from international locations where available. *Charges for the call will be reflected on the statement issued by the respective commercial credit/charge card institution.

2.2.4.A.3 Third Number Billing - This option allows a call to be billed to a telephone number identified with a station other than the calling or called one. Charges to be billed to a third number are subject to verification by the Company that they will be accepted at the third number, prior to completion of the call. Other efforts may be undertaken subsequently by the Company, as necessary, to determine responsibility for payment of such calls.
