EXPLANATION OF SYMBOLS

- C - To signify changed rate, regulation or condition
- D - To signify discontinued rate, regulation, or condition
- I - To signify increase
- M - To signify a move or change in location of text from one sheet to another
- N - To signify new rate, regulation, or condition
- R - To signify reduction
- T - To signify a change in text but no change in rate or regulation

DEFINITIONS

Access Line

A circuit between a switching center and a subscriber premises that includes a standard network interface (SNI).

Access Line Installation Charge

An initial nonrecurring charge to cover all or a portion of the cost associated with the installation of communication facilities.

Air Line Mileage

The shortest distance between the points involved.

Applicant

An individual or concern that applies to the Company for service, or reapplies for service at a new or existing location after service has been discontinued.

Automatic Call Back (Camp-On)

Allows a station, which has reached a busy condition on an internal call to be notified when the busy station becomes available and to be placed automatically in a "call back" mode. The system will scan both the calling station and the called busy station. At the moment both stations are free, the system will call the originating station first and once the user answers, the system will call the camped-on station.

Automatic Route Selection (ARS)

With this feature, customer-provided trunk route lists are automatically searched for the most economical route to a destination.

Average Power

The power averaged over any one-tenth second.

Basic Measured Service

A measured usage service that consists of a low monthly access charge coupled with measured usage on all intraexchange calls.

Billed Number Screening

A feature that restricts billing of collect and third number billed calls to a specific telephone number.

Section 2
1st Revised Sheet 2
Canceling
Original Sheet 2

DEFINITIONS

Bridged Lines

See Combination Main Service.

Business Service

Business service is exchange service furnished to customers whose actual or obvious use of the service is for conducting a business, trade or profession, or whose use of the service is obviously not confined to domestic use.

Call Forward

The Call Forward feature allows a customer to have incoming calls to a station automatically forwarded to a predetermined telephone number. Call Forwarding consists of three variations as follows:

- Forward all calls
- Forward when busy
- Forward when there is no answer

(T)
(T)

Call Hold

The Call Hold station feature allows a station, engaged in a call, to set the call into holding condition, which completely frees the station to place or receive a call.

Call Park

This provides a station engaged in a call to set the call aside into a holding condition for access from another station in the system. The Call Park feature differs from the Call Hold feature in that the call is associated with an index code, or in some systems a station number, and does not standby for access by the station, which set the call aside. The feature allows any station to dial a Call Park retrieval code to be connected to the held call.

Call Pick-up

The Call Pick-up feature permits a station user of a designated pick-up group to answer a call directed to another station in the group by dialing a code.

Call Restriction Service (CRS)

Call Restriction Service prevents access to the toll network. Depending on the option selected, CRS will block access to 1+, 0+, 0-, 1+ 900, 1+ 976, and local directory assistance.

Call Transfer

This feature allows a station to hold and transfer calls. During transfer, the two stations talk privately. The station receiving the transferred calls must be internal to the system.

3rd Revised Sheet 3
Canceling
2nd Revised Sheet 3

DEFINITIONS

(D)
|
(D)

Central Office

A switching unit in a telephone system which provides service to the general public, having the necessary equipment and operating arrangements for terminating and interconnecting customer lines and trunks.

Central Office Line

A Network Access line between the central office and terminating equipment located on the customer's premises.

Central Office Located Service

An exchange access line between the Company's wire center and a multi-line switching system co-located in the same wire center.

Central Office Located Trunk

A Customized Multi-line Telephone Service or ISDN-BRI network access register that connects the end user to the public switched network.

Central Office Trunk

See Trunk.

Challenge Intercept

See New Number Call Routing (Call Referral Service).

Channel

A path for communication between two or more telephones or Company offices, furnished in such a manner as the Company may elect, whether by wire, radio, or a combination thereof.

Class of Service

The various categories of service generally available to the customer: business, residence, and public.

I.P.U.C. PRICE LIST No.1
FRONTIER COMMUNICATIONS NORTHWEST INC.

Section 2

2nd Revised Sheet 4
Canceling
1st Revised Sheet 4

DEFINITIONS

(D)
|
(D)

Combination Main Service

Provides for service for separate business and residence locations from the same one-party line with separate rings for each location.

Flexible Telephone Systems

Denotes channels or other facilities that are capable, when not connected to telephone service and WATS, of communications between customer-provided terminal equipment or Company telephones.

Companion Service

See Combination Main Service.

Company

Frontier Communications Northwest Inc.

Connecting Arrangement

The equipment provided by the Company to accomplish the direct electrical connection of customer-provided facilities with the facilities of the Company.

Contiguous Exchanges

Two exchanges whose boundaries adjoin.

Continuous Property

Property owned or leased and occupied by a customer, which is not separated by public highways or by property occupied by others.

Advice No. 57

Issued: 05/19/15
Issued by Frontier Communications Northwest Inc.
By Jack Phillips, Director of Government and External Affairs

Effective: 05/31/15

DEFINITIONS

Cost

The word encompassing actual cost of material, labor, vehicles, and incidentals, plus a charge for administration.

Customer

A person, firm, partnership, corporation, municipality, cooperative organization, governmental agency etc., who has applied for, been accepted, and is currently receiving service. A customer who voluntarily discontinues service and reapplies for service at a new or existing location within 20 days after disconnection will retain customer status.

Customer-of-Record

The person or entity who resells or shares exchange services.

Customer Premises Inside Wire (CPIW)

Wire for telecommunications purposes which is on the customer's premises. CPIW begins on the customer's side of the Standard Network Interface (SNI).

Customer-provided Pay Telephone Service

Pay telephone service provided through an instrument owned by the customer. The services are provided on an instrument implemented basis rather than a central office implemented basis, and must be connected to a Public Access Line.

Date of Presentation

The date upon which a bill or notice is mailed, first class, postage prepaid, in a sealed envelope properly addressed to the customer, or if not mailed, the date upon which that bill or notice is presented to the customer by a representative of the Company.

Demarcation Point

The point of common termination of Company-provided and Customer-provided facilities. Sometimes referred to as the Standard Network Interface (SNI).

DEFINITIONS

Deposit

A cash payment made by the customer in aid of establishing or reestablishing credit with the Company. Such payment, which may be required before or during the period of service, offsets the risk that the customer may make inadequate payment following a period of service. Interest is payable on all deposited amounts.

Direct Inward Dialing (DID)

Allows incoming calls from the exchange or toll network to reach specific stations without attendant assistance or intervention.

Direct Inward-Outward Dialing (DIOD)

Allows incoming calls from the exchange or toll network to reach specific stations without attendant assistance or intervention and allows the trunk to be used to place outgoing calls.

Directory Listings

Information in the telephone directory or information records of the Company whereby telephone users may ascertain the telephone number of a listed customer telephone.

End Office Switch

A Company local switching system where Company local service subscriber station loops are terminated for purposes of interconnection to each other and to trunks.

End User

A client of an interstate carrier taking service offered in combination with telephone companies and other carriers.

Exchange

An exchange is a specified area established for the furnishing of communication service. It usually embraces a city, town, village, or unincorporated community and environs thereto and may consist of one or more central offices, together with the associated plant used in furnishing service within that area.

Extended Area Service

Interexchange telephone service furnished at flat or measured service rates between one or more exchanges.

Extension Service

Extension service provides the capability of originating or receiving calls from locations equipped with telephones in addition to the primary termination of the network access line.

Section 2

1st Revised Sheet 7
Canceling
Original Sheet 7

DEFINITIONS

Facilities

Supplemental equipment, apparatus, wiring, poles, cables, and other materials and mechanisms necessary to, or furnished in connection with telephone service.

Flat Rate Service

Service furnished at a fixed monthly rate.

Foreign Exchange

Any exchange other than that in which the customer is located.

Foreign Exchange Service

Exchange service furnished a customer from a central office located in an exchange other than that in which the customer's primary station is located, or off premises station service furnished a customer in an exchange other than that in which the customer's primary station is located.

Grandfathered Service

Existing service not available to new customers.

Individual Line Service

See One-Party Service

Installation Charge

See Service Charges

(T)

Interface

That point on the premises of the customer at which provision is made for connection of Company facilities to facilities provided by others.

Joint User

An individual or concern authorized by the Company and the customer to share in the use of the customer's business telephone service. All arrangements regarding service must be made by the customer.

Section 2

1st Revised Sheet 8
Canceling
Original Sheet 8

DEFINITIONS

(D)
|
(D)

Lifeline Service

See Idaho Telephone Service Assistance Program.

Line Connection

Installation of facilities provided by the Company for a circuit from the central office to the protector, inclusive.

Line Extension

A line extension is the outside plant required in addition to existing facilities to render telephone service.

Local Channel

A Channel connecting two or more stations within an exchange area.

Local Exchange

The area within the boundaries of exchange maps filed with and approved by the Commission. In connection with foreign exchange service, that exchange in which the primary termination of the Network Access line is located.

Local Loop

One pair of wires from a Company wire center to the point of demarcation on a customer's premises within that serving wire center area.

Local Message

A completed customer call not subject to toll charges.

Section 2

2nd Revised Sheet 9
Canceling
1st Revised Sheet 9

DEFINITIONS

Local Service

Telephone service furnished between customers' telephones located within the same local service area.

Local Service Area

The area within which telephone service is furnished under a specific schedule of rates. This area may include one or more exchanges without the application of toll charges.

Local Service Options

Refers to customer ability to choose whether local calling will be rated as all measured, a combination of measured and flat, or all flat.

Measured Usage

A separate charge applicable to each outgoing local message. The message charges are based on the time of day, distance, and length of calls. Measured usage is provided in conjunction with Measures Service and Local Service Options.

Message

A completed customer telephone call.

Mileage Rate

Additional recurring charges based on distance measurement as provided in the schedules.

Minimum Term Commitment Period

A minimum length of time for which a customer is obligated to pay for service, facilities or equipment, whether or not retained by the customer for such minimum length of time.

Native American Lifeline

Additional federal Lifeline and Linkup assistance for qualifying low-income individuals living on Native American reservations to reduce the cost of basic telephone service and offset the service order charges and line extension costs associated with the initiation of service for those individuals.

(T)

DEFINITIONS

Network Access

The element of local service representing the ability of the customer to access the network and to receive calls.

Network Access Line

A communications facility between the customer's premises and the serving central office, providing access to and from the telecommunications network.

Network Access and Local Exchange Usage

The element of local service representing the ability of the customer to access the network, receive calls, and to make unlimited calls within the customer's own exchange.

Network Interface

The point of common termination of Company-provided and customer-provided facilities. Sometimes referred to as the Standard Network Interface (SNI).

No Call/No Solicitation Program

This program is available to consumers through the Idaho Attorney General's Office, Consumer Protection Unit. Toll free number is 1/800-432-3545.

Noncontiguous Exchanges

Two exchanges whose boundaries do not adjoin.

Non-Listing Service

An arrangement whereby a customer is omitted from the telephone directory but not from the information records, at the customer's request.

(T)

Nonrecurring Charge

A one-time charge covering installation, move, or change of facilities accomplished at customer's request. The charge may be based on either a flat rate or on a time and material (T&M) basis.

DEFINITIONS

Off Premises Stations and Extensions

The wire facility used in providing an off-premises access line.

One-Party Service

A grade of Network Access arranged to serve one customer only, although additional telephones may be connected to the Network Access line as extensions.

Idaho Telephone Service Assistance Plan (ITSAP)

A program which provides reduced monthly rates for low income residential customers who meet eligibility requirements. Rates under this program apply to the single line serving the customer's principal residence.

Pay Telephone Service

Public, semi-public and customer-provided pay telephone service. Exchange service provided at the customer's request and designed for use of the customer and the public at locations somewhat public in character at a specified charge for each outgoing message. Public and semi-public locations are at a location chosen or accepted by the Company and use central office implemented features. Customer-provided service is offered by the customer on an instrument implemented basis and must be connected to a Public Access Line.

Permanent Disconnect

A service is permanently disconnected when the customer is denied both incoming and outgoing service by the Company.

Premises

A building, two or more buildings, or part of a building, including associated grounds, located on continuous property and occupied by an individual customer. This could include all or part of a single residential or business building, multi-story building, or multiple-buildings on continuous property.

Price List

The index, definitions, rates, charges, rules and regulations, conditions of service, concurrences, and maps adopted and filed by the Company and approved by the Public Utilities Commission of Idaho.

Section 2

1st Revised Sheet 12
Canceling
Original Sheet 12

DEFINITIONS

Private Branch Exchange (PBX – PABX)

Service furnished by means of trunk lines directly connected from a Company central office to a branch switchboard on a customer's premises from which connection is made to stations located at various locations of the customer's operations. Private Branch Exchange Service is for the exclusive use of the customer or the customer's authorized agent.

Public Access Line

An exchange line to which a customer-provided instrument is connected, to provide pay telephone service.

Rate

A recurring monthly assessment made in conjunction with the provisions of a service.

Residence Service

A class of network access furnished to an individual at a residence or place of dwelling where the actual or obvious use of the service is primarily for domestic purposes.

Route Mileage

The distance measured along the route of the circuit between any two or more given points on that circuit.

Service Charges

An initial nonrecurring charge made to cover all or a portion of the cost associated with the installation of communication facilities. The charge also applies to subsequent moves of the communication facilities.

(T)
(T)

Service Line Service

Service furnished to customers beyond the normal serving area by means of lines and telephones, which are owned and maintained beyond a designed junction by organized associations of customers.

Shared Telecommunications Service

The provision of telecommunications and information management services and equipment and includes connection to the local exchange telecommunications service by a commercial shared services provider or by a users' association.

Slamming

The unauthorized change of a subscriber's preferred telecommunications carrier.

Section 2

3rd Revised Sheet 13
Canceling
2nd Revised Sheet 13

DEFINITIONS

(D)
I
(D)

Split Referral (also referred to as Challenge Intercept)

Service in which an Intercept Operator furnishes referral of calls from a disconnected telephone number to more than one forwarding telephone number. See Call Referral Service.

Station Line

The channel connecting the customer- or Company-owned telephone or terminal equipment to the private branch exchange system.

Station Hunting

Station Hunting is a call completion feature that increases the likelihood of an incoming call being completed within a customer-defined group of lines. When a system encounters a busy indication while attempting to connect a call to a line which hunting is assigned, the switch recognizes the busy condition and attempts to complete the call on a sequence of other lines.

Station to Station Calling (Intercom)

Station to Station Calling allows a station to dial an abbreviated number of digits to reach other stations directly without the need for attendant assistance.

Supersedure

Supersedure of service is when a new customer, who qualifies for the establishment of service, assumes the existing service, as is, of another customer on the premises where the existing service is being rendered and where an arrangement acceptable to the utility is made to pay outstanding charges against the service.

Advice No. 60

Issued: 11/04/15
Issued by Frontier Communications Northwest Inc.
By Steve Crosby, Senior Vice President of Regulatory Affairs

Effective: 11/15/15

Section 2

1st Revised Sheet 14
Canceling
Original Sheet 14

DEFINITIONS

Telecommunications Service

Telecommunications service consists of local, toll service, or private line.

Temporary Disconnect

The suspension of telephone service at the request of the customer or, upon written notice of suspension of service on the initiative of the Company without permanent disconnection of service.

Temporary Service

Local service definitely known to be required for a short period, such as service provided for contractors for use during the construction of a building, sales campaigns, athletic contests, conventions, fairs, circuses, etc.

Term Commitment

The length of time for which a customer agrees to pay for service, facilities or equipment.

Terminal Loop

See off-premises stations and extensions.

Termination Charge

The charge applicable when an agreement for service is terminated by the customer before the expiration of the minimum agreement period.

(D)
|
(D)

DEFINITIONS

Tie Line

A telephone circuit connecting two private branch exchange systems for the purpose of interconnecting the stations of one system with the stations of the other without the use of trunk lines to a central office of the Company.

Time and Material Charges

Time and material spent by a Company representative exclusive of work required to establish network access.

Toll Rate

The charge prescribed for toll messages based upon the duration of the initial and additional periods and distance between exchanges.

Toll Message

A completed call between two exchange stations located in different local service areas, between two toll stations, or between a toll station and an exchange station. Charges for toll messages are made on a per unit basis.

Toll Restriction

This feature disallows the dialing of long distance calls. The system may be programmed so that some stations have no dialing restrictions while others have their own defined restrictions.

Toll Service

Telephone service between exchanges or locations for which a toll rate is charged.

Touch Call Service

A type of high-speed address signaling (dialing) in which numbered buttons in a bank of ten can be depressed to give one of a group of audio tone pairs for signaling directly over the circuit.

Trade Name

The name or style under which a concern conducts its business and by which it is generally known to the public.

Trunk, Central Office Located

An exchange access line between the Company's wire center and a multiline switching system co-located in the same wire center.

Trunk Line

An exchange access line between the Company's wire center and a multiline system on the customer's premises, which utilizes common equipment.

Wire Center

A building in which one or more end office switches, used for the provision of Company local services, are located.

GENERAL REGULATIONS

APPLICATION OF REGULATIONS

The regulations set forth herein apply to intrastate services and facilities furnished within the state of Idaho by Frontier Communications Northwest Inc. hereinafter referred to as the Company, subject to the jurisdiction of the Idaho Public Utilities Commission.

No officer, employee, or agent of the Company has authority to change, amend, or waive any rate or regulation approved or prescribed by the Commission. Rates and regulations may be changed or canceled only with the consent or approval of the Commission.

The Company furnishes exchange service and interexchange service throughout the territory it serves, as shown by its filed rates, regulations, and maps. The Company also furnishes interexchange toll service to the territory served by connecting companies, subject to their rates and regulations.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 08/16/10

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES

Advanced Credit Management

Advanced Credit Management is a process whereby the Company will establish credit limits for new and existing Single Line Business and Residence Service (one party B1 and R1) customers. The Company will utilize Credit Scoring for new customers and Behavioral Scoring for existing customers where technical capabilities exist.

Credit Scoring will be provided through the use of a third party credit reporting service for new Service Requests. The credit rating will screen accounts to establish a credit limit for a combination of local service and toll usage. The credit limit will be based initially on a credit score assigned by commercial credit reporting service and be adjusted periodically as a result of the customer's payment history. Customers will be informed of their credit limits during the application process. The account credit limit will appear on the first bill and on any subsequent bill in the billing cycle in which a customer's credit limit is automatically changed. Changes in credit limits will be conveyed by mailed notices to the customers. (T)

Credit Scoring – New Customers:

Credit levels and credit limits as a result of the scoring will be categorized as follows:

Low Risk

- No collection judgments (T)
- No collection accounts
- No charge off accounts
- No delinquency history over 30 days past due

Medium Risk ¹

- Collection accounts have been paid
- Minimal charge off accounts
- Various degrees of delinquency history from 30-180 days, but paid in full or current at time of scoring
- Customer provides positive identification to Company following a "No Match" on a credit inquiry

High Risk ¹

- Collection judgments
- Charge off accounts
- Outstanding collection accounts
- Various degrees of delinquency history from 30-180 days, and not paid in full or current at time of scoring

¹ Risk determination for medium and high levels can result from one listed event. All possible events need not occur.

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES (Continued)

Advanced Credit Management (Continued)

Behavioral Scoring will establish credit limits on existing customers based on Company payment history. Customers will be notified of their initial credit limit amount and subsequent credit limit changes through credit limit notices mailed to the billing address. A behavioral score will be established and maintained on each customer when the program is initiated and/or after service has been established. The behavioral scoring will be updated monthly, based on billing and payment behavior during the preceding twelve months.

Behavioral Scoring - Existing Customers:

Behavioral Scoring levels and credit limits as a result of the scoring will be categorized as follows:

Low Risk

No dishonored checks during the past 12 months
No service denials due to non-payment during the preceding 12 months

Medium Risk ¹

No more than two NSF checks for telephone bill payments during the preceding 12 months
No more than one service denial due to non-payment during the preceding 12 months

High Risk ¹

Three or more NSF checks for telephone bill payments during the preceding 12 months
Two or more service denials due to non-payment during the preceding 12 months

¹ Risk determination for medium and high levels can result from one listed event. All possible events need not occur.

Section 3

1st Revised Sheet 4
Canceling
Original Sheet 4

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES (Continued)

Advanced Credit Management (Continued)

Notice will be sent when a Single Line Business or Residence Service (one party B1 or R1) customer exceeds the established credit limit. The customer will be allowed eight days to make payment arrangements. If arrangements are not made, access (both intra and interLATA toll) to one plus (1+), direct dialed international (011+), zero plus (0+) and all 900/976/700 calls will be blocked, where facilities and operating conditions permit. If 9-1-1 service is not available in an exchange, zero minus (0-) calls will be limited to local operator assisted emergency calls. Payment of 80% of the customer's credit limit plus the total amount over the limit will prevent the account from being toll blocked. For example:

If a customer had a \$200.00 limit and was \$300.00 over the limit, the customer could prevent the account from being toll blocked by making a payment of \$460.00 (80% of the customer's \$200.00 limit, equal to \$160.00, plus the total amount over the limit, equal to \$300.00.)

In addition, the Company will restrict all collect, credit card and third number billed calls. Not all service will be blocked, i.e., 1-800/866/877/888 calls will be allowed so the customer may contact Company offices and customer services; also, access to the local calling area and emergency services will not be blocked.

Notification that such blocking has been established will be mailed to the customer. A recording will advise the customer that the number is restricted from long distance service and that blocking has been imposed when dialing or billing attempts are initiated. A service reconnect charge is not applicable when the customer's toll service is unblocked. Advanced Credit Management helps the customer maintain local access service, control their liability and thus minimizes temporary disconnects and permanent termination of all service due to payment delinquencies. Advanced Credit Management eliminates the necessity for deposits by Single Line Business and Residence Service (B1 and R1) customers. Single Line Business and Residence Service customers may voluntarily request credit limits lower than would be specified by their credit or behavioral scores.

(T)

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES (Continued)

Advance Payments

At the time an application for service is made, an applicant may be required to pay an amount equal to at least one month's Network Access Rate plus installation charges that may be applicable in addition to such special construction charges as are to be borne by the applicant.

Federal, State, or Municipal governmental agencies may not be required to make advance payments. Requirements for advance payments except for special construction charges do not apply to Single Line Business and Residence Service (one party B1 and R1) customers who are regulated by the Advanced Credit Management System.

Deposits¹

Applicants or customers whose credit rating is, or may become, unsatisfactory will be required to make a suitable deposit, not to exceed two normal billing periods, as security for payment of future bills. Such a deposit may be requested at any time at the option of the Company. The interest paid on deposits may change on January 1 of each new year. The Commission will determine the 12-month average interest rate for one-year treasury bills for the previous November 1 through October 31, round that rate to the nearest whole percent, and notify the Company of its determination of this interest rate. That rate will commence on January 1 and remain in effect for the following calendar year.

Deposits will be returned within 18 months for business customers or 12 months for residential customers unless the service has been discontinued for nonpayment during that period. The deposit will be refunded after the service has been discontinued and all amounts due the Company have been paid. If the amount due the Company has not been paid, the deposit will be credited to the unpaid amount and the balance if any, will be returned to the customer.

¹ Single Line Business and Residence Service customers (B1 and R1) are regulated by the Advanced Credit Management System and will not be required to make deposits.

Section 3

Canceling
1st Revised Sheet 6

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES (Continued)

Provision of Equipment

Terminal equipment necessary for the provision of a given service may be furnished and owned by the customer. The customer may be required to provide suitable housing or other protective measures where Company-provided equipment is to be installed in locations exposed to weather or other hazards. Commercial power will be furnished by the customer to meet terminal equipment specifications when and where required.

Customer Billing

The customer is responsible for all charges in conjunction with the services furnished him, including collect toll messages that have been accepted at the customer's telephone.

Monthly recurring charges are billed in advance and toll charges are billed in arrears. Special billing arrangements may be established for services provided to governmental agencies.

Bills are due when rendered unless otherwise specified on the bill and may be paid at any business office of the Company or at any agency authorized to receive such payments.

For billing purposes each month is presumed to have thirty days.

Retroactive billing adjustments will not be made for a period exceeding three years.

The Company may temporarily suspend service in the event the customer fails to pay any amount due. Such suspensions shall not be made until at least seven days (measured from the day after the date of mailing) following written notification to the customer of the intention to suspend service, the amount due, and the date by which the same must be paid.

Returned Payment Charge

A charge may apply for returned payments for residential and business customers. Returned Payment Charge may apply to any payment that cannot be processed and may include, but is not limited to: insufficient funds; unable to locate account; account closed; balance held; drawn against uncollected funds; account garnished; payment stopped; no funds; account frozen; or post no debts.

Late Payment Charge

A late payment charge of 1.5% or \$9.00 (whichever is greater) of past due unpaid balances, is applicable on residence and business customer bills after 30 days from the customer's billing cycle date.

(I)

Section 3
Original Sheet 7

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES (Continued)

Minimum Contract Period

Except as specified below, the minimum contract period is one month from the date service or additions to service are established, and the minimum charge is the established rate for one month.

Termination Liability

In the event the service is terminated by the customer prior to completion of the current term commitment period, the customer shall be liable for an early termination charge, except as noted below. The amount of the early termination charge will be 25% of the monthly recurring charge(s) (MRC) for the remainder of the term. For example:

$$25\% \times \text{MRC} \times \# \text{ of Lines/Channels/Paths} \times \text{Remainder of Term} = \text{Termination Charge}$$

Early termination charges will apply only to those rate elements under a term commitment period. If any rates for the service are increased during the term period, exclusive of any increase due to local, state or federal fees, taxes or surcharges, the customer may terminate the service without incurring an early termination charge.

End of Term Options

Prior to the end of the term commitment period, the customer may select one of the following options, to be effective at the end of the term:

- Renew their term commitment
- Commit to a new term period
- Arrange for a change service, or
- Arrange for termination of the service.

In the event the customer does not select one of the above options, the customer will be converted to the shortest-term period available under the Price List (i.e., month-to-month, one year, etc.) for the same service, and will be subject to the applicable term commitment, if any, unless the customer terminates the service within sixty (60) days of the conversion date.

Early termination charges will not be assessed under the following circumstances:

Customer moves existing service either to a new location within the same address and/or same building (inside move) or to a new location (outside move) and maintains that service for the remainder of the term;

Customer attempts to move the existing service to a new location within the Company's service area, but the service is unavailable;

Customer renegotiates a new term commitment plan for the same service before the current term commitment expires and the value of the new term commitment is equal to or greater than the remaining value of the current term commitment; or

Advice No. 1

Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 08/16/10

Section 3
Original Sheet 8

GENERAL REGULATIONS

ESTABLISHMENT AND FURNISHING OF SERVICES (Continued)

Termination Liability(Continued)

Early termination charges will not be assessed under the following circumstances:(Continued)

Customer changes to another service or upgrades service to a higher speed or capacity under a term commitment, provided the following conditions are met:

The value of the new term commitment is equal to or greater than the remaining value of the current term commitment,

The Company provides the new service via Price List or on an individual case basis (ICB), and

The order to discontinue the existing service and the order for the new or upgraded service are received by the Company at the same time.

ABUSE OR FRAUDULENT USE OF SERVICE

The service is furnished subject to the condition that there will be no abuse or fraudulent use of the service. Abuse or fraudulent use of service includes:

The use of service or facilities of the Company to transmit a message, or to locate a person, or otherwise to give or obtain information, without payment of the charge applicable for service;

the obtaining, or attempting to obtain, or assisting another to obtain service by rearranging, tampering with, or making connection with any facilities of the Company, or by any trick, scheme, false representation, or false credit device, or by or through any other fraudulent means or device whatsoever, with intent to avoid the payment, in whole or in part, of the regular charge for such service;

the use of service or facilities of the Company for a call or calls, anonymous or otherwise, if in a manner reasonably expected to frighten, abuse, torment, or harass another;

the use of profane or obscene language;

the use of the service in such a manner as to interfere unreasonably with the use of the service by other customers.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 08/16/10

GENERAL REGULATIONS

DISCONTINUANCE , TERMINATION , OR REFUSAL OF SERVICE BY THE COMPANY

The Company may refuse to furnish, or may terminate the service and remove its equipment under the following circumstances, provided suitable notice has been given to the customer:

upon the continuance of any unpaid amount due for a period of 10 days following temporary suspension;

upon the continuance of any unauthorized attachment or improper connection of customer owned facilities with facilities provided by the Company;

upon objection to the furnishing of a service made in writing by or on behalf of any governmental law enforcement agency acting within its jurisdiction, on the grounds that such service is or is to be used for an illegal purpose;

upon the use of a service in such a manner that, in the opinion of the Company. Constitutes abuse or fraud or may tend to injuriously affect the efficiency of the Company's plant, property, or service;

upon a continuing violation of any of the regulations governing the furnishing of a service.

Termination of Service by the Company will be administered in accordance with the Telephone Customer Relations Rules, IDAPA 31.41.01. The text of these rules is available for customer inspection upon request.

TERMINATION OF SERVICE AT CUSTOMER'S REQUEST

Term commitments for service may be terminated prior to the expiration of the term commitment period provided advance notice is given to the Company and upon agreement to pay all charges due for the service furnished, plus any termination charge which might be applicable.

When a commitment for service with a one month minimum period is canceled before establishment of the service is completed, a charge not to exceed the installation charge specified is applied if all or a portion of the facilities have been installed.

No minimum or termination charge will apply when a new customer takes over the service of the former customer, provided the service is to be furnished at the same location without interruption and that the new customer assumes all unpaid charges on the original term commitment. Minimum and termination charges will apply for any service furnished under the original term commitment that is not retained by the new customer.

No minimum or termination charge will apply in the event the service is terminated because of condemnation, destruction, or damage to property by fire or other cause beyond the control of the customer.

Section 3

1st Revised Sheet 10
Canceling
Original Sheet 10

GENERAL REGULATIONS

RECONNECT CHARGE

(T)

When service is disconnected for violation of rules or regulations, for fraudulent use of service, or nonpayment, the Company may charge for the reconnection as set forth in the Service Charges Section 4 of this Price List.

(T)

SLAMMING

Per FCC 00-135, CC Docket 94-129, a telecommunications carrier who acquires a customer by an unauthorized change of that customer's local service will be billed the applicable service charges to reestablish that customer's service with the authorized carrier as it existed before the change.

(T)

SUPERSEDURE

Customers who qualify for the establishment of service may assume the existing services of another customer on the premises where the existing service is being rendered and where an arrangement acceptable to the Company is made to pay outstanding charges against the service. Applicable termination charges will apply for any service furnished under the existing service arrangement that is not retained by the new customer.

RESALE OF SERVICE

The resale of any service provided by the Company is not permitted except as provided elsewhere in this Price List or as specifically authorized by the Company.

TELEPHONE NUMBERS

The customer has no property right to the telephone number nor any right to continuance of service through any particular central office.

The Company reserves the right to change the customer's telephone number or the central office associated with the number, or both, as may be required for the proper conduct of its business.

DIRECTORIES

The Company will furnish to its customers, without charge, such directories as are necessary for the efficient use of the service. Copies of other directories may be provided at a nominal charge.

Directories regularly furnished to customers shall remain the property of the Company. No binder, holder, or auxiliary cover, except as provided or authorized by the Company shall be used in conjunction with any directory furnished by the Company.

The Company may give credit for errors or omissions in directory listings that were furnished to the customer at no charge. Credit will not exceed the monthly rate for the Network Access Line during the effective life of the directory in which the error or omission is made. In the case of directory listings for which a charge is made, its liability shall be limited to the monthly rate for each such listing for the charge period during which the error or omission continues.

Section 3

1st Revised Sheet 11

Original Sheet 11

GENERAL REGULATIONS

OBLIGATION OF COMPANY

Furnishing of Service

The Company's obligation to furnish service is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary circuits and equipment.

Where facilities beyond those normally required are provided to satisfy customer requests, charges based on the additional costs incurred will apply.

When a customer orders installations, moves or changes, which cannot be completed during scheduled working hours, overtime charges may apply. Simple Service overtime charges will be the difference between straight time and overtime and will be in addition to the normal installation, move, or change charge. The customer must agree to this provision before such overtime work will be performed.

(T)
(T)

When the construction of certain facilities is necessary for the furnishing of a service, the ownership of such facilities will be vested in the Company, even though all or a part of the cost of construction is borne by the customer.

The Company will determine the type of facilities to be provided for the furnishing of a service.

The Company will be reimbursed for the costs associated with customer requests for relocation or rearrangement of facilities.

Maintenance and Repair

All costs associated with the maintenance and repair of services furnished by the Company will be borne by the Company except as specified elsewhere in this Price List.

The Company will be reimbursed for any loss or damage to its facilities on the customer's premises resulting from intentional destruction or any other cause except from fire or unavoidable accidents.

Access to customer's premises, at any reasonable hour, will be given to representatives of the Company for the purpose of inspecting, repairing, testing, or removing any part of the Company's facilities.

Section 3

2nd Revised Sheet 12
Canceling
1st Revised Sheet 12

GENERAL REGULATIONS

OBLIGATION OF COMPANY (Continued)

Allowance for Interruptions

In the event of an interruption to any service, except an exchange Network Access Local Service, which is not due to the negligence of the customer, an allowance may be made if the interruption continues for more than 48 hours from the time it is reported to or detected by the Company.

The allowance will be the prorated portion of the monthly rate or monthly guarantee for the service or the portion of the service made inoperative.

Service Commitment

The Utility will credit a customer's account by an amount equal to the monthly rate for one month of basic exchange service (Network Access Local Service) if the customer reports an out-of-service condition which has deteriorated service to the extent that the customer cannot make or receive local calls, or cannot use the service for voice-grade communications because of cross talk, static, or other transmission problems, and service is not restored within...

(D)
(D)

fourty-eight hours after the report of the outage, except that outages reported on Thursday, must be restored no later than 6:00 p.m. Monday and outages reported on Friday, Saturday or Sunday must be restored no later than 6:00 p.m. Tuesday.

(C)

The credit will not apply to out-of-service conditions resulting from the willful neglect, misuse or abuse by the customer. The credit will not apply to out-of-service conditions where the outage is in the customer's inside wire or customer's premises equipment. This credit will not apply to out-of-service conditions resulting from natural disasters, or circumstances beyond the control and knowledge of the Utility. This credit also will not apply to out-of-service conditions where service has been temporarily or permanently discontinued for nonpayment of bills. Service Commitment is provided in accordance with IDAPA 31.41.01.

GENERAL REGULATIONS

OBLIGATION OF COMPANY (Continued)

Service Performance Guarantee (SPG)

This Service Performance Guarantee does not constitute a waiver of the provisions of Allowance for Interruptions or Service Commitment. Credits paid in accordance with Service Performance Guarantee shall be in addition to those required to be paid in accordance with Allowance for Interruptions or Service Commitment.

If a business-class or a residence-class customer requests installation of a new or subsequent service or repair of an existing service, and the installation or repair is not completed as agreed, the customer will be eligible to receive a credit of \$100.00 for business-class service or \$25.00 for residence-class service.

One credit per service order or per trouble report may be applied, if the installation or repair involves services from the Price List but excludes the following:

Public Telephone Service
Toll Service
Wide Area Telephone Service (WATS)

Each credit shall be limited to the amount specified above for each service order or trouble report.

A credit will be extended in accordance with the above conditions at the request of the customer. The customer may choose to apply the appropriate credit toward their bill. (C)

A credit will be extended in accordance with the above conditions only after the Company fails to meet a commitment to install or repair one or more of the services specified above or fails to restore Company-owned facilities used to provide any of the services specified above.

Credits will be provided in accordance with the above conditions to business-class or residence-class customers.

GENERAL REGULATIONS

OBLIGATION OF COMPANY (Continued)

Service Performance Guarantee (SPG) (Continued)

Credit is NOT applicable to:

Claims for credit by customers that are temporarily disconnected for nonpayment or are requesting reconnection from a temporary disconnect for nonpayment.

Misuse or abuse of the Company owned facilities, or if the problem is found to be associated with the customer's inside wiring or the customer's premises equipment.

Missed commitments of new or subsequent service and outages of more than 24 hours that are a result of natural disasters or circumstances beyond the control of the Company, such as acts of God, wars, revolution, civil commotion, acts of public enemy, labor difficulties (including without limitation strikes, slowdowns, picketing or boycotts), that occur within such a proximity of the due date that the Company could not reasonably notify the customer nor perform the necessary service. Such example is where there has been a storm or other catastrophe that has caused a large number of customers to lose telecommunications services and/or other similar utility type services.

Customer Premises Inside Wire (CPIW)

CPIW is telephone wiring located on the customer's premises beginning at the point of connection of premises wiring to the Company's facilities and terminating at the point of connection with terminal equipment. Work on CPIW may be performed by the customer, by a technician designated by the customer, or by the Company at the customer's request.

The connection to Company facilities will be at a standard network interface (SNI) provided by the Company. Terminal equipment will be connected to the inside wire at each location of use via a customer provided modular jack or similar device. FCC registered/approved equipment must be used. Use of unapproved or altered equipment can result in discontinuance of service and/or a service charge for costs to eliminate harm from the network.

Installation and Maintenance of CPIW is the responsibility of the customer.

If it is necessary for the Company to make a service call to clear a line having a fault in CPIW, charges for a service call, as specified in Section 4, will apply.

GENERAL REGULATIONS

LIABILITIES

General Liability Statement

The liability of the Company for damages arising out of mistakes, omissions, interruptions, delays, or errors or defects in transmission occurring in the course of furnishing a service and not caused by the negligence of the customer, shall, in no event, exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistake, omission, interruption, delay, or error or defect in transmission occurs.

When the facilities of other companies are used in establishing connections to points not reached by the Company's facilities, the Company is not liable for any act or omission of the other company or companies.

The Company is not liable for any unavoidable damage to the customer's premises resulting from the attachment of its equipment and associated wiring on such premises, or from the installation or removal thereof.

The Company will make no refund of overpayments by a customer unless the claim for such overpayment together with proper evidence be submitted within three years from the date of the alleged overpayment.

GENERAL REGULATIONS

AID TO CONSTRUCTION

The Company will provide telephone facilities to subdivisions, housing projects, multifamily dwellings, and mobile home parks having five or more individual units under the following conditions:

Prior to commencement of the installation of facilities the developer (owner) will enter into a written agreement assuming full responsibility for charges due under this Aid to Construction Price List. A deposit equal to sixty percent of the Company's estimated project charges is payable upon execution of the written agreement. Such payment must be received prior to the commencement of any construction activity.

Repayment to the developer of all Aid to Construction charges, less Line Extension charges, made for a particular project will be made if, at any time within five years of the date of commencement of construction, fifty percent of the units specified in the written agreement are producing network revenue for the Company. If the development does not reach a fifty percent fill rate, the developer will not be entitled to any refund. A date beyond which this refund provision will no longer apply will be stated in the written agreement between the developer and the Company.

The Company will undertake to provide all facilities necessary to provide permanent telephone service to the above projects.

Provisions of this Price List are applicable to all subdivisions, housing projects, multifamily dwellings, or mobile home parks consisting of five or more individual units approved or platted after the effective date of this Price List.

For construction of facilities outside of platted developments see Line Extension Charges.

Nothing in this regulation shall be construed as limiting or in any way affecting the right of the Company to collect from the developer any additional charges to which it is entitled by virtue of the provisions of this Price List or otherwise by law.

GENERAL REGULATIONS

DEMARICATION POINT

The point(s) of demarcation, or standard network interface (SNI), will normally be provided as follows for each primary service location on continuous property:

Switched Network Services

Residence Building - Single Occupant

The SNI will normally be located outside the building at the protector.

Residence Building - Multi Occupant

Small complex (typically 25 units or less) - One SNI will be established for the complex. Normally this will be located either outside the building at the protector or inside the building at a point mutually agreed upon by the building owner and the Company such as an equipment room.

Large complex (typically more than 25 units) - As a minimum, one SNI will be established for the complex. If a single SNI is used, the building will be treated as a small complex. Upon mutual agreement by the Company and the building owner, multiple SNIs may be established at centralized locations throughout the building.

Single Business Building - Single Occupant

The SNI will normally be located outside the building at the protector or inside the building at a point mutually agreed upon by the customer and the Company such as an equipment room.

Multiple Business Buildings - Single Customer

As a minimum, one SNI will be established for the complex. The building in which the SNI is located will be treated as Single Business Building - Single Occupant. Upon mutual agreement by the Company and the customer, multiple SNIs may be established for the complex. If multiple SNIs are used, each building at which an SNI is located will be treated as a Single Business Building - Single Occupant.

GENERAL REGULATIONS

DEMARCATION POINT (Continued)

Switched Network Services (Continued)

Single Business Building - Multiple Customers

If the building capacity is provided primarily through horizontal construction (such as a mall), as a minimum, one SNI will be established for the complex. The SNI will normally be located either outside the building at the protector or inside the building at a point mutually agreed upon by the building owner and the Company such as an equipment room. Upon mutual agreement by the Company and the owner, multiple SNIs may be established either on each premises occupied by an individual tenant or at centralized locations throughout the building.

If the building capacity is provided primarily through vertical construction (such as a high rise building), as a minimum, one SNI will be established for the building. The SNI will normally be located in a centralized location, such as an equipment room, on the ground floor or basement of the building. Upon mutual agreement by the Company and the building owner, multiple SNIs may be established. If multiple SNIs are used, one SNI will be located at a centralized location on each floor.

Multiple Business Buildings - Multiple Customers

Each building will be treated as a Single Business Building -Multiple Customers.

Dedicated Network Services

A demarcation point in addition to those described above may be established at a point mutually agreeable to the Company and the customer.

LOCAL SERVICE

NETWORK ACCESS LOCAL SERVICE OPTIONS

GENERAL

Local Service Options are available only where facilities and operating systems are available and technically feasible to individual business and residence and multi-line business customers. Local Service Options are comprised of the following: (C)

Basic Calling Service is economy rate exchange service that provides measured rate calling to points within the local calling area only. (C)

Community Calling Service provides for flat rate calling within the originating exchange and Company specified nearby exchanges only. All other calls terminating within the local calling area are measured.

Community Plus Calling Service provides flat rate calling within the originating exchange and Company specified nearby exchanges with measured calling to all other exchanges within the local calling area.

Premium Calling Service provides flat rate calling to all exchanges within the local calling area.

Refer to this section for information regarding Local Measured Usage rates and zones. (T)

CONDITIONS

Network Access Service is provided by Local Service Options through facilities owned and maintained according to the standards of the Company. The territory served is shown on maps filed with the Commission, by the Company. This territory is referred to as an exchange.

Within an exchange the following classes of service are available to Business customers where facilities exist: Business One-Party, Business Multi-line, Central Office Located Trunk, Custom Line Telephone Service and Public Access Line. (T)

The following class of service is available to Residence customers: Residence One-Party.

The application of business or residence rates is determined by the actual or obvious use made of the service by the customer. Where only one Network Access line is provided at a location that is both business and residence, the business rate will apply. Public Access Line service will only be installed on premises of a public or semi-public character in a location where the telephone would be accessible for use by the patrons of the customer or by the public in general. Public Access Line Service are provided as Community Calling. (T)

While the Company's Local Exchange Network Access Line Service may be used by the customer for dial-up access, the advertised speeds of the customer's modem may not be attainable with this service and are not guaranteed by the Company. (T)

LOCAL SERVICE

NETWORK ACCESS LOCAL SERVICE OPTIONS

CONDITIONS (Continued)

Local calls placed from a line with Local Service Options will be billed the appropriate charges, as follows:

Direct dialed call

The customer will pay the Initial and Additional Minute rate for the duration of the call based on the Zone called.

Operator assisted calls when difficulty experienced in direct dialing

Any customer subscribing to Local Service Options who experiences difficulty in direct dialing may request an operator's assistance to place the call. The Initial and Additional Minute rate will apply as if the call had been direct dialed. No Operator Service Charge will apply.

Handicapped customers are exempt from the Operator Service Charge on all operator-assisted calls.

Operator assisted calls for Special billing arrangements

Local Service Option customers who dial the Operator to bill Exchange and/or extended area calls to a Third Number, Collect, or Special Billing Number will be billed the Operator Service Charge, Initial Minute rate, and Additional Minute rate for the appropriate Zone. (C)

Calls to Call Forwarded lines

The Local Service Option customer pays the appropriate usage rate (Initial and Additional Minute) for the duration of the call from the originating number to the called number.

The customer of the Call Forwarding service pays any applicable usage (measured) rate from the called number to the terminating location of the call.

Usage on a Foreign Exchange access line with measured usage is measured and billed as if the local calls had been placed from the primary service location.

LOCAL SERVICE

NETWORK ACCESS LOCAL SERVICE OPTIONS

CONDITIONS (Continued)

Local Service Options will not be offered in connection with WATS.

Hotel/motel customers can subscribe to any of the options available for Local Service Options. All charges for the service, including charges for any messages, shall be billed to the hotel/motel, which shall be responsible for any prorating and billing of the charges to the guests.

For the purpose of determining charges, the following applies:

A flat monthly rate for provision of incoming calls and access to the local network.

Zones 1 through 3 relate to measured usage rates based upon interexchange mileage determined by measuring the airline distance between rate centers within the local service (calling) area. There are no mileage charges associated with calls originating and terminating within a customer's serving exchange.

A charge per minute or fraction thereof, for duration of call. Monthly billing is based on cumulative minutes of usage with the total fraction rounded to the next higher minute.

The time-of-day and day-of-week discounts apply to all calls that are originated within the designated discount periods. The charges are determined separately for each rate period, and the results are totaled.

Customers with lines in a hunt line arrangement must subscribe to the same service option for all lines.

Customers with more than one line who are group billed, must subscribe to the same service option for all lines.

LOCAL MEASURED USAGE RATES

CONDITIONS

Usage charges apply to calls from Basic Calling, Community Calling, and Community Plus Services.

No usage charges apply to Premium Calling Service.

Usage will not be charged on calls placed to Operators, 911 (Emergency Service), Directory Assistance, Company Service or Repair Offices, nor on calls that access Interexchange Carrier lines/trunks that have been registered with the Company for the purpose of placing long distance calls.

Any routes in the expanded calling area that are over 23 miles are billed at Zone 3 rates.

RATES

	<u>Initial Minute</u>	<u>Additional Minute</u>
Zone 0 Immediate Exchange	\$0.05	\$0.02
Zone 1 1-10 Miles	0.07	0.03
Zone 2 11-16 Miles	0.10	0.05

LOCAL SERVICE

LOCAL MEASURED USAGE RATES

DISCOUNT PERIODS

Discounts for evening, night, and weekends are expressed as a percent reduction in the preceding measured usage charges. The discount is applicable to both initial and subsequent minute rates. In cases where a message begins in one discount period and ends in another, the initial period discount is the discount in effect at the time the connection is established. The discount for each additional minute is the discount in effect at the beginning of each additional minute. Discounts are applied, based on the following table:

	Mon.	Tue.	Wed.	Thu.	Fri.	Sat.	Sun.
8:00 am to 4:59 pm	Day Rate Period Full Rate						
5:00 pm to 10:59 pm	Evening Rate Period ¹ 30% Discount						Evening 30% Discount
11:00 pm to 7:59 am	Night and Weekend Rate Period 45% Discount						

¹ The Evening Rate applies to the holidays listed below:

- | | |
|--------------------|-----------------------------|
| - New Year's Day | January 1 |
| - Independence Day | July 4 |
| - Labor Day | First Monday in September |
| - Thanksgiving Day | Fourth Thursday in November |
| - Christmas Day | December 25 |

LOCAL SERVICE

PUBLIC ACCESS LINE SERVICE

GENERAL

Public Access Lines (PAL) are business exchange lines provided to customers who connect customer-owned pay telephones to access local service as well as message toll service with the interexchange carrier(s) selected by the owner. Customer owned pay telephones may be connected only to Public Access Lines.

The PAL customer shall be responsible for the installation, operation and maintenance of any customer provided pay telephone used in connection with this service. Instruments must meet the following criteria:

Registered under Part 68 of the FCC Rules and Regulations (instrument-implemented), or

Unregistered, but connected behind a protective coupler registered under Part 68.

Comply with requirements of the Telecommunications for the Disabled Act of 1982.

Comply with all conditions as set forth in Order No. 19766 of the Idaho Public Utilities Commission.

CONDITIONS

Public Access Line Service is provided as Community Calling.

Public Access lines may require a number change if a customer changes from existing service. If a number change is required to provide restrictive features, the appropriate Service Charge will apply. (T)

Public Access Lines may be installed at any well-lighted location. A current telephone directory, in legible condition, must be provided for use by calling parties. This condition for directories is waived for coinless, toll only pay telephones that provide operator access for directory assistance at no charge to the user.

Extensions to a pay telephone permitting third party access to conversations are prohibited.

Charges for local and toll calls may be assessed by the Owner of the pay telephone. These charges may exceed the approved charges permitted the Company.

The instrument may be pre-pay or post-pay. Coin-operated instruments must accept coins of various denominations and return/refund unused coins.

The Company is not responsible for coin collection or return, for fraudulent use of the customer's service by the public, or for restrictions to line usage imposed by limitations of the customer-provided telephone.

Advice No. 65

Issued: 09/21/16
Issued by Frontier Communications Northwest Inc.
By Steve Crosby, Senior Vice President of Regulatory Affairs

Effective: 10/03/16

LOCAL SERVICE

PUBLIC ACCESS LINE SERVICE

CONDITIONS (Continued)

Public Access Lines are single party business lines equipped to provide access to local service as well as to message toll service of all available interexchange carriers.

The instrument must allow coin-free operator and emergency/911 access in any exchange in which 911 service is available. The instrument shall also provide access to the Telecommunications Relay Service (TRS) without the use of coin or credit card.

All PAL customers must have O- (Operator) capability. In operating areas where 911 service is not available, the O-feature provides operator service for the placing of emergency calls for the customer to fire departments, police, ambulance, etc. O- calling also permits the placing of calls for certain handicapped/disabled individuals and operator-placed calls where repair problems or trouble in dialing occurs. Telephone operators will not dial digits for customers outside of these conditions.

Coin sent paid interLATA calls from PAL lines may be routed to any Interexchange Carrier selected by the customer who has the required coin signaling capabilities (i.e., coin recognition, coin control, etc.) which are required to complete the call.

Instructions for obtaining refunds from the subscriber and a statement that the customer provided telephone is not provided by the Company must be prominently displayed on or near the instrument. The Company is not responsible for refunds of coins deposited in customer-owned coin operated telephones.

Each Public Access Line will be charged for Directory Assistance calls up to a maximum of \$6.00 per month.

Each telephone must be labeled or there must be posted in close proximity to the instrument, information including:

Name, address and telephone number of Owner;

Procedure for reporting service difficulties and method of obtaining refunds;

A statement that the instrument is not owned by the Company and that charges for calls made on the instrument are not regulated;

Dialing instructions;

Operational characteristics such as pre-pay or post-pay;

Emergency dialing information including dial tone first, coin-free 911 or other emergency access; and,

Where calls are timed, the time limits per call.

LOCAL SERVICE

PUBLIC ACCESS LINE SERVICE

CONDITIONS (Continued)

The Operator will refer customer requests for repair, explanation of telephone operation, etc. to the Vendor or Owner of the customer-provided station.

Directory listings for PAL service are provided under the regulations governing the furnishing of listings in Section 5 of this Price List.

Ancillary services, such as Speed Calling and Touch Call, are available at rates specified elsewhere in this Price List.

In addition to the rates and charges above, Public Access Lines shall bear all special charges related to business access line service such as directory assistance, and maintenance of service.

The customer is responsible for payment of all charges billed to the Public Access Line, including charges for Directory Assistance and Message Toll Service.

The customer shall be responsible for the payment of a Time and Material Charge for visits by a telephone company employee to the customer's premises when a service difficulty or trouble report results from the use of customer-provided pay telephones as outlined in Telephone Customer Relations Rule IDAPA 31.D.2.

The Company may require a security deposit to ensure payment.

Owners must apply for PAL service with the Company on an application form provided by the Company, meeting requirements set by the Idaho Public Utilities Commission. When the form is received by the Company, completed in its entirety and signed by the Vendor and the Owner, an installation date will be scheduled.

An incomplete application will result in a delay or refusal to provide PAL service.

When any customer-provided telephone is found in violation of this Price List, the Company shall notify the customer of the reported violation. The Company has the right to disconnect the service when it is deemed necessary to protect the toll network and Company employees or protect the public from misuse of service. The customer must notify the Company, in writing, within ten days of the disconnect when the violation is corrected for service to be restored.

Failure to comply will result in a permanent disconnection of the service. The customer must then submit a new request for service and pay all applicable Nonrecurring charges for service installation. Proof that previous violation has been corrected will be required before service is reinstalled.

Calls to Telecommunications Relay Service (TRS) will be provided at no charge to the end-user.

Original Sheet 45

LOCAL SERVICE

PUBLIC ACCESS LINE SERVICE

SERVICE OPTIONS

Customers of PAL Service may select the following options which are offered wherever equipment, facilities and operating conditions permit. The minimum billing period for any option is one month.

Nonrestrictive - permits all types and classes of calls to originate and terminate on the PAL.

Selective Class of Call Screening/Option 1 provides Operator Call Screening (0+) and Long Distance (1+) Blocking. Any 0+ direct dialed calls received by the operator will be screened for credit card, operator verified third number or collect billing arrangements. Long distance direct dialed calls (1+ 7 or 10 digits, 01+, 011+, 1+555, 1+900, 1+976, 1+700) will be blocked in the central office and directed to a recording that informs the caller that the number may not be dialed direct from that telephone. Direct dialed calls to 1 + 800/866/877/888 and 1+950+10XXXX will be permitted.

The PAL customer remains responsible for the payment of any calls that are unsuccessfully screened or blocked due to a nonparticipating carrier location originating the call.

Selective Class of Call Screening/Option 2 provides Operator Call Screening only. Any 0+ dialed calls received by the operator will be screened for operator verified third number and collect billing arrangements. Long distance (1+) directly dialed calls are allowed with this option. (C)

The PAL customer remains responsible for the payment of any calls that are unsuccessfully screened or blocked due to a nonparticipating carrier location originating the call.

Answer Supervision is the line side functionality that provides an electrical signal to the calling end of a switched telephone connection when the called line goes off-hook. PAL Answer Supervision will be provided for use with PAL Service as specified in this Price List to assist in determining when billing for a specific call should commence.

900 Blocking Service provides blocking of all Intrastate 1+ and 0+ 900XXX-XXXX calls when the PAL customer elects to have such calls blocked. 900 Call Restriction Service is available at no charge to PAL customers if the order is placed at the same time as an initial order or subsequent order for other services. Nonrecurring charge as listed under rates applies for reinstallation of the service.

Bill Number Screening is a feature that restricts billing of collect and third number billed calls to a specific telephone number. Additional information in Section 6 of this Price List.

International Blocking provides end-office blocking of end-user direct dialed 011+ and 10XXX+011 calls from an end user's location. Offered on a per line basis where facilities permit.

(D)

LOCAL SERVICE

IDAHO TELEPHONE SERVICE ASSISTANCE PROGRAM (LIFELINE)

APPLICATION (Continued)

Lifeline Toll Restriction Service (IOSC 40696) is available on a voluntary basis where technically feasible to Lifeline Telephone Service customers at no charge. Lifeline Toll Restriction Service prevents 0+, 00-, 1+NPA-NXX-XXXX, 1010XXXX, International (01+), Directory Assistance (411, 1+411, 0+411, 555-1212, 1+/0+555-1212, 1+/0+NPA-555-1212), 1+900 calls, 976 calls, and IntraLATA toll calls, while allowing access to local, 911, 0-, 1+800/888 etc., and EAS calls. Access to Directory Assistance is available to Lifeline customers by dialing 0-. Access to Service Activation Codes "*" /#" (e.g., *66, *69) is also allowed. Upon customer request, some Service Activation Codes may be blocked at no charge, where conditions and facilities permit.

Lifeline customers may receive toll limitation services without charge. Toll limitation services include voluntary toll control and toll blocking. Toll control allows the customer to specify a certain dollar amount of toll usage, which is acceptable to the Company that may be incurred on their telephone service. Toll blocking will take effect once the customer's requested toll limitation amount is exceeded.

Lifeline Service may not be disconnected for non-payment of toll charges.

Deposit requirements do not apply to Lifeline Service customers if toll blocking is employed.

LOCAL SERVICE

IDAHO TELEPHONE SERVICE ASSISTANCE PROGRAM (LIFELINE)

RATES AND CHARGES

A total credit amount applies to the Lifeline customer's monthly bill, for the available Service Option selected by the customer, as follows:

	Monthly Credit Rate	
Federal and State Lifeline Credits for a One-Party Line		(D)
a. Federal Lifeline Support Credit	\$9.25	(T) (D)
b. State Amount	2.50	(D)

All recurring and nonrecurring charges for any service ordered by the customer shall be billed at the Price Listed rates with the exception of Tribal Link Up Service as defined on Sheet 55.

When the Company receives the name and telephone number of the eligible customer and new service is established, the Telephone Assistance Program credit will begin within 60 days if the customer name and telephone number match the Company's records. The credit will be prorated on the basis of a 30-day month from the effective date of the customer's application.

The regular service and equipment charges and regulations applicable to the service offerings will apply. The service and equipment charges to change to or from this program due to eligibility status will be waived.

When a customer is no longer eligible for Lifeline Service, the Lifeline credit amount specified above will be discontinued and regular Price List rates and charges will apply.

FUNDING

The total cost of providing this Lifeline program shall be funded from a uniform monthly surcharge to each business and residential access line, excluding those residential access lines benefiting from the program.

LOCAL SERVICE

NATIVE AMERICAN LIFELINE

GENERAL

Residential customers who reside on federally recognized tribal lands are eligible to receive additional enhanced federal Lifeline support in order to reduce the price for basic local telephone service. An individual living on tribal lands may qualify for an additional enhanced federal Lifeline credit of up to \$25.00 per month if the individual participates in one of the following assistance programs:

- Bureau of Indian Affairs General Assistance
- Tribally Administered Temporary Assistance for Needy Families (TTANF) (T)
- Head Start (only those households meeting its income qualifying standard)
- Tribal or National School Lunch Program's (free lunch program)
- Food Distribution Program on Indian Reservations (FDPIR)
- Medicaid
- Supplemental Nutrition Assistance Program
- Supplemental Security Income
- Federal Public Housing Assistance
- Veterans Pension (C)
- Veterans Survivors Pension (C)
(D)

A resident of a federally recognized tribal land may also qualify if the individual is head of household and earning at or below 135% of the Federal Poverty Guidelines.

APPLICATION

The additional enhanced federal credit will be available to Lifeline customers who reside on tribal lands in the following exchanges:

<u>Tribes/Reservation</u>	<u>Exchange</u>
Coeur d'Alene Tribe of the Coeur d'Alene Reservation	Plummer/Worley St. Maries Harrison Coeur d'Alene Kellogg/Pinehurst Potlatch Post Falls Tensed/Bluebell
Kootenai Tribe	Bonnors Ferry
Nez Perce Tribe	Genesse Orofino Pierce Weippe

TRIBAL LINK UP SERVICE

GENERAL

Tribal Link Up Service helps Tribal Land low-income subscribers initiate telephone service by providing reduced service installation charges qualifying Tribal Land residential subscribers.

APPLICATION

Tribal Link Up Service is available to low income residential customers who meet the eligibility requirements of the Idaho Telephone Service Assistance Program (Lifeline).

(D)
|
(D)

An applicant or recipient is required to furnish his/her social security number before his/her eligibility can be determined. Failure to do so will result in denial of benefits.

Tribal Link Up Service can only be associated with the primary residential connection.

Funding for Tribal Link Up Service is obtained from a universal service support mechanism to which all telecommunications carriers that provide interstate telecommunications services contribute on an equitable and nondiscriminatory basis.

RATES AND CHARGES

Reduction of Service Charges, as specified in Section 4 of this Price List. A 100% discount, up to a maximum of \$100.00, for new Service Charges shall apply.

Effective: 11/01/12

LOCAL SERVICE

MILEAGE CHARGES

CONDITIONS

Interoffice Mileage is applicable when a customer requests a Network Access line from another central office within the exchange other than that from which he would normally be served.

The mileage measurement will be the direct airline distance in miles between the serving central offices involved.

RATES

Monthly Rate

Interoffice Mileage, per quarter mile

\$ 1.74

LOCAL SERVICE

EXTENSION SERVICE

CONDITIONS

Extensions

Extension Service provides the capability of originating or receiving calls from locations other than the primary termination point of the Network Access line within the serving central office area. For extension service between two central offices within the same exchange, refer to Section 5 of I.P.U.C. No. 6.

The Terminal Loop charges stated above apply to extensions of Network Access lines when facilities of the Company are used in the provision of Extension Services. Terminal Loop charges do not apply when extension service wiring is placed by the customer or the customer's vendor on the customer's side of the point of demarcation on the same premises.

Extension Service may be furnished in connection with all classes and grades of Network Access service except Public Telephone Service.

Directory listings and distinctive signals are not allowed on Extension Service.

Off-premises extensions may be located on the premises of another customer for answering purposes only, provided the other customer has separate service at the same location. This condition is not required when extensions of business service are to be located at a residence occupied by the individual who is the subscriber to the business service or a partner in the firm.

The Company reserves the right to remove Extension Service that interferes with the satisfactory operation of a Network Access line. The customer may be required to restrict the number of extension telephones in use when the ringer equivalencies of the telephones exceed the maximum limit and cause harm to the customer's telephone service and/or the network of the Company. Failure to comply shall be considered a violation of the General Regulations, Section 3 of this Price List.

LOCAL SERVICE

EXTENSION SERVICE

CONDITIONS (Continued)

Terminal Loops

A Terminal Loop is the wire facility and/or transmission equipment used in extending a Network Access line to a different building on continuous or non-continuous property.

Terminal Loop rates are applicable when facilities on the Company side of the demarcation point are used in the provision of this service. Extensions of Network Access lines may be provided by the customer when the facilities can be contained on the customer side of the demarcation point. When provided on the customer side of the demarcation point, Terminal Loop rates do not apply.

Terminal Loop charges, continuous or non-continuous, may apply in addition to mileage charges found elsewhere in this Price List.

Terminal Loop-Continuous Property

Examples of Continuous Property Terminal Loop rate applications include, but are not limited to, the following:

- One Terminal Loop applies for each termination of the extension of a Network Access line that is located outside of the building where the primary network terminates when network facilities of the Company are used in the provision of the service.
- Refer to Special Channel Services, Section 13, for application of Local Loop charges when a station or an extension of a PBX station requires the use of Company Network facilities to extend the line to a different building on continuous property.

Terminal Loop - Noncontinuous Property

Examples of Noncontinuous Property Terminal Loop rate applications include, but are not limited to, the following:

- One Terminal Loop applies for each extension of a Network Access line and for each line extended to terminate on a concentrator unit. Two Terminal Loops apply when the line is controlled by a key at the primary termination of the Network Access line.
- Refer to Special Channel Services, Section 13, for application of Local Loop charges when a station or an extension of a PBX station requires the use of Company Network facilities to extend the line to an off-premises location.

LOCAL SERVICE

EXTENSION SERVICE

CONDITIONS

Line Treatment Charge-Noncontinuous Property

The rate applies when combinations of wire facilities exceed the distances where transmission of information or supervision of network signaling cannot be accomplished without amplification or signaling adapters.

Unusual or Special Construction

A departure from the rates and special conditions specified in this schedule may be made on behalf of the Company when a line extension involves unusual construction or disproportionately large expenditures as compared with the usual type of plant construction.

RATES

LOCAL SERVICE

SERVICE CHARGES

(T)

CONDITIONS

Service Charges

(T)

The preceding charges are applicable to all installations and moves and changes of services and facilities of the utility.

The Nonrecurring Service Charges shown are in addition to charges shown in the applicable Price List schedules.

Service Order Charge - Initial

Applicable to work done in receiving, recording, and processing information necessary to execute an applicant's request for the initial establishment of telephone service at a premises.

Service Order Charge - Subsequent

Applicable to work done in receiving, recording and processing information necessary to execute an applicant's request for additions, moves, or changes to existing service.

Central Office Connection Charge

Applicable to work done in the central office, between the central office and station protector and on the protector in association with providing an exchange access line or making changes thereto.

(T)

Access Line Work Charge

(N)

The charge applied to work associated with making and changing connections on the circuit between the serving central office up to and including the protector on the customer's premises, and/or other premises where the service is to be terminated, including necessary cross connections and line and station transfers.

Reconnect Charge

The non-pay Reconnect Charge applies where a customer re-establishes service on the same premises, with no changes in service after being disconnected for non-payment of a bill. This charge replaces the listed Service Charges and includes all services which were previously connected. If the customer does not take action to re-establish service within two weeks of the non-pay disconnect, the appropriate Service Charges will apply.

SERVICE CHARGES

(T)

CONDITIONS (Continued)

(T)

Service Charges (Continued)

Special Telephone Numbers

Special Telephone Numbers (STN) are numbers which cannot be randomly assigned from a mechanized system. Examples include requests for specific telephone numbers or choice of telephone numbers. Exceptions to this charge are as follows:

A former subscriber to a telephone number requests reconnection of the number in the same service name within 90 days after disconnection. If the number is still available for reassignment, the (STN) Charge will be waived.

A business customer who disconnects service and pays all outstanding indebtedness, may pay directory advertising charges through the end of the current directory issue to receive referral of call service. If service is reestablished during this same period under the former number, the STN Charge will be waived.

The charge for Special Telephone Number is in addition to the other applicable nonrecurring charges incurred in the installation, move, or change of a service. One nonrecurring charge will apply for each lead number of a trunk hunting group in which a Special Telephone Number is assigned.

The rights to these telephone numbers remain those of the Company's as stated in the General Regulations of this Price List. In the event the Special Telephone Number must be changed due to Company initiated reasons, the nonrecurring charge for a new Special Telephone Number will be waived.

Field Visit Charge

Field Visit Charges apply to Multiline Business service whenever field personnel are dispatched to perform work on the network facilities or on leased terminal equipment. If more than one location and/or premises is visited, the appropriate number of Field Visit Charges will be billed.

LOCAL SERVICE

SERVICE CHARGES

(T)

CONDITIONS (Continued)

Service Charges (Continued)

(T)

Service Charges do not apply to the following:

(T)

Supersedure of Service due to death of responsible party.

Change mailing address.

Disconnect or removal of Network Access line(s) and line features.

Change of street address due to legal change in house number and/or street name.

Add, change, or delete Customer Provided Equipment information such as FCC registration numbers.

Corrections and/or changes to customer records for Company reasons, i.e., central office conversions, record corrections.

Reestablish service that has been disrupted by fire, accident or natural catastrophe. When service that has been disrupted by fire, accident, or natural catastrophe is reestablished for the customer at either the original location or a new location, the Service Charges and Field Visit Charges will not apply for the installation of the Network Access line and Standard Network Interface that were in place prior to the disaster. The customer will be responsible for replacing facilities beyond the point of demarcation (SNI).

(T)

When service has been disrupted due to unauthorized change to another telecommunications carrier (slamming), see Section 3, General Regulations, for billing of Nonrecurring Charges to reestablish service with the authorized carrier.

Installment Billing

(N)

Residential customers may select an installment billing option. This option provides for billing one-time charges in three (3) equal monthly installments.

LOCAL SERVICE

SERVICE CHARGES

(T)

CONDITIONS (Continued)

Time and Material Charges (non-regulated charges shown for informational purposes)

Time and Material charges are applicable to each service call by the Company where a trouble report results from customer-provided equipment and/or facilities. At the request of the customer, the Company will repair, adjust, and/or perform any work on the customer-provided equipment and/or facilities at non-regulated rates and charges.

Time and Material Charges apply in addition to any applicable Service Charges, Premise Visit and Other Installation Charges as shown in other schedules in this Price List.

(T)

Total Time and Material Charges are based on the labor time and miscellaneous materials required to complete the installation on the customer's premises.

Time and Material charges and associated Service Charges do not apply to the following work:

(T)

To install the Standard Network Interface (SNI).

To move or change a customer's telephone service or equipment if required or initiated by the Company.

To install, move, or change telephone equipment located on a customer's premises but used exclusively by the Company for maintenance or training activities.

The "from" portion of work involved in a transfer of service from one premises to another.

Disconnection and/or removal of main or extension line services and supplementary network services such as the Customized Multi-line Telephone Service.

Premise Visit (trouble isolation)

(T)

A Premise Visit (trouble isolation) charge is applicable whenever the Company's repairmen are dispatched to the customer's premises, at the request of the customer, and the repair trouble is found to be the result of customer-provided equipment or facilities. If more than one location and/or premises is visited, the appropriate number of Premise Visit charges will be added.

LOCAL SERVICE

LINE EXTENSION CHARGES

GENERAL

Line Extension Charges are applicable in connection with all classes, types, and grades of service in any exchange area when established by means of an extension or addition to the Company's wire, cable, or service drop plant, whether aerially or sub-surface. Supporting structures, which accommodate the plant include trenches, conduit, and poles, whether solely owned, jointly owned, or contracted under a rental agreement.

All line extensions will be owned and maintained by the Company. The applicant may furnish and place the required supporting structure, for their entire service drop only, in lieu of applicable service drop charges. All supporting structures will be placed in accordance with construction specifications of the Company, however in all instances the ownership of the structures shall be entirely vested in the Company.

An applicant receives only a single line extension allowance regardless of the number of services ordered at the premises.

CONDITIONS

Measurement of Distances

Distances referenced in this schedule are route distances. The routing of the extensions will be determined by the Company in accordance with standard engineering practices.

Payment of Charges

Line Extension Charges will be paid in a lump sum or, when mutually agreeable, in equal monthly installments for a term of two years. The Company reserves the right to request advance payment, either in whole or in part prior to performing any work.

Disconnects

When a customer disconnects his service, no refund is made of the Line Extension Charges.

On disconnection of service, a customer making monthly Line Extension Charge payments is required to pay an amount equal to the total of the monthly Line Extension Charge payment for the unexpired life of the contract, except as provided under reuse of facilities.

Charges to remaining customers are not affected by disconnects.

Section 4

1st Revised Sheet 68
Cancels Original Sheet 68

LOCAL SERVICE

LINE EXTENSION CHARGES

CONDITIONS (Continued)

Reuse of Facilities

When a customer disconnects service or moves and service is established for a new applicant at the same location, the new applicant may assume the Line Extension Charge contract provided there is no lapse in payments, as follows:

If the original customer was on the monthly payment basis, the new applicant is charged the same monthly payment for the remaining life of the term commitment. The original customer is relieved of any further responsibility for Line Extension Charges on the project.

If the original customer prepaid the charged the new applicant pays no charge.

Any adjustment in prepaid Line Extension Charges is a matter for negotiation between the original customer and the new applicant.

Temporary or Speculative Service

Line extensions to provide service to an applicant engaged in temporary or speculative business will be made on the condition that the applicant pays to the Company, in advance, the estimated cost of construction and removal, less the salvage value, and the materials used.

If a customer maintains service, originally established on a temporary or speculative basis, for a period of 36 months, and if his business or operation at the end of that time has proven its permanency to the satisfaction of the Company, the customer will be refunded an amount equal to the charge above, less the normal Line Extension Charge which would have been applicable at the time the customer's service was installed.

Unusual or Special Construction

A departure from the rate and special conditions specified in this schedule may be made on behalf of the Company when a line extension involves unusual or disproportionately large construction expenditures as compared with the usual types of plant construction. Such departure may require a specific ruling by the Idaho Public Utilities Commission.

For subdivisions, housing projects, multifamily dwellings, and mobile home parks with five or more units, see Section 3, General Regulations - Aid to Construction.

Relocation of Company Facilities

When an applicant, customer, association or other third-party requests a change in the type, location or the relocation of aerial or underground of communications facilities used to provide telephone service, the requestor shall be required to pay the cost incurred by the Company for such change or relocation of facilities. Payment for the cost of the change or relocation must be made prior to the change or relocation.

Advice No. 5

Issued: 02/02/11
Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 02/14/11

LOCAL SERVICE

LINE EXTENSION CHARGES

RATES

The Company will provide line extensions up to \$3,000 regardless of the length of the extension. The customer shall pay 100% of all costs over \$3,000.

JOINT APPLICATION

The total charge for the project less the maximum free allowance of \$3,000 per customer will determine the total line extension recovery for the project, which will be shared by the applicants.

An applicant's share will be determined based on his individual portion of the common line.

Under no circumstances will the Company charge an applicant more under a joint application than he would have been charged as a single applicant.

Original Sheet 70

LOCAL SERVICE

CONSTRUCTION OF OUTSIDE PLANT FACILITIES

DESCRIPTION

Construction of outside plant facility charges and requirements apply in connection with the placement of service drops, new facilities in subdivisions, and for relocation of existing facilities.

RATES

Where the Company performs work in public right-of-way areas, the actual cost of both labor and materials used, less salvage, will apply.

CONDITIONS

General

The Company will furnish, install and maintain all cable/wire on the Company side of the demarcation point to serve its customers, except as otherwise provided in this tariff.

Construction, as cited in this tariff section, consists of all outside plant facility work and materials required to provide service, with the exception of cable/wire, which is furnished and placed by the Company.

Except where required by law, the type of construction (direct burial, underground conduit, or aerial) on both public right-of-way and private property is the prerogative of the Company and will only be changed at the applicant/customer's request as provided in this tariff section.

Where underground construction will not be within a utility strip or other designated right-of-way and where the Company requires adequate rights for the construction, operation, and maintenance of such construction, the applicant/customer, or tract owner, or developer in the case of real estate subdivisions, will provide the Company with easements, deed restrictions, or other appropriate covenants for these rights.

Refer to General Regulations, Section 3, General Liability Statement for Company liability statement.

Advice No. 1

Issued: 08/05/10

LOCAL SERVICE

CONSTRUCTION OF OUTSIDE PLANT FACILITIES

CONDITIONS (Continued)

Public Right-of-Way

Normal Construction

The Company will extend cable/wire to the property line of the applicant/customer at no charge except where Line Extension Charges apply. Refer to Line Extension Charges, Section 4, Sheets 67-70 for line extension charges.

Special Construction

If the applicant/customer requests a route or type of construction other than what the Company would ordinarily provide, the additional cost of construction will be borne by the applicant/customer or others requesting the special construction.

Relocation of Existing Outside Plant Facilities

When cable/wire is relocated or the type of construction is changed at the applicant/customer's, association or other third-party requests, the entire cost of removing the old and constructing the new will be borne by the applicant/customer or others requesting the relocation. Payment for the cost of the change or relocation must be made prior to the change or relocation. (C)

LOCAL SERVICE

CONSTRUCTION OF OUTSIDE PLANT FACILITIES

CONDITIONS (Continued)

Private Property

Normal Construction

Where the Company determines that buried wire or cable is to be used for the service connection, the applicant/customer will provide the trench to bury the network service wire.

Where the Company determines that underground conduit is to be used for the service connection, the applicant/customer will provide the conduit and will own and maintain at his/her expense the conduit and underground supporting structure. Such conduit and structure must comply with National Electric Safety Code (NESC) and Company standards. The conduit and underground supporting structure will be the property of the applicant/customer and the cable/wire will be property of the Company.

Where the Company determines that aerial wire is to be used for the service connection, the applicant/customer shall provide any poles or other supporting structures required to complete the connection. Such poles and supporting structures must comply with National Electric Safety Code (NESC) and Company standards. These poles and supporting structures will be property of the applicant/customer and the cable/wire will be the property of the Company.

The applicant/customer will be responsible for providing the Company with access to any poles, structures, trench and/or conduit necessary for installation of cable/wire and service. The poles, structures, trench and/or conduit must meet the Company's established standards, which permit termination of the buried cable/wire at the premise property line. This termination point is to be designated by the Company.

In cases where the Company is refused access to an open trench, or the Company is not notified of the availability of an open trench, it will be the responsibility of the applicant/customer to provide the necessary conduit and/or trench.

The actual cost incurred because of the sharing of an open trench on private property with another utility will be the responsibility of the applicant/customer or others requesting the work.

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.1 CALL REFERRAL SERVICE

A. GENERAL

Call Referral Service is offered to customers who have moved to a new location, disconnected telephone service or requested a telephone number change. Calls to the intercepted telephone number are referred to an operator or they are routed to a pre-recorded message that informs the caller of the status of that number. At the customer's request, the new number may be included in the basic recording, and if a customized option is selected, additional information can be included. This service is available where resources permit. No charges apply when Call Referral is provided due to a Company error.

B. SERVICE DESCRIPTION

1. Basic Call Referral

This level of service provides a pre-recorded announcement stating that the called number has been disconnected or changed. At the customer's request, the new number may be included in the recording. Basic Call Referral Service is provided free of charge for 30 days to both Residence and Business customers.

2. Extended Basic Call Referral

This optional level of service includes the features of Basic Call Referral as described above and provides customers the ability to extend the Basic Referral service beyond the initial 30-day period. The minimum period is an additional one month, to a maximum of 11 additional months.

3. Internet Call Messenger Service/New Number Call Routing

(T)

Internet Call Messenger Service/New Number Call Routing is a customized operator intercept service available to business or residence customers who have relocated or changed telephone numbers and require more than the standard referral of calls to a new number. The customer may design an intercept message up to 240 characters. Typical messages include status of the new line, name(s), new telephone number(s), new address(es), zip code(s), business hours, etc. (T)

In the case of multiple customers needing a referral from the same number, New Number Call Routing can be made. A customized recording is created giving out each party's name and associated new number as directed by the customers. (T)

Internet Call Messenger Service/New Number Call Routing are services are offered for a minimum of 1 month and a maximum of 12 months. (T)

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.1 CALL REFERRAL SERVICE (Cont'd)

C. CONDITIONS

The Company reserves the right to refuse any customer's requested message that it deems to be in violation of the General Regulations section of this Price List. Messages must also be in compliance with all administrative rules, state statutes, and public policy considerations.

Personalized recorded message services such as Extended Basic Referral, Internet Call Messenger Service/New Number Call Routing will not be provided to customers who have been disconnected for nonpayment. (T)
(T)

All applicable charges for Call Referral Services will be billed in advance as a one-time charge. Customers will be billed for the total requested Call Referral Service time period on their next billing statement.

Internet Call Messenger Service/New Number Call Routing may be requested when a disconnected number has been in use by more than one customer (e.g., partnership in a firm, members of the same household, etc.), and each party wishes to receive calls at their new number. The announcement will provide the names and forwarding telephone numbers of all parties listed in the message. (T)

Basic Call Referral and Extended Basic Call Referral are available for Custom Line Telephone Service customers. (T)

Call Referral Service in this Section is not applicable for Direct Inward Dialing (DID) customers. Extended Basic Referral service for DID customers is set forth in General Services, Section 6 of this Price List.

D. APPLICATION OF RATES

The rates and charges following are in addition to any other applicable rates and charges.

In addition to the monthly nonrecurring charge for Internet Call Messenger Service/New Number Call Routing, a Customized Recording Set-up Fee will apply. (T)
(T)

The Customized Recording Set-up Fee applies to all initial and subsequent orders Internet Call Messenger Service/New Number Call Routing. (T)

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.4 DIRECTORY ASSISTANCE

A. LOCAL DIRECTORY ASSISTANCE

1. GENERAL

The Company's Directory Assistance operator will provide a calling party with telephone numbers, information that a customer has a non-published number or that the requested party has no telephone listing.

The regulations and rates set forth below apply to calls from customers who request assistance in determining telephone numbers of customers who are located in the same Local Access and Transport Area (LATA) as the customer making the request.

Directory Assistance Call Completion (DACC) allows customers the option to have their local or intralata calls completed to a requested number by either Directory Assistance Operator or Directory Assistance Audio Response System that provides the requested directory number.

2. CONDITIONS

A maximum of two telephone numbers will be provided on each call to Local Directory Assistance. The customer should advise the operator at the beginning of the call if two listings will be requested.

The charges stated in RATES below do not apply to calls originating from:

An exchange access line, which the Company has determined is used on a continuing basis by a person incapable of using the Company directory.

When a customer has two or more Network Access lines and/or Trunks at the same premises and billed on the same account, the total usage of all lines and trunks is applied against the allowance for the total number of lines and trunks involved.

Business Category Search – If the exact name of a business is not known, directory assistance operators can search the database for a "type of business" using Business Category Search to find telephone numbers under business headings provided by the customer. A maximum of two headings can be searched per call and up to three listings can be provided per call via a random search. Charges apply even if the numbers are non-published or no numbers are found. With a "type of business" search, the caller is billed for each category searched.

Directory Assistance Call Completion (DACC)

The calling party will incur a \$.10 usage charge for all toll calls completed between the calling station and the station connected via DACC. No usage plan discounts will apply to calls connected via DACC.

IntraLATA calls completed through the use of DACC will be carried by the Telephone Company, notwithstanding the identity of the presubscribed IntraLATA carrier (ILC PIC) selected by the customer.

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.4 DIRECTORY ASSISTANCE (Cont'd)

B. DIRECTORY ASSISTANCE

1. GENERAL

Directory Assistance Call Completion provides an incoming Directory Assistance customer requesting an intraLATA number, a mechanized announcement offering call completion to the listed number requested. If the customer asks for two listings, the second number will be automatically connected unless the customer asks the operator to be connected to the first number.

(C)
(D)
(D)

The mechanized announcement will instruct the caller that for an additional charge he may have his call automatically completed by depressing a specific digit on the touch-tone key pay.

Customers may request blocking of Directory Assistance calls originating from their telephone lines by contacting the Local Company business office.

2. CONDITIONS

Directory Assistance will only be furnished where facilities and operating conditions permit.

This service is furnished solely for the telephone calling purposes of the caller.

Provisions concerning limitations of liability and allowance for interruption of service are as set forth in General Regulations, Section 3, of this Price List.

This offering provides call completion on a Local Access and Transport Area (LATA) basis for an additional flat rate charge.

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.4 DIRECTORY ASSISTANCE (Cont'd)

B. DIRECTORY ASSISTANCE (Cont'd)

2. CONDITIONS (Cont'd)

Person, collect, conference, third number or any other calls requiring operator handling, are not included. (C)

Directory Assistance is not subject to optional calling plan discounts. However, the usage associated with a call completed via Directory Assistance will be subject to any applicable discounts.

Directory Assistance will not be provided to the following services: 800/866/877/888 Service, 976 Service, 900 Service, Public Access Line (PAL) Service for Customer-Provided Equipment (CPE), or Feature Group A Service

3. RATES

Directory Assistance does not have a separate rate. This feature is included in Local Directory Assistance Service.

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.4 DIRECTORY ASSISTANCE (Cont'd)

C. NATIONAL DIRECTORY ASSISTANCE/CUSTOMER NAME AND ADDRESS SERVICE

1. GENERAL

National Directory Assistance provides customers with directory listings from the Company's directory assistance database. This database makes all Company listings available to any Company operator along with national listings from other directory assistance provider database(s). National Directory Assistance provides listings for residential, business, government, Company 1-800, and Company local emergency numbers. Customer Name and Address (CNA) Service is a reverse search feature which allows the caller to request a customer's name and/or address after giving the directory assistance operator a complete phone number.

2. CONDITIONS

Customers receive a maximum of two listings per call, i.e., two National Directory Assistance numbers, one National Directory Assistance number and one CNA listing or two CNA listings.

Customers who make operator assisted calls to Directory Assistance or to obtain Customer Name and Address Service will be charged the Directory Assistance rate plus the applicable operator surcharge as set forth in the Company's Price List.

The Company shall not be liable for any errors or omissions, whether arising through negligence or otherwise, in the information furnished; and the customer shall indemnify and save the Company harmless against all claims (including costs and attorney's fees) that may arise from the use of such information.

Customers will have access to any in- or out-of-franchise, number/ address listing within the continental United States, Alaska and Hawaii, with the exception of non-published listings. When a non-published number/address is requested, the message "Non-published number/address" or "NP" is displayed and no information will be available.

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.4 DIRECTORY ASSISTANCE (Cont'd)

C. NATIONAL DIRECTORY ASSISTANCE/CUSTOMER NAME AND ADDRESS SERVICE (Cont'd)

2. CONDITIONS (Cont'd)

Charges for National Directory Assistance /Customer Name and Address Service are not applicable to calls placed on an exchange access line which the Company has determined is used on a continuing basis by a person incapable of using the Company's directory. This condition is administered the same as it is for Directory Assistance.

National Directory Assistance /Customer Name and Address Service will be available where technology permits.

Local Directory Assistance placed to National Directory Assistance /Customer Name and Address Service will continue to be billed according to the local Directory Assistance charge and call allowance. Local Customer Name and Address Service calls placed to National Directory Assistance /Customer Name and Address Service will be billed according to the National Directory Assistance /Customer Name and Address Service tariff.

3. RATES AND CHARGES

	<u>Charge</u>
National Directory Assistance /Customer Name and Address Service

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.5 DIRECTORY SERVICE

A. GENERAL

(T)

The following applies to light faced listings in the white pages (alphabetical section of the directory).

(C)

1. Only information necessary to identify the customer is included in these listings.
2. The Telephone Company may use abbreviations in listings when, in its judgment the clearness of the listing or the identification of the subscriber is not impaired.
3. The Telephone Company may reject a residence listing, which is judged to be business or advertising. The Telephone Company may reject a listing, which it judges to be objectionable or fictitious and contrived.
4. Special arrangement of names designed to secure a preferential position in the alphabetical list or listings which otherwise are objectionable are not acceptable.
5. A name made up by adding a term such as Company, Shop Agency, Works etc to the name of a commodity or service will not be accepted as a listing unless the subscriber is legally doing business under that name.
6. Listing charges date from the day the time it is available in directory assistance and continue until the expiration date of the printed directory in which they appear.
7. Incoming calls to Non-Publish service will be completed by the Company only when the calling party places the call by number. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. In the absence of willful misconduct, no liability for damages arising from publishing the telephone number of a Non-Publish service customer in the directory or disclosing a Non-Publish number to any calling party shall attach to the Company and where such number is published or disclosed by a Company employee, the Company's liability shall be limited to and satisfied by a refund of any monthly charges which the Company may have made for such Non-Publish listing service.
8. The Company reserves the right to forward the name, address and telephone number of Non-Publish telephone number service customers to government agencies authorized by ordinance to establish E911 service and/or subscribing to or providing E911 service.
9. Non-Publish directory service telephone numbers associated with the line used by the calling party to place outgoing calls may be forwarded to subscribers of calling number ID.

B. COMPOSITION OF LISTINGS

1. Name

a. Business Service

(If questions arise regarding the right of a customer to list the name of a business or to use the trade name of another, the Company may require written authority from the owner of such name or trade name prior to the insertion or continuance of such listing.)

1. The name of a subscriber
2. The name of each business enterprise, which the subscriber conducts
3. The name of a corporation, which is the parent or subsidiary of the subscriber

b. Residence Service

1. The name of the subscriber
2. Another authorized residential name
3. Dual name listings for authorized by the subscriber i.e. Smith, Mary and John
4. Name of a church that includes "parsonage", "rectory", "parish house", "church study" or a descriptor that indicates it is part of a domicile

C. DESIGNATION

A designation can be used on a business service to assist the public in calling but not to advertise the business.

D. ADDRESS

Each customer may, but does not have to, include the house number and street name of the residence service is provided. A customer may provide an alternate address like a PO Box that is a valid mailing address.

(C)

(C)

OPERATOR ASSISTANCE AND DIRECTORY SERVICES

5.5 DIRECTORY SERVICE Cont'd)

E. TYPES OF LISTING

1. Primary Listing – One listing, termed the primary listing, is provided without charge for each customer service whether billed by the same monthly statement or by separate statements for service provided by an entity with directory listing agreement.
2. Additional Listing – A general term to denote any listing, regardless of the form, in addition to the primary listing. It may be a second listing of the primary number with different name or a listing for a telephone number for the same customer service. It may also be a cross reference listing which is a referral without a telephone number to another listing i.e JC Penney's see Penney's. A business class of service may have a residential additional listing in order to populate a record in the residential section of a directory.
3. Foreign Exchange Listing – A listing appearing in a directory other than the directory in which local exchange service is furnished or associated with a service provider that does not have a directory listing agreement in place.
4. Extra Lines of Information – descriptive text that does not have a telephone number.
5. Non-Listing - A listing that is available in directory assistance but not printed in the telephone directory.
6. Non-Publish – A telephone number that is not listed in either directory assistance or in the telephone directory.

GENERAL SERVICES

BILLED NUMBER SCREENING

DESCRIPTION

Billed Number Screening (BNS) is a feature that restricts billing of collect and third number billed calls to a specific telephone number.

CONDITIONS

Incoming collect and third number billed calls from most points in the United States and many foreign countries may be screened at a computerized customer data base. When the call originates from a carrier who participates in the screening, the originating operator denies the collect or third number billed call. The operator informs the calling party that a different billing method must be arranged. When the call originates from a carrier who does not participate in the screening, the call will go through to the called party and will be billed as requested, collect or third number. It is the carrier at the originating point of a call that determines whether BNS will be successful in restricting the call, not the carrier at the terminating end of the call (location of subscriber to BNS).

The customer remains responsible for the payment of any collect or third number billed calls that are charged when BNS is unsuccessful due to a nonparticipating carrier location originating the call.

(D)
(D)

Customers wanting to subscribe to both Billed Number Screening (BNS) and Call Restriction Service (CRS) 2 - Maximum Restriction, may subscribe to CRS 2/BNS-Combination Service and will receive a discounted combination rate. (See Call Restriction Service in this section.)

RATES	Per Line Monthly Rate ¹	Per Order Nonrecurring Charge ²
Single Line Service	\$ 2.00	\$ 5.00
Multiline Service	2.00	5.00

- 1 Customers with Billed Number Screening service established prior to May 14, 1996 will not be charged the monthly rate. Subsequent discontinuance and re-subscription to the service will incur the monthly charge.
- 2 For large business users receiving multiple bills per month, it may be more economical to pay the actual cost for the provision of BNS when the Nonrecurring Charges listed above exceed \$200.00. Special NRC Rates will be the total labor, programming time and expense, and materials. (Must allow 2-4 weeks for processing due to special handling.)

GENERAL SERVICES

CALL RESTRICTION SERVICE

DEFINITION

Call Restriction Service (CRS) provides the capability to block outgoing dialed calls to selected prefixes. The service is provided from Company central offices where facilities and operating conditions permit.

DESCRIPTION

The CRS package permits calls to the following non-chargeable numbers/prefixes: 911, 1+800/866/877/888, local calls and listed toll free numbers for the Company (Repair, Billing, etc.).

CRS 1 - Limited Restriction

Subscriber dialed calls to 1+900 and 0+900, and 1+976 numbers/prefixes are blocked in the Company's central office and diverted to a Company-provided intercept announcement.

CRS 2 - Maximum Restriction

In addition to blocking the same numbers as CRS 1, CRS 2 also blocks 0-, 0+, 011+ and 1+ dialing.

CRS 2/BNS - Combination

Customers wanting to subscribe to both CRS 2 - Maximum Restriction and Billed Number Screening (BNS) may subscribe to CRS 2/BNS-Combination Service and will receive a discounted combination rate. In addition to blocking the same numbers as CRS 2, CRS 2/BNS - Combination service blocks incoming collect, and/or third number billed calls. (See Billed Number Screening Service.)

CRS 4 - 976 Call Restriction

Blocks intrastate calls to 1+ 976-XXXX.

GENERAL SERVICES

CALL RESTRICTION SERVICE

CONDITIONS

Call Restriction Service is available on local exchange one-party residence and business network access lines where central office and operating conditions permit.

Call Restriction Service shall be removed upon written request from the customer.

Service Charges are waived in establishing Call Restriction Service in the following situations: (T)

Ordered and installed at the same time as the basic network access service.

Ordered and installed at the same time as another change on the network access line. Service Charges in Section 4 of this Price List will apply. (T)

Ordered within 90 days after the conversion to a new central office that makes Call Restriction Service available for the first time in a serving area.

Ordered within 90 days upon receipt of customer notification from the Company when approval of any new call restriction Price List is received.

Service Charges for the installation of CRS 1 or CRS 4 shall be waived upon the initial request for the service. If the customer subsequently removes the CRS 1 or CRS 4 service and then orders it reinstated on the same line, service charges will apply. (T)

Customer requests for Maximum Call Restriction (CRS 2 or CRS 2/BNS) will be denied in serving areas in which 9-1-1 is unavailable and emergency service is available only by dialing a seven or ten digit number or 0- to obtain an operator.

The Company shall not be liable to any person for damages of any nature arising out of, resulting from, or in connection with the provision of Call Restriction Service offered herein, including without limitation the inability of the station user to access the operator for any purpose and any of the other restricted codes specified in the dialing options listed previously.

GENERAL SERVICES

CONNECTION WITH MISCELLANEOUS COMMON CARRIERS

CONDITIONS

This service is provided to connect the radio telephone system of a Miscellaneous Common Carrier to the exchange and toll lines of the Company.

The connection equipment will be provided by the Company.

To be eligible to interconnect, the Miscellaneous Common Carrier must have obtained proper Federal Communications Commission authority to operate within the State of Idaho and shall have met the requirements of the Idaho Public Utilities Commission.

GENERAL SERVICES

DIAL UP SERVICE

(T)

DESCRIPTION

Dial Up Service is an enhancement to single line residential and single line business service to provide higher quality transmission standards than normally provided for voice transmission. It is designed for customers requesting a better grade of service for data transmission. Lines conditioned with this level of service may also be used for normal voice communications. This service is offered subject to the availability of suitable facilities.

(T)

CONDITIONS

The parameters of Dial Up Service are designed to support transmission of data up to 4800 bits per second on the local loop from the point of demarcation to the serving central office switch.

(T)

The quality of the line is guaranteed only between the customer point of demarcation and the serving central office switch. The Company shall inform potential customers of the service that the quality of data transmission is also dependent upon the quality of the customer equipment, the quality of the switching equipment and the remainder of the telephone circuit. No guarantee is made for a transmission level impaired at these points in the circuit.

Dial Up Service may not be compatible with other services offered in the Company's Price Lists.

(T)

Prior to implementation of Dial Up Service, the Company shall evaluate if the Network Access line meets conditioning parameters. If it is found that the network access line does meet the parameters, the customer is not required to order the service and no charge will be assessed for the line evaluation.

GENERAL SERVICES

DIRECT INWARD DIALING SERVICE

DESCRIPTION

Direct Inward Dialing (DID) Service is a central office service that provides in-dialing from the exchange and toll network directly to the station lines associated with customer premises equipment without intervention from an attendant.

CONDITIONS

DID Service will be provided from central offices where equipment and operating conditions and facilities permit.

Network Access Lines used in conjunction with DID Service may be provided on a measured-rate basis in exchanges where Local Calling Plans are available; otherwise, the service will be provided on a flat-rate basis.

DID Station Line Telephone Numbers

The assignment of telephone numbers and sequence of numbers assigned to this service are made at the discretion of the Company.

DID Service will be offered in a minimum block of 10 numbers where facilities and operating conditions permit. Additional numbers may be ordered on a per unit basis.

Customer-Provided Switching Systems must handle calls to all assigned numbers, including those that are not currently used with specific stations. Calls to numbers not currently used with specific stations must be routed by the customer to a recorded announcement referring the caller to another number.

The Service Charges in Section 4 shall apply when a routing selection is changed after the initial option has been selected and installed. (T)

DID Trunks

DID trunks are equipped for one-way inward service only and all trunks in a trunk group serving DID station lines must be equipped for DID service.

The customer must subscribe to a sufficient number of trunks to insure Service Standards as determined by the Company.

When trunks other than DID trunks are furnished to a customer with DID Service, those trunks must be in a separate trunk group from the DID service trunks.

If, at the discretion of the Company or at the request of the customer, it is necessary to provide DID service from a central office other than the office from which service would normally be provided, appropriate mileage charges apply per DID trunk.

GENERAL SERVICES

DIRECT INWARD DIALING SERVICE

CONDITIONS (Continued)

Customer-provided Premises Equipment

Regulations for customer-provided facilities and equipment are as stated in the Rules and Regulations of the Federal Communications Commission (FCC).

Directory Listings

Directory listings will be furnished in accordance with the rules and regulations as found in Section 5 of this Price List. DID station numbers may be listed at the appropriate rates for business additional listings. Customers are responsible for timely notification of changes, additions and deletions of numbers to meet the schedule requirements of the Company's directory.

Obligations of the Company

It is the responsibility of the Company to maintain the integrity of the network that serves the general public. In the provision of DID Service it is the responsibility of the customer to maintain sufficient DID trunks, and to intercept calls to DID station lines, to assure that degradation of network services does not occur. Failure to do so, will result in one or more of the following actions by the Company (based on the severity of the problem):

The customer will be contacted in person or by telephone at the first awareness of a negative impact on the network and will be advised of the type of harm being created and the action required to alleviate the problem. A written notice may be sent upon completion of this contact to verify customer responsibilities for the service and actions that may be taken due to failure to comply.

The customer will be required to correct the service problem within 10 days upon notification.

Failure to correct the problem within the specified time period will result in the customer being charged the actual costs incurred by the Company in investigating and resolving trouble reports that are directly due to the negligence of the customer.

NOTE: If the negligence of the customer causes harm to the network service of other customers, the Company reserves the right to take necessary action, including the disconnection of the service, until the problem is alleviated. Provisions for disconnection are as stated in the Idaho Public Utilities Commission Rules and Regulations, Termination of Service Rules For All Telephone Companies, and in Section 3 of this Price List.

GENERAL SERVICES

DIRECT INWARD DIALING SERVICE

CONDITIONS (Continued)

Special Conditions - DID Served from Electromechanical Central Offices

The Conditions/Regulations listed previously also apply to customers of DID Service provided from electromechanical central offices with the following exceptions:

- DID station line numbers provided from electromechanical central offices are sequentially numbered.
- Customer-Provided Switching Systems must handle calls to all assigned numbers, including those that are not currently used with specific stations. Calls to numbers not currently used with specific stations must be routed by the customer to a recorded announcement referring the caller to another number.

RATES

	<u>Monthly Rate</u>	<u>Installation Charge</u>
For Service provided from Electromechanical Central Offices:		
First 100 DID station line numbers	\$180.00	\$ 390.00
Each additional 100 DID station line numbers	180.00	195.00
For service provided from Electronic/Digital Central Offices:

Each additional station line number per station line	1.80	3.90
Access line	See Network Access Rates and Service Charges in Section 4	

(T)

GENERAL SERVICES

DIRECT INWARD-OUTWARD DIALING SERVICE

GENERAL

Direct Inward-Outward Dialing Service (DIOD) is a Central Office based service that permits incoming calls to reach customer provided equipment, without the assistance of an attendant, and allows the trunk to be used to place outgoing calls. This service is provisioned with E&M signaling and a 4-wire connection at the customer's premises. Rotary hunt does not apply.

CONDITIONS

The assignment of telephone numbers and the sequence of numbers assigned to a customer are made at the discretion of the Company. Telephone number rules, regulations and charges found in the DID section of this Price List apply to DIOD service.

Customer-Provided Switching Systems must handle calls to all assigned numbers, including those that are not currently used with specific stations. Calls to numbers not currently used with specific stations must be routed by the customer to a recorded announcement referring the caller to another number.

Trunks arranged for DIOD service may not be combined with trunk groups arranged to provide Direct Inward Dialing (DID) service. Overflow of calls between the two arrangements is not permitted.

DIOD service works in conjunction with Direct Inward Dialing (DID) service. DIOD rates are in addition to applicable rates and charges for DID Service as specified in this section.

DIOD service is provided from Central Offices equipped to provide this service and subject to the availability of facilities.

Foreign Central Office

If DIOD is not available from a customer's normal serving central office, the Company may choose to provide service from the nearest DIOD-capable office. If DIOD is available from a customer's normal serving central office, the customer must accept service from that office and DIOD Foreign Central Office/Foreign Exchange is not available to the customer.

At the Company's discretion, DIOD may be provided to a non-capable central office. In this instance, if the customer is served from a central office/exchange which has the same local calling scope as his normal serving central office/exchange, Foreign Central Office/Foreign Exchange charges as specified elsewhere in this Price List will not apply.

Should the customer be served from a different local calling scope from the customer's normal serving central office/exchange, the applicable Foreign Central Office/Foreign Exchange charges as specified in Section 6 of this Price List will apply.

Termination Liability

In the event DIOD is terminated by the customer prior to completion of the current term commitment period, Termination Liability charges, as outlined in General Regulations, Section 3, will apply.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.

¹ Charges and rates do not include charges and rates for other services and facilities including charges and rates applicable to trunk line service as shown under Network Access Service, Section 4, and DID Service, Section 6. When this service is provided from a foreign exchange, rates and charges for Foreign Exchange Service, Section 6 in this Price List may apply.

GENERAL SERVICES

EMERGENCY ALERTING SYSTEM

CONDITIONS

The service offered in the above Rates is designed for any emergency reporting system. A person calling the listed reporting number activates a conference circuit which rings conference telephones, enabling the caller to report the emergency to answering personnel on the system. The conference circuit can also be activated manually via a dispatcher.

Basic Systems are required in each central office serving Network Access lines in a system.

Remote Answering Terminals permit personnel away from home, upon hearing the siren, to call a designated telephone number that will connect them to the system. This optional feature requires a nonpublished One-party Business Network Access line. It will handle up to three simultaneous calls. The Network Access rates for this line will apply.

The Amplifier feature is an option, available to maintain a satisfactory level of transmission.

The Manual Origination Feature permits activation of the system from one or two dedicated telephones or key terminations. In addition, for this optional feature, charges for One-party Business Network Access service apply for each telephone or key termination dedicated to this service.

The Automatic Origination Feature permits activation of the system by dialing a directory number. This optional feature requires one One-party Business Network Access line.

A non-emergency call in progress on a regular telephone may Optionally be automatically overridden or a tone may be provided, signaling the emergency personnel to terminate the conversation and take the emergency call.

When the System is in use, subsequent callers receive a busy signal preventing Simultaneous activation.

GENERAL SERVICES

EMERGENCY ALERTING SYSTEM

RATES	<u>Monthly Rate</u>	<u>Installation Charge</u>

GENERAL SERVICES

FOREIGN EXCHANGE SERVICE

CONDITIONS

Foreign Exchange Service is Network Access Service furnished from an exchange other than the one which service would normally be furnished. The local exchange is the exchange in which the customer is located. The foreign exchange is an exchange other than the one in which the customer is located.

Foreign Exchange Service is not available in all exchanges, but will be provided where it is feasible to place facilities as necessary to provide such service. The rates and conditions contained herein will apply wherever this service is provided.

For Foreign Exchange Service the customer is required to select one of the Local Calling Plans available in the exchange where their Foreign Exchange dial tone is located.

The rates applicable for toll service will be those of the foreign exchange.

Interexchange Channel Terminal is the termination of an Interexchange Channel at a rate center. The Service Function rate applies at the Company local exchange only.

Rates for supplementary services such as extensions, key equipment, directory service, and similar services will be those applicable under the Price List of the local exchange. Directory service in the directory of the foreign exchange will be at the rates of the foreign exchange.

Business Foreign Exchange Service will be furnished for the exclusive use of the customer and his employees to be used solely in the customer's business. Residence Foreign Exchange Service will be furnished for the use of the customer and the members of his immediate family only.

Joint User Service will not be established in connection with Foreign Exchange Service.

Section 6

Original Sheet 20

GENERAL SERVICES

FOREIGN EXCHANGE SERVICE

CONDITIONS (Continued)

Foreign Exchange Service will not be provided for public or semi-public use or in connection with Private Branch Exchange Systems in hotels, apartment houses, motels, or clubs.

Foreign Exchange Paystation Service will not be furnished.

Extension telephones and Private Branch Exchange stations may be installed outside the building in which the primary station is located if the station is located on the premises of the customer and is provided for the use of the customer only. Terminal Loop rates and, where applicable, mileage will apply as covered in the schedule on Mileage Charges found in Section 4 of this Price List.

Applicable nonrecurring Service Charges of both the serving company and local exchange company will apply to the establishment of Foreign Exchange Service or off-premises Foreign Exchange extension telephones. (T)

For extensions of plant within the local exchange, the wire only charge will apply should the applicant choose to furnish and set the poles required in accordance with the construction standards of the Company. The ownership of the poles shall be vested in the Company.

Exemption from Foreign Exchange Charges:

If a customer moves from one Company exchange to another adjoining Company exchange and the following conditions apply, the customer may choose to keep existing number(s) without incurring the foreign exchange charge ¹:

The new and old customer serving locations are provisioned from common facilities serving both exchanges;

the common facilities are located near the adjoining exchange boundaries; and

the central office serving the old customer location also serves the shared common facilities within the old exchange area up to the adjoining boundaries. ²

¹ Where facilities are available.

² This arrangement is limited to the life of the service and is not transferable by supersedure.

GENERAL SERVICES

MISCELLANEOUS EQUIPMENT AND SERVICE

CONDITIONS

Line Hunt Service

Line Hunt is used by a customer with more than one line in order to route an incoming call to an available (non-busy) line. If a line is busy, this service will hunt for an idle line in order to complete the call. Line Hunt must be on each line arranged in a hunt group.

Line Hunting is available to customers on any local service option -- Basic, Community, Community Plus or Premium Calling Service. Mixing of these local service options within a service arrangement such as Business Line, Line Hunt, PBX Trunk or Customized Multi-line Telephone Service is not permitted. Line Hunting is not available between measured rated and flat rated lines. (T)

Stop Hunt Service

This service is available with rotary hunting Trunks and Network Access lines from serving central offices that are equipped to provide the service.

Stop Hunt is activated by the customer's switching key that, in turn, activates the Stop Hunt feature in the Company's central office at a prearranged line to give the busy indication. A lamp on the customer's premises lights up to indicate that the Stop Hunt feature is activated.

The Lamp and Key at the customer's premises shall be customer-provided.

Should a Control Channel be required to operate with a switching key to activate the Stop Hunt feature, the channel will be provided in accordance with the appropriate Private Line Service Price List. Channels, which are in service on or before August 12, 1988 will continue to be provided at no additional charge.

The above rate contemplates controlling Trunks of the Central Office area in which the customer is located.

GENERAL SERVICES

PERSONAL SIGNALING SERVICE

CONDITIONS

If the customer provides his own receiver and associated equipment only the monthly rate for Signaling Service will apply.

Personal Signaling Service is the one-way transmission of a signal to activate a pocket receiver. It is subject to the availability of special facilities and equipment.

Personal Signaling Service is available to pocket receivers when within range of land radio-telephone base stations through which such service is furnished. It is subject to transmission, atmosphere, terrain, and similar limitations.

RATES

	Monthly <u>Rate</u>
Personal Signaling Service	One-party Business Network Access Rate, Section 4

GENERAL SERVICES

TAX ADJUSTMENT

LOCAL TAXES

The exchange and interexchange telephone rate schedules do not include municipal occupation, business, excise, or use of street taxes.

The Company will add such taxes, where imposed, to its charges for service provided customers within the jurisdiction of the municipality imposing the tax.

GENERAL SERVICES

TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

DESCRIPTION

The Telecommunications Service Priority (TSP) System is a service that provides for the priority provisioning and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services. The TSP System applies only to NSEP services, includes both exchange and private line services and provides the Company with a guide to the sequence in which services are to be provisioned and/or restored.

The Company currently has circuits classified as RP (Restoration Priority). These facilities were offered under part 64.401, Subpart D, Appendix A of the FCC Rules and Regulations prior to the revisions released November 17, 1988 under GEN. Docket No. 87-505 (FCC 88-341). These facilities will maintain their RP designation and priority treatment until either converted by the customer to the TSP System, or March 10, 1993, whichever occurs first.

All facilities that can be identified by a unique circuit identifier can be provisioned for NSEP service by the Company.

CONDITIONS

Obtaining Telecommunication Service Priority (TSP) Service

The Executive Office of the President, through the TSP Program Office, is empowered with the authority to receive, evaluate and process requests for NSEP services. The TSP Program Office makes the priority level assignments and issues the TSP authorization code reflecting the priority assignment associated with a request. The customer provides the TSP authorization code, in addition to all the other details necessary to complete the order, to the Company to obtain TSP System Service.

The TSP authorization code, assigned on a per order basis, consists of a 12-character field, a nine-character control ID followed by a dash and a two-character field specifying the priority level assignment. Its structure is as follows:

TSPxxxxxn - yy

The "x"s represent a sequence number unique to each TSP authorization code and the "n" is a one character alphanumeric check digit. The first "y" contains the provisioning priority level assignment and the second "y" contains the restoration priority level assignment.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 08/16/10

Section 6

1st Revised Sheet 29
Canceling
Original Sheet 29

GENERAL SERVICES

TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

CONDITIONS (Continued)

Provisioning Priority

If the customer requires service within a shorter time interval than the Company can provide, and the requested service qualifies for NSEP, the customer may elect to invoke NSEP treatment and obtain the appropriate provisioning priority assignment from the TSP Program Office. Acceptable assignment code values are: E, 1, 2, 3, 4, and 5 or 0.

The assignment of the value "E" denotes Emergency Provisioning and implies the service has the most critical provisioning requirements and the Company will respond accordingly. The Company will take immediate action to provide the requested service at the earliest possible date. Rates and charges associated with "E" provisioning are specified on Sheet 360, Special Construction.

The assignment values of 1, 2, 3, 4, and 5 are treated as essential service priorities and the Company will adjust its available resources to meet the customer's requested due date. Rates and charges associated with invoking this priority treatment are specified under Service Charges in Section 4, at the applicable Time and Material Changes. The value "O" implies no provisioning priority. (T)

Restoration Priority

A TSP authorization code for restoration priority classifies the service as being among the nation's most important NSEP telecommunications services. The Company will restore these services before service without restoration priority assignments in the order of priority assignments. Acceptable values are: 1, 2, 3, 4, 5, or 0 with the value "1" being the highest priority.

When the Company recognizes a TSP as being out of service, unusable or receives a trouble report, available resources will be dispatched to restore the service as quickly as practicable. A priority value of 1, 2, or 3 requires outside normal business hours if necessary to restore the service. A priority value of 4 or 5 only requires dispatch outside of normal business hours if the next business day is more than 24 hours away. If the value "0" has been assigned, then no restoration priority is applicable to this service.

The minimum period for service is one month.

Advice No. 65

Issued: 09/21/16
Issued by Frontier Communications Northwest Inc.
By Steve Crosby, Senior Vice President of Regulatory Affairs

Effective: 10/03/16

GENERAL SERVICES

TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

CONDITIONS (Continued)

Obligations of the Customer

In all instances, the customer is responsible for obtaining the appropriate TSP authorization code and providing that code to the Company.

The TSP System service customer must also be the customer for the local service with which TSP service is associated. Only the customer or its authorized agent as indicated in a letter of agency on file with the Company is allowed to order TSP System service.

All points of a multipoint service configuration must have the same restoration priority assignment and must satisfy the requirements of that assignment.

In obtaining TSP System service, the customer consents to the release of certain information by the Company to the federal government in order to maintain and administer the TSP System. Such information includes: the customer's name, telephone number and mailing address, the TSP authorization code and the circuit or service ID number associated with the NSEP service.

The Company will attempt to notify the customer of expected charges. The customer, when invoking NSEP treatment, recognizes that quoting charges and obtaining permission beforehand may not be practicable and may cause unnecessary delays and, as a result, grants the Company the right to quote and bill charges after provisioning of the service.

During certain emergencies, the customer may request TSP assignments verbally and the Company will accept such verbal notification. The customer must submit a written order to the Company within two working days following the verbal request. If written order is not received within two working days, all applicable rates and charges accumulated to date to provision TSP System service become immediately due and payable and the requested TSP priority is revoked.

The customer must request and justify revalidation of all priority level assignments at least every three years.

Additionally, the NCS Manual 3-1-1, "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual", dated July 9, 1990, prescribes specific conditions, which warrant NSEP Treatment and related procedures.

GENERAL SERVICES

TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

CONDITIONS (Continued)

Obligations of the Company

The Company will allocate resources to ensure best efforts to provide NSEP services by the time required.

The Company will work TSP service in the order of their priority level assignments. The priority sequence is as follows:

- Restore NSEP services assigned restoration priority 1
- Provision Emergency (E) NSEP services
- Restore NSEP services assigned restoration priority 2, 3, 4 or 5
- Provision NSEP services assigned provisioning priority 1, 2, 3, 4 or 5.

The Company will work cooperatively with other providers of NSEP service when only a portion is provided by the Company to ensure 'end-to-end' service.

Additionally, TSP System Service will be provided in accordance with the guidelines set forth in NCS Handbook 3-1-2, "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook" dated July 9, 1990.

GENERAL SERVICES

TELECOMMUNICATIONS SERVICE PRIORITY SYSTEM

APPLICATION OF RATES

The following rates and charges are in addition to all other rates and charges that may apply for other services offered under this Price List, which operate in conjunction with the TSP System.

Establishment of TSP System Service

The nonrecurring charge (NRC) specified applies when facilities are ordered with provisioning and/or restoration priority. If both are ordered at the same time, only one NRC is applicable. The NRC is also applicable for orders changing priority levels.

Provisioning Priority

There are two basic levels of provisioning priority, Emergency (provisioning priority "E") and Essential (provisioning priority 1, 2, 3, 4, or 5).

Emergency provisioning.

The Company will take immediate action to provide the requested service at the earliest possible date. The rates and charges will apply as set forth in Section 4.

(T)

Essential provisioning.

The Company will adjust its available resources to meet the customer's requested due date. The Company will keep track of the additional labor hours used to meet the request of the customer and bill the customer at the applicable Time and Material Charges as set forth in Section 4 under Service Charges.

(T)

Restoration Priority

Restoration Priority is a monthly rate per circuit for the ongoing administration and maintenance of the TSP System. This monthly rate only applies when a restoration priority code (1,2,3,4 or 5) is specified in position 12 of the authorization code.

CONDITIONS

Telephone Answering Service will be furnished for incoming calls. Service under this schedule does not contemplate (1) communication service through the connection of two client lines which terminate on the answering switchboard or (2) outgoing calls over Secretarial lines or answering lines of the clients of the Telephone Answering Service, customer (hereafter referred to as client). Outgoing calls will be permitted only over the Network Access lines in the name of the customer to the Telephone Answering Service (hereafter referred to as customer).

Answering Line Service is a service employing a Network Access line terminating on telephone answering equipment and is designed to enable the customer to answer incoming calls of the client. Extensions will not be furnished on answering lines except to other positions in the telephone answering switchboard system.

Secretarial Line Service is a service employing an extension of a client's Network Access line or PBX station line service or multiples of Class A trunks terminating on telephone answering equipment.

The Customer's Network Access line is equipped for two-way service and is furnished only in the name of the customer. The line may terminate on a jack, key, or telephone.

An application for connection of a client's line to telephone answering equipment will be accepted from the client or from his telephone answering service. The Company will verify with the client when service is to be discontinued at one Telephone Answering Service and connected at another Telephone Answering Service.

Charges for Answering Lines, Secretarial Lines, Mileage, Terminal Loops, and Automatic Exclusion units will be billed to the clients. The other charges will be billed to the customer.

If for any reason service to the customer is discontinued, all service associated with the telephone answering equipment will also be discontinued. If for any reason the exchange service to the client is discontinued, the line to the answering equipment will be discontinued.

Network Access lines of the customer may be extended to additional telephone answering positions on the same premises. Network Access lines or extensions of Network Access lines shall be limited to one termination per answering position.

A mileage rate applies between central offices in multi-office exchanges. Interexchange mileage applies between rate centers of exchanges.

The Company is not responsible for the quality of transmission or supervision which may result from the connection of a client's line to a customer's network access line made in an emergency.

VACATION SERVICE ¹

CONDITIONS

Vacation Service is provided in all exchanges and applies to customers of:

- Business One-Party
- Non-Measured Residential class of service
- Community Calling Service
- Community Plus Calling
- Premium Calling Service
- Certain Digital Phone Packages identified in Section 7 of this Price List

Vacation Service is not available for Lifeline customers.

Vacation Service will not be made available for periods of less than one (1) month, and the maximum period is nine (9) months. The customer's number must be working for at least 90 days in a calendar year.

During the period of Vacation Service, no installations, moves, changes or maintenance will be provided. Changes to billing address are allowed.

No outward or inward service is provided during the period of Vacation Service.

APPLICATION OF RATES

The customer may request a restoration date in advance of the maximum allowable vacation period. Otherwise, complete service and billing will be restored on the last day of the maximum allowable vacation period of 9 months.

Monthly bills for line service are rendered at the vacation service rate during the vacation service period and are to be paid in accordance with regular collection practices.

During the period the customer is furnished vacation service, vertical services or miscellaneous services associated directly with the line service will not be charged.

Any Miscellaneous Services not directly associated with the line service such as Directory Listing or Operator Services would continue at the standard Price List rates.

No service order charges apply to restore service at the completion of the vacation service period.

RATES	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>

GENERAL SERVICES

BUSINESS TRAFFIC STUDY SERVICE

GENERAL

Business Traffic Study Service provides performance reports of call capacity for originating and terminating traffic on access lines or hunt groups. The traffic study report enables business customers to determine how many calls terminate successfully as opposed to the number of calls that reach a station-busy condition.

DESCRIPTION OF SERVICE

Traffic studies are performed, at the customer's request, on Company access lines or hunt groups with local exchange numbers.

For customers with access lines or hunt groups at more than one location, a separate Service Establishment Charge would apply for traffic studies at each location.

Traffic study reports may be requested for more than one access line or hunt group at a single customer location. A separate traffic study report is required for each access line or hunt group. Following is a list of possible access lines or hunt groups that would constitute one traffic study report:

Individual Access Line	Features Plan - Business	(T)
Multiline Hunt Group	Flexible Telephone system group	(T)
PBX trunk group	Remote Call Forwarding	
DID trunk group	Customized Multi-line Telephone Service single line station	(T)
DOD trunk group	Customized Multi-line Telephone Service single line station multiline hunt group	(T)
ISDN BRI	Customized Multi-line Telephone Service single line station Attendant	(T)
ISDN PRI trunk group	Customized Multi-line Telephone Service single line station features – RCF/ACD	(T)
Central Office Located Trunk/ business group or other trunk group		

Traffic study reports can be requested on a weekly, bi-weekly or monthly basis. The monthly rate is determined by the number of traffic study reports provided within a 4-week billing cycle.

Along with the reports, the Company provides a recommendation of required lines to accommodate the studied call traffic based on industry standards for call traffic handling. Calculations for the recommendation are derived from traffic engineering tables. The recommendation is a close estimate and cannot be guaranteed.

GENERAL SERVICES

BUSINESS TRAFFIC STUDY SERVICE

CONDITIONS

Business Traffic Study Service is available to business customers only.

Calls must be carried by the Company, and billed by or on behalf of the Company to the customer requesting the study.

Studies cannot be performed on toll-free or pay-per-call type telephone numbers.

A one-week traffic study may be performed per customer location, per access line or hunt group, per calendar year, at no Service Establishment Charge and no monthly charge. Any additional traffic studies requested during the calendar year will be billed at the Rates and Charges on the following page.

Traffic study report features may vary by Central Office switching system type.

When applicable, traffic study reports on Customized Multi-line Telephone Service should include reports on both the Central Office Located Trunk and on the hunt group, in order to make sure that blockage is not occurring at either area. (T)

APPLICATION OF RATES AND CHARGES

For the setup of each additional Traffic Study, per customer location, per calendar year, the Service Establishment Charge applies in addition to the Monthly Rate.

A Miscellaneous Change Charge, Section 4, will apply in addition to the Service Establishment Charge for initial setup for additional traffic study, and for any subsequent additions or changes to Traffic Study Reports in a calendar year.

CALLING SERVICES

7.1 DEFINITION

Calling Services is a family of enhanced network services available to residence and business customers. These calling services provide customer-controlled or prearranged communications services on individual access lines.

Section 7

1st Revised Sheet 2
Canceling
Original Sheet 2

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

A. CONDITIONS

1. INDIVIDUAL SERVICES

These services are available where Network Access Service is provided by an electronic central office. The number of features available depends upon the central office providing this service.

These services are offered on a subscription or pay-per-use basis to customers subscribing to residence or business individual-line service.

Service Charges are not applicable if Calling Services are ordered at the same time as the basic network access service or within a 60-day period after establishing service. (T)

Service Charges will not apply to new services ordered within 90 days of the conversion of a central office to electronic switching equipment with the capability of offering these services. (T)

Service Charges may be waived at the Company's discretion during sales promotions of these services. (T)

Customer provided equipment may be required for some of the described services. The Company assumes no responsibility for the customer provided equipment or its compatibility to the Company's network.

Section 7

1st Revised Sheet 3
Canceling
Original Sheet 3

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

A. CONDITIONS (CONTINUED)

2. CALL FORWARD AND REMOTE CALL FORWARD (RCF) (T)

Call Forward Services are provided where facilities permit. (T)

Outgoing calls can be made from a line arranged with Call Forward while forwarding incoming calls to another number. (T)

Message or measured charges may be incurred in addition to the Call Forward Charge as follows: (T)

- The calling party will be responsible for message toll or measured charges between the rate center of the originating telephone number and the rate center of the called number.
- The called party will be responsible for message toll or measured charges between the rate center of the called number and the rate center for the call forwarding location.
- The message or measured charges billed to the customer will be those specified in the applicable Price Lists for the type of call involved.

Remote Call Forward (RCF) is provided where required special equipment and facilities are available. (T)

Message toll or measured charges apply in addition to the RCF charge. If the RCF number terminates in the local exchange or EAS area, then local measured rates, Section 4 in this Price List, will apply. If the RCF number terminates to a telephone number outside of the local or EAS area, then the appropriate message toll rates apply.

Listings in the directory serving the exchange in which the RCF is located will be furnished by the same regulations governing the providing of business and residence listings found in Directory Services, Section 5 of this Price List.

Section 7

3rd Revised Sheet 4
Canceling
2nd Revised Sheet 4

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

A. CONDITIONS (CONTINUED)

2. CALL FORWARD AND REMOTE CALL FORWARDING (RCF) (CONTINUED)

The RCF number may not terminate on:

- a line equipped with any other form of call forwarding or RCF feature.
- DID station numbers terminating on a private branch exchange system, Centrex, or Customized Multi-line Telephone Service
- Public Access Line (PAL)
- A number to be used in conjunction with data transmission

(T)

The use of RCF for toll by-pass is not allowed.

Each RCF service allows for forwarding one call at a given time. Additional RCF service is necessary for each individual call to be forwarded simultaneously.

The use of RCF to forward calls to international locations is not allowed.

RCF service may not be furnished for use in the resale of telephone service.

The telephone number to which the RCF calls are forwarded will determine whether the business or residence local service rates will be charged.

The Company cannot provide customers who subscribe to RCF with the telephone number of the originating call.

The Company cannot guarantee transmission of the forwarded calls because of the distance and routing necessary to complete the connection.

1st Revised Sheet 5

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

A. CONDITIONS (CONTINUED)

2. CALL FORWARD AND REMOTE CALL FORWARD (RCF) [CONTINUED]

The applicable Service Charges, Section 4 in this Price List, will apply for the installation of RCF or number changes for RCF services. (T)

The customer must order sufficient RCF features and facilities to adequately handle calls to the RCF customer without interfering with or impairing any services offered by the Company. The initial RCF path and additional paths are available on a measured usage rate basis. If, in the Company's opinion, additional Remote Call Forward features are required at the call forwarding location or if facilities are needed at the terminating station, the subscriber will be required to subscribe to additional paths. Should the customer refuse to subscribe to additional paths, the customer's RCF service will be subject to termination.

Section 7

2nd Revised Sheet 6
Canceling
1st Revised Sheet 6

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

A. CONDITIONS (CONTINUED)

3. CUSTOM LOCAL AREA SIGNALING SERVICE (CLASS)

Custom Local Area Signaling Service (CLASS) is a group of Calling Services offered to individual line residential and business customers.

Custom Local Area Signaling Service features are applicable to calls placed to/from compatible central offices or within a compatible central office offering the service. These services are offered based on information stored within the switch or provided to the switch through call setup signaling and are subject to limitations associated with the availability, and content of that information. Note: The family of services to which *69 belong is typically referred to as "CLASS" services, but the name may vary between states, e.g., Phone Smart Service, Calling Services.

Operator assisted calls will override these services for emergency purposes.

Service Charges are not applicable when Custom Local Area Signaling Service is provided at the same time as the business or residence individual line service is established. (T)

When services are added or rearranged on an existing line, the service charge will apply unless conditions stating otherwise appear elsewhere in this Price List. (T)

All customer lines in Caller ID Number Only serving areas will automatically be provisioned with Selective Blocking - per call service which cancels the delivery of the caller's identity on a per call basis, unless the customer subscribes to Complete Blocking - per line service.

The service charge will not apply to an initial order for Complete Blocking - per line. Subsequent changes to this service will incur the applicable service charge. (T)
(T)

Customer provided equipment may be required for some of the described services. The Company assumes no responsibility for the customer provided equipment or its compatibility to the Company's network.

4. SATISFACTION GUARANTEE

If at anytime a customer notifies the Company of dissatisfaction with the Individual Custom Calling or CLASS service, the customer will be entitled to a full refund of one (1) month's Monthly Recurring Charge (MRC). If the subscription period is less than 30 days, the amount of the refund will be prorated for the appropriate portion of the Monthly Recurring Charge. This refund will be applied as a credit on the customer's bill. Each customer will be entitled to the credit one time per service. The Company will disconnect the feature(s) that did not satisfy the customer.

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

B. FEATURE DESCRIPTIONS

1. INDIVIDUAL SERVICES

Call Waiting/Cancel Call Waiting - Call Waiting is an arrangement whereby a customer who is using an exchange line arranged for call waiting is alerted, by means of a tone signal, when another caller is trying to reach that line. The customer, by flashing the switchhook, is able to have alternative conversation between parties.

Cancel Call Waiting allows a Call Waiting subscriber to disable the Call Waiting feature of their telephone for the duration of a telephone call. The subscriber dials a code prior to placing a call to temporarily disable the Call Waiting feature.

Distinctive Ring - Provides two or more different phone numbers and rings for a single telephone line. Used to distinguish incoming calls. The designated primary number will receive a normal ringing pattern, other numbers will receive distinctive ringing patterns.

Speed Call 8 ⁽¹⁾ - This provides for the calling of a 7 or 10 digit telephone number by dialing an abbreviated code. This arrangement is available in an eight-number capacity.

Speed Call 30 - This provides for the calling of a 7 or 10 digit telephone number by dialing an abbreviated code. This arrangement is available in a thirty number capacity.

3 Way Calling - Permits the customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The customer initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.

The pay per use charge is activated irrespective of whether the call is completed or not. Pay per use customers will be charged upon dialing the activation code without any specific prior request for the feature.

(T)

(T)

⁽¹⁾ This service offering is limited to all existing subscribers at their existing locations as of July 20, 2014.

Canceling
1st Revised Sheet 8

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

B. FEATURE DESCRIPTIONS (CONTINUED)

2. CALL FORWARD AND REMOTE CALL FORWARD (RCF)

Basic Call Forward - This feature provides an arrangement for transferring incoming calls to another telephone number within the local area by dialing a code and the number of the service to which calls are being transferred. Enables the customer to forward incoming calls to another telephone number by dialing *72 and the number to which calls are being forwarded to.

Call Forward Busy - This feature provides for calls terminating to a subscriber's busy directory number to be forwarded to another telephone number on a premise other than the provisioned premises.

Call Forward No Answer - This feature provides for calls terminating to a subscriber's idle directory number to be forwarded, after a customer pre-selected interval, to another telephone number.

Call Forward Busy/No Answer - A permanently activated service which automatically redirects calls placed to a customer's telephone number to another predetermined telephone number if the caller encounters either a no-answer condition after a specified number of rings or a normal busy-line condition.

Remote Call Forward (RCF) - A central office provisioned call forwarding service requiring the assignment of a RCF telephone number from which calls to it are forwarded to the subscriber's designated service.

B. FEATURE DESCRIPTIONS (CONTINUED)

3. CUSTOM LOCAL AREA SIGNALING SERVICE (CLASS)

Anonymous Call Block/Rejection - Customers who do not wish to receive calls from callers that withhold their telephone number and name or other identifying information through per line or per call blocking can reject anonymous calls. Upon dialing a specific code, Caller ID with Name subscriber can automatically reject calls from customers who have chosen to block the passage of their telephone numbers and names on outgoing calls. The caller will receive an announcement that the customer is not accepting calls from callers who are blocking their telephone numbers and names. This feature can be activated by dialing "*77" ("1177" on rotary phones) and can be deactivated by dialing "*87" ("1187" on rotary phones). ACR is included with Caller ID with Name. A call can be completed to a Caller ID with Name subscriber who has activated ACR by (1) placing the call through an operator, (2) placing the call with a telephone credit card, or (3) placing the call after unblocking the telephone number and name

*66 Busy Number Redial - When activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. The activation code is *66. The user can press *86 to deactivate.

The pay per use charge is activated irrespective of whether the call is completed or not. Pay per use customers will be charged upon dialing the activation code without any specific prior request for the feature.

*69 Call Return - This feature enables a customer to place a call to the telephone number associated with the most recent call received whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call. If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. The activation code is *69. The user can press *89 to deactivate this feature.

The pay per use charge is activated irrespective of whether the call is completed or not. Pay per use customers will be charged upon dialing the activation code without any specific prior request for the feature.

Caller ID with Name - Permits a customer to receive the calling name and telephone number for calls placed to that customer, if the call is not placed from outside of the Call ID area, through an operator or via telephone credit card, provided the calling party has not activated the per call restrict options and where technologically feasible. Before placing an outgoing local telephone call, customers with per call restrict may designate their number as private and prevent the delivery of their name and telephone number to the called party through the Call ID feature for that call by dialing the Call ID restrict activation code.

(T)

Caller ID Number Only ⁽¹⁾ - Permits a customer to receive the calling telephone number for calls placed to that customer, if the call is not placed from outside of the Call ID area, through an operator or via telephone credit card, and provided the calling party has not activated the per call restrict options. Before placing an outgoing local telephone call, customers with per call restrict may designate their number as private and prevent the delivery of their telephone number to the called party through the Call ID feature for that call by dialing the Call ID restrict activation code.

CALLING SERVICES

7.2 INDIVIDUAL SERVICES

B. FEATURE DESCRIPTIONS (CONTINUED)

3. CUSTOM LOCAL AREA SIGNALING SERVICE (CLASS) [CONTINUED]

Enhanced Call Forward - This feature provides a business customer with the capability to specify the number of calling paths that will be forwarded from one subscriber line to another telephone number. The feature is offered where facilities permit and at no time will this service take precedent over the requirement for these facilities to provide a customer with telephone service. Enhanced Call Forward is restricted to voice use only. The feature is available only as an enhancement to one or more of the following features: Call Forwarding, Call Forwarding Busy and Call Forward No answer. Enhanced Call Forward is limited to ten (10) call forwarding paths per telephone number. It can be used with any of the following services: B1, PBX, Centrex and ISDN BRI. (T)

Priority Call - Is an incoming call management feature which will allow the subscriber to define a list of calling directory numbers that will provide the subscriber with special incoming call treatment. Any incoming calls on this list will be indicated by a distinctive ringing. Any numbers which are not on the list or which cannot be identified will be given standard treatment. To gain access to this service, the customer dials "*61" or "1161" on a rotary telephone. (T)

Selective Call Acceptance - Allows a customer to select specific telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller that the customer is not accepting calls. Selective Call Acceptance is accessed by dialing "*64" or "1164" on a rotary telephone. (T)

Selective Call Rejection - Allows a customer to reject call attempts from up to 15 telephone numbers. To use this service, the customer preprograms telephone numbers of calling parties they wish to reject. Any call attempts to the customer's telephone from these specified numbers will be prevented from being completed to that customer. The calling party will get a recording advising the caller that the called party is not receiving calls. The customer can also add an "unknown" caller to the Selective Call Rejection list by activating the feature immediately after receiving an unwanted call. Selective Call Rejection is activated by dialing "*60" for "1160" from a rotary telephone. After gaining access to the service, the customer can activate or deactivate by dialing an activation/deactivation code as directed by an announcement.

Selective Call Forward - Allows a customer to program up to 15 telephone numbers to be forwarded automatically to another telephone number. Incoming calls that are on the Selective Call Forwarding list will be forwarded to the predetermined telephone number. Selective Call Forwarding is accessed by dialing "*63" or "1163" from a rotary telephone. After gaining access to the service, the customer can activate or deactivate by dialing an activation/deactivation code as directed by an announcement. Entries on the Selective Call Forwarding list, as well as the forward-to telephone number, can be changed at any time.

7.3 BUNDLES/PACKAGES

B. BUSINESS CUSTOMERS

1. CONDITIONS

a. CHOICE PACK

This service offers a discount of 30% off the rates to business customers who subscribe to individual Calling Services as specified under Rates - Individual Services and Custom Local Area Signaling Service. This discount applies only when the customer subscribes to three or more of the following services:

- *66 Busy Number Redial
- *69 Call Return
- Anonymous Call Block/Rejection
- Basic Call Forward
- Call Waiting
- Call Waiting/Cancel Call Waiting
- Caller ID with Name
- Caller ID Number Only ⁽¹⁾
- Distinctive Ring
- Selective Call Rejection
- Priority Call
- Selective Call Forward
- Speed Call 8 ⁽¹⁾
- 3 Way Calling

If three or more eligible individual services are ordered per customer account, the discount will apply on rates of all eligible services. The threshold of three eligible services is figured on a per account basis instead of per line.

If the customer removes a service(s) such that the total subscription becomes less than three, the discount will be discontinued.

A service may be added at a later date for the discount to apply. A service may also be substituted for another at a later date and the discount will continue to apply.

Service Charges will not apply to qualifying Choice Pack orders or to add or change the services to Choice Pack, as long as the minimum (three) eligible services are retained. (T)

⁽¹⁾ This service offering is limited to all existing subscribers at their existing locations as of July 20, 2014.

CALLING SERVICES

7.3 BUNDLES/PACKAGES

F. Unlimited Dial Tone (DTL) Package for Business and CentraPAK for Business (Cont'd)

3. CONDITIONS (Cont'd)

Unlimited DTL and CentraPAK are not available in combination with other optional calling plans or virtual private network services.

Unlimited DTL and CentraPAK do not apply to the following calls or services:

- Operator Assist Station-to-Station Service
- Operator Assist Person-to-Person Service
- Operator Assist Credit Card Calls
- Directory Assistance Service (Local and National)

(D)

- Dial It Service
- Wide Area Telecommunications and 800 Service
- 3 Way Calling (per activation)
- *69 Call Return (per activation)

Unlimited DTL and CentraPAK may only be used for voice applications and may not be used for the transmission of data, for internet connections, or for any other non-voice application. These services may not be used for autodialing. The Company reserves the right to restrict the number of other services and/or equipment furnished or used in connection with any particular class of service in order to prevent any impairment in the quality of service furnished. If the customer uses this service for any non-eligible purpose, including, but not limited to, the examples noted above, the Company may suspend, restrict or cancel the service.

Details on calls made will not be available for this service.

Service Charges will be waived in the event a class of service change is required in order to have an Unlimited DTL or CentraPAK.

Applicable Service Charges as specified in Section 4, Sheet 66 will be waived for customers subscribing to a three year agreement.

1st Revised Sheet 36
Canceling
Original Sheet 36

CALLING SERVICES

7.3 PACKAGES

F. Unlimited Dial Tone (DTL) Package for Business and CentraPAK for Business (Cont'd) (T)

4. TERMINATION LIABILITY

Unlimited DTL and CentraPAK are offered on a one-year or a three-year term agreement. (T)

Early termination of a Unlimited DTL Basic Package or CentraPAK term agreement by the customer will result in a one-time flat Termination Charge of: (T)

1-year term agreement

\$75

3-year term agreement

\$225 for default within the 1st year of the term
\$150 for default within the 2nd year of the term
\$75 for default within the 3rd year of the term

If the customer cancels any of the unregulated components or all of the Expansion Line(s) of the bundle, the remaining components will revert to the individual rate and/or the price list rate associated with that component.

The customer can add, delete or change the Expansion Lines without termination charges as long as two (2) lines (the Basic Package core line and one Expansion Line) remain on the account. If the one Expansion Line is removed, the remaining elements will revert to price list rates. If the Basic Package core line is removed, the applicable termination charge shown above will apply.

Customer termination of service within the first 60 days, starting on the Order Completion Date, will result in customer liability for the monthly charges. Termination liability will be waived.

At the end of the term period or any subsequent renewal, the agreement will automatically be renewed for a successive one-year or three-year term at the same terms and conditions, unless either party provides advance notice that it does not wish to renew the term. Each subsequent renewal will allow for a 60-day grace period for the subscriber to unsubscribe from the plan without penalty. Pricing will remain the same during any automatic renewal unless the Company has provided 30 days notice of any change. Customers can move from a one-year to a three-year term without incurring a penalty.

(T)

I. Business Single Line Pack

1. General

Single Line Business Pack is an optional business flat-rated usage package with a network access line, calling features and specified non-regulated services offered for a one-year or three-year term commitment:

Single Line Business Pack includes the following:

- One (1) Dial Tone Line with touch-tone
- Unlimited local voice usage
- Unlimited intraLATA direct distance dialed unassisted toll calling
- Choice of zero to five (0 - 5) of the following calling features:
Call Waiting, 3 Way Calling, Basic Call Forward and Caller ID with Name.

(T)

(Additional credit will apply if provisioned with Frontier Broadband Service, or Frontier Broadband Service.)

2. Regulations

1. Single Line Business Pack is available only where facilities and conditions permit.
2. Single Line Business Pack is available only to customers who subscribe to Frontier for their local usage and intraLATA toll calls.
3. Single Line Business Pack is available only on a one-year or three-year term agreement.
4. Single Line Business Pack is only available to business customers who agree to subscribe to a business unlimited nationwide long distance calling plan through Frontier Online and Long Distance Inc., and Frontier High-Speed Internet service or FIOS Internet service.
5. Single Line Business Pack is available to business customers who subscribe to 25 or fewer lines (voice grade or voice grade equivalent) at the time service is initiated.
6. Customers may only have one Single Line Business Pack per account. A maximum of ten lines may have Unlimited Calling either with this plan or any other Unlimited Local or Unlimited Local and Toll Usage product offered by Frontier. Customers may not combine this package with the Unlimited Dial tone Line and Unlimited Flexible Telephone System Packages.

- 3 Way Calling (per activation)
- *66 Busy Number Redial (per activation)
- *69 Call Return (per activation)
- Call Trace (per activation)

10. Single Line Business Pack may only be used for voice applications and may not be used for the transmission of data, for internet connections, or for any other non-voice application. These services may not be used for autodialing. The Company reserves the right to restrict the number of other services and/or equipment furnished or used in connection with any particular class of service in order to prevent any impairment in the quality of service furnished. If the customer uses this service for any non-eligible purpose, including, but not limited to, the examples noted above, the Company may suspend, restrict or cancel the service.

11. Details on calls made will not be available for this service.

12. Service Charges will be waived in the event a class of service change is required in order to have the Single Line Business Pack.

13. Applicable Service Charges will be waived for customers subscribing to a three-year agreement.

1. Business Single Line Pack (Cont'd) (T)
3. Termination Liability
 1. Single Line Business Pack is offered on a one-year or a three-year term agreement. (T)
 2. Early termination of Single Line Business Pack term agreement by the customer will result in a one-time flat Termination Charge of: (T)
1-year term agreement:
\$75
3-year term agreement
\$125 for default within the 1st year of the term
\$100 for default within the 2nd year of the term
\$75 for default within the 3rd year of the term
 3. If the customer cancels any of the components: the business unlimited nationwide long distance calling plan through Frontier Online and Long Distance Inc., or Frontier Internet Service or FIOS Internet Service, the remaining components will revert to the individual rate and/or the tariff rate associated with that component. (T)
 4. If the Dialtone Line (DTL) is removed, the applicable termination charge shown above will apply.
 5. Customer termination of service within the first 60 days, starting on the Order Completion Date, will result in customer liability for the monthly charges. Termination liability will be waived.
 6. At the end of the term period or any subsequent renewal, the agreement will automatically be renewed for a successive one-year or three-year term at the same terms and conditions, unless either party provides advance notice that it does not wish to renew the term. Each subsequent renewal will allow for a 60-day grace period for the subscriber to unsubscribe from the plan without penalty. Pricing will remain the same during any automatic renewal unless the Company has provided 30 days notice of any change. Customers can move from a one-year to a three-year term without incurring a penalty.

J. UNLIMITED LD PRICE GUARANTEE – Grandfathered as of May 6, 2019 (C)

1. GENERAL

The Unlimited LD Price Guarantee Offer provides a discounted offer for Regional Calling Value to qualifying residential customers.

2. CONDITIONS

Qualify residential customers are those customers who meet all of the following:

- (a) Must be a new residential customer or be an existing local customer who calls Frontier to disconnect their telephone service and agree to retain their service based on this offer;
- (b) Must reside in a service area not eligible for Frontier Broadband;
- (c) Must subscribe to Regional Calling Value service; and
- (d) Must subscribe to a qualifying Unlimited LD plan.

The monthly rate is guaranteed for as long as the customer remains at the same service address.

Discontinuance of any one of the qualifying services will result in immediate termination of this offer.

Each service must be billed by Frontier Communications Northwest Inc.

Qualifying Unlimited LD plans must be consistent with the Plan O Service – Unlimited as found in the Frontier Communications Online and Long Distance Inc. Posted Rates, Terms and Conditions.

3. RATES

For customers meeting all of the specific criteria set forth in Conditions, above:

Customers will be eligible to receive Regional Calling Value for a monthly rate of \$17.04.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

(T)

DEFINITION

Customized Multi-line Telephone Service 1000, 2000, 3000 and Customized Multi-line Telephone CLASS are service offerings, which utilize the advanced capabilities of electronic central offices to incorporate individual business lines into a single communications system. The customer purchases an access line (Customized Multi-line Telephone Service station line) separately from the desired feature package (Customized Multi-line Telephone 1000, 2000, 3000 or Customized Multi-line Telephone CLASS). The station lines provide access to the central office switching capabilities while the Customized Multi-line Telephone packages, applied to each station line, provide a set of station and system calling features.

DESCRIPTION - BASIC OPERATING FEATURES

Automatic Identification of Outward Dial - Identifies all calls leaving the customer group by the station number from which calls are placed.

Direct Inward Dialing - Allows incoming calls from the exchange or toll network to reach a specific station without attendant assistance.

Direct Outward Dialing - Allows station users to place external calls to the exchange network without attendant assistance.

Distinctive Ring - Permits a station user to determine by the cadence of the ringing, whether a call is internal or external.

Station-to-Station Calling - Allows station users to call each other using intercom dialing.

Touch Call - Equips all station lines for touch call dialing.

Section 8

2nd Revised Sheet 4
Canceling
1st Revised Sheet 4

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - BASIC OPERATING FEATURES (Continued)

SERIES 1000

Call Alternation - Allows a station user to place one call on hold, make a second call, and talk alternately between the two parties.

Call Forward - Provides the option of fixed and/or variable forwarding of a station's incoming calls to a predetermined number. Fixed forwarding is established and changed by the Company. Variable forwarding is established and changed by the station user. This feature will forward all calls, or only those calls reaching a busy or no answer condition, to a predetermined number. Forwarding for hunt groups is available. (T)

Call Hold - Allows a station user to place a call in progress on hold.

Call Pick Up - Direct - Permits a station user to pick up any ringing station in the business group by dialing a feature code plus the ringing station's intercom number. The ringing station is not required to be in the same pick-up group.

Call Pick Up - Extended - Permits a station user to dial a code to extend call pick-up to groups other than its own.

Call Pick Up - Group - Permits a station user to dial a code to answer a call that is ringing at another station within the call pick up group.

Call Waiting/Cancel - Allows a station user to cancel the Call Waiting feature for the duration of a single call.

Call Waiting Terminating/Cancel - Alerts the called party, with a beep, that an incoming call is waiting.

Section 8

3rd Revised Sheet 5
Canceling
2nd Revised Sheet 5

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - BASIC OPERATING FEATURES (Continued)

SERIES 1000 (Continued)

Consultation Hold - Allows the initiator of a three-way call or transfer to speak privately with the third party before completing the connection.

Dial Call Waiting - Allows a station user to send a Call Waiting tone when calling a busy station, even if the called station does not have the Call Waiting feature. Dial Call Waiting is restricted to calls both placed and received within the same customer group.

Hunting (Directory Number) - Activates hunting when any of the directory numbers of the individual lines in the hunt group are called. If the called line is busy, hunting will start with the called line and continue to the end of the list.

Hunting (Pilot Number) - Searches for an idle line beginning with the first member of the hunt group and ending with the last member.

Hunting (Secretarial) - Searches for an idle line beginning with the group member dialed and ending with the last member in the group.

*66 Busy Number Redial - Allows a station user to redial the last number dialed by dialing a code instead of redialing the entire telephone number. (T)

Speed Call 8 ⁽¹⁾ - Allows a station user to dial an individually selected list of up to 8 telephone numbers by dialing two or three digits. (Available on GTD-5 central office switching equipment only).

Station Restriction - Prevents a station user from making or receiving calls outside the business group. Calls cannot be routed beyond this restriction by an attendant or through any indirect means such as Call Transfer, Call Forwarding or Call Pick-Up.

3 Way Calling - Permits a station user to put one party on hold, reach a third party, and bring all three parties together in a 3 way connection.

Toll Restriction - Prevents customer designated stations from placing chargeable toll calls.

(1) This service offering is limited to all existing subscribers at their existing locations as of July 20, 2014.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - BASIC OPERATING FEATURES (Continued)

SERIES 2000

The features listed below are provided in addition to Series 1000 features.

Automatic Callback - Enables a station user encountering a busy station to request the system to call back when both stations are idle.

Call Park-Multiple - Enables a station user to place multiple calls on hold and later retrieve the held calls from any station in the business group.

Circular Hunting - Searches for an idle line beginning with the number dialed, proceeding to the last member in the hunt group, wrapping around to the first member, and ending with the member preceding the one that was dialed.

Data Line Security - Protects data being transmitted on a telephone line from being disturbed by tones generated by system features such as Call Waiting, Executive Busy Override, etc.

Multiple Classes of Service - Enables the customer to assign each station a class of service, which defines the station's calling privileges and restrictions.

Saved Number Redial - Permits a station user to store a number in memory and later redial the number using a code. (Not available on 5-ESS central office switching equipment.)

Speed Call 30 - Allows members of a business group to share a list of up to 30 telephone numbers, each of which may be dialed using an access code and two or three digits. (T)

Uniform Call Distribution (UCD) Hunting - Provides an even distribution of incoming network and intercom calls among the individual main stations of a hunt group.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - BASIC OPERATING FEATURES (Continued)

SERIES 3000

The features listed below are provided in addition to Series 1000 and 2000 features.

Call Forward/Incoming - Forwards incoming calls from outside the business group to a predetermined alternate number within the business group when the called station is busy. (T)

Call Forward/Within Group - Forwards calls originating from within the business group to a predetermined destination. (T)
Calls originating from outside the business group are completed as if Call Forward were not in effect. (T)

Executive Busy Override - Allows a station user, upon reaching a busy station within the same business group, to "break-in" to the existing conversation. The system sends an alert tone to the conversing parties and creates a three-way call controlled by the party breaking in.

Off-Hook Queuing - Allows a station user to remain off-hook and wait for an idle trunk in order to complete a dialed call.

Ringback Queuing - Permits a station user with activated queuing to hang up and wait for a trunk to become idle. When a trunk is available, the station user is notified by a Distinctive Ring tone.

Speed Call 30 - Allows a station user to dial an individually selected list of up to 30 telephone numbers by dialing two to four digits. (T)

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION – BASIC OPERATING FEATURES (Continued)

CUSTOMIZED MULTI-LINE TELEPHONE CLASS

In order to subscribe to Customized Multi-line Telephone CLASS, the customer must also subscribe to at least Feature Package Series 1000.

*66 Busy Number Redial – When activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. The activation code is *66. The user can press *86 to deactivate.

*69 Call Return – This feature enables a customer to place a call to the telephone number associated with the most recent call received whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call. If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. The activation code is *69. The user can press *89 to deactivate this feature.

General Disclaimer/Conditions

Custom Local Area Signaling Service features are applicable to calls placed to/from compatible central offices or within a compatible central office offering the service. These services are offered based on information stored within the switch or provided to the switch through call setup signaling and are subject to limitations associated with the availability and content of that information. **Note:** The family of services to which *69 belong is typically referred to as "CLASS" services, but the name may vary between states, e.g., Phone Smart Service, Calling Services.

Rates & Charges

Per activation customers are charged upon announcement of the telephone number associated with the last incoming call. The charge applies regardless of whether the customer attempts to return the call by dialing "1" and regardless of whether the announced number identifies the calling party or can be used to return the call automatically or by manual dial back.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - BASIC OPERATING FEATURES (Continued)

CUSTOMIZED MULTI-LINE TELEPHONE CLASS (Continued)

In order to subscribe to Customized Multi-line Telephone CLASS, the customer must also subscribe to at least Feature Package Series 1000.

Anonymous Call Block/Rejection - Customers who do not wish to receive calls from callers that withhold their telephone number and name or other identifying information through per line or per call blocking can reject anonymous calls. Upon dialing a specific code, Caller ID with Name subscriber can automatically reject calls from customers who have chosen to block the passage of their telephone numbers and names on outgoing calls. The caller will receive an announcement that the customer is not accepting calls from callers who are blocking their telephone numbers and names. This feature can be activated by dialing "*77" ("1177" on rotary phones) and can be deactivated by dialing "*87" ("1187" on rotary phones). ACR is included with Caller ID with Name. A call can be completed to a Caller ID with Name subscriber who has activated ACR by (1) placing the call through an operator, (2) placing the call with a telephone credit card, or (3) placing the call after unblocking the telephone number and name.

Selective Call Acceptance - Screens incoming calls and only allows access to those telephone numbers on a customer determined list (up to a maximum of 12 telephone numbers). All others will be directed to a pre-recorded message.

Selective Call Forward - Allows a customer to select specific telephone numbers from which calls are to be received. All other calls are intercepted and routed to a recorded announcement that informs the caller that the customer is not accepting calls. Selective Call Acceptance is accessed by dialing "*64" or "1164" on a rotary telephone.

Special Call Waiting ⁽¹⁾ - Allows a customer to choose up to 12 numbers that can activate Call Waiting. Incoming calls placed from numbers not selected by the customer receive busy signals when the customer's line is busy. Customers may not subscribe to Call Waiting and Special Call Waiting on the same line.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

(T)

DESCRIPTION - OPTIONAL SYSTEM FEATURES (Continued)

The features below can be ordered individually at the rates and charges set forth under RATES in this section.

Attendant Data Link Console Interface - Allows the use of a proprietary data-link multiplexed console that is connected to the central office. (Requires three (3) additional Customized Multi-line Telephone Station Lines.)

(T)

Attendant Flexible Night Answer - Allows the attendant to reassign the destination for Predetermined Night Answer calls. (Requires Data Link Console.)

Attendant Identification-Multiple Directory Numbers - Enables the attendant to identify an incoming call by directory number using the console display. If the subscriber has multiple directory numbers, the number being called will be displayed on the attendant console. (Requires Data Link Console.)

Attendant Mixed Night Answer - This feature is a combination of Universal and Predetermined Night Answer. Incoming calls can be switched to either type of night answer by the attendant. (Requires Data link Console.)

Attendant Non-Data Link Console Interface - Allows the use of a multi-line attendant instrument designed specifically for console service. A physical cable pair is required for each customer loop (Customized Multi-line Telephone Station Line).

(T)

Attendant Predetermined Night Answer - Allows incoming calls to an attendant position to be answered by a predetermined alternate station during non-business hours or when the attendant's line is busy. This feature also allows for the transfer of calls during commercial power failure. (Requires Data Link Console.)

Attendant Universal Night Answer - Allows incoming calls to an attendant to be answered by any station in the attendant's business group during non-business hours. This feature also allows for the transfer of calls during commercial power failure. (Requires Data Link Console.)

Authorization Codes - Used to override the calling restrictions placed on a particular line.

2nd Revised Sheet 12

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - OPTIONAL SYSTEM FEATURES (Continued)

Automatic Route Selection (ARS) - Provides an automatic means of low cost route selection. ARS provides up to 10 routes and allows customers to prioritize these routes based on cost. Three-digit NPA translation is included. This feature also includes:

Expensive Route Warning - Provides a warning tone indicating an expensive route has been selected.

Facilities Restriction Level - Allows each station and each facility access in the business group to be assigned a restriction level for use with ARS.

Time of Day Routing - Provides for route selection based on the most economical path for a particular time-of-day or day-of-week.

Call Trace - Call Trace allows a customer to automatically activate (*57 or 1157 from a rotary phone) a trace record of the last incoming call tracing feature. The customer automatically authorizes and requests the Company to release the results of any and all traces initiated by the customer directly to the customer's servicing law enforcement agency. The customer must contact the Company within ten (10) days after activating a call trace or the trace record will automatically be deleted from the system.

Call Trace is available on a monthly subscription basis, or on a pay per use basis. Pay per use customers will be charged upon dialing the activation code without any specific prior request for the feature.

Caller ID Number Only ⁽¹⁾ - Permits a customer to receive the calling telephone number for calls placed to that customer, if the call is not placed from outside of the Call ID area, through an operator or via telephone credit card, and provided the calling party has not activated the per call restrict options. Before placing an outgoing local telephone call, customers with per call restrict may designate their number as private and prevent the delivery of their telephone number to the called party through the Call ID feature for that call by dialing the Call ID restrict activation code.

Caller ID with Name - Permits a customer to receive the calling name and telephone number for calls placed to that customer, if the call is not placed from outside of the Call ID area, through an operator or via telephone credit card, provided the calling party has not activated the per call restrict options and where technologically feasible. Before placing an outgoing local telephone call, customers with per call restrict may designate their number as private and prevent the delivery of their name and telephone number to the called party through the Call ID feature for that call by dialing the Call ID restrict activation code.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - OPTIONAL SYSTEM FEATURES (Continued)

(D)

(D)

Cancel Calling Number ID or Cancel Caller ID Delivery - Per Call - Provides free per call blocking in exchanges where Calling Number Identification or Caller ID Delivery is offered by the Company. Customers may prevent the delivery of their telephone number to the called party. This is accomplished on a per call basis when the customer dials the Cancel Calling Number Identification Delivery - Per Call activation code prior to placing the call.

Cancel Calling Number ID or Cancel Caller ID Delivery - Per Line - Provides free per line blocking in exchanges where Calling Number ID or Caller ID Delivery is offered by the Company. This service prevents the delivery of customer's telephone number to the called party. A Cancel Calling Number ID or Cancel Caller ID Delivery - Per Line customer has the option of deactivating Cancel Calling Number ID or Cancel Caller ID Delivery and forwarding their telephone number on a per call basis by dialing the code *82 prior to placing a call.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

(T)

DESCRIPTION - OPTIONAL SYSTEM FEATURES (Continued)

Code Call Access - Provides access to customer provided code calling signaling devices.

Conference Calling - Permits a station user or attendant to form a conference with a maximum of eight parties, including other stations and/or parties reached over trunks.

Dictation Access and Control - Provides for station access to customer provided dictation equipment.

FX Access - Connects to foreign exchange line facilities.

ISDN PRI Customized Multi-line Telephone Access - Provides the interface between the ISDN PRI Tie Channel Services and the Customized Multi-line Telephone. ISDN PRI Access and Tie Channel Service are required for this application.

(T)

(T)

ISDN PRI Voice over IP (VOIP) Customized Multi-line Telephone Access - Provides additional Customized Multi-line Telephone Service features to integrate Customized Multi-line Telephone service with VOIP applications. The VOIP NRC rate applies. PRI's that only require Tie Channel Intercom functionality do not require this NRC. ISDN PRI Access and Tie Channel Service are required for this application.

(T)

Limited Automatic Call Distribution - Allows incoming trunk calls to be directed to and distributed among a select group of stations using distributive hunting.

Music-on-Hold - Provides access to a common music source for use with call hold, transfer, park and queuing features.

Paging/Public Address Access - Provides a central office interface to a loudspeaker at the customer premises for paging and/or public address.

Pilot Number - A directory number used to access a hunt group. (No associated cable pair required.)

Preferential Hunting - Assigns hunting for an individual group of hunt group members to a pilot number of another circular hunt group.

Priority Call - Allows a customer to program up to twelve (12) telephone numbers of selected callers enabling the customer to distinguish certain incoming calls from all others by a Distinctive Ring tone. If a customer also subscribes to Call Waiting, calls from the selected numbers will be distinguished by a distinctive call waiting tone.

(T)

Priority Queuing - Provides two levels of priority in the handling of queued calls: high priority and low priority.

Proprietary Set Interface - Provides capability for central office connectivity for business proprietary sets.

Pseudo Number - A software number that has the characteristics of a basic exchange access line. A Feature Series rate is applicable to each Pseudo Number.

Recorded Announcement - Routes calls on a "hold" or "queuing" condition to a recording in the Company's central office. The recording may be customized at the customer's option.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

DESCRIPTION - OPTIONAL SYSTEM FEATURES (Continued)

Speed Call 30 - Allows members of a business group to share a list of up to 30 telephone numbers, each of which may be dialed using an access code and two or three digits. (T)

Station Message Detail Recording (SMDR) - Magnetic Tape Only - Provides a record of calls originated by Customized Multi-line Telephone Service station lines or incoming tie-line groups. SMDR information is provided on magnetic tapes that are sent to the customer's site. This service is limited to existing customer as of September 30, 1999.

Stop Hunt - Uses a code to stop the hunting process when a particular line is reached in a hunting sequence.

Terminal Make Busy - Allows a station or group of stations to appear busy to incoming calls.

Tie Facility Access - Provides access to tie line facilities, which connect the business group to another CENTREX, PABX or similar facility.

T-1 Access - Allows a Customized Multi-line Telephone Service to access a dedicated digital facility.

Unlimited IntraLATA Toll Usage Plan for Business – Allows a customer to subscribe to unlimited intraLATA toll voice usage for a flat monthly rate within the customer's intraLATA area. See I.U.P.C. Price List 3 IntraLATA Toll Services, Section 1 Unlimited IntraLATA Toll Usage Plan for Business.

Unlimited IntraLATA Toll Usage Plan for Business Feature Package Two – Allows a customer that is subscribed to Unlimited IntraLATA Toll Usage Plan for Business to choose Caller ID with Name and Voice Messaging¹. The customer may choose either or both features. If the customer selects Caller ID with Name and has Call Waiting, the customer can choose to have Call Waiting ID at the same rate.

Unlimited IntraLATA Usage Plan for Business Feature Package Three – Allows a customer that is subscribed to Unlimited IntraLATA Toll Usage Plan for Business to choose Caller ID with Name and One Point Voice Messaging². The customer may choose either or both features. If the customer selects Caller ID with Name and has Call Waiting, the customer can choose to have Call Waiting ID at the same rate.

WATS Access - Allows a Customized Multi-line Telephone Service customer to access WATS for bulk toll calling.

800/866/877/888-Service Access - Allows 800/866/877/888 Service Access to terminate in the Customized Multi-line Telephone Service System.

¹ Voice Messaging is a non-regulated service.

² One Point Voice Messaging is a non-regulated service.

Section 8

2nd Revised Sheet 16
Canceling
1st Revised Sheet 16

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

CONDITIONS

General

Customized Multi-line Telephone service is available only where facilities permit.

Customized Multi-line Telephone service may be provided on a measured-rate basis in exchanges where Local Service Options are available; otherwise, the service will be provided on a flat-rate basis.

Customized Multi-line Telephone customers may not combine different Local Service Options within a Customized Multi-line Telephone service system.

If the Customized Multi-line Telephone system falls below three lines it will no longer be considered a Customized Multi-line Telephone system. The remaining lines will be converted to individual business lines with no features. All existing price list rules, regulations, rates and charges associated with the conversion will apply.

Where the Customized Multi-line Telephone station being provided involves a location in a different central office area of an exchange, the interoffice mileage charge and measurement as specified in Section 4 is applicable.

Where Customized Multi-line Telephone stations of the same system are located in different exchanges, a special transport charge applies for each interexchange channel involved as specified in Section 13.

Customized Multi-line Telephone Customers may experience service problems when connecting Customized Multi-line Telephone lines to PABX or hybrid equipment. The Company will not be responsible for problems arising out of equipment that is incompatible with Customized Multi-line Telephone service.

Numbers Not in Use

Customers are required to keep 50% or more of their assigned telephone numbers working, in order to retain them. The Company will notify customers annually if the quantity of working numbers drops below 50% of their assigned numbers, so that action can be initiated by the customer to increase their number of assigned numbers working, or by Frontier to reclaim numbers. Telephone numbers working periodically for regular intervals of time, such as those assigned to student residences, are "working at all times" to the extent that they work for a minimum of 90 non-consecutive days during each calendar year in which they are assigned to the customer.

Service Charges

The service charges for Connection of Central Office Located Trunk, Initial Order and Subsequent Order, Station Lines and Feature Packages 1000, 2000, or 3000 will not apply to the initial installation of Customized Multi-line Telephone Service lines when installed at the Price List rates under a term commitment.

(T)

Termination Liability

The customer may choose a 3-, 4-, or 5-year term commitment period. A 3-year term commitment includes a 3% system discount, a 4-year term commitment includes a 4% discount, and a 5-year term commitment includes a 5% discount in addition to rate stability. The discount is applicable to all features and lines. In exchange for stabilized rates, the customer must agree to remain in service for the entire term period. If the customer disconnects before the entire period expires, Termination Liability, as outlined in General Regulations, Section 3, will apply.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

CUSTOMER MOVES AND CHANGES (CMAC)

General

Customer Moves and Changes (CMAC) provides Customized Multi-line Telephone service customers with the ability to prepare, schedule, and implement, all under their control, certain feature changes and certain configurations of their Customized Multi-line Telephone service from the customer's computer terminal.

Description of Service

The management capabilities of CMAC include, but are not limited to, the following:

Service Option Information Changes:

Service Level Assignment - The customer can change the permission level assigned to define calling privileges associated with both facilities and station users.

Call-Pickup Group - The customer can establish a call-pickup group and add or delete members from an existing call-pickup group.

Call Forward Number - The customer can change the number to which a station user forwards calls. (T)

Authorization Code Assignment - The customer can activate, change, or deactivate authorization codes. The customer can also display the features associated with the authorization code for a particular user.

Button Features - The customer can manage the buttons on a multi-button station set by either activating features or enabling call appearances (specific telephone numbers assigned to buttons).

Activation/Deactivation of Features - The customer can either add a feature to a telephone number that does not have it, modify an existing feature, or take a feature off a telephone number that does. This function is limited to the features included in the feature packages subscribed to by the customer.

Telephone Number Swaps - The customer can swap telephone number assignments among like lines within a Customized Multi-line Telephone service system.

Regulations

CMAC is available to either existing or new Customized Multi-line Telephone service customers.

CMAC will be furnished only from offices that are technically capable of and equipped for providing the service.

Customers will have 24-hour access to the CMAC system except when restricted during maintenance windows. Customers are permitted unlimited sessions on the system; however, after a period of inactivity, the system will terminate the session.

Section 8

2nd Revised Sheet 26
Canceling
1st Revised Sheet 26

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

CUSTOMER MOVES AND CHANGES (CMAC) (Continued)

Regulations (Continued)

Some of the lines in a customer's Customized Multi-line Telephone service system cannot or should not be rearranged. The Company will specify the unchangeable lines. The customer may have the Company designate other lines as unchangeable. Changes to these lines will be made through the Company's existing service order procedures.

CMAC service is provided per Customized Multi-line Telephone service system customer.

All normal or emergency functions of the central office switch processor will have priority over execution of CMAC requests. The Company assumes no responsibility for change requests delayed by priority central office switch processor functions.

The Company reserves the right to inhibit CMAC service in the event of a service-affecting condition to the central office or affiliated operating support system.

The Company reserves the right to bill appropriate charges should the customer-initiated changes require corrective action by the Company.

Customers requesting CMAC service for 201 or more lines will be price under an Individual Case Basis (ICB) arrangement.

Rates and Charges:

The following rates and charges apply per Customized Multi-line Telephone service system:

	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u> ¹
Line Size -		
2 – 200 Lines	\$ 95.00	\$ 800.00
201+ Lines	ICB	ICB

¹ Applies in addition to Service Charges as set forth in Section 4 of this Price List.

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

(T)

STATION MESSAGE DETAIL RECORDING (SMDR)

General

Station Message Detail Recording (SMDR) is an optional feature of Customized Multi-line Telephone service that provides a record of calls originating from Customized Multi-line Telephone service station lines to locations outside of the same Customized Multi-line Telephone Service system. Facility groups may also be designated as requiring originating and terminating records.

(T)

|

(T)

Description of Service

The SMDR record includes the following information:

The Customized Multi-line Telephone service line number of the incoming facility group which originated the call or the originating station number

(T)

The called telephone number

The date, time and duration of the call

The facility type used for routing the call

Authorization codes, if ordered by the customer, can be included in the record at the discretion of the station user.

SMDR records are provided to the customer via one of the following three methods:

Dedicated access to the customer's premises - the call records are transmitted to the customer according to a pre-determined schedule. This option requires a minimum of a dedicated voice grade line from the Central Office to the customer location. The associated rates, charges, and regulations for the dedicated access line as specified in Section 4 of this tariff shall apply in addition to the rates, charges and regulations for SMDR.

Dial-up access - the customer dials into a centralized location to retrieve the call records when desired. Call records are stored for a maximum of 10 days.

Internet access - the call records are sent to the customer via the internet.

Section 8

2nd Revised Sheet 28
 Canceling
 1st Revised Sheet 28

CUSTOMIZED MULTI-LINE TELEPHONE SERVICE

STATION MESSAGE DETAIL RECORDING (SMDR) (Continued)

Regulations

SMDR is available only where facilities permit and from capable Central Office switches.

SMDR is not represented to be a provision of billing detail.

Local call records are provided only where available.

Customer must designate all station lines in a customer group and/or facility groups on which SMDR is to be provided.

Modems, collection devices, computer equipment and software are not provided as part of this service and are the responsibility of the customer.

SMDR customers requesting dedicated access, or those requesting dial-up or internet access for more than 200 lines, will be priced under an Individual Case Basis (ICB) arrangement.

Rates and Charges:

	<u>Monthly Rate</u>	<u>Nonrecurring Charge ¹</u>
Dedicated Access ²	ICB	ICB
Dial-up Access		
2 – 200 Lines	\$ 200.00	\$ 300.00
201+ Lines	ICB	ICB
Internet Access ³		
2 – 200 Lines	\$ 200.00	\$ 300.00
201+ Lines	ICB	ICB
Additions and Changes per system change		4

¹ Applies in addition to Service Charges as set forth in Section 4 of this Price List.

² The associated rates, charges and regulations for the dedicated access line as set forth in Section 4 of this Price List will apply in addition to the rates and charges for SMDR.

³ Customer is responsible for obtaining connection to the internet.

CUSTOM LINE TELEPHONE SERVICE

(T)

GENERAL

Custom Line Telephone Service is a non-engineered Customized Multi-line Telephone based service, with a pre-positioned switch which does not require operations provisioning at the time of the customer order and does not require the customer to use the "dial 9" access code to place calls.

(T)

Custom Line Telephone Service is classified as a business service, and is offered as a complete service package only. The exchange access, intercommunication and features are not offered separately.

(T)

Custom Line Telephone Service is customized for small businesses with a minimum of 2 lines, not to exceed a maximum of 30 lines.¹ If the Custom Line Telephone Service system falls below two lines it will no longer be considered a Custom Line Telephone Service system. The remaining line will be converted to an individual business line with no features. All existing price list rules, regulations, rates and charges associated with the conversion will apply.

(T)

|

(T)

Custom Line Telephone Service provides an enhanced dial tone from the Central office to the customer's premises along with an attractive menu of basic services.

(T)

Custom Line Telephone Service is furnished from compatible digital-type switching equipment located on the Company premises and includes the facilities necessary for intercommunication between Custom Line Telephone Service lines within the customer's system. Custom Line Telephone Service includes local Exchange Service (no dial "9" required), direct inward-dialing to Custom Line Telephone Service lines, identification and billing of outgoing long distance messages by line number where such billing is done by the Company, touch-tone Calling Service and intercept to the main listed number. Central Office Located Trunks are not required for local access.

(T)

|

(T)

Customer provided equipment may be required for some of the described features. The Company assumes no responsibility for the customer equipment or the compatibility to Custom Line Telephone Service.

(T)

No other Customized Multi-line Telephone Classes of Service may be mixed with Custom Line Telephone Service. The customer has the flexibility of adding any combination of standard individual lines and hunt groups that meets the communications needs of the business as well as choosing features from within the offered Custom Line Telephone Service package for each line or hunt group.

(T)

(T)

¹ The service is limited to a maximum of six-lines in the DMS 10 Central Office.

CUSTOM LINE TELEPHONE SERVICE

CONDITIONS

Term Options

Custom Line Telephone Service customers may select either a month-to-month option or a two-year term commitment period. The term commitment period becomes effective upon the installation date of the service.

Custom Line Telephone Service payment options may be selected by billing account number within a customer's system.

Service Charges

The Service Charge for Custom Line Telephone Service Network Access Line Connection and the Feature Change Charge will not apply to the initial installation of Custom Line Telephone Service lines when installed under a term commitment.

(T)

(T)

Adding Lines Under Term Option

Additional Custom Line Telephone Service lines may be added to an existing system, up to a maximum of 30, during the term commitment period. For customers subscribing to the two-year term commitment period, the term commitment with respect to any additional lines will be coterminous.

Termination Liability¹

There is no termination liability for customers who have elected the Custom Line Telephone Service month-to-month payment option.

Transfer of Term Option¹

With the permission of the Company, the obligation to pay the Custom Line Telephone Service charges for the remainder of the term commitment period may be assigned to another customer.

¹ See General Regulations, Section 3, for Termination Liability.

CUSTOM LINE TELEPHONE SERVICE

(T)

CONDITIONS (continued)

Custom Line Telephone Service System

(T)

Custom Line Telephone Service lines sharing a common intercom arrangement and a primary Directory listing will be considered Custom Line Telephone Service System. A system must have a minimum of two lines and may not exceed a maximum of thirty Custom Line Telephone Service lines. Custom Line Telephone Service is classified as a business service and is offered only as a complete service. The exchange access, intercommunication and services are not offered separately.

(T)

Subscriber Line Charge

An applicable interstate Subscriber Line Charge will be applied to all Custom Line Telephone Service lines. SLC rates are listed in the Company's FCC tariff.

(T)

Incoming Toll Free Service Access Arrangement

Incoming calls on Toll Free Service access lines can be terminated on a Custom Line Telephone Service System. Incoming calls terminated in this manner may be transferred to other lines of the same Custom Line Telephone Service System.

(T)

(T)

Off-Premise Lines

Custom Line Telephone Service lines may be provided at a separate customer premise. No mileage charges apply to lines of the same Custom Line Telephone Service system that are located at different premises but situated within the same wire center serving area.

(T)

(T)

Optional Custom Line Telephone Services

(T)

Optional services are available where Company facilities permit at the rates specified in the following. Only the Customized Multi-line Telephone Service specified in this section will be available under Custom Line Telephone Service. Other Customized Multi-line Telephone Service are not available under the Custom Line Telephone Service. The Custom Calling and CLASS services that are identified elsewhere in the Local Exchange tariff are not offered.

CUSTOM LINE TELEPHONE SERVICE

CONDITIONS (continued)

Feature Restriction

Call Transfer, Three-Way Calling, Call Forwarding Busy Line, Call Forwarding Don't Answer and Call Forwarding may generate local, Regional Toll Call Plan or long distance usage charges. If generated, these charges are the responsibility of the Custom Line Telephone Service customer.

Customer Satisfaction Guarantee

When a customer subscribes to the month-to-month option or the 24-month term commitment for Custom Line Telephone Service, he must request that the Company disconnect the service within 30 calendar days of installation to be entitled to a full credit of any charges directly associated with the establishment of the service as well as the monthly charges billed for the service. In addition, customers who are not satisfied with their Custom Line Telephone Service within 30 calendar days of installation, may have their previous Frontier service reinstalled, at no cost, in accordance with the following terms and conditions:

Customers will not be permitted to revert to a service that has been grandfathered.

Customers who had no previous Company services, and subsequently elect to have their Custom Line Telephone Service disconnected, will be converted by the Company to Business Lines or Trunks with no additional Service Charge. However, the lines cannot exceed the total number of lines in the Custom Line Telephone Service system that the customer is disconnecting. (T)

The refund of any charges directly associated with the establishment of the service or monthly charges will be applied as a credit to the customer's bill.

Credit refunds will not be applied for toll charges, E911, or other like surcharges incurred.

Each customer will be entitled to a credit refund, one time per service.

The Customer Satisfaction Guarantee applies to the Custom Line Telephone Service as a whole and not to the individual services offered with Custom Line Telephone Service.

The Customer Satisfaction Guarantee does not extend to any Customer Provided Equipment (CPE) used in conjunction with this service, nor does it apply to Time and Material charges incurred.

The Customer Satisfaction Guarantee does not apply to the installation of temporary service.

1st Revised Sheet 35

CUSTOM LINE TELEPHONE SERVICE

FEATURE DESCRIPTIONS

CUSTOM LINE TELEPHONE SERVICE BASIC STANDARD SERVICES

The services listed here are automatically included on every Custom Line Telephone Service line, and are the backbone of the Custom Line Telephone Service offering:

Assume Dial "9" - Allows the customer to place calls outside the group without having to dial the access code "9".

Call Hold - The ability to place an established call on hold for an extended period of time by dialing a feature code (*01). This frees the line to place or receive another call. Only one call can be put on hold at a time per line.

Call Transfer – (All Calls) - The ability for a Custom Line Telephone Service line to transfer an established incoming call to another line. The "transfer to line" location may be inside or outside the group. Calls forwarded outside the area subject to local, Regional Toll Call Plan or long distance usage charges. If generated, these charges are the responsibility of the Custom Line Telephone Service customer.

Consultation Hold - A temporary or soft hold activated by a hook-switch flash or link button that places an existing call in progress on hold and activates dial tone. The dial tone enables the user to make another call for private consultation or to activate a three-way call.

Direct Inward Dial (DID) - The ability of each member of the Custom Line Telephone Service group to receive calls from outside the group directly to their station.

Direct Outward Dial (DOD) - The ability of each member of the Custom Line Telephone Service group to place calls to locations outside the group without first having to dial a "9" access code or use an attendant.

Distinctive Ring (Inside/Outside) - Allows the user to distinguish external calls from calls originating within the Custom Line Telephone Service group. A double ring will signify external calls and a single ring will identify calls from within the group.

Intercom Dialing - Allows the user to communicate between lines within the Custom Line Telephone Service group by dialing a two-digit code. The intercom codes are assigned by the Company at the time of the initial service order.

3 Way Calling - Allows the user to add a third party. Calls from within the group or outside the group may be added to establish a 3 way conference arrangement. This service may generate local, Regional Toll Call Plan or long distance usage charges. If generated, these charges are the responsibility of the Custom Line Telephone Service customer.

CUSTOM LINE TELEPHONE SERVICE

FEATURE DESCRIPTIONS (continued)

CUSTOM LINE TELEPHONE SERVICE SELECTABLE SERVICES

The following services may be selected with no monthly recurring charge and placed on any Custom Line Telephone Service line. These services may also be available for application to Hunt Groups with no monthly recurring charge.

Automatic Call Back (within system only) – Allows the user who reaches a busy line within the Custom Line Telephone Service group to dial a code (*52), and be connected when both lines are idle. This feature is for use inside the Custom Line Telephone Service group only, and only one request at a time from a line is permitted. The request will remain active for a period of time up to 30 minutes unless it is deactivated, by dialing a code (#52).

Call Forward Busy – A fixed feature, provisioned by the telephone company using data provided by the customer, to automatically route all incoming calls to another number (either inside or outside the group) when the called line is busy. Calls forwarded outside the Custom Line Telephone Service group are subject to local and/or long distance charges. (T)

Call Forward No Answer – A fixed feature, provisioned by the telephone company using data provided by the customer, to automatically route all incoming calls to another number (either inside or outside the group) when the called line is not answered in a predetermined number of rings/seconds. Calls forwarded outside the Custom Line Telephone Service group are subject to local and/or long distance charges. (T)

Basic Call Forward – Allows the customer to route all incoming calls to a number of their choosing. The user also has the ability to modify the forward-to telephone number and turn the feature off and on as needed. Calls forwarded outside the Custom Line Telephone Service group are subject to local and/or long distance charges. (T)

Call Waiting/ Cancel Call Waiting – When a busy Custom Line Telephone Service line receives an incoming call, a tone announces the waiting call. The user has the option of answering or disregarding the incoming call. The user may terminate the Call Waiting feature by dialing the Cancel Call Waiting Code (*70). If the user does not wish to be interrupted by the call waiting tone, the Cancel Call Waiting code (*70) must be redialed prior to each call.

Dial Call Waiting-Originating – Allows members of the Custom Line Telephone Service group to signal each other with a call waiting tone by dialing the code *54 upon reaching a busy signal. The called member, upon hearing the tone, may terminate or place on hold the call in progress, or disregard the call waiting tone.

CUSTOM LINE TELEPHONE SERVICE

FEATURE DESCRIPTIONS (continued)

CUSTOM LINE TELEPHONE SERVICE SELECTABLE SERVICES (continued)

Call Pick-Up Directed - Allows a user to answer (pick-up) calls ringing on any other line within the Custom Line Telephone Service group by dialing a code (*18) plus the number of the ringing line. If more than one user attempts to pick-up the call, the first user will receive the call; others will receive a busy tone.

Call Pick-Up Group - Allows the user to answer (pick-up) a ringing line within the users Pick-Up Group by dialing a Call Pick-Up Code (*17).

Hunting (Series and/or Multi-line) - Allows the customer to increase accessibility by reducing busy signals for incoming callers. Hunting arrangements are predetermined upon initial order. Hunting for Custom Line Telephone Service customers will be provided in a Series or Multi-line arrangement only ¹, and must be programmed by the Company from data provided by the customer.

Series Hunting - when a call attempts to terminate to a Custom Line Telephone Service line with Series Hunting and the line is busy, the incoming call is directed to the line designated as next in the hunting series. When the last number in the series is busy, the caller receives a busy tone. Call Forwarding-Variable and Special Call Forwarding will override series hunting.

Multi-line Hunting - enables hunting by utilizing a pilot directory number (DN). Hunting starts at the first line assigned to the hunting group and ends at the last line.

Speed Call 6 or 8 ⁽²⁾ - Allows the user to make calls to frequently dialed numbers by using an abbreviated code for each number. The short list consists of 8 numbers in all switch types except the 5ESS, which will only provide 6. This is a customer programmable feature. (T)

(1) No other type hunting sequence (Rotary, Directory Number, Pilot Number or Secretarial) is available to Custom Line Telephone Service customers.

(2) This service offering is limited to all existing subscribers at their existing locations as of July 20, 2014. (N)

CUSTOM LINE TELEPHONE SERVICE

FEATURE DESCRIPTIONS (continued)

CUSTOM LINE TELEPHONE SERVICE SELECTABLE SERVICES (continued)

Call Restriction Options (8 options) - The customer has the option of choosing the type call restriction desired for each individual line. The customer request for each line must be identified on the service order so the line can be provisioned with the proper line class code, and call rejection services.

(T)

Types of call restrictions are:

No Call Restrictions - Allows the user to make and receive calls without restrictions of any kind.

Call Restriction One - Blocks all outgoing chargeable toll calls, including all operator calls. Allows outgoing local calls, 800/866/877/888 calls, local Directory Assistance (DA) calls, repair calls, and 911 calls only. Allows all incoming calls with no restrictions.

Call Restriction Two - Blocks all outgoing direct dialed chargeable toll calls, but allows outgoing operator handled calls for class call screening (3rd number, collect, or credit card only), local calls (outside the group), 800/866/877/888 calling, local DA calls, repair calls, and 911 calls. Allows all incoming calls with no restrictions.

Call Restriction Three - Blocks all outgoing chargeable toll calls and all local calls. Allows outgoing operator handled calls for class call screening (3rd number, collect, or credit card only), 800/866/877/888 calling, local DA calls, repair calls, and 911 calls. Allows all incoming calls with no restrictions.

Call Restriction Four - Does not allow calls to numbers outside the Custom Line Telephone Service group (toll or local, including 911). Allows all incoming calls with no restrictions.

Call Restriction Five - Does not allow calls to or from outside the Custom Line Telephone Service group (including 911). Only inside the group (intercom) calling is allowed.

Call Restriction Six - Blocks all 700-, 900- and 976- calls. This call restriction may be added to the No Call Restriction class of service as required.

Call Restriction Seven - Blocks all casual dialing (101XXXX) type calls. This call restriction may be added to the No Call Restriction class of service as required.

Call Restriction Eight - Blocks all international calls. This call restriction may be added to the No Call Restriction class of service as required.

Canceling
1st Revised Sheet 39

CUSTOM LINE TELEPHONE SERVICE

FEATURE DESCRIPTIONS (continued)

CUSTOM LINE TELEPHONE SERVICE OPTIONAL SERVICES

The optional services listed below may be added to any line or hunt group for additional charges.

*66 Busy Number Redial - When activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. The activation code is *66. The user can press *86 to deactivate.

*69 Call Return - This feature enables a customer to place a call to the telephone number associated with the most recent call received whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call. If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed. The activation code is *69. The user can press *89 to deactivate this feature.

General Disclaimer/Conditions

Custom Local Area Signaling Service features are applicable to calls placed to/from compatible central offices or within a compatible central office offering the service. These services are offered based on information stored within the switch or provided to the switch through call setup signaling and are subject to limitations associated with the availability and content of that information. **Note:** The family of services to which *69 belong is typically referred to as "CLASS" services, but the name may vary between states, e.g., Phone Smart Service, Calling Services.

Rates & Charges

Per activation customers are charged upon announcement of the telephone number associated with the last incoming call. The charge applies regardless of whether the customer attempts to return the call by dialing "1" and regardless of whether the announced number identifies the calling party or can be used to return the call automatically or by manual dial back.

2nd Revised Sheet 40

CUSTOM LINE TELEPHONE SERVICE

FEATURE DESCRIPTIONS (continued)

CUSTOM LINE TELEPHONE SERVICE OPTIONAL SERVICES (continued)

The optional services listed below may be added to any line or hunt group for additional charges.

Anonymous Call Block/Rejection – Allows the user to block up to twelve customer-defined telephone numbers from terminating a call to the user's line. Operator calls cannot be blocked. Once activated, any calls from these twelve numbers will be routed to an intercept message. (T)

Call Park – Allows the user to "park" a call on his number, and then retrieve the call from any other station in the group. Only one call can be parked at a time per line.

Call Park Directed – An enhanced call park feature that enables the user to "park" a call on any other number within the Custom Line Telephone Service group. The call can then be retrieved from the parked location. Only one call can be parked at a time per line.

Caller ID – Allows the user to view the telephone number and listed name of the incoming call (typically by the second ring), subject to limitations such as those described below. Customer provided equipment is required. The name and telephone number of the caller may not be displayed for every incoming call. "Out of Area," "Unavailable," the calling party's state name, or a similar message may appear for certain calls, including (i) calls made through certain networks, (ii) operator-assisted calls, calls from toll-free numbers and international calls, (iii) when phone number or caller name information is not made available to Frontier, (iv) for certain telephone numbers for which Frontier does not purchase Caller ID information, and (v) for other technical reasons. In addition, "Private," "Anonymous" or a similar message may appear when the caller has blocked caller identification information.

Caller ID-Number Only – Allows the user to view the telephone number of the incoming call (typically by the second ring). Customer provided equipment is required. Telephone numbers of incoming callers will be forwarded for non-blocked calls, subject to technical and other limitations including the availability of the number of forwarding.

Call Trace – Allows the user to trace the number of the last call received from within his defined calling area, and have the number automatically reported to the telephone company.

CUSTOM LINE TELEPHONE SERVICE

(T)

FEATURE DESCRIPTIONS (continued)

CUSTOM LINE TELEPHONE SERVICE OPTIONAL SERVICES (continued)

(T)

Executive Busy Override - Allows the user to dial a code (*40) to gain access to a busy line within the group, and establish a Three- Way call. The called number will receive a warning tone prior to the establishment of the three-way conference call.

Last number redial¹ - Enables the user to redial the last called number by dialing a code (#77).

Select Call Forwarding² - Allows the user to define and program up to twelve numbers to be call forwarded. When any of the numbers on the user-defined list calls, the call will be forwarded to the number programmed to receive the call. Calls from all other numbers will be handled in the normal manner. Call Forwarding-All Calls will override this feature.

Priority Call - Allows the user to define up to twelve numbers for special notification. A unique ring will notify the user of a call from any of the defined numbers. This feature is not available for hunt group Pilot numbers.

Unlimited IntraLATA Toll Usage Plan for Business – Allows a customer to subscribe to unlimited intraLATA toll voice usage for a flat monthly rate within the customer's intraLATA area. See I.U.P.C. Price List 3 IntraLATA Toll Services, Section 1 Unlimited IntraLATA Toll Usage Plan for Business.

Unlimited IntraLATA Toll Usage Plan for Business Feature Package Two – Allows a customer that is subscribed to Unlimited IntraLATA Toll Usage Plan for Business to choose Caller ID with Name and Voice Messaging³. The customer may choose either or both features. If the customer selects Caller ID with Name and has Call Waiting, the customer can choose to have Call Waiting ID at the same rate.

Unlimited IntraLATA Usage Plan for Business Feature Package Three – Allows a customer that is subscribed to Unlimited IntraLATA Toll Usage Plan for Business to choose Caller ID with Name and One Point Voice Messaging⁴. The customer may choose either or both features. If the customer selects Caller ID with Name and has Call Waiting, the customer can choose to have Call Waiting ID at the same rate.

CentraPAK - Optional business flat-rated usage package with a Custom Line Telephone Service line, calling features and Voice Messaging³ offered for a one-year or three-year term commitment.

(T)

¹ This feature is not available in the 5ESS.

² Calls forwarded outside the Custom Line Telephone Service group are subject to local and/or long distance charges.

³ Voice Messaging is a non-regulated service.

⁴ One Point Voice Messaging is a non-regulated service.

VERSALINE CENTREX SERVICE

(N)

GENERAL

1. Versaline Centrex Service (Versaline) is a digital central office based switching system that provides premium, versatile, and advanced communication features and service to multi-line business customers. Versaline includes various features and the ability to establish groups of lines with common and/or unique characteristics.
2. Versaline Service is only offered from digital central offices and is subject to availability of required facilities, conditions and central office technology.
3. Frontier Communications (the Company) will determine what type of central office configuration is required to conform to facility standards of the Company, including transmission requirements. Additional charges for special arrangements to meet signaling and transmission requirements may apply.

Feature availability is based on central office technology serving any given exchange.
4. Customer Premises Equipment (CPE) - CPE may be provided by the customer or by the Company. CPE provided by the customer must be compatible with Versaline features.
5. Directory listings for Versaline Service will be provided in accordance with regulations and rates as specified in this tariff.
6. Service charges as specified in this tariff apply to all customer requested moves and changes performed at the customer's premises.
7. Maintenance of Service Charges, as set forth in this tariff apply for visits by the Company to a customer's premises if a service difficulty results from customer provided facilities for equipment.
8. The Local Exchange Calling scope for Versaline stations will be the Business Premium Calling Plan as specified in this tariff.
9. Temporary suspension of service, vacation service, or seasonal service does not apply to Versaline Service.
10. Versaline stations of the same system but located in different exchanges will be subject to foreign exchange mileage as specified in this Tariff.
11. Versaline Service features are available to PBX and Key System customers. Versaline Service cannot be used as a surrogate for the Automatic Access Line or Business Line serving a PBX or Key System.
12. The rates contained herein are for central office facilities and local intercom loops only. The applicable interexchange mileage and termination charges will be charged for private line, foreign exchange lines, tie lines, and WATS.
13. Federal Subscriber Line charges will be billed to each Versaline Service Line as set forth in FCC tariff.

VERSALINE CENTREX SERVICE

(N)

TERMS AND CONDITIONS

1. Terms

- A. Versaline Service is provided for a minimum of one month, beginning on the service installation date. Month-to-month rates are subject to changes per approval of the appropriate regulatory agency.
- B. Versaline Service is also offered on a contractual basis, commencing on the date that service is installed, for fixed terms of twelve months (one year), twenty-four months (two years), or thirty-six months (three years). For the contract period, Versaline rates offered by the Company will not change. Versaline customers who subscribe to fixed term contracts will receive reduced pricing to the Versaline Station Line month-to-month rate as stated in this tariff.
- C. A Versaline customer is required to retain as a minimum, the initial number of lines under their original contract. Subsequent Versaline Station Line additions will be rated at the existing contract rates as an addendum to the existing contract for the remainder of the initial term.
- D. In the event that Versaline service is terminated by the customer prior to completion of the initial contract period, a termination charge will apply. The termination charge will be an amount representing the difference between (1) the charges billed for services provided pursuant to the contract, and (2) the charges applicable under the Company's month-to-month Versaline rates, for a period representing the greater of 50% of the term of the contract or the actual number of months in which service was provided pursuant to the Contract. The termination charge is payable immediately upon termination of a contract.
- E. When the contract term expires, a Versaline Customer may select a new contract period or continue with month-to-month service at rates offered in the tariff in effect at that time.

(N)

VERSALINE CENTREX SERVICE

(N)

DEFINITIONS

1. Versaline Station Line Service - Includes the following:

- System and station features
- Intercom (station to station) calling
- Loop facilities from the system dial switching equipment to the Network interface of the Versaline station line
- Local exchange network access calling

2. System and Station Features

A. System Features Definitions

Automatic Identification of Outward Dialing (AIOD) - identifies all calls leaving the customer group by the station number from which calls are placed.

Direct Inward Dialing (DID) - allows a station user to receive local or long distance calls from outside of the business group, without the aid of an attendant.

Direct Outward Dialing (DOD) - allows a station user to place local or long distance calls outside of the business group, without the aid of an attendant.

Equal Access - provides the ability to access an long distance carrier of choice.

Intercept Announcements - Common - alerts callers when stations are disconnected with a standard office intercept announcement.

Intercom Dialing (Station to Station) - allows abbreviated (4 digits) dialing between Versaline stations.

Local Exchange Calling - provides a station user exchange network calling to and from a Versaline station.

Off Premises Stations - allows for stations served from the same central office to be located in a building(s) other than the one housing primary Versaline.

911 Emergency Service - allows a station to report an emergency by dialing 911.

(N)

2nd Revised Sheet 56
Canceling
1st Revised Sheet 56

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

2. System and Station Features (Continued)

B. Station Features Definitions

Basic Call Forward - provides an arrangement for transferring incoming calls to another telephone number within the local area by dialing a code and the number of the service to which calls are being transferred. Enables the customer to forward incoming calls to another telephone number by dialing *72 and the number to which calls are being forwarded to. (T)
|
(T)

Blind Transfer Recall - allows a set user to transfer a call to another party without waiting for that party to answer. If the party does not answer the transferred call within a specific time-out period, the set from which the call was transferred is recalled.

Call Forward Busy - provides for calls terminating to a subscriber's busy directory number to be forwarded to another telephone number on a premise other than the provisioned premises. (T)
(T)

Call Forward Fixed - provides an automatic connection between a calling station going off hook and a predetermined terminating number.

Call Forward No Answer - provides for calls terminating to a subscriber's idle directory number to be forwarded, after a customer pre-selected interval, to another telephone number. (T)
(T)

Call Forward Remote Activation - allows a station to activate and deactivate Call Forward from his station. Activation\ deactivation can be performed from another phone served by their own central office, or from another central office.

Call Forward No Answer (30 seconds) - allows incoming calls to a Versaline line to be automatically routed to a preselected Versaline line when a called station is not answered after a preset number of rings. The station user has the ability to change the number to which calls will be forwarded. Forwarded calls can be limited to those originating outside the customer group.

Call Forward No Answer Variable Timer - allows incoming calls to a station line to be automatically routed to a preselected station line when a called station is not answered after a preset number of rings. This feature must be programmed by the Telephone Company. Forwarded calls can be limited to those originating from outside the customer group.

Call Forward of A Call Waiting Call - allows a station user to have calls that are enqueued against their busy station for a set period of time to automatically be forwarded to a pre-determined station.

VERSALINE CENTREX SERVICE

(N)

DEFINITIONS (Continued)

2. System and Station Features (Continued)

B. Station Features Definitions (Continued)

Call Hold - allows a station user to "hold" any call in progress by flashing and then dialing a "hold" code, thus freeing the same line for the purpose of originating another call or returning to a previously held call.

Call Park - allows a station user to park a call against its own directory number (DN). The parked call can be retrieved from any station by dialing a feature-access code and the DN against which the call is parked.

Call Park Directed - allows a station user to park calls against another DN within the customer group by flashing the hook switch and dialing the Call Park Directed access code. The parked call can be retrieved from any station by dialing the retrieval access code and the parked DN.

Call Park Multiple - allows a station user to place multiple calls on hold and later retrieve the held calls from his station or another station in the customer group.

Call Pick-Up - allows a station to answer incoming calls to another station within a defined call pickup group by completing a pickup dial code. This feature is provided on individual stations within a customer group.

Directed Call Pick-Up - allows a Versaline line user to answer calls directed to a specific Versaline line from any other Versaline line in the customer group by dialing a feature code and the number of the ringing station.

Call Pick-Up Directed Any Station - is a terminating line option, which allows any station in the business group to answer/pick-up on the incoming calls terminating at the station assigned with the feature.

Call Pick-Up Directed Barge-In - allows a station user to answer a call that is ringing on any other line within the same customer group. To answer the station user dials the access code, receives a special dial tone, and then dials the extension number of the station to be picked-up or barged into.

Call Pick-Up Directed Exempt - allows a station user to answer a call that is ringing on any other line within the same customer group. Once the call is picked-up this feature will not allow the call to be barged into.

Call Transfer - allows a station user to transfer calls to another station either within or outside the business group by flashing the switchhook and dialing the transfer-to number.

(N)

Section 8

1st Revised Sheet 58
Canceling
Original Sheet 58

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

2. System and Station Features (Continued)

B. Station Features Definitions (Continued)

Call Waiting All Calls - allows an incoming call encountering a busy station to receive audible ringing, while the busy station receives a call waiting tone. The station user may put the existing caller on hold and acknowledge the incoming caller, then alternate between the calls, or abandon one of the calls.

Call Waiting (customer specific) - informs a busy Main Station Line, when the Main Station Line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the connection while answering the new call and return to the original connection. This can be on all calls or inter-business group calls only.

Call Waiting Cancel - permits a station user to prevent interruption, either from inside or outside the customer group, by suspending the Call Waiting feature for the duration of any telephone call.

Call Waiting Dial - allows a station user to selectively (by a dial code) impose Call Waiting on a called station when the called station is busy.

Call Waiting Inhibit - prevents a calling line with Call Waiting Originating or Call Waiting Dial from imposing Call Waiting on the line.

Call Waiting Originating - allows a station user to impose Call Waiting tones on a called station within the customer group.

Consultation Hold - permits the transferring party to talk privately with the destination before transferring the call.

Data - Call Protection - allows the assignment to individual lines within the customer group of No Double-Connect. This option does not allow the connection of test circuits to the line while the line is busy. This option protects data calls from interruption. (T)

Direct Line - Hot Line - allows a station user to automatically place a call to a pre-selected DN by lifting the receiver.

Section 8
1st Revised Sheet 59
Canceling
Original Sheet 59

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

2. System and Station Features (Continued)

B. Station Features Definitions (Continued)

Direct Line - Manual Line - automatically places a call to an operator when the station user goes off hook.

Direct Line - Warm Line - is a time delayed automatic line. If a station user commences dialing within the time delayed period, the call will proceed normally. If dialing commences before the end of the time delay period, the call is treated as a Hot Line.

Distinctive Call Waiting Tones - permits station user to determine whether an incoming Call Waiting call is internal or external to the customer group by providing different tone cadences for the two situations.

Distinctive Ring - provides a different and distinct ringing cadence for intragroup and DID calls allowing the station user to identify the type of call. (T)

Do Not Disturb - allows station users to prevent incoming calls from ringing their station. Calls can be diverted to an attendant, another station, a busy tone or a recorded announcement.

Executive Busy Override - allows a single-line set user to gain access to a busy station by flashing the switchhook (during busy tone), and dialing a feature code.

Executive Busy Override Exempt - will not allow Executive Busy Override to be activated against the line by a station user within the customer group.

Hunting (customer specific) - is a call completion feature that increases the likelihood of an incoming call being completed within a customer-defined group of lines. Three types of hunting are available.

Directory Number Hunting (DNH) - may be either circular or sequential.

- Circular hunting hunts all lines in the group regardless of the starting point.
- Sequential hunting starts at the number dialed and ends with the last number in the group.

Multi-Line Hunting - Only the pilot number of the hunt group may be dialed to access the hunt group. Hunting proceeds from the pilot number to the last number in the group.

1st Revised Sheet 60

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

2. System and Station Features (Continued)

B. Station Features Definitions (Continued)

Distributed Line Hunting (DLH) - Only the pilot number of the hunt group may be dialed to access the group. Hunting starts after the first idle line found by the previous hunt and continues until the starting point of the hunt is reached. DLH provides an equal distribution of calls within the hunt group. DLH is used in conjunction with the uniform call distribution feature.

***66 Busy Number Redial** - allows a station user to redial the last number dialed by utilizing an access code rather than dialing the entire number. (T)

Line Restriction Fully - permits the customer to restrict certain stations from making calls to and/or receiving calls from stations outside the customer group. It also prevents the customer from making calls to and/or receiving calls from the attendant, thereby denying it indirect access to/from outside the customer group.

Line Restriction Semi - permits the customer to restrict certain stations from making calls to and/or receiving calls from stations outside the customer group. It may, however, make and/or receive calls via the attendant, Call Forwarding, Call Transfer, and Call Pick-Up features.

Line Restriction Toll - permits the customer to block certain stations from the completion of calls that are directed to an outside operator or to numbers outside the local calling area. The Toll Restriction list may be assigned to either an individual line or shared by multiple lines.

Line Restriction Code - allows the customer to restrict the completion of calls that are directed to specified area codes (NPAs) and/or central office codes (NXXs). A Code Restriction list may be assigned to either an individual line or shared by multiple lines.

Line Restriction Multi-Level - allows the subscriber to define those codes that stations may dial. This can be done on a three-digit office code basis (NXX) or a six-digit area code (NPA) and (NXX) basis.

Make Busy - allows a station user to temporarily make a particular station appear busy to incoming callers. Make Busy causes the hunt feature to skip over a station during the search for an idle station. Make Busy can be activated by dialing a feature code or by a key operated feature. The key operated feature requires additional hardware.

DEFINITIONS (Continued)

2. System and Station Features (Continued)

B. Station Features Definitions (Continued)

Ring Again - allows a station user when encountering a busy station within the customer group to be notified when the busy station becomes idle and to be placed automatically in a ring-again mode.

Speed Call 8 ⁽¹⁾ - provides a Versaline line user with abbreviated dialing. It is limited to single digit codes and can be accessed by only one user. (T)

Speed Call 30 - provides a station user with abbreviated dialing. The individual long list provides two digit codes and is dedicated to one station user. (T)

Stop Hunt - allows a station user to stop the normal hunting process at a predetermined point. Activating this feature at a predetermined point. Activating this feature at a particular station in a Multiline Hunt Group will stop the search for an idle line at that station. Stop Hunt can be activated by dialing a feature code or by a key operated feature. The key operated feature requires additional hardware.

Touch Tone - equips all station lines for touch call dialing.

3 Way Calling - permits a station user using the consultation hold feature to put one party on hold, reach a third party, and bring all three parties together in a three-way connection. (T)

⁽¹⁾ This service offering is limited to all existing subscribers at their existing locations as of July 20, 2014.

(N)

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

3. Optional Add-On Features

Authorization Codes (AC) - allows the customer to define a set or sets of dialing privileges and associated dialing codes for each set or sets. AC permits certain dialing privileges to authorized personnel.

Automatic Call Distribution (ACD) - provides advanced call distribution and queuing capabilities as an integrated function of Versaline Service.

Automatic Route Selection (ARS) - allows an outgoing call to be completed automatically by the most cost effective route available. The caller is alerted by a tone if the outgoing call is accessing an expensive call route for completion.

Conference Calling - Six Port - allows station users to establish a conference call consisting of more than three conferees without the assistance of the attendant. The conferees can include lines in the same customer group, lines belonging to another customer group, and stations reached through trunks.

Custom Intercept Announcements - allows a custom announcement to be provided to a business group. These announcements are applicable on originating calls that violate restrictions or the dialing plan and terminating calls to nonworking directory numbers assigned to the business group.

Customer Data Changes (CDC) - provides customers with the ability to prepare, schedule, and implement feature changes and configurations from a computer terminal located on the customer's premises.

Delay Announcements for Queued Calls - informs a caller that their call has been placed in a queue. The delay announcement can be repeated at regular intervals until an idle station becomes available.

Meet-Me-Conference (Up to 30 ports) - allows conferees to hold a conference on a thirty-party conference bridge by dialing a directory number at a specified time.

Multiple Appearance Directory Numbers (MADNs) - is a software number that has no real switch hardware attached, but is given all the database characteristics associated with a normal line. MADNs can be configured in either a single-call-arrangement (SCA) or a multiple-call-arrangement (MCA). The SCA allows only one set to be active on the MADNs at any given time. The MCA allows more than one set in the MADNs group to be simultaneously active. MCA is available only within a Versaline customer group.

(N)

(N)

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

3. Optional Add-On Features (Continued)

Music On Hold - allows a customer group to have music and/or an announcement applied to a calling line while on hold.

Paging Access - provides a central office interface to customer provided paging equipment such as loudspeaker, code, and radio.

Queuing for Multiline Hunt Groups - allows calls to hunt groups with all lines busy to be queued with an announcement or music.

Special Service Facilities Access - allows station users to gain access to the following by dialing an access code:

- **Foreign Exchange (FX) Facilities Access** - provides access to and from an InterLATA or IntraLATA Foreign Exchange circuit or Foreign Central Office Circuit.
- **OutWATS Access** provides the customer access to an interexchange carrier for bulk toll calling.
- **Private Line Facilities Access** provides the customer access to a Private Line or Dedicated Circuit.
- **Tie Facility Access** provides the customer access to and from an InterLATA or IntraLATA tie facility.
- **800 Service Access** permits 800 Service Access to terminate in the Versaline Service System.

Station Message Detail Recording (SMDR) - provides a detailed customer report of calling activity of chargeable and non-chargeable calls for each customer group.

(N)

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

4. Attendant Feature Package

These features will be provided where facilities are available.

Access to Paging - allows an attendant to gain access to customer-provided loudspeaker paging equipment to summon a particular person over speakers located throughout the customer's premises.

The feature also provides a preempt capability allowing an attendant to force-release a calling party from a loudspeaker access.

Autodial - permits an attendant to dial frequently called numbers by pressing a feature key, which is programmed with a particular number.

Automatic Recall - allows redirect of extended calls to unanswered stations, camped-on stations, or stations with call waiting back to the Attendant. This also provides for redirect of calls parked for a predetermined amount of time.

(D)

Call Hold - allows an attendant to hold a call manually on the loop by pressing a key.

Call Park - allows the attendant to park calls against any directory number in the customer group.

Call Selection - enables an attendant to answer incoming calls using either of the following methods:

- in the order they are received, regardless of the incoming call type;
- by manually selecting a specific incoming call type.

Camp-On - allows the attendant to extend an incoming call to a busy station. When the busy station becomes idle, it automatically rings and is connected to the waiting call.

Code Calling Line Termination - allows the attendant to access customer provided code-call equipment using an access code and a called party code.

Conference - allows the attendant to establish a conference with up to 30 conferees.

VERSALINE CENTREX SERVICE

(N)

DEFINITIONS (Continued)

4. Attendant Feature Package (Continued)

Console Activation of Call Forward - allows attendants to activate, deactivate, and program Call Forwarding for stations.

Console Test - allows attendant to test the functional operations of a console.

Control of Trunk Group Access - allows the attendant to control the access to all stations and incoming trunks to various trunk groups by operating corresponding keys.

Delayed Operation - allows the attendant to place a call for a calling station while the calling station waits on hook.

Display of Queued Calls by ICI Key - provides console operators with a visual indication of the number of calls queued to be answered.

Flexible Console Alerting - allows an attendant to be alerted to a call requiring attention.

Interposition Calls - allows an attendant to call, speak to, and transfer a call to another attendant.

Locked-Loop Operation - allows an attendant to hold a call on loop. Attendant Locked-Loop Operation consists of two hold types, automatic and manual. Both types are attendant console features.

- in the order they are received, regardless of the incoming call type,
- by manually selecting a specific incoming call type.

Lockout - prevents the attendant from reentering a call on a held loop unless recalled by a station user or by Automatic Recall.

Multiple Listed Directory Numbers - allows each directory number to be assigned a unique lamp. The maximum number is limited by the number of available lamps and keys on the console.

Position Busy - allows the attendant to make the console unavailable to additional queued calls.

Priority Console Alerting - allows an attendant to be alerted to an enqueued emergency call while the console is idle, active on a call, position busy, or night service.

(N)

Section 8

2nd Revised Sheet 66
Canceling
1st Revised Sheet 66

VERSALINE CENTREX SERVICE

DEFINITIONS (Continued)

4. Attendant Feature Package (Continued)

Recorded Announcement - feature permits the routing of either originated or extended attendant calls to an optional announcement.

Secrecy - allows the attendant to talk to a called party (destination) without the calling party (source) hearing the conversation. When the attendant releases from the call, the source and the destination are connected.

Serial Call - allows an attendant to extend a call to more than one station.

Speed Call - allows the attendant to dial frequently called numbers with an abbreviated number of digits. A console can have one Speed Calling Short List, one Long List, and can be a user of a Long List.

Transfer - allows a call that is transferred by a station to an attendant to be queued on a first-in, first-out basis.

Two-Way Split - allows the attendant to talk privately to either the calling party of the called party.

Wildcard Key - allows any special feature normally available through the use of a feature key to be invoked through the Wildcard Key, with the exception of ICI.

TELEPHONE NUMBERS AND FACILITIES RESERVED FOR FUTURE USE

1. General

- A. A customer may reserve pre-assigned telephone numbers and facilities necessary to meet their specified growth requirements at specific locations, on a mutually agreeable date. In the event the customer elects not to be provided with reserved telephone numbers, timely main station additions cannot be assured and facilities necessary for growth requirements will be provided only within normal engineering and construction intervals.
- B. Telephone numbers reserved for future use services include pre-assigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as required by the customer.
- C. The assignment of telephone numbers and the sequence of numbers assigned to a Versaline system is made at the discretion of the Company.
- D. The service is furnished subject to the availability of facilities and telephone numbers.
- E. Calls to reserved (unassigned) telephone numbers will be routed to intercept over Versaline common recorded announcement facilities as specified in this tariff.
- F. Telephone numbers furnished herein retain their reserve status until assigned to a main station at which time the service assumes rates and charges applicable to a Versaline main station.
- G. Reserved numbers not assigned to a main station as agreed in this tariff will be billed at the following rates until removed from reserved status or billed as an active Versaline main station.

Original Sheet A

9-1-1 EMERGENCY TELEPHONE SERVICE

INDEX

	<u>Sheet Nos.</u>
9. 9-1-1 Emergency Telephone Service	
General.....	1
Conditions	1
Description of Services	9
Rates	15

Original Sheet 1

9-1-1 EMERGENCY TELEPHONE SERVICE

GENERAL

9-1-1 is the three-digit telephone number designated throughout the United States as the emergency telephone number to be used by the public to obtain law enforcement, medical, fire, rescue, and other emergency services.

9-1-1 Service enables a caller dialing 9-1-1 with access to the local exchange telephone network, arranged to provide 9-1-1 Service, to be automatically connected to the appropriate Public Safety Answering Point (PSAP). A PSAP is the communications facility, designated for a specific territory, to which 9-1-1 calls are routed for response. The Service, may be provided from any one of the following three categories: B9-1-1 (or Basic 9-1-1), C9-1-1 (or ANI-only 9-1-1), and E9-1-1 (or Enhanced 9-1-1)

CONDITIONS

9-1-1 Service is restricted to one-way incoming emergency service only.

The Company does not undertake to answer and forward 9-1-1 Service calls, but furnishes the use of its facilities to enable the customer's personnel to accept such calls on the customer's designated premises.

9-1-1 is offered on a Central Office District basis only, and the area to be served is that contained within the Central Office District boundary as identified by the Company. Where the Central Office District boundary and community boundary do not coincide, applicants for this service must, at their cost and expense, arrange to answer and process all 9-1-1 calls made within the boundary of the Central Office District(s).

9-1-1 Service is provided solely for the benefit of the local governmental unit. The provision of such service shall not be interpreted, construed, or regarded as being for the benefit of, or creating any Company obligation toward, or any right of action on behalf of any third person or other legal entity.

Intercept and call transferring services for any seven- or ten-digit emergency number(s) replaced by 9-1-1 Service will be provided for a period of time as negotiated between the Company and the customer; however, in no case shall these services be provided for more than one year.

9-1-1 Service is limited to the use of central office telephone number 9-1-1 as the emergency telephone number. Only one 9-1-1 Service will be provided within any government agency's locality.

9-1-1 calls originated from local exchange telephone network access facilities shall be completed to the appropriate PSAP without a charge being assessed to the end user by the Company.

Calls placed from all stations, including those with non-published or unlisted numbers, to a PSAP may display subscriber information associated with such numbers to emergency 9-1-1 responding personnel. The subscriber forfeits the privacy afforded by a non-listed or non-published service upon placing a 9-1-1 call.

Original Sheet 2

9-1-1 EMERGENCY TELEPHONE SERVICE

CONDITIONS (Continued)

The main telephone directory listing for the PSAP must be a seven- or ten- digit administrative telephone number of a listed emergency number. A listing for the PSAP will also be provided under 9-1-1 at no additional charge.

The Company will not prorate any billing among agencies of the same governmental entity jointly subscribing to 9-1-1 Service.

All non-regulated telecommunications service providers (e.g., Private Branch Exchange (PBX), Shared Tenant Service (STS), etc.) in an E9-1-1 service area should provide current lists of their subscriber's names, addresses, and telephone numbers in Company standard format to the customer for inclusion in the E9-1-1 database. The Company, however, assumes no responsibility for collecting, gathering or formatting said lists.

Information provided by the Company as part of the provision of C9-1-1 or E9-1-1 is to be used only for the purposes of answering and dispatching emergency calls.

When a 9-1-1 call is placed by the calling party via interconnection with an inter-exchange carrier or operator service provider, the Company cannot guarantee the completion of said call, the quality of the call, or any features that may otherwise be provided with 9-1-1 service.

9-1-1 EMERGENCY TELEPHONE SERVICE

CONDITIONS (Continued)

Customer Obligation

Application for 9-1-1 Service must be executed in writing by each customer and must be accompanied by satisfactory proof of authorization to provide 9-1-1 Service in the exchanges where service is requested. If application for service is made by an agent, the Company must be provided in writing with satisfactory proof of appointment of the agent by the customer.

The customer is responsible for dispatching the appropriate emergency service within the 9-1-1 service area, or will undertake to transfer all 9-1-1 Service calls received to the governmental agency with responsibility for dispatching such services, to the extent that such services are reasonably available.

The 9-1-1 Service applicant must submit to the Company written concurrence to the following terms and conditions by all participating agencies:

The applicant shall have the sole responsibility for determining which public safety agencies will participate in (jointly) subscribing to a 9-1-1 Service offering, and for the control and staffing of the PSAP.

The primary PSAP will answer all calls on a 24-hour, seven-days-a-week, basis.

Each primary PSAP must subscribe to sufficient 9-1-1 Service lines to adequately handle incoming calls in each PSAP's average busy hour so that no more than one call out of 100 encounters a busy signal. The 9-1-1 Service network from each central office to the central office serving the primary PSAP must provide a minimum of a P.01 transmission grade of service or two trunks, whichever is the higher standard.

Each primary PSAP shall and each secondary PSAP should subscribe to at least three lines as follows:

At least one seven- or ten-digit non-emergency local exchange line with at least one listed directory number for administrative calls.

At least one non-listed seven- or ten-digit local exchange line for forwarding or transferring 9-1-1 calls to locations other than those connected to that PSAP by dedicated lines.

At least one non-listed seven- or ten-digit number to be used by other PSAP's and Emergency Response Agencies to reach the PSAP. This number must be in addition to those listed above.

Each primary PSAP must subscribe to at least two dedicated lines to each secondary PSAP for the purpose of forwarding or transferring calls. The number of lines shall be no fewer than the number required to provide a P.01 transmission grade of service during that secondary PSAP's average busy hour.

The customer shall promptly notify the Company in the event the system is not functioning properly.

Original Sheet 4

9-1-1 EMERGENCY TELEPHONE SERVICE

CONDITIONS (Continued)

Customer Obligation (Continued)

Because the Company serving boundaries and political subdivision boundaries may not coincide, the customer must make arrangements to handle all calls received on its 9-1-1 service lines that originate from all points served by central offices within the 9-1-1 service area whether or not the calling telephone is situated on property within the geographical boundaries of the customer's public safety jurisdiction.

9-1-1 Emergency Telephone Service information consisting of the names, addresses, and/or telephone numbers of telephone subscribers, regardless of whether or not this information is published in directories, or listed in directory assistance offices, is Company proprietary information. The customer agrees to use such information only for the purpose of responding to 9-1-1 calls at the time such calls are placed. Any connecting company or agency or the customer of any connecting company or agency purchasing Company information shall take all reasonable efforts to safeguard the proprietary nature of Company-provided information, including but not limited to:

Maintenance of a log which will record all 9-1-1 calls placed to a customer and all manual queries for ALI. The Company retains the right to review such logs with all pertinent public agency supervising officers to detect any unauthorized retrieval of information from the 9-1-1 system database. The customer must report to the Company any unauthorized retrieval and must implement corrective action to prevent any further unauthorized retrieval.

The customer shall provide to the Company, upon request, a list of authorized personnel who shall be provided with passwords or other safety or security mechanisms to guarantee the system may not be accessed by unauthorized personnel.

All 9-1-1 customer equipment, system software, and databases must be located in a secure area within a PSAP's office operations to prevent unauthorized personnel from accessing confidential information.

The customer shall agree to indemnify, save and hold the Company harmless from any and all claims for injury or damage of any nature by any person arising out of or relating to the customer's unauthorized use of Company-provided subscriber information.

Equipment, used in conjunction with any 9-1-1 Emergency Telephone Service, located at the PSAP(s) must be compatible with the interface standards of the Company and provide sufficient capacity to terminate Company provided facilities. Any terminal equipment used in connection with 9-1-1 Service shall be configured to restrict the customer from removing and/or changing the data provided by the Company.

9-1-1 EMERGENCY TELEPHONE SERVICE

CONDITIONS (Continued)

Liability

The Company's entire liability to the customer or any person for interruption or failure of 9-1-1 service shall be limited by the terms set forth in this Section, the General Regulations Section of this Price List, and in any sections of other Price Lists which apply to the provision of 9-1-1 service by the Company. This 9-1-1 service is offered solely to assist the customer in providing 9-1-1 emergency service in conjunction with applicable fire, police, and other public safety agencies. By providing this service to the customer, the Company does not create any relationship or obligation, direct or indirect, to any third party other than the customer.

The Company shall not be liable for civil damages, whether in contract, tort or otherwise, to any person, corporation, or other entity for any loss or damage caused by any Company act or omission in the design, development, installation, maintenance, or provision of 9-1-1 service other than an act or omission constituting gross negligence or wanton or willful misconduct. However, in no event shall the Company's liability to any person, corporation, or other entity for any loss or damage exceed an amount equal to the prorated allowance of the Price List rate for the service or facilities provided to the customer for the-time such interruption to service or facilities continues, after notice by the customer to the Company. No allowance shall be made if the interruption is due to the negligence or willful act of the customer.

The customer shall indemnify and hold harmless the Company from any damages, or other injuries which may be asserted by any person, business, governmental agency, or other entity against the Company as a result of any act or omission of the Company or customer or any of their employees, directors, officers, or agents except for Company acts of gross negligence or willful or wanton misconduct in connection with developing, adopting, implementing, maintaining, or operating the 9-1-1 system or for releasing subscriber information, including non-published or unlisted information in connection with the provision of the 9-1-1 service.

Section 9

1st Revised Sheet 6
Canceling
Original Sheet 6

9-1-1 EMERGENCY TELEPHONE SERVICE

CONDITIONS (Continued)

Liability (Continued)

The Company shall not be liable or responsible for any indirect, incidental, or consequential damages associated with the provision of the 9-1-1 service when any 9-1-1 call originates from a system or line which makes the provision of specific location information impossible to provide for technical reasons. These technical reasons can include, but are not limited to, technical inability to provide subscriber information associated with multi-party lines, or private telecommunications services, such as PBXs or shared tenant services or calls originating over Customized Multi-line Telephone Service lines. (T)
(T)

The Company accepts no responsibility for obtaining subscriber record information from private Flexible Telephone systems, such as PBXs or shared tenant services, unless provided to the Company by a customer. At the rates set forth herein, the Company will integrate any records provided to it by the customer in a Company-standard format for inclusion in a 9-1-1 database. However, by doing so, the Company makes no representation or warranty regarding the accuracy of the data provided to it by a customer and shall not be liable or responsible for any indirect, incidental, or consequential damages associated with the provision of this data by the customer, which may be asserted by any person, business, government agency, or other entity against the Company. (T)
(T)

The Company shall not be liable or responsible for any indirect, incidental, or consequential damages associated with the provision of 9-1-1 service when there is a failure of or interruption in 9-1-1 service due to the attachment of any equipment by a customer to Company facilities. The customer may, with the prior written consent of the Company, which consent shall not be reasonably withheld, attach features, devices, or equipment or other vendors to the equipment or network facilities provided by the Company. Said attachments, devices, or equipment must meet all applicable federal and state registration or certification standards. The Company reserves the right to refuse attachments if the Company determines that said attachments will degrade the 9-1-1 system ordered by the customer, Company facilities, or otherwise affect its telephone operations.

9-1-1 EMERGENCY TELEPHONE SERVICE

CONDITIONS (Continued)

Liability (Continued)

The Company shall not be liable for any civil damages caused by an act or omission of the Company in the good faith release of information not in the public record, including nonpublished or nonlisted subscriber information to emergency service providers responding to calls placed to a 9-1-1 service or host providers using such information to provide a 9-1-1 service.

The Company shall have no liability whatsoever to any person arising from its provision of, or failure to provide, 9-1-1 Service to any subscriber to a non-regulated telephone service (e.g., shared tenant service). It is the obligation of the customer to answer, respond to, transfer, terminate, dispatch, or arrange to dispatch emergency services, or otherwise handle all 9-1-1 telephone calls that originate from telephones within the customer's service area. Neither the customer nor the Company shall have any responsibility for 9-1-1 calls that carry foreign dial tone, whether they originate within or outside of the customer's service area, or for calls originating from mobile/cellular telephones.

The Company shall not be liable for any mistakes, omissions, interruptions, delays, errors or defects in transmission or service caused or contributed to by the negligence or willful act of any person other than the Company, or arising from the use of customer provided facilities or equipment.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.

Original Sheet 9

9-1-1 EMERGENCY TELEPHONE SERVICE

DESCRIPTION OF SERVICES

B9-1-1 (or Basic 9-1-1) Service ¹

B9-1-1 (or Basic 9-1-1) Service automatically routes 9-1-1 calls to a PSAP but provides no information about the location or telephone number of the caller.

B9-1-1 Service provides for routing all 9-1-1 calls originated by stations with given central office prefix codes to a single PSAP which is prepared to receive those calls via a 9-1-1 Service line.

Interoffice 9-1-1 service is provided via dedicated trunking. 9-1-1 service from the central office serving the PSAP is provided over dedicated facilities.

The following rate elements apply to a typical B9-1-1 arrangement:

9-1-1 Central Office Enabling - Enables the central office to recognize 9-1-1 as a valid number and connect a 9-1-1 call to a 9-1-1 Service Line or dedicated 9-1-1 trunk.

9-1-1 Service Line - A dedicated access line connecting the PSAP and its serving central office.

Interoffice Trunk - A dedicated facility between central offices (intra- or interexchange). The Interoffice Trunking Charges apply to each trunk ordered. A minimum of two trunks is required on each interoffice route.

Mileage - Applicable to each trunk on a per airline mile basis.

Trunk Termination - Applicable to each end of each trunk terminated.

Section 9

1st Revised Sheet 10
Canceling
Original Sheet 10

9-1-1 EMERGENCY TELEPHONE SERVICE

DESCRIPTION OF SERVICES (Continued)

ANI-Only 9-1-1 Service (C9-1-1)

C9-1-1 (or ANI-only 9-1-1) Service automatically routes 9-1-1 calls to a PSAP and provides the calling telephone number (through automatic number identification or ANI) to the PSAP attendant who answers the call. C9-1-1 Service is comprised of B9-1-1 Service plus ANI spill.

The following rate elements apply to a typical C9-1-1 arrangement:

9-1-1 Central Office Enabling - Enables the central office to recognize 9-1-1 as a valid number and to connect such calls to a 9-1-1 Service Line or dedicated 9-1-1 trunk. Also enables the central office to generate ANI for the caller's telephone number and provide it to the 9-1-1 Service Line or dedicated 9-1-1 trunk.

9-1-1 Service Line - Same as B9-1-1 Service.

Interoffice Trunk

Mileage - Same as B9-1-1 Service.

Trunk Termination - Same as B9-1-1 Service.

C9-1-1 Service includes ANI Spill which is the provision of the caller's telephone number to the PSAP. ANI Spill may not be provided from multi-party end users. For calls placed to a PSAP from off-premises stations and stations behind business systems, where ANI Spill is provided, it will provide the identity of the primary telephone service billing or lead number.

Optional C9-1-1 Service:

Automatic Location Identification (ALI) Database - An E9-1-1 database that contains subscriber names, telephone numbers, addresses and Emergency Service Numbers (ESNs), and is periodically updated by the Company. A per database charge is applicable to each database and a per-record charge is applicable to all records in each database. When the Company is not responsible for the system's ALI database, a per record charge will apply to all Company records provided to the ALI database manager. The customer is responsible for the following:

(C)

Providing a correct set of addresses and ranges, known as a Master Street Address Guide (MSAG), with ESNs assigned to each address. This must include all Company and participating telecommunication service subscriber addresses and be based upon Company standards.

Advising the Company in a timely manner of any changes in the MSAG or ESN assignments.

9-1-1 EMERGENCY TELEPHONE SERVICE

DESCRIPTION OF SERVICES (Continued)

Enhanced 9-1-1 (E9-1-1)

E9-1-1 (or Enhanced 9-1-1) Service automatically routes 9-1-1 calls to a PSAP and provides the calling telephone number and address, and may also provide the name of the telephone access line subscriber and the names of the Emergency Response Agencies with responsibility for the caller's location.

Enhanced 911 Service Features:

Selective Routing:

This service provides for the routing of 9-1-1 calls to the designated PSAP based upon predetermined routing information associated with the 9-1-1 caller's number identification. The service provides two Selective Routers interconnected to each PSAP(s). Both Selective Routers are also interconnected to permit call routing to interflow between Selective Routers. This service arrangement enables calls to switch to either Selective Router if there are no circuits available to the target PSAP at the Primary Selective Router. Additionally, circuits from both Selective Routers to PSAPs based on Customer designated circuit quantities.

Selective Routing service routes both Wireline calls as follows:

Wireline Selective Routing - All participating Local Exchange Carrier Central Offices within an E9-1-1 network are connected to both Selective Routers via dedicated circuits. The Number Identification along with the voice connection is sent by the Servicing Central Office of the 9-1-1 caller to the Company Selective Router(s). The Selective Router(s) use the number identification to determine routing and sends both the number and voice call to the appropriate PSAP. This service includes all dedicated circuits needed to connect all Company Central Offices Local Exchange Switching Systems to both Selective Routers at a minimum P.01 grade of service. This service does not include other exchange carriers Central Office Local Exchange Switching Systems to Selective Routers.

9-1-1 EMERGENCY TELEPHONE SERVICE

DESCRIPTION OF SERVICES (Continued)

Enhanced 911 Service Features (Continued)

Selective Routing (Continued)

Additional Features of Selective Routing:

Alternate Routing - Automatically routes 911 calls to a predetermined alternate PSAP if all facilities connecting the Selective Routers to the primary PSAP are busy or not available. If the alternate PSAP is connected to the Selective Router(s) via dedicated circuits the number identification will also be forwarded. Additionally, the alternate location may receive rerouted calls via the public switched network under this routing arrangement however number identification will not be provided.

Customer Control of Alternate Routing - This service enables a person(s), having an authorized identification code and password, to individually activate alternate routing in each Selective Router.

Default Routing - This feature automatically routes 9-1-1 calls to a predestinated PSAP when the Selective Router processes a 9-1-1 call that has an incomplete or missing telephone number or ESRD. Each incoming facility group is assigned to a designated default PSAP.

Manual Transfer - This feature enables a PSAP to transfer an incoming 9-1-1 call to any emergency agency (e.g. police, fire, ambulance) by dialing the telephone number of the agency or a pre established two-digit speed calling code.

Fixed Transfer - This feature enables a PSAP to transfer incoming 9-1-1 calls to a standard combination of emergency agencies (e.g. police, fire, ambulance). Only one combination, per PSAP, is available with this feature.

Selective Transfer - This feature enables a PSAP to transfer incoming 9-1-1 calls based on a unique combination of emergency agencies (e.g. police, fire, ambulance) responsible for providing emergency service to the specific location of the 9-1-1 caller. Each 9-1-1 Service area is defined by an "Emergency Service Number" (ESN). ESNs will be provided by the Company.

Section 9

Original Sheet 13

9-1-1 EMERGENCY TELEPHONE SERVICE

DESCRIPTION OF SERVICES (Continued)

Enhanced 911 Service Features (Continued)

a. Database Administration Service –

A Database Administration System capable of receiving subscriber information from Exchange Carriers and Private Branch Exchange (PBX) Owners. This service provides the following: validates subscriber address to match the Master Street Address Guide (MSAG); assigns Emergency Service Number (ESNs) to telephone numbers and ESRDs; provides addition, deletion, and change updates of subscriber names, telephone numbers, addresses to the Centralized ALI Storage/Processing System; provides addition, deletion and change updates of ESNs associated with telephone numbers and ESRDs in the Selective Router(s).

b. Centralized Automatic Location Identification (C-ALI) Storage/Processing

The C-ALI system stores subscriber information associated with the E911 service area. It is used by the PSAPs to retrieve location data of a 9-1-1 caller. This service is provided via a network based system consisting of two identical components, one being the primary component responding to the PSAP, the other providing redundant capabilities. This Service includes the connections between the C-ALI Storage/Processing components to all Primary PSAP(s). This Service provides location information for both wireline callers as follows:

Wireline

Upon receipt of an ALI query, the system will respond with the subscriber's name, street address and community associated with the telephone number.

9-1-1 EMERGENCY TELEPHONE SERVICE

ADDITIONAL SERVICES

Additional 9-1-1 Features

A package of additional central office features is available where operating conditions permit:

Forced Disconnect - Enables the PSAP attendant to release a connection on a 9-1-1 call even if the calling party remains off-hook.

Called Party Hold - Enables the PSAP attendant to hold a 9-1-1 connection even if the calling party hangs up.

Emergency Ringback - Allows a PSAP attendant to ring back the caller's line.

Additional 9-1-1 Features are available only when there is direct trunking from the originating central office to the PSAP and when the PSAP CPE has the appropriate signaling capability.

GENERAL SERVICES

SWITCHED DATA SERVICE

DESCRIPTION

Switched Data service is a network service that provides the capability for switched digital end-to-end data transport.

The customer may subscribe to Switched Data service under one of the following service arrangements, except when conditions specified on Sheet 2 are applicable.

Switched Data Individual Line Loop Extension

An extended loop capability that transports Switched Data usage between the customer premises and the local serving central office. Each Switched Data Individual Line Loop Extension provides one channel which supports data transmission only. Each channel can transmit up to 56,000 bits per second, or up to 64,000 bits per second depending on technology.

Switched Data Channel Access

A 1.544 Megabit high capacity digital facility that transports Switched Data usage between the customer premises and the local serving central office on a channelized basis. Switched Data Channel Access provides 24 digital channels that supports data transmission only. On a per channel basis, the customer can transmit data up to 56,000 bits per second.

CONDITIONS

The minimum billing period for which service is provided is one month.

End User charges (Subscriber Line Charges) as specified in the End User Facilities For Interstate Access (FIA), Section 13, of the Company's Interstate Access Tariff will apply to Switched Data service. For each Switched Data Channel Access, the End User FIA charge will apply twice. For each Switched Data Individual Line Loop Extension, the End User FIA charge will apply twice.

For Presubscription of an Interexchange Carrier, the rates and regulations as set forth in the Company's Interstate Access Tariff will apply to Switched Data service.

A directory listing for Switched Data service will be provided upon request in accordance with Section 5 of this Price List.

GENERAL SERVICES

SWITCHED DATA SERVICE

CONDITIONS (Continued)

Switched Data Individual Line Loop Extension can be provided where:

- A customer's local serving central office is capable of providing Switched Data.
- A customer's local serving central office is not capable of providing Switched Data. The Company will determine the nearest designated central office capable of providing Switched Data service. Interoffice digital data service (DDS) mileage will apply from the non-capable central office to the central office capable of providing Switched Data at the rates shown in the appropriate Price List. ¹ In this situation, the dialing plan associated with the central office that will be providing the Switched Data service to the customer will be utilized.

Switched Data Channel Access can be provided where:

- A customer's local serving central office is capable of providing Switched Data.
- A customer's local serving central office is not capable of providing Switched Data. The Company will determine the nearest central office capable of providing Switched Data. Interoffice digital high capacity mileage (1.544) will apply from the non-capable central office to the central office capable of providing Switched Data at the mileage rate shown in the appropriate Price List. ² In this situation, the customer will utilize the dialing plan associated with the central office that delivers the digital dial tone.

Access to Switched Data service is obtained through a dial-up connection via the public switched telephone network using the standard 7 through 10 digit methods.

Origination of calls for 800/866/877/888, 900, 976, 0- (IntraLATA) and 0+ (IntraLATA) is restricted.

The provision of Switched Data service is subject to the availability of certain central office and outside plant facilities.

Switched Data requires the use of customer provided data equipment (CPE) that must be compatible with the Company's equipment and facilities.

¹ Use Digital Data Service interoffice mileage in the Company's Access Price List, Section 5.7.10(A).

² Use High Capacity 1.544 Megabit (DS-1) mileage in the Company's Access Price List, Section 5.7.7(A).

GENERAL SERVICES

SWITCHED DATA SERVICE

FEATURE DESCRIPTIONS

Standard Features

Data Line Security – This feature prevents a call from being interrupted by override tones, such as a call waiting tone, or other tests that would interrupt the flow of data. (T)

Intercom Dialing – This feature allows customer group stations to complete calls to other stations without the assistance of an attendant, by dialing a 2 through 7 digit number. This feature is applicable to Customized Multi-line Telephone Service customer groups only and is restricted to the serving wire center only.

Direct Dialing – This feature allows the user to place local and long distance calls without the assistance of an attendant by using the standard 7 through 10 digit dialing methods.

Optional Features

Data Direct Connect – This feature provides an automatic connection between a Switched Data calling line that goes off-hook and a predetermined location.

Data Closed User Group – This feature, restricted to Customized Multi-line Telephone Service lines, provides partitioning of Switched Data lines into groups where calls within such a group are allowed, but calls between such groups are denied.

Optional Feature Packages

The following feature packages are available for use with Switched Data service:

Feature Package Data 1000 includes:

Data Toll Restriction – This feature will restrict toll calls from being placed over Switched Data lines.

Data Sequential Hunt Group – This feature assigns a pilot telephone number to the hunt group. Hunting is sequential, i.e., starting at the first line assigned to the pilot telephone number and ending at the last line.

GENERAL SERVICES

SWITCHED DATA SERVICE

DEFINITIONS

Bit

A binary digit. The smallest unit of information in the binary system of notation.

Bits Per Second

The number of bits transmitted per second. A measure of the speed of transmission of digital information.

Digital

Information which is expressed in discrete or non-continuous form.

Hunting

A search through a group of telephone numbers until an idle number is found or the last number of the group is reached.

GENERAL SERVICES

SWITCHED DATA SERVICE

APPLICATION OF RATES

Switched Data service is comprised of the following rate elements:

- Switched Data Customer Line
- Service Charges
- Optional Features
- Software Reconfiguration Charge
- Network Usage Charge

(T)

The appropriate regulations established in other sections of this Price List will also apply.

Rates and charges specified in other sections of the Price List for services provided in conjunction with Switched Data service (Touch-Tone, Custom Calling Service features, Customized Multi-line Telephone Service features, etc.) are in addition to the monthly rates for Switched Data service.

Customer Premises Channelization is an optional component of Switched Data channel Access. The customer may elect to support premises channelization with CPE devices. Channelization at the customer's premises when provided by the Company, is available at the rates specified on sheet 6. Both the Customer Premises channelization charge, per channel and the Customer Premises Termination charge, per access arrangement (24 channels), will apply.

Switched Data lines placed in a voice Customized Multi-line Telephone Service business group do not require Central Office Located lines for outbound data traffic. However, the customer may choose to purchase additional Central Office Located lines to support all terminating traffic that may be increase by Switched Data. The customer has the option of placing the Switched Data lines in a Switched Data-only Customized Multi-line Telephone Service business group which will not require Central Office Located lines for either outbound or terminating data traffic.

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

GENERAL

Services offered in accordance with this Price List are provided exclusively from central offices equipped with digital facilities. The availability of services and ability to provide services may vary among serving central offices. Digital (ISDN) Single Line services will be provided where central office capabilities and conditions permit.

Customer-provided equipment used in conjunction with services provided in accordance with this Price List must conform with the technical specifications of the Company.

The Company may change telecommunications services, equipment, operations, or procedures while remaining consistent with the Federal Communications Commission's Rules and Regulations. If changes cause a customer's equipment or Flexible Telephone System to become incompatible with services or if changes cause terminal equipment to require modification or become less effective, the Company shall not be responsible.

Customer requested temporary disconnections of Digital (ISDN) Single Line services are not permitted.

A change in service from a basic exchange service to Digital (ISDN) Single Line service is a discontinuation of service and an establishment of service and will cause a temporary interruption of service. However, all applicable installation and service charges and all charges applicable to the establishment of Digital (ISDN) Single Line services apply. (T)

All voice/circuit-switched data calls will be charged blocks of time, flat rate, or network usage rates at the charges stated elsewhere in this Price List.

DESCRIPTION

Digital (ISDN) Single Line Service is a local exchange telecommunications service available only to customers served from suitably equipped central offices where operating conditions permit. It is a central office based service arrangement, which consists of host central office interface equipment and software located on Company premises. Digital (ISDN) Single Line Service is a set of standards, which will enable end-to-end digital transmission, access integration, and established standardization of points of interconnection over a single access line.

End-to-end digital connectivity eliminates the necessity for voice-band modems that utilize analog signal processing techniques. Access integration refers to utilizing a single ISDN link, thereby, an end-user over a single line can access a wide variety of user information services, such as voice and circuit switched data. This service provides local exchange access, interexchange access, and features.

Digital (ISDN) Single Line Access is a service, which terminates a digital local loop at the central office and permits access to the exchange network. Only one Digital (ISDN) Single Line access element is required for each digital local loop.

A customer may order multiple Single Lines.

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

DESCRIPTION (Continued)

Digital (ISDN) Single Line Service is composed of the following elements:

- o Local Loop
- o Digital (ISDN) Single Line Access
- o Line Configuration: choose one or a combination of:
B-Voice/CSD, per line
- o Usage Options - must choose one:
Measured service (Res or Bus)
25 hours block of time (Res only)
50 hours block of time (Res or Bus)
Flat rate (Res only)
100 hour block of time (Bus only)
Measured for Circuit Switched Data Calls.

Digital (ISDN) Single Line Service is digital exchange service.

A Digital (ISDN) Single Line Access arranges a digital local loop for an individual user.

Each Packaged Service is associated with a digital local loop, not with a channel.

Each digital local loop is arranged with a B-Channel or D-Channel configuration, or both a B-Channel and D-Channel configuration.

The B-Voice/Circuit Switched Data Channel (B-V/CSD) assigns voice and circuit switched data traffic to two B-Channels of a digital local line. The CSD mode operates at a maximum speed of 64 kbps (Switched 64 kbps) but may be used at a speed of 56 kbps (Switched 56 kbps).

Data sent to interexchange carriers over B-V/CSD Channels in the CSD mode can be transmitted at either 64 kbps or 56 kbps. (Some interexchange carriers do not offer transmission at 64 kbps).

Advice No. 1

Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 08/16/10

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

CONDITIONS

Digital (ISDN) Single Line Service is available where central office and operating facilities and conditions permit.

Digital (ISDN) Single Line Service is not available for resale.

One bill will be rendered for each Digital (ISDN) Single Line Service.

The Company makes no guarantee and assumes no liability for sharing by the customer of the Digital (ISDN) Single Line Service and its associated facilities, including (without limitation) the failure of any person to pay the customer's billing for any reason whatsoever, including (without limitation) denied toll calls and toll fraud.

Digital (ISDN) Single Line Service is offered on a term commitment basis commencing on the date the service is established.

A minimum term commitment of three months is required for each ISDN Single Line service.

Digital (ISDN) Single Line Service Line and Feature Packages rates apply each month from the time the system is placed in service.

Rates and charges for Digital (ISDN) Single Line Service contemplate the use of central office equipment selected by the Company. When special central office equipment or features are provided at the request of the customer, special assembly rates and charges may be applied in addition to those shown herein.

Private Line arrangements or Special Access Services connected with Digital Single Line Service are subject to rates, rules, and conditions as set forth in the appropriate Price Lists.

Certain optional feature capabilities may not be compatible with other Feature Packages or Optional System features.

Definitions of Individual Calling Services, Packages, and CLASS Features are provided in Section 7 of this Price List.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.
By Kenneth Mason, Vice President of Government and Regulatory Affairs

Effective: 08/16/10

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

CONDITIONS (Continued)

Additional Telephone Numbers

Up to two primary telephone numbers are provided with each activated Digital (ISDN) Single Line one for each of 2 channels. If an additional telephone number is required an additional number charge applies for each additional number. The additional telephone numbers are available at the rate shown in this section. Additional telephone numbers may be published in the directory at the additional listing rates as found in Section 5 of this Price List.

Digital (ISDN) Single Line Access

Digital (ISDN) Single Line Access provides support for connecting from one to eight terminals belonging to the same customer on an individual digital local line.

Only one user will be connected to each B-Channel. Other users on the same digital local loop can access the D-Channel only.

A maximum of eight terminals belonging to the same customer are permitted per Digital Single line.

Individual Line Loop Extension

Digital (ISDN) Single Line Individual Line Loop Extension provides a physical extension of the Digital (ISDN) Single Line loop from approximately 18,000 feet to approximately 36,000 feet (Distances are for planning purposes; actual distances are dependent on decibel (dB) loss and not just physical loop length.) This physical extension is accomplished by means of a central office installed power module and an outside plant installed regenerator or U-Repeater.

The deployment method is based on dB loss and not on specific cable footage. The vendor installation information indicates that up to a 34dB loss at 40kHz in either direction of the field repeater is acceptable. The Company's engineering practice identifies a maximum loss for the Digital (ISDN) Single Line Service loop as 38dB at 40kHz. If the service distance exceeds the 38dB for standard installation, a U-Repeater may be mounted within the stated range of 34dB, thereby extending the service length another 34dB from the U-Repeater installation point. Only one U-Repeater and associated power module can be used per Digital (ISDN) Single Line.

The customer's network access line is pre-engineered to determine if a U-Repeater/power module is required. The customer will not be charged the Digital (ISDN) Single Line Individual Line Loop Extension rate unless the equipment is actually used. The charge will not be invoked based on the cable footage. The power module is designed for use only with the U-Repeater and the repeater can only be used with the power module. The appropriate Individual Line Loop Extension rate will apply in addition to rates for Digital (ISDN) Single Line Service.

One interexchange carrier must be selected for all voice and circuit switched data telephone numbers associated with the same digital local loop.

Advice No. 1

Issued: 08/05/10
Issued by Frontier Communications Northwest Inc.

Effective: 08/16/10

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

CONDITIONS (Continued)

Foreign Central Office

If ISDN is not available from a customer's normal serving central office, the company may choose to provide service from the nearest ISDN-capable office. If ISDN is available from a customer's normal serving central office, the customer must accept service from that office and ISDN Foreign Central Office/Foreign Exchange is not available to the customer.

At the Company's discretion, Digital (ISDN) Single Line Service may be provided to a non-capable central office. In this instance, if the customer is served from a central office/exchange which has the same local calling scope as his normal serving central office/exchange, no Foreign Central Office/Foreign Exchange charges will apply.

Should the customer be served from a different local calling scope from the customer's normal serving central office/exchange, Foreign Central Office/Foreign Exchange charges as specified in Section 6 of this Price List will apply.

When ISDN service becomes available from the customer's normal serving central office, the customer will accept a number change to a number associated with the ISDN serving central office. The customer will be subject to calling areas associated with the normal serving central office, as specified in Section 4 of this Price List.

If the customer does not wish to take ISDN service from the normal serving central office after the service is available from their office, but continues to utilize service from an alternate serving central office, Foreign Central Office/Foreign Exchange charges will apply.

No charge will apply to transfer the customer back to their normal serving central office as set forth above.

Provisioning of ISDN from non-capable ISDN offices is solely at the discretion of the Company.

Subsequent Additions, Deletions and Changes

Subsequent line additions will be rated under a new term commitment or an addendum to an existing term commitment based upon the remaining period of the initial term.

Termination Liability

In the event Digital (ISDN) Single Line Service is terminated by the customer prior to completion of the initial term period, Termination Liability charges, as outlined in General Regulations, Section 3, will apply.

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

DEFINITIONS

B-Channel (Bearer Channel)

A channel used to carry digitized voice and data information at a speed of 64 kbps.

Clear Channel Capability

The capability to transport 64 kbps over a channel with no constraint on the quantity or on the sequence of bits.

Channel

The electrical path provided by the Company between two or more terminating points for the transmission of information or intelligence.

D-Channel (Delta Channel)

A communications path that operates at 16 kbps in support of network control signals.

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

DEFINITIONS (Continued)

Digital (ISDN) Single Line

Single Line Service is based on industry Standard Integrated Services Digital Network (ISDN) Basic Rate Interface (BRI) technology where one line includes two 64 kilobits (kbps) per second B-Channels and one D-Channel.

Integrated Services Digital Network (ISDN)

A set of standards which enable end-to-end digital transmission, access integration, and established standardization of points of interconnection over a single access line. End-to-end digital transmission eliminates the necessity for voice-band modems that use analog processing techniques. Access integration refers to utilizing a single ISDN line, whereby an end user over one line can access a wide variety of user information services such as voice and circuit switched data.

Digital (ISDN) Single Line Access

The central office termination of a BRI Line arranged for access to the public switched network.

Kbps

Kilobits Per Second.

Mbps

Megabits Per Second.

User

A member of a business system.

MBKS

Multibutton Key Set.

Circuit Switched Data 1000 Package

Data Call Forward allows a customer to forward incoming calls to another telephone number.

Data Multi-Line Hunt Group provides sequential hunting among lines in a hunt group for calls to a pilot number.

Data Speed Call-Short List allows speed calling over a Circuit Switched Data Channel. A short list allows storing up to eight numbers.

Data Toll Restriction denies toll calls attempted from Circuit Switched Data Channels.

Circuit Switched Data 2000 Package - Includes CSD 1000 Package Plus:

Data Circular Hunting searches for a vacant line in a hunt group for calls to a pilot number. The hunting starts from the idle line found by the previous hunt.

Data Speed Call-Long List allows speed calling over a Circuit Switched Data Channel. A long list allows storing up to thirty numbers.

DIGITAL (ISDN) SINGLE LINE SERVICES

MULTIBUTTON KEY SET (MBKS) BASIC SERVICE (Continued)

MBKS is 5ESS switch terminology. A similar system term, Electronic Key Telephone Set (EKTS) is commonly used in DMS-100 switch terminology.

Service Descriptions and Features

Analog Shared Directory Number (DN) allows an analog user to share an MBKS DN with ISDN MBKS users. The analog user can originate, receive, or bridge onto a call on the shared MBKS DN. If an MBKS DN is shared by an analog user and if there are multiple appearances of that shared DN on the ISDN MBKS terminals, the analog user can be associated with any one call appearance of that shared MBKS DN, with the default being the first call appearance.

Call Alternation allows a station user to hold one call, make another call and then talk alternately between the two parties.

Call Forwarding provides the option of fixed and/or variable forwarding of a station's incoming calls to a predetermined number. Includes all calls or any calls reaching a busy or no answer conditions (Fixed Forwarding is established and changed by the Telephone Company, whereas variable forwarding is established and changed by the station user).

Conference Calling allows a user to set up a conference call. Conference calls can include individual Digital ISDN-SL users and outside users. Three or more parties can be connected depending on the system.

Drop allows a user to disconnect the last party added to a conference call, or the other party if only two parties are conferenced.

Feature Inspect provides service providers and end users who have display terminals with a method of determining the features and call appearances that are assigned to the buttons on a terminal. Inspecting a button is a two-step procedure: (1) The Inspect Feature button is depressed, and (2) The feature or call appearance button to be inspected is pressed. The feature assigned or, for call appearances, call related information is displayed.

INTEGRATED SERVICES DIGITAL NETWORK

DIGITAL (ISDN) SINGLE LINE SERVICES

MULTIBUTTON KEY SET (MBKS) BASIC SERVICE (Continued)

Service Descriptions and Features (Continued)

Hold allows the MBKS set user to place a call on hold by pressing the function button. Any MBKS set with the call appearance for call on hold can pick up the call by pressing the call appearance button.

Key System Coverage for Analog Lines allows an analog station set to share calls with the ISDN station set.

Multiple DN Buttons provide access to more than one Directory Number (DN) on the MBKS set. Indicator lights show the status of the DN (idle, call on hold, call in progress, etc.)

Shared Call Appearances of DN allows several MBKS station sets to share one or more DNs. Originating and terminating events on one station set affect all stations sharing that DN. The shared DNs can have multiple call appearances, multiple calls can exist on one DN, and more than one station sharing the DN can have a call active on that shared DN.

Speed Dialing (Abbreviated Dialing) permits the customer to dial selected numbers using fewer digits than normally required. This is accomplished through the assignment of abbreviated codes to frequently called numbers. One and two-digit speed dialing lists are available. The Speed Dialing Feature is available to individual lines and members (some or all) of a multi-line hunt group. Speed Dialing lists assigned to individual lines can be shared by other lines at the customer's request.

Time and Date Display is a subscription feature for ISDN attendants and ISDN station set users. The 5ESS Switch provides the time and date to the ISDN station set.

Original Sheet 21

INTEGRATED SERVICES DIGITAL NETWORK

PRIMARY RATE INTERFACE (PRI)

DESCRIPTION

Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) is a central office based service arrangement that is an alternative for individual access services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), 800 (series) Services, Wide Area Telecommunications Services, and local business trunks.

ISDN-PRI is provisioned on a clear channel 1.544 megabyte per second (Mbps) facility and uses the ISDN architecture of 23 "B" channels and one "D" channel or 24 "B" channels to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport.

ISDN-PRI provides the capability to transport customer information in the form of circuit-switched voice or data up to 64 Kbps over any "B" channel. One "D" channel can control up to 20 PRI Accesses. When the service is configured in that manner, a single "D" channel in one ISDN-PRI Access handles all signaling and control functions of the other PRI Accesses in the arrangement, which allows remaining PRI Accesses to consist of 24 "B" channels each.

The local calling scope of ISDN PRI Flat Rate Voice Channel is that of the Community Calling Plan as described in this Price List. The ISDN PRI Access customers can choose to add the Community Plus Calling Plan as described in this Price List at rates for the Central Office Located Trunk. This calling plan can be purchased instead of the Voice Channel Activation, Flat rate.

The PRI Term & Volume Plans include the PRI Access, the DS1 Switched Facility, standard features and Channel Activations (except Tie Channels). The local calling scope of ISDN PRI channels in the Term & Volume Plans is that of the Community Plus Calling Plan as described in this Price List. The PRI Access Term & Volume Packages without the DS1 Switched Facility includes the same items except the DS1 Switched Facility. The packages are offered with two options: 1) Community Plus Voice with flat rate data or 2) measured voice and measured data. Tie Channels are in addition to the regular channels.

The PRI Term & Volume Plan is an optional plan.

Original Sheet 22

INTEGRATED SERVICES DIGITAL NETWORK

PRIMARY RATE INTERFACE (PRI)

CONDITIONS

ISDN-PRI service is available from serving central offices equipped with the necessary "clear channel" facilities to provide ISDN-PRI service. Feature availability and service capabilities are dependent on the facilities and the digital technology providing the service.

Customer Provided Equipment (CPE) must be NI-2 compliant. Any CPE that requires custom switch features not supported in the NI-2 specification may be supported as an exception and priced on an individual case basis. Custom ISDN features based in specific switch types may be provided on individual case basis.

The service is available from central offices that have the necessary facilities to provide ISDN-PRI service and the customers serving wire center is ISDN-PRI capable.

If a customer desires ISDN PRI service from an alternative central office and/or ISDN PRI service from an alternative central office is necessary because the customer's normal serving wire center is not suitably equipped, such service may be provided; however the customer will be provided with the dialing plan associated with the alternative central office. The Local PRI Access, Channel Activations and PRI Facility rates and charges will apply in addition to the Special Transport Terminations (two apply) and Special Transport Mileage rates when the service is provided from an alternative central office within the local calling scope of the customer's normal central office.

When a customer's serving office is part of a Remote Switching Cluster, additional Special Transport Termination and Special Transport (mileage) charges are not applicable. A Remote Switching Cluster exists when the remote switch is dependent on the host switch for its software processing. A remote switch can process only intra-office calls with the host switch. Customers served from a Remote Switching Cluster may subscribe to ISDN-PRI from the host switch at no additional charge, provided the customer's local calling area and telephone numbers are those provided from the remote switch.

This Price List provides for PRI switching capabilities only and additional services must be subscribed to under separate sections of this Price List. Each ISDN-PRI trunk group is provided with one telephone number. Additional numbers may be purchased at the rates specified for Direct Inward Dialing (DID) service.

Customers with a term commitment who disconnect ISDN-PRI services before the expiration of the term period, shall pay an early termination liability charge as outlined in General Regulations, Section 3. Termination Liability does not apply to optional features. The termination liability charge will not apply when a customer converts from PRI Access and Facility to a PRI Access only when the PRI is connecting to an alternate high capacity facility

During the initial term commitment period, the customer may add PRI services at the same monthly rate specified in the customer's original term commitment.

INTEGRATED SERVICES DIGITAL NETWORK

PRIMARY RATE INTERFACE (PRI)

CONDITIONS (Continued)

If a customer discontinues other Company services and establishes ISDN-PRI that utilizes the same facilities (i.e., Digital Channel Service), the nonrecurring charge associated with the ISDN-PRI facilities (DS1 facilities) will be waived for the same quantity replaced by the ISDN-PRI facilities to which the customer currently subscribes. The nonrecurring charges associated with the ISDN-PRI access portion of the new service applies in all instances.

The PRI Subsequent Activity Charge (SAC) is applicable for any changes to customer configurations after the initial installation. The SAC is applicable per occurrence and not based on the number of trunks.

Customers on an existing PRI contract plan may convert to a new contract plan without incurring termination liability charges provided the value of the new contract is equal to or greater than the remaining value of the existing contract plan.

All of a customer's Telephone Company provided Term and Volume Plan PRIs within a state will count towards the volume contract threshold. Volume contract customers may change the number of PRIs during the volume term period. In the event customers under a volume contract make subsequent PRI increases or decreases that cause the total number of PRIs to fall within a different threshold level, all remaining PRIs will be billed at the applicable level rate for the remainder of the volume contract term period. The customer must provide the account information of the PRIs included in the volume contracts at the time of the initial installation of service and with each change to the service under the volume contract.

Two-year volume contract customers may subscribe to 3-year contract PRI features and facilities when 2 year contract rates are not available.

INTEGRATED SERVICES DIGITAL NETWORK

PRIMARY RATE INTERFACE (PRI)

FEATURES DESCRIPTIONS

STANDARD FEATURES

The following B-channel features are offered to the customer at no additional charge:

Calling Number Identification is a standard feature that allows the customer to have access to the directory number of the calling party.

"D" Channel Back-Up automatically takes over for a failed "D" channel in case of trouble. This may be subscribed to as part of a 23B+D Channel Back-Up arrangement.

Call-by-Call Service Selection provides an option to the dedicated channel configuration by allowing channels to be configured to access multiple services on a per call basis. With this feature, separate facilities are not required for individual services, such as DID, DOD, WATS, 800 (series) services, and local switched access lines.

Clear Channel Capability allows the customer to transport 64 Kbps over the PRI channels with no constraint on the quantity or sequence of bits using the "Bipolar with Eight Zero Substitution" method of providing bit sequence independence.

Non-Facility Associated Signaling (NFAS) allows the D-channel signaling entity to assign calls to channels on more than one interface (including the one containing the D-channel). The collection of these B-channels and the controlling D-channel is called a PRI group. Multiple DS1 Facilities can be assigned to a PRI group.

Two Way Service provides an option to the dedicated channel configuration by allowing two way calls on all channels.

PRIMARY RATE INTERFACE (PRI)

FEATURES DESCRIPTIONS (Continued)

OPTIONAL FEATURES

Calling Line Identification (CLID) with Name: Allows the customer to have access to the directory number and name of the calling party. No additional service charge will apply for CLID with Name feature if installed with initial PRI order. If CLID with Name is added to an existing PRI arrangement, the Service Order Charge – Subsequent in Section 4 of this Price List, will apply. CLID with Name is available only where facilities and conditions permit. CLID with Name is available on a 1-, 3-, 5 year term commitment or Term and Volume plan.

(T)
(T)

PRI Station Detail Billing: Provides individual station call details for all stations utilizing a Customer's ISDN Primary Service at an account level on a monthly basis. These details are provided with the normal customer bill or on the Frontier Communications Inc. website via the Internet.

PRI Station Detail billing is only available with message/measured usage service. Individual PRI Station Call Detail is for informational purposes only. Exact billing information is located in the Measured Call Summary portion of the bill.

The customer's ISDN Primary Service must be equipped with Calling Party Default Directory Number with the Calling Party Screening option. Customers will not have the option to change the Calling Party Number and CPN may not be deleted. Customers will have the option to define a partial listing in the screening list. Specific call details will not be provided for stations not included in the screening list. The screening list may not include 800 numbers, fictitious numbers, private network numbers or Centrex Dialing Plan numbers defined in the screening tables. Station Call Details will only be provided for valid telephone numbers within the switch providing the customer's ISDN Primary Service.

Tie Channel Service: Provides intercom capability on "B" channels of ISDN-PRI arrangements and other digital Customized Multi-line Telephone Service within the same subscriber network (central office to central office). This feature provides the capability to communicate on a private facility basis, as a tie line between Customized Multi-line Telephone Service served from different central offices. Tie channels on a single ISDN-PRI arrangement can be configured for intercom calling to a Customized Multi-line Telephone Service and local exchange access for CPE. Intercom calls between an ISDN-PRI arrangement and a Customized Multi-line Telephone Service do not incur usage charges. Calls to telephone numbers outside of a Customized Multi-line Telephone Service without intercom capability may incur usage charges.

Tie Channel Service may terminate on CPE at a customer location or at an Intermediary Customer (IC) location. Rates for Tie Channel Service to Customer Premises or Central Office to Central Office are available on a per "B" channel basis or on a per ISDN-PRI basis. Rates for Tie Channel Services to IC are available on a per "B" channel basis or on a per PRI basis when 10 or more channels are activated.

Tie Channel to an Intermediary Customer (IC): "B" channels may be specified as dedicated to compatible services of an interexchange carrier or other service provider. The rate for the ISDN-PRI Facility is as specified in the Rate section following. The intermediary customer will be required to order a 1.544 high capacity digital services facility to the customer's ISDN-PRI serving central office from the appropriate Frontier interstate or intrastate access services tariff.

INTEGRATED SERVICES DIGITAL NETWORK

INTEGRATED SERVICES DIGITAL NETWORK (ISDN) - PRIMARY RATE INTERFACE (PRI) BUNDLED SERVICE

GENERAL

Integrated Services Digital Network (ISDN) - Primary Rate Interface (PRI) Bundle Service is an optional business package that provides a digital trunk with 23 B-channels for circuit switched voice and data and 1 D-Channel for signaling plus Caller ID and the option of Direct Inward Dialing (DID) numbers.

APPLICABILITY

Applicable to network services provided in accordance with Integrated Services Digital Network (ISDN) – Primary Rate Interface (PRI) Bundle Service standards.

TERRITORY

Within all exchange areas as those areas are defined by maps filed as part of this Product Guide.

CONDITIONS

ISDN PRI Bundle Service is available where technically feasible.

The bundles are offered for 2-, 3- and 5-year term commitments. A termination fee of 50% of the Monthly Recurring Charges will incur for the remainder of the term commitment period.

A customer may convert an existing term commitment to a new term commitment prior to the completion of the existing term without penalty. The customer will be charged a Subsequent Activity Charge as specified in Section 11, Sheet 27 of this Price List for the change and will pay the current rates in effect for the term commitment chosen.

When a customer's serving office is not suitably equipped and/or the customer chooses to subscribe to ISDN-PRI Service from another central office, the customer will utilize the dialing plan associated with the designated ISDN-PRI central office. For PRIs served from an alternate central office, the normal PRI rates will apply in addition to the charges for Special Transport Termination and Special Transport (Mileage).

ISDN-PRI customers who are served from a foreign node may request to have their service provided from their local central office when facilities become available at that office. The Service Order Charge – Initial and nonrecurring charges for T-1s and ports will be applicable, and termination charges will not apply on that transfer provided that the quantity of T-1s and ports are preserved. Customers who choose to continue service from a foreign node will be subject to the monthly rate for interoffice facilities. In addition, a number change generally will be required on any transfer from a foreign node to a local central office.

(T)

Ports will be provided at the T-1 level only.

Customer provided equipment used to connect to ISDN-PRI Bundle Service must meet Company requirements.

Advice No. 65

Issued: 09/21/16
Issued by Frontier Communications Northwest Inc.
By Steve Crosby, Senior Vice President of Regulatory Affairs

Effective: 10/03/16

INTEGRATED SERVICES DIGITAL NETWORK

INTEGRATED SERVICES DIGITAL NETWORK (ISDN) - PRIMARY RATE INTERFACE (PRI) BUNDLED SERVICE

(N)

CONDITIONS (Continued)

The Company shall not be responsible to the customer if changes in any of the facilities, operations, or procedures utilized in the provision of ISDN-PRI Bundle Service render any equipment provided by a customer obsolete or require any modification or alteration of such equipment or system or otherwise affect its use or performance.

The customer must subscribe to services and specify each type of traffic that will be transported across the ISDN-PRI Bundle Service port (i.e., DID, DOD). All rates and regulations for these services will apply. The bundle is offered as flat rate voice with measured data. Usage charges generated by using ISDN-PRI will be measured and billed in accordance with the rates specified in this Price List.

Appropriate nonrecurring charges apply for installation of and changes to ports, T-1s and features ordered by the customer except as set forth in Rates following.

RATES

	<u>Monthly Rate</u>
<u>2-Year Term</u> ¹	
ISDN-PRI Bundle ²	\$575.00
ISDN-PRI Bundle with 20 DID Numbers ²	590.00
ISDN-PRI Bundle with 50 DID Numbers ²	595.00
ISDN-PRI Bundle with 100 DID Numbers ²	600.00
<u>3-Year Term</u> ¹	
ISDN-PRI Bundle ²	\$475.00
ISDN-PRI Bundle with 20 DID Numbers ²	490.00
ISDN-PRI Bundle with 50 DID Numbers ²	495.00
ISDN-PRI Bundle with 100 DID Numbers ²	500.00
<u>5-Year Term</u> ¹	
ISDN-PRI Bundle ²	\$425.00
ISDN-PRI Bundle with 20 DID Numbers ²	440.00
ISDN-PRI Bundle with 50 DID Numbers ²	445.00
ISDN-PRI Bundle with 100 DID Numbers ²	450.00

¹ Nonrecurring Charges do not apply to the initial installation of an ISDN-PRI Bundle.

² Channels activated for data will generate Usage Charges as set forth in ISDN-PRI Service, Section 11, Sheet 27 (Voice/Data Channel Usage).

Original Sheet 1

DS1 CYBER SERVICE

(T)

GENERAL

DS1 Cyber Service provides network dial tone service between a customer's premises and the local serving office on a channelized basis (DS0) over a single high-capacity (DS1) digital facility that terminates on the trunk side of the switch in the local serving office. DS1 Cyber Service is available for data dialed access use. (T)

DS1 Cyber Service is provided in capacity increments of 24 digital channels within a single DS1 (1.544 Mbps) signal. (T)

DS1 Cyber Service provides a trunkside DS1 connection with 24 channels. DS1 Cyber Service does not provide the function of analog to digital (or vice versa) conversions, and no service types can be specified on the DS1. (T)

DS1 Cyber Service is comprised of a DS1 Cyber Service Capacity component: (T)

The DS1 Cyber Service Capacity will be at the rates and charges as specified under RATES of this Section. (T)

DS1 Cyber Service customers will have to select capacity in increments of 24 digital channels. (T)

Section 12

1st Revised Sheet 2
Canceling
Original Sheet 2

DS1 CYBER SERVICE

(T)

DIGITAL ARCHITECTURE

DS1 Cyber Service differs in provisioning method and numbering format from end-to-end services. DS1 Cyber Service will be available from the Company on a link basis rather than as an end-to-end service. This architecture is intended to promote more efficient connectivity of analog and digital networks.

(T)

If the DS1 Cyber Service facility has been provisioned and is ready for use but the customer's related network services are not ready, then the system will not be functional.

(T)

DS1 Cyber Service will be available on a digital basis at the network interface on a customer's premises. Both the Company and the customer have joint responsibilities to ensure the proper transmission of the provided services. Normal analog channel network interface specifications will be superseded by the electrical specifications on the 1.544 Mbps (DS1) channel which is actually terminated. Each digital channel provided will have an identity only as a "time slot" within a DS1 Channel. Compatible digital to analog conversion equipment must be provided by the customer to derive the desired analog services. Any Channel Service Units (CSUs) necessary for digital services are the responsibility of the customer.

(T)

Section 12

1st Revised Sheet 3

Original Sheet 3

DS1 CYBER SERVICE

(T)

DEFINITIONS

Channel Service Unit (CSU). The term CSU denotes network channel terminating equipment provided by the customer to terminate digital channel facilities on a customer's or user's premises.

DS1 Cyber Capacity. A DS1 signal between the customer premises and the central office. This digital link can be used to transport switched data services. DS1 Cyber Service is available in increments of 24 digital channels.

(T)

(T)

DS0. The term DS0 denotes a channel service expressed in terms of its digitally encoded data bit rate in accordance with the North American hierarchy of digital signal levels. It is generally referred to as having a 64 Kbps transmission bit rate signal; however, customer transmitted bit rates are limited to 56 Kbps. The required format and interface specifications are stated in Section 7000 of the Company Technical Interface Reference Manual.

DS1. The term DS1 denotes a channel service expressed in terms of its digitally encoded bit rate in accordance with the North American hierarchy of digital signal levels. It has a 1.544 Mbps transmission data rate and provides for the two-way simultaneous transmission of isochronous timed bit stream format. Unframed signal formats are not permitted or compatible with Company equipment. The required format and interface specifications are stated in Section 7000 of the Company Technical Interface Reference Manual.

Section 12

1st Revised Sheet 4

Original Sheet 4

DS1 CYBER SERVICE

(T)

REGULATIONS

DS1 Cyber Service is furnished subject to the availability of facilities from digital central office equipment located in a central office building owned or leased by the Company. Clear Channel Capability (B8ZS) will be provided where available.

(T)

DS1 Cyber Service is available within an exchange where appropriate digital facilities are available as determined by the Company. Service inquiries will be necessary to determine availability. Special Construction Charges as specified in Section 4 of this Price List may be applicable.

(T)

All DS1 Cyber Service must be channelized in a single equipment location on a customer's premises. DS1 Cyber Service cannot be split between premises, or multiple locations within a premise. Standard network interfaces, without Integrated Services Digital Network (ISDN) signaling and without any line type features, will be provided by the Company for analog and digital services consistent with existing practices.

(T)

The technical specifications and standard network interface for DS1 and associated channelized services are stated in Section 7000 of the Company Technical Interface Reference Manual.

APPLICATION OF RATES

The DS1 Cyber Service Capacity rate is applicable to each DS1 Cyber Service.

(T)

The DS1 Cyber Service Capacity element provides for the network facility to the customer premises and the central office channelization.

(T)

DS1 Cyber Service is available on a month-to-month basis, or on a 12-, 24-, or 36-month term commitment. A change from month-to-month to a term commitment will incur a Records Only Change Charge found in Section 4 of this Price List. In the event DS1 Cyber service is terminated by the customer prior to the completion of the current term commitment period, Termination Liability as outlined in General Regulations, Section 3 will apply.

(T)

(T)

Supersedure (transfer) of service responsibility between customers is permitted subject to the rules and regulations as specified in Section 3 of this Price List.

Unless specified herein, rules and regulations contained elsewhere in this Price List are also applicable to DS1 Cyber Service.

SPECIAL CHANNEL SERVICES

GENERAL

Special Channel Service (Private Line) facilities provide a transmission path to connect two or more points within a wire center for the purpose of providing local telecommunications. The technical parameters of these facilities are limited to standard voice grade capabilities. Customers may use the facilities for purposes such as voice, data, metering, etc., however, the Company does not guarantee transmission quality beyond the stated parameters.

This Price List contains rates and conditions applicable to Special Channel Services within a customer's serving wire center. Any Special Channel Service requiring transmission parameters beyond voice grade, plus all interexchange and intraexchange inter wire center private line facilities, are provided under Section 5 of the Company's Facilities for Intraexchange Access Price List.

The transmission performance characteristics of each Special Channel offering are stated in the Company's Technical Interface Reference Manual. The Company will maintain existing transmission specifications on services installed prior to the effective date of this Price List, except that existing services with performance specifications exceeding the standards in the Company's Technical Interface Reference Manual will be maintained at the performance level specified in the manual. The Manual further defines technical parameters of channels and supplemental features found in this Price List that may be referenced when required.

SPECIAL CHANNEL SERVICES

ELEMENTS OF SERVICE

Special Channel Service consists of different elements which, when applied in various combinations, provide a variety of services to meet customer requirements. These elements are:

Types of Channels

The types of channels provided under this Price List typically have uses for:

Remote metering, supervisory control and miscellaneous signaling (formerly referred to as Series 1001)

Remote metering, supervisory control and miscellaneous signaling and transmission between low speed teletypewriters (formerly referred to as Series 1005)

Voice between telephone sets, key or PBX telephone systems or similar equipment not switched to the telecommunications network (formerly referred to as Series 2001)

Voice and combined voice and tone control in connection with private land radio-telephone stations (formerly referred to as Series 2002)

Remote metering, supervisory control and miscellaneous signaling and transmission of data signals generated by customer-premises data processing equipment (formerly referred to as Series 3003 when terminated on a 4-wire interface, and Series 3004 when terminated on a 2-wire interface)

Distribution of music or in connection with apparatus for recording of sounds (formerly referred to as Series 6003)

Local Area Data Channels (formerly referred to as Series 11000)

SPECIAL CHANNEL SERVICES

ELEMENTS OF SERVICE (Continued)

Types of Channels (Continued)

The before mentioned channels may be provided by two-wire or four-wire channels, as appropriate, when they meet the parameters as follows:

Two-Wire Voice Grade Channel

These facilities are unconditioned and are capable of transmitting voice or data signals within the frequency spectrum of approximately 300 Hz to 3000 Hz. These facilities are furnished on a two-point or multi-point basis and may be terminated two-wire or four-wire at the point of termination. They permit the simultaneous transmission of information in both directions over a circuit, but cannot ensure independent information transmission simultaneously in both directions.

Four-Wire Voice Grade Channel

These facilities are unconditioned and are capable of transmitting voice or data signals within the frequency spectrum of approximately 300 Hz to 3000 Hz. The facilities are furnished on a two-point or multi-point basis and may be terminated two-wire or four-wire at the point of termination. When terminated four-wire, they permit simultaneous independent transmission of information in both directions over a circuit. However, when terminated two-wire, simultaneous independent transmission cannot be supported.

SPECIAL CHANNEL SERVICES

ELEMENTS OF SERVICE (Continued)

Supplemental Features:

Supplemental features are items, which can be added to a Special Channel Service to provide enhanced capabilities or improve its utility. Customer use of supplemental features is limited only to the extent that such use must not harm the network.

The following is a list of supplemental features that are offered under this Price List:

Bridging

Bridging is the function of connecting three or more loops in a wire center for the multipoint arrangement. Two types of bridging are offered under this Price List.

Multipoint Data Bridging

This feature provides the capability to derive a multi-point data circuit from a single facility and is normally provided on Voiceband facilities provided for transmission of data signals. This function is provided on a per port basis where facilities are available.

Voice Conference Bridging

Bridging arrangement to connect multiple Voiceband facilities in order that a voice frequency input signal from any location will be reproduced at the output of all other circuit locations. This function is provided on a per port basis where facilities are available.

SPECIAL CHANNEL SERVICES

ELEMENTS OF SERVICE (Continued)

Supplemental Features: (Continued)

Conditioning

Data conditioning, when used with effective four-wire voice grade transmission facilities, improves the characteristics of the channel. These improved characteristics apply only to that portion of the facility provided by the Company, and not the service provided by the customer.

Only Types C and DA Data Conditioning are provided under this Price List (and may be combined on the same circuit).

Type C conditioning controls attenuation distortion and envelope delay distortion as follows:

Attenuation distortion - with reference to the loss at 1004 Hz, will be controlled within an Acceptance Limit (AL) of -0.5 dB to +3.0 dB to Immediate Action Limit (IAL) of -1.0 dB to +3.0 dB in an approximate range of 300 - 3000 Hz.

Envelope delay distortion must not exceed a maximum difference of AL 2,950 microseconds and IAL 3,000 microseconds in an approximate range of 500 - 3000 Hz.

Type DA conditioning controls the signal to C-notched noise ratio and intermodulation distortion. Facilities will have the following characteristics:

Signal to C-notched noise ratio with AL greater than or equal to 34 dB and IAL, 32 dB.

Nonlinear signal to second order distortion with AL greater than or equal to 40 dB and IAL, 38 dB.

Nonlinear signal to third order distortion with AL greater than or equal to 44 dB and IAL, 42 dB.

SPECIAL CHANNEL SERVICES

ELEMENTS OF SERVICE (Continued)

Supplemental Features: (Continued)

Signaling

Signaling is the capability inherent in the facility design to accommodate the transmission of a signal from an input source to be received at the distant end.

Signaling arrangements, when furnished with Voiceband transmission facilities, enable these facilities to accommodate standard telecommunications signaling protocols. Signaling arrangements charges apply whenever Voiceband facilities terminate on Company provided wire center switching equipment or certain Terminating Options as described previously.

Signaling arrangements are available with Voiceband transmission facilities to enable transmission of requested signaling formats. Signaling charges will apply for each signaling conversion. On facilities requiring multiple signaling arrangements a corresponding signaling arrangement charge will apply for each conversion. Available signaling arrangements are as listed below:

Loop Signaling Range Extension - An arrangement to extend the metallic resistance limitations of loop type signaling.

Conversion of Loop or E&M Signaling to SF - An arrangement to convert loop or E&M signaling to the single frequency signaling format.

E&M to DX Signaling Conversion - Conversion of E&M signaling to the DX signaling format.

E&M to Loop Signaling Conversion - Conversion of E&M signaling format to the loop type signaling.

Automatic Ringdown Signaling - A signaling arrangement on a two-point Special Access which converts loop seizure at one end of the facility into ringing signal at the opposite end.

SPECIAL CHANNEL SERVICES

CONDITIONS

All channels and facilities for Special Channel Service to the point of demarcation will be provided by the Company.

Channels will be furnished by whatever means the Company may elect, whether by wire, radio, carrier, etc., or combination thereof. Where facility and operating conditions require, the Company reserves the right to reroute an existing channel over different facilities.

The offering for DC (Metallic) and telegraph-grade facilities and services will be grandfathered as of February 19, 1992. Metallic facilities (wire pairs) are in diminishing supply, and can be expected to become less available as optical fiber is deployed and wire cables are removed.

Following a one year written notification to customers, the Company reserves the right to convert the remaining customer requested metallic facilities to other types of outside plant facilities, as may be deemed necessary.

A four-wire channel may be provided by means of two, two-wire channels when requested by the customer. When this arrangement is provided, the technical parameters of two-wire circuits will be furnished by the Company.

RESPONSIBILITIES OF THE CUSTOMER

The customer is responsible for selecting the proper type of local channel and Supplemental features to meet his service requirements.

Additional regulations outlining customer responsibilities are found elsewhere in this Price List.

RESPONSIBILITIES OF THE COMPANY

The Company undertakes to maintain and repair the network facilities which it furnishes. The customer or authorized user may not rearrange, disconnect, remove or attempt to repair or permit others to rearrange, disconnect, remove or attempt to repair any network facilities installed by the Company except upon the written consent of the Company.

Network facilities on the premises of a customer or authorized user furnished by the Company, are the property of the Company, whose agents and employees shall have the right to enter the premises at any reasonable hour for the purpose of installing, inspecting or repairing facilities or upon termination of the service or channel, for the purpose of removing such facilities.

When repair visits are incurred, and the trouble is determined to be in the customer's premises equipment, repair charges found in Section 4 of this Price List may apply.

SPECIAL CHANNEL SERVICES

RATES ¹	Monthly <u>Rate</u>	Nonrecurring <u>Charge</u>
CHANNELS (Per Local Loop):		
Two-wire Voice Grade	\$ 6.00	\$ 30.00
Four-wire Voice Grade	12.00	30.00
BRIDGING (Per Port):		
Multipoint Data Bridging	2.95	81.41
Voice Conference Bridging	6.53	59.95
CONDITIONING (Per Circuit):		
Type C Data Conditioning	.95	457.47
Type DA Data Conditioning	.83	131.63
SIGNALING (Per Local Loop):		
Loop Signaling Range Extension	5.02	170.94
Conversion of Loop or E&M Signaling to SF	11.91	274.22
E&M to DX Signaling Conversion	6.18	170.94
E&M to Loop Signaling Conversion	3.83	191.84
Automatic Ringdown Signaling	4.15	174.69

¹ These rates apply for work performed by the Company at the customer's request in connection with the installation, addition, move, or change of channels on the premises of the customer or authorized user.

Original Sheet 1

OPTIONS FOR PROVIDING ENHANCED SERVICES

DESCRIPTION

Options for providing enhanced services are central office capabilities, which can be used by Enhanced Service Providers (ESPs) who, in turn, provide services such as voice messaging services to their clients. Options for providing enhanced services include: Call Forwarding (Busy Line, Don't Answer and Busy Line/Don't Answer), Call Screening, Customer Controllable Ringing, Data Link, Forwarded Call Information, Inter-Switch Voice Messaging (ISVM), Message Waiting Indication-Audible, Message Waiting Indication-Audible Ring Burst, Message Waiting Indication-Visual, Queuing and User Transfer. Subscribers to any of the options require multiline or Customized Multi-line Telephone Service, which are obtained from existing general Price List offerings. (T)

CONDITIONS

Customers are responsible for the payment of rates and charges associated with establishing, continuing, and discontinuing or disconnecting services ordered on behalf of themselves and their clients.

The Company will not provide instructions for operating services of customers. Instructing clients is the responsibility of the customer.

The Company is not required to notify a customer (such as an ESP) when the Company disconnects a service subscribed to by another customer who is also the customer's (ESP's) client.

The Company will not disconnect or discontinue the Price List services subscribed to by a customer who is also a client of another customer (such as an ESP) because of nonpayment of charges billed to the other customer. The Company will discontinue or disconnect services billed directly to a customer for nonpayment in accordance with the rules of the Company's Price Lists. The Company is not responsible for harm or damages to a customer or its clients resulting from services disconnected in accordance with Price List rules, terms, and conditions.

Each customer and each customer's client shall indemnify, defend, protect, and save harmless the Company against any and all losses, claims, suits, demands, causes of action, damages, costs, or liability in law or in equity or every kind and nature whatsoever, including attorney's fees, arising directly or indirectly from the services provided in accordance with this Price List or in connection therewith, including but not limited to any loss, damage, expense, or liability resulting from any infringement or claim of infringement of any patent, trademark, or copyright, or resulting from any claim of libel or slander.

Section 14

1st Revised Sheet 2
Canceling
Original Sheet 2

OPTIONS FOR PROVIDING ENHANCED SERVICES

CONDITIONS (Continued)

Each customer, not the Company, has the responsibility and control over the content, quality, and characteristics of the services provided and conversations conducted over its equipment. The Company is not responsible for quality of, defects in, or content of the services that a customer provides its clients. The customer is responsible for complying with law, with rules and regulations of governmental agencies, and with the terms and conditions of the Company's price lists and tariffs.

A customer may neither use the Company's name, signs, symbols, or markings nor implicate, implicitly or explicitly, the Company in any other way as a participant, promoter, or co-promoter, in sales media or other publicity, of services provided wholly by the ESP or jointly by the ESP and the Company, unless the customer first obtains written permission from the Company for each advertisement, announcement, or other informational media to be released.

The customer must subscribe to a number of multilines or Customized Multi-line Telephone Service lines sufficient to ensure service standards as determined by the Company. (T)

Each customer subscribing to User Transfer service is responsible for the payment of applicable calling charges for each completed call forwarded from its line to another line. User Transfer (Call Transfer) is part of the standard Customized Multi-line Telephone Services. Therefore, User Transfer rates from this section are not billed to Customized Multi-line Telephone Service customers. (T)
|
(T)

Customers subscribing to Forwarded Call Information shall not disclose telephone numbers identified as a result of the Forwarded Call Information Service.

Section 14

1st Revised Sheet 3
Cancelling
Original Sheet 3

OPTIONS FOR PROVIDING ENHANCED SERVICES

CONDITIONS (Continued)

Each customer, such as an ESP, ordering services from the Company on behalf of its customers (the customer's clients) is responsible for payment of all rates and charges associated with the services ordered. Should a client dispute the customer's authority, the customer will be held responsible by the Company, whether or not an agency agreement (any agreement between customers and clients) exists.

The nonrecurring charges applicable to one-party and multiline services and specified in this Price List under RATES, will be billed to the customer for each client whenever services associated with a client's line and subscribed to by the customer on behalf of the customer's client are established. One NRC will apply if one or more than one of the following services are ordered at the same time (on the same order) for the same line or telephone number:

- Message Waiting Indication
- Forward Call Information
- Call Forwarding Busy Line
- Call Forwarding Don't Answer
- Call Forwarding Busy Line/Don't Answer
- Three Service Package

The customer is responsible for placing orders for disconnecting or discontinuing services subscribed to on behalf of clients. Should a customer's client's telephone service be discontinued or disconnected for any reason, the Company will continue billing the customer for services subscribed to on behalf of the client until the customer requests that the service be disconnected or discontinued.

Each customer and each client, directly or indirectly subscribing to a call forwarding service, is responsible for the payment of applicable calling charges for each completed call forwarded from each customer's and each client's line to another line.

Services provided to Customized Multi-line Telephone Service customers or to clients who subscribe to Customized Multi-line Telephone Service will be billed in accordance with the rates, charges, and conditions included in the Customized Multi-line Telephone Service section of this Price List.

Section 14
1st Revised Sheet 4
Canceling
Original Sheet 4

OPTIONS FOR PROVIDING ENHANCED SERVICES

CONDITIONS (Continued)

Customized Multi-line Telephone Service customers subscribing to CENPAC--Basic Control Package are not charged for changing the number of rings before calls are forwarded. (T)

Each call forward service, each Message Waiting Indication service, each Forwarded Call Information service and each package containing any of these services must be identified with specific telephone numbers from which and to which calls are forwarded and to which is subscribed by a customer or a customer's client.

A customer must specify which services are to be associated with each client's telephone service.

Each customer providing voice message services must subscribe to either one-party business service, multiline business service or Customized Multi-line Telephone Service lines capable of supporting the services offered in this section for access to the Company's switched network. The network connection will be used to pass messages to and from the ESP's equipment, and the customer's equipment must be compatible. (T)

Customers may subscribe to Inter-Switch Voice Messaging (ISVM) subject to the availability of the required Data Link facilities.

The Company will determine which central office and transmission facilities are used to provide service. (T)

Signaling, control and data communication protocols are defined by the Company, and the Company retains the right to change these protocols.

OPTIONS FOR PROVIDING ENHANCED SERVICES

DEFINITIONS

Call Forwarding Busy Line is a permanently activated service which automatically redirects calls placed to a customer's or a customer's (such as an ESP's) client's telephone number to another telephone number subscribed to by the utility's customer, if the caller encounters a normal busy-line condition.

Call Forwarding Don't Answer is a permanently activated service which automatically redirects calls placed to a customer's or a customer's (such as an ESP's) client's telephone number to another telephone number subscribed to by the utility's customer, if the caller encounters a no answer condition after a specified number of rings.

Call Forwarding Busy Line/Don't Answer is a permanently activated service which automatically redirects calls placed to a customer or a customer's (such as an ESP's) client's telephone number to another telephone number subscribed to by the utility's customer, if the caller encounters either a no-answer condition after a specified number of rings or a normal busy-line condition.

Call Screening service provides clients the ability to monitor and screen incoming calls that have been forwarded to voice mail and decide whether or not to accept them. Call screening is activated/deactivated by dialing an access code. A ring burst alerts the client that a call is incoming and can be monitored. A hookswitch flash allows the client to intercept the call and speak to the calling party.

Customer Controllable Ringing provides customers with the ability to adjust the number of ring cycles that are used prior to forwarding a call in a "No Answer" situation. To select the number of rings desired (1-9), the customer will dial a special access code and then input a digit that corresponds to the number of ring cycles desired before the forwarding takes place.

Data Link service provides the capability to deliver Forwarded Call Information to an ESP. (Requires subscription to Forwarded Call Information-Intraoffice). A Data Link is required for each central office serving area per system.

Enhanced Services are defined as services offered over Local Exchange Carrier, i.e., Company, exchange and transmission facilities used in intraLATA communications which employ computer processing applications that act on the format, content, code, protocol or similar aspects of the subscriber's transmitted information. Enhanced Services may provide the subscriber additional, different, or restructured information or involve subscriber interaction with stored information.

Enhanced Service Provider (ESP) is a customer of the company who provides Enhanced Services. A customer of an ESP is, in turn and with respect to this Price List, a client.

Section 14
1st Revised Sheet 6

Original Sheet 6

OPTIONS FOR PROVIDING ENHANCED SERVICES

DEFINITIONS (Continued)

Forwarded Call Information—Intraoffice service provides information relating to calls incoming to an ESP client and outgoing from the client to the ESP, if the client's line is arranged for any call forwarding service, which forwards calls to an ESP. The information relating to calls includes the client's number, call-forwarded number and the reason (busy line or don't answer condition) for calls being forwarded. (Requires subscription to Data Link). (T)

Inter-Switch Voice Messaging (ISVM) service is available as an optional enhancement to Data Link service. With the combination of Data Link, which operates on an intra-switch basis only, and ISVM, voice mail and call answering capabilities can be extended to customers via intra- and inter-switch connectivity, thereby allowing the ESP to serve any client within a Local Access Transport Area (LATA). (Requires subscription to Data Link).

Message Waiting Audible service sends an identifiable tone (such as a stutter dial-tone) to an ESP's client whenever messages for the client are waiting in storage. (This service must be used in conjunction with Forwarded Call Information).

Message Waiting Indication-Audible Ring Burst, in addition to the stutter dial tone that lets a customer know that a message is waiting, this service provides ringing at a special cadence to signal the customer that a message is waiting. This reminder will be repeated at a specific interval programmed by the Company.

Message Waiting Indication – Visual enables a signal to be sent to the customer's CPE which activates a light. This light indicates that a message is waiting.

Queuing service is a supplement to rotary service, which places calls in queue while waiting to be answered when all terminals in a hunt group are busy. Queuing service is provided only in conjunction with lines arranged for rotary service.

User Transfer service provides a customer subscribing to multiline or Customized Multi-line Telephone Service lines used in conjunction with an ESP's equipment with the ability to place on hold an established call, originate a second call to a third party. After a call has been transferred, the original line or trunk is cleared for further use. (T)

CALLING SERVICES

INDIVIDUAL SERVICES AND PACKAGES

DESCRIPTIONS

Busy Number Redial - This service allows the customer to dial a camp-on code when a busy station is reached. The call is then retried automatically until both parties are available. No new service will be established after December 3, 1996.

Last Number Redial - A service, which allows the customer to dial a code initiating the switch to place a call to the last called number. No new service will be established after December 3, 1996.

Saved Number Redial - A service which allows the customer to dial a code initiating the switch to place a call to a specific number stored even if the customer has made subsequent calls to other numbers. No new service will be established after December 3, 1996.

GRANDFATHERED SERVICES

CALLING SERVICES

FLEXIBLE PACKAGING ¹

DESCRIPTIONS

Flexible packaging offers a monthly discount on specific Calling Services and CLASS Service features as identified on in Section 7.

Flexible packaging is available to residence individual line customers only.

When a customer orders four (4) or more of the eligible services, a discount applies to all of the eligible services. The discount percentage is applied to the total of the individual service rates subscribed to by the customer. To be eligible for the flexible packaging discount, all services ordered by the customer must be billed on the same residence account.

Any service may be substituted for another, or additional services may be ordered at a later date. The combination of services is not important to qualify for the discount, only the number of services (minimum of 4).

If the customer removes an eligible service (or services) so that the total number is less than four (4), the 40% discount no longer applies. The billing of those services will revert to the individual service rate.

When 4 or more of the following services are ordered ², the customer is eligible for the flexible packaging discount of 40%.

- | | |
|--------------------------|--------------------------|
| Busy Redial | Distinctive Ring |
| *69 | Special Call Acceptance |
| Anonymous Call Rejection | Select Call Forwarding |
| Call Forwarding | Speed Dialing (8-Code) |
| Call Waiting | Speed Dialing (30-Codes) |
| Caller ID | Three-Way Calling |
| Caller ID – Number Only | Priority Call |

(T)

Service charges are not applicable, when:

- an order is placed which qualifies the customer for flexible packaging discount, or
- when a flexible packaging customer rearranges his/her features, provided at least four (4) of the eligible services are retained.

RATES

GRANDFATHERED SERVICES

COMBINATION MAIN SERVICE ¹

CONDITIONS

Combination Main Service provides for serving separate business and residence locations from the same One-party Network Access line.

All locations must be within the same central office area.

A separate number will be assigned to each Network Access Line at each of the locations.

Additional signals may be required at any one or all locations and arranged so that an indication will be received at any one or all locations when one telephone at another location is being called. There will not be a charge for these signals required to provide this service. Additional signals over the minimum requirement may be provided by the customer.

RATES

The monthly rate and installation charge for a business or residence One-party Network Access Line at each location will apply.

¹ Grandfathered-limited to those customers in service as of October 1, 1993.

GRANDFATHERED SERVICES

COMMUNITY VOLUNTEER FIRE REPORTING SYSTEM¹

CONDITIONS

Community Volunteer Fire Reporting System is designed for use by unattended volunteer fire departments. A party calling the listed fire reporting number activates a conference circuit, which rings volunteer firemen's telephones, enabling the caller to report the fire or emergency to answering firemen.

This equipment permits two simultaneous fire-reporting calls, if the customer desires. This optional feature requires an additional One-party Business Network Access line.

Remote Answering Terminals permit firemen away from home, upon hearing the fire siren, to call a designated telephone number which will connect them to the Fire Reporting System. This optional feature required a nonpublished One-party Business Network Access line, it will handle up to three simultaneous calls.

The siren control circuit is a private line, suitable for supervisory control, from the Fire Reporting System common equipment to the siren.

The Amplifier feature is an option, available to maintain a-satisfactory level of transmission.

¹ No new service installed after May 16, 1984.

GRANDFATHERED SERVICES

GRANDFATHERED SERVICES

SERVICE LINE SERVICE ¹

CONDITIONS

Service Line Service provides for the connection of facilities owned and maintained by a customer or group of customers with the facilities of the Company. The Company will not provide such a connection if it is prepared to provide telephone service in the same area.

The connection of Service Lines with the Company facilities will be made at a point determined by the Company outside the Base Rate Area of the exchange, which would normally serve the area where the Service Lines are located. The entire Service Line must be located outside the Base Rate Area and within the exchange or contiguous unfilled territory.

Each Service Line customer will be allowed one directory listing.

Service Line Service is furnished on a line basis only and the owners or members of each line shall be represented by one person to transact all business with the Company.

A Service Line is subject to the Company's regulations with regard to treatment for nonpayment of bills.

The Service Line must be maintained in accordance with the standards of the Company.

RATES

	Monthly Rate	Nonrecurring Charges
Installations, moves, changes, repairs of service through point of demarcation		Actual Cost

¹ Grandfathered-limited to those customers in service as of October 1, 1993.

GRANDFATHERED SERVICES

9-1-1 EMERGENCY TELEPHONE SERVICE

ALTERNATE NETWORK ROUTING SERVICE ¹

GENERAL

Alternate Network Routing (ANR) Service is offered as an optional service to 9-1-1 Emergency Telephone Service system customers. ANR provides other paths to route a 9-1-1 call from the caller to the Public Safety Answering Point (PSAP).

In cases of network overload (all trunks busy) or facility outage, such as failure of an intermediate central office or the loss of a 9-1-1 trunk, ANR Service will route the 9-1-1 call through the public switched network or cellular network. Any 9-1-1 calls in progress, at the time of a dedicated facility outage, will be lost when the facility fails.

The components offered in this Price List include the terminating telephone network equipment and cellular radios.

DESCRIPTION

Alternate Network Routing is actuated upon a failure of the dedicated 9-1-1 access path to handle a 9-1-1 call.

In order to reroute the 9-1-1 call through the public switched telephone network (PSTN), Sender equipment is installed in the central office on the outgoing side of the 9-1-1 trunk and Receiver equipment is installed on the premises of the PSAP or at an intermediate switching point.

Multiple telephone numbers may be programmed in the Sender in case the primary Receiver is not available.

When a cellular path is used as an alternate route, a cellular transceiver is installed in the central office on the sending end and a second transceiver unit may be installed at the receiving end (either at the intermediate switching point or at the PSAP).

¹ Service provided to existing customers only. No new service after 12/01/01.

GRANDFATHERED SERVICES

9-1-1 EMERGENCY TELEPHONE SERVICE

ALTERNATE NETWORK ROUTING SERVICE ¹

DESCRIPTION (Continued)

Alternate Network Routing Service is offered with two categories of Sender/Receiver terminal equipment:

Without Monitoring. The Sender Unit performs the functions of receiving the 9-1-1 call from the originating switch, storing the Automatic Number Identification (ANI), dialing the telephone number of the Receiver Unit to establish voice connection, and sending the caller's ANI to the Receiver Unit. The Receiver Unit has an output connection to the network or the PSAP's E9-1-1 customer premises equipment, to provide the answering attendant the ANI to record the call information and to be used to retrieve the associated Automatic Location Identification (ALI).

With Monitoring. Similar functions and terminal equipment are provided as described above, but with the addition of sensors, which monitor the outgoing trunk to detect signalling problems. When detecting a problem, the Sender Unit seizes control of the 9-1-1 call and establishes the alternate route over the public switched network or cellular network to complete delivery of the voice and associated ANI.

Alternate Network Routing via Cellular Transceivers may be selected with either of the ANR services, listed above, to add cellular path connectivity. This service requires a cellular transceiver to be installed at either or both ends of the path; one at the originating central office connected to a Sender; the other at the terminating PSAP connected to a Receiver. If the PSAP or originating central office is outside the normal service area of a cellular radio cell, a directional antenna should be installed to ensure adequate signal strength for radio communications.

¹ Service provided to existing customers only. No new service after 12/01/01.

GRANDFATHERED SERVICES

9-1-1 EMERGENCY TELEPHONE SERVICE

ALTERNATE NETWORK ROUTING SERVICE ¹

CONDITIONS

When the 911 Customer selects an Alternate Network Routing Service over the public switched telephone network, the 911 Customer will need to subscribe to a business access line for each sender unit and a business access line for each receiver unit.

The customer will be responsible for all subscriber access line charges and toll calls billed to those access lines.

911 customers subscribing to a cellular radio circuit as an alternate network will be responsible for obtaining the cellular service and paying all charges related to its use.

Due to compatibility limitations, the service is limited to either Teltone's or Proctor's equipment for each 911 trunk.

¹ Service provided to existing customers only. No new service after 12/01/01.

GRANDFATHERED SERVICES

CALL REFERRAL SERVICE¹

(T)

DESCRIPTION

Call Referral Service is a voice operator intercept service available to business and residence customers who have relocated or changed telephone numbers and request more than the standard referral of calls to a new number. The customer may design his/her own intercept message up to 240 characters. Typical messages include name, new telephone number, new address, zip code, business hours, etc. In the case of split referrals, more than one name and telephone number would be provided in a message.

(T)

CONDITIONS

Residence customers may request a minimum of one month and a maximum of three months of service.

Business customers may request a minimum of three months and a maximum service period of 12 months or life of the current directory (whichever is shortest).

The Company reserves the right to refuse any customer requested message that it deems to be in violation of the General Regulations in Section 3 of this Price List. Messages must also be in compliance with all administrative rules, state statutes, and public policy considerations.

Call Referral Service will not be provided to customers disconnected for nonpayment.

(T)

Residence customers will be billed for the requested duration of service on their closing statement.

Business customers may:

provide full payment with their closing statement covering the requested duration of service; or

pay for the minimum service period (three months) with their closing statement and receive monthly bills beginning in the fourth month of service.

New Number Call Routing (also referred to as Challenge Intercept) may be furnished when a number is disconnected that has been used by more than one customer (i.e., partnership in a firm, members of the same household), and each party wishes to receive calls at his/her new number. The operator will provide the names and forwarding telephone numbers of all parties listed in the OTM message. No charges apply when split referral is provided due to a Company error.

(T)

¹ Offering is limited to existing customers at existing locations as of July 1, 2003.

DIGITAL (ISDN) SINGLE LINE SERVICES Packet Switching¹

DESCRIPTION

Access integration refers to utilizing a single ISDN link, thereby, an end-user over a single line can access a wide variety of user information services, such as packet-switched data.

Digital (ISDN) Single Line Service is composed of the following element:

D-Packet, per channel

The D-Packet Switched Data Channel allows transmission of Packet Switched Data over a D-Channel.

Subscription to a D-Packet Service without subscription to B-Channel Service is permitted.

CONDITIONS

A separate interexchange carrier may be chosen for packet service.

DEFINITIONS

D-Channel (Delta Channel)

A communications path that operates at and 9.6 kbps X.25 packet data.

D-Packet

A service, which permits a customer to use a D-Channel for Packet Switched Data. Utilizes 9.6 of the 16 kbps of the D-Channel and allows more than one data service.

Integrated Services Digital Network (ISDN)

A set of standards, which enable end-to-end digital transmission, access integration, and established standardization of points of interconnection over a single access line. Access integration refers to utilizing a single ISDN line, whereby an end user over one line can access a wide variety of user information services such as packet switched data (where available).

¹ This service limited to existing customers only. No new installation, moves, changes or additions are allowed.

SERVICE DESCRIPTIONS AND FEATURES (Continued)

Data Packages

X.25 Basic Package

X.25 Flow Control Parameter Negotiation permits negotiation on a per call basis of the flow control parameters. This consists of automatically negotiating the maximum packet size and window size for each direction of data transmission.

X.25 Incoming Calls Barred prohibits a data terminal from terminating an incoming call.

X.25 Outgoing Calls Barred prohibits a data terminal from originating outgoing virtual calls.

X.25 Reverse Charge permits a called party to be billed for a call.

X.25 Reverse Charge Acceptance allows a called party to accept charges for incoming calls.

X.25 Throughput Class Negotiation allows the calling data terminal to request specific throughput classes in a call request package for both directions of data transmission.

X.25 Transmit Delay Selection and Indication allows the data terminal to specify an acceptance transit delay on a per-call basis for virtual call.

X.25 Deluxe Package: Includes X.25 Basic Package Plus:

X.25 Closed User Groups allows ISDN subscribers to establish subnetworks within which the members of a closed user group can communicate. A member can not communicate with parties outside of the closed user group. Closed user groups are established by a service order. A user can belong to more than one closed user group.

X.25 Fast Select allows a data terminal to send as many as 128 bytes of data in addition to call setup and clearing packets.

X.25 Fast Select Acceptance allows transmitting incoming call packets with the fast select facility to a compatible destination terminal.

X.25 Hunt Groups allows grouping access lines so that a packet switched data call incoming to a hunt group is completed if there is an open channel on an access line within the hunt group. A Hunt Group is established by service order. Members of a Hunt Group can be distributed among the ISDN switching modules within the central office switch, but the Hunt Group cannot span switches. A Digital ISDN-SL line within a Hunt Group can have its own address (individual line addressing) and can accept calls independent of the Hunt Group. A Hunt Group can have multiple group addresses.

¹ This service limited to existing customers only. No new installation, moves, changes or additions are allowed.

DIGITAL (ISDN) SINGLE LINE SERVICES ISDN-PRI FACILITY MONTH-TO-MONTH AND OOCS¹

PRIMARY RATE INTERFACE (PRI)

FEATURES DESCRIPTIONS

STANDARD FEATURES

The following B-channel features are offered to the customer at no additional charge:

Fractional DS1 ISDN-Originating allows the customer to set up N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.

Fractional DS1 ISDN-Terminating allows the customer to receive N x 64 Kbps calls from an ISDN-PRI in real-time and in the same manner as any circuit switched ISDN call.

Out-of-Calling Scope (OOCS) allows a customer to subscribe to Integrated Service Digital Network-Primary Rate Interface (ISDN-PRI) from an alternative Central Office (CO) that is outside the local calling scope of the CO from which the customer would normally receive exchange network services. When the customer desires ISDN-PRI service from an alternative CO that is outside the calling scope of the serving CO, the Out-of-Calling Scope (OOCS) ISDN-PRI Access rates will apply instead of the Local ISDN-PRI Access rates. The PRI Facility rates and PRI Channel Activation rate, only the Voice/Data Channel Activation (measured) option is offered, will apply from the current tariff, along with the DS1 (1.544 Mbps) Special Transport Mileage applicable for the required interoffice Special Transport from the Facilities for Intrastate Access Tariff. When ISDN-PRI service is provided from a customer's serving CO or an alternative CO that is within the local calling scope of the customer's serving CO, the local ISDN-PRI Access from the current tariff will apply instead of the OOCS PRI Access rate.

OPTIONAL FEATURES

CLID with Name is available on a month-to month basis.

RATES

	Monthly Rate	Nonrecurring Charge ²
ISDN-PRI Facility	3	3

¹ This service limited to existing customers only. No new installation, moves, changes or additions are allowed.

² Service charges reflected in Section IV of this tariff will not apply in addition to the nonrecurring charges specified here.

³ The applicable rates and charges for the ISDN-PRI Facility are the monthly and nonrecurring charges for 1.544 (Mbps) Special Access Line and Special Transport, as specified in Section 5.7.10(A) of the Facilities for Intrastate Access Tariff. For applications that include connections to T-3, SONET or 44.736 Mbps service, only the rate elements and charges from those tariffs will apply. In addition, End User Charges as specified in the Company's FCC Tariff will apply per PRI Access.

COMPETITIVE RESPONSE

One Time Credit Offers – Grandfathered as of May 6, 2019

(C)

Frontier Communications Northwest Inc. may offer residence customers a one-time incentive for the purpose of retaining their local service when the customer has either threatened to disconnect their service or been identified by Frontier as at-risk of disconnecting their service. A One-Time Credit Offer may also be used as an incentive for customers to change their local service from another provider to Frontier.

Depending upon the situation, the incentive amount may be \$25 or \$50, and may take the form of gift card or bill credit. Customers are eligible for the \$25 incentive if they:

- Call Frontier with a repair issue and threaten to disconnect their local service, or
- Call Frontier with a repair issue and are identified as having repeat repair issues, or
- Have been identified by Frontier as likely to disconnect their local service because of a history of repair issues.

Eligible customers who are responding to a Frontier direct mail, advertisement, or other Frontier marketing activity, may receive the \$50 benefit.

The offers are not redeemable for cash and may not be used to satisfy delinquent balances owed to Frontier or any Frontier affiliate. Bill credit offers mailed to qualifying customers must be redeemed prior to the expiration date specified in the mailing.

The offers are not available to customers disconnecting dial tone service for seasonal service.

The offers are limited to one per customer and cannot be combined with any other offers except as authorized by Frontier.

COMPETITIVE RESPONSE

Residence Customer Incentive Program

(N)

A. Description

The Customer Incentive Program is an offering for potential new residence local exchange customers and existing residence local exchange customers to encourage the retention or continuation of existing services by those existing customers.

B. Terms and Conditions

1. This Customer Incentive Program may be offered to potential new residence local exchange customers. In addition, the Company may provide a retention benefit to any existing residence customer who has retained a service for some period of time.
2. For a potential new residence customer, the Company may provide an incentive offer no more often than once in any one-year period. In retention situations, the Company may provide an incentive no more often than once in any one-year period with respect to any particular service or feature.
3. To qualify for these offers, a residence customer is required to have a satisfactory credit rating with the Company.
4. For a potential new residence local exchange customer, the Company may condition its offers upon the customer remaining with the Company for up to one year. Any minimum period of time shall be identified to the residence customer as part of the offer. In such cases, if the customer terminates service early, the customer may be billed all of the nonrecurring charge(s) and monthly rate(s) waived under this program. The customer is not considered to be opting out if the customer moves to another Company service of equal or greater value.
5. The recipients of the Customer Incentive offer and the amount of the customer incentive offer shall be in the sole discretion of the Company, but the total value of the offer may not exceed the sum set out in C.1., following.
6. The Company shall determine the particular details, including but not limited to periods and duration, class of customers, services, amounts, and geographic area, so long as each such offer to a particular local exchange residence customer is not inconsistent with the provisions of this Price List and the amount does not exceed the maximum amount set forth in C.1. following. The Company may prohibit use of this program in conjunction with another being marketed by the Company and/or a Company affiliate.

(N)

Section 17

Original Sheet 3

COMPETITIVE RESPONSE

Residence Customer Incentive Program (Continued)

(N)

B. Terms and Conditions (Continued)

7. Offers may differ based on reasonable criteria, including the following criteria or combinations of criteria below:
 - (a) The sales channel through which the products are sold.
 - (b) A specific geographic area.
 - (c) Existing customers who request to have one or more products disconnected.
 - (d) Customers who identify a better competitive offer are available to them. Company representatives may present to these customers multiple offers up to the maximum value under C.1., following.
 - (e) Such other facts, criteria, and circumstances as the Company believes is a reasonable basis upon which to distinguish among groups of customers.
8. The Company reserves the right to discontinue this offer.

C. Rates and Charges

1. The Customer may be offered one of the following, or the equivalent monetary value, on selected products as determined by the Company:
 - (a) A waiver of an amount up to 100% of the current residence nonrecurring rate(s) or charge(s), or
 - (b) A waiver of up to three months of the recurring rate(s) or charge(s), or
 - (c) A waiver of an amount up to 100% of the current residence nonrecurring rate(s) or charge(s) and up to three months of the recurring rate(s) or charge(s), or
 - (d) A benefit or consideration offered or provided that is not associated with a service or product offered by the Company such as CPE, merchandise, or discounts on merchandise offered by others, gift certificates, gift cards or otherwise, in the discretion of the Company. In determining the value of non-cash offers or benefits, the actual cost incurred by the Company, not to exceed the sum of C.1.(c) above, shall be used.
2. The waiver(s) will appear in the form of a credit(s) on the customer's bill. The waiver may be one-time, or spread over a period of up to 12 months in a fashion determined by the Company.
3. Waiver amounts are calculated on the first month's nonrecurring charge(s) and monthly rate(s). The total waived amount will not exceed the value of the total nonrecurring rate(s) or charge(s) plus three months service of the monthly rate(s) or charge(s).

COMPETITIVE RESPONSE

Business Customer Incentive Program

(N)

A. Description

The Customer Incentive Program is an offering for potential new business local exchange customers and to existing business local exchange customers to encourage the retention or continuation of existing services by those existing customers.

B. Terms and Conditions

1. This Custom Incentive Program may be offered to potential new business local exchange customers. In addition, the Company may provide a retention benefit to any existing business customer who has retained a service for some period of time.
2. For a potential new business customer, the Company may provide an incentive offer no more often than once in any one-year period. In retention situations, the Company may provide an incentive no more often than once in any one-year period with respect to any particular service or feature.
3. To qualify for these offers, a business customer is required to have a satisfactory credit rating with the Company.
4. For a potential new business local exchange customer, the Company may condition its offers upon the customer remaining with the Company for a minimum of one year. Any minimum period of time shall be identified to the business customer as part of the offer. In such cases, if the customer terminates service early, the customer may be billed all of the nonrecurring charge(s) and monthly rate(s) waived under this program. The customer is not considered to be opting out if the customer moves to another Company service of equal or greater value.
5. The recipients of the Customer Incentive offer and the amount of the customer incentive offer shall be in the sole discretion of the Company, but the total value of the offer may not exceed the sum set out in C.1., following.
6. The Company shall determine the particular details, including but not limited to periods and duration, class of customers, services, amounts, and geographic area, so long as each such offer to a particular local exchange business customer is not inconsistent with the provisions of this Price List and the amount does not exceed the maximum amount set forth in C.1., following. The Company may prohibit use of this program in conjunction with another being marketed by the Company and/or a Company affiliate.

 - (b) A specific geographic area.
 - (c) Existing customers who request to have one or more products disconnected.
 - (d) Customers who identify a better competitive offer are available to them. Company representatives may present to these customers multiple offers up to the maximum value under C.1., following.
 - (e) Such other facts, criteria, and circumstances as the Company believes is a reasonable basis upon which to distinguish among groups of customers.
8. The Company reserves the right to discontinue this offer.

C. Rates and Charges

1. The Customer may be offered one of the following, or the equivalent monetary value, on selected products as determined by the Company:
 - (a) A waiver of an amount up to 100% of the current business nonrecurring rate(s) or charge(s), or
 - (b) A waiver of up to three months of the recurring rate(s) or charge(s), or
 - (c) A waiver of an amount up to 100% of the current business nonrecurring rate(s) or charge(s) and up to three months of the recurring rate(s) or charge(s), or
 - (d) A benefit or consideration offered or provided that is not associated with a service or product offered by the Company such as CPE, merchandise, or discounts on merchandise offered by others, gift certificates, gift cards or otherwise, in the discretion of the Company. In determining the value of non-cash offers or benefits, the actual cost incurred by the Company, not to exceed the sum of C.1.(c) above, shall be used.
2. The waiver(s) will appear in the form of a credit(s) on the customer's bill. The waiver may be one-time, or spread over a period of up to 12 months in a fashion determined by the Company.
3. Waiver amounts are calculated on the first month's nonrecurring charge(s) and monthly rate(s). The total waived amount will not exceed the value of the total nonrecurring rate(s) or charge(s) plus three months service of the monthly rate(s) or charge(s).
