Case: ATL-E-03-1
Name: Mary Drake
Street_Address: 72 E Pine
City: Atlanta
State: Idaho
ZIP: 83601
Home_Telephone: 208 864 2171
E-Mail: drakem@direcway.com
Company: Atlanta Power
mailing_list_yes_no: yes

Comment_description: In Responce to Case ATL-E-03-1:

I am disturb that the PUC has not notice that Atlanta Power has not for the last 5 years notice that Atlanta Power has not turn in the proper reports. Please explain why you continue to allow Atlanta Power to get away with this. I have read the 1993 report that the PUC did on Atlanta Power and it seems that this new report is a continuation of the PUC allowing Atlanta Power to operate any old way. Does the PUC allow Idaho Power to operate this way?

We recently had a four day power outage. Are you going to place a time limit on Atlanta Power on how long Atlanta can be without power before a back up generator can be in operation. Will you enforce this time limit?

Atlanta Power did not take care of the Back-up Generator- left it out in the weather- no preventive maintenace. Why do should we have too buy a new one when he did not take care of the first one?

Why is Atlanta Power making too much money? Do we get our rates reduce?

What is your time line for Atlanta Power to do a preventive maintenance plan? Will you enforce it?

I appreciate the hiring of a third person. The third person needs more training- will this happen?
