IDAHO PUBLIC
UTILITIES COMMISSION

Idaho Public Utilities Comm:

There is no way many of us can get to any of these meetings - distance - time & gas leaves us at a disadvantage.

However we want to let you know if you give Anista another raise you are taking food out of the mouths of children & other low income individuals to line the pocket of a risk Corporation.

All this hallyhao about these people without facing the fact that government is forcing us to buy pap instead of milk, eggs, meat, even fruits & vegetables. Pap at \$.58 a liter milk over \$2.50 per gallon.

Commissions like you can take a stand & do something for this great country of ours & say NO to Corporation requests

Eva McAllister
