To all Commissioners:

We are very upset at the higher charges for electricity when we hear the CEO is making 1.1 million a year plus perks.

Next in line gets \$840,000. What do they do to earn this kind of money?

By the way, how much do you make a year? How do you get picked for this job? Do you find additional ways to give the CEO & other top people more money or perks.

There should be a wage freeze on them. If they can't make it, on say, a quarter million a year, let them go out and pick up cans like a lot of people in this country have to do?

How do you SLEEP AT NIGHT?!

We got 2 basic charges on our bill this month. The lower bill for our water pump had basic charges \$2.01 higher than our home bill.

Pump House usage 1.01	House usage 32.28
← basic 6.08	Basic 4.07

We would appreciate some answers!
