LISA D. NORDSTROM Lead Counsel Inordstrom@idahopower.com IDAMO I VE UTILITIES COMMISSIO

November 16, 2011

# **VIA HAND DELIVERY**

Jean D. Jewell, Secretary Idaho Public Utilities Commission 472 West Washington Street Boise, Idaho 83702

Re:

Case No. IPC-E-11-08

General Rate Case - Rebuttal Testimony

Dear Ms. Jewell:

Enclosed for filing are an original and nine (9) copies each of the rebuttal testimonies of Theresa Drake, Warren Kline, and Michael J. Youngblood. One copy of each of the aforementioned testimonies has been designated as the "Reporter's Copy." In addition, a disk containing Word versions of the testimonies is enclosed for the Reporter.

Very truly yours,

Lisa D. Nordstrom

Lisa D. Mardotrom

## BEFORE THE IDAHO PUBLIC UTILITIES COMMISSION

IN THE MATTER OF THE APPLICATION	)		
OF IDAHO POWER COMPANY FOR	)		
AUTHORITY TO INCREASE ITS RATES	)	CASE NO.	IPC-E-11-08
AND CHARGES FOR ELECTRIC SERVICE	)		
IN IDAHO.	)		
	)		

IDAHO POWER COMPANY
REBUTTAL TESTIMONY

OF

THERESA DRAKE

- 1 Q. Please state your name and business address.
- 2 A. My name is Theresa Drake. My business address
- 3 is 1221 West Idaho Street, Boise, Idaho.
- Q. By whom are you employed and in what capacity?
- 5 A. I am employed by Idaho Power Company ("Idaho
- 6 Power" or "Company") as Manager of Customer Relations and
- 7 Energy Efficiency.
- 8 Q. Please describe your educational background.
- 9 A. In May of 1990, I received a Bachelor of
- 10 Science Degree in Marketing with emphasis in Finance from
- 11 Jacksonville State University in Jacksonville, Alabama. I
- 12 have attended numerous seminars and conferences on pricing
- 13 issues, regulatory issues, marketing research, and energy
- 14 efficiency.
- 15 Q. Please describe your business experience with
- 16 Idaho Power.
- 17 A. I joined Idaho Power in January 1997 as a
- 18 Pricing Analyst. In July 2001, my position evolved into a
- 19 Senior Pricing Analyst and included preparing cost-of-
- 20 service studies, development of the Company's tariffs, and
- 21 performance of duties as a regulatory liaison for customer-
- 22 related issues. In February 2004, I became Manager of
- 23 Customer Relations and Research (now referenced as Customer
- 24 Relations and Energy Efficiency). In that capacity, I
- 25 manage staff members and activities associated with

- 1 customer satisfaction, process improvement, and energy
- 2 efficiency.
- Q. What is the scope of your testimony in this
- 4 proceeding?
- 5 A. On September 23, 2011, Idaho Power filed a
- 6 settlement stipulation ("Stipulation") in this docket that
- 7 was signed by all parties but one. My testimony will
- 8 address two of the three unresolved issues identified on
- 9 page 7 of the Stipulation:
- 1. Low-income Weatherization Assistance
- 11 for Qualified Customers ("WAQC") program funding; and
- 12 2. The funding level for the Energy
- 13 Efficiency Rider.
- 14 I. WAQC FUNDING
- Q. Please describe the WAQC program.
- 16 A. The WAQC program provides financial assistance
- 17 to regional Community Action Partnership ("CAP") agencies
- 18 in the Idaho Power service area. This assistance helps
- 19 cover weatherization costs of electrically heated homes
- 20 occupied by qualified customers with limited income. In an
- 21 effort to simplify program management for CAP
- 22 weatherization managers, Idaho Power mirrors the U.S.
- 23 Department of Energy ("DOE") requirements, which can change
- 24 from year to year. In 2011, an applicant's income to
- 25 qualify for weatherization may be up to 200 percent of the

- 1 national poverty level guidelines. The WAQC program also
- 2 provides a limited pool of funds for weatherization of
- 3 buildings occupied by non-profit organizations serving
- 4 primarily special needs populations, regardless of heating
- 5 source, with priority given to buildings with electric
- 6 heat.
- 7 Q. Who administers the WAQC program?
- 8 A. The CAP agencies administer the day-to-day
- 9 operations of the WAQC program with funds collected in
- 10 electric base rates by Idaho Power.
- 11 O. How would you summarize Idaho Power's
- 12 commitment to the WAQC program?
- 13 A. Idaho Power has a long history helping to
- 14 provide low-income weatherization assistance. Beginning in
- 15 1989, Idaho Power began funding what was called the Low
- 16 Income Weatherization Assistance ("LIWA") program.
- 17 Beginning in 2004, Idaho Power changed the name of the
- 18 program to Weatherization Assistance for Qualified
- 19 Customers after IPUC Order No. 29505 significantly
- 20 increased the level of funding provided by Idaho Power
- 21 customers. Idaho Power has dedicated staff to the program
- 22 that has in turn developed a good working relationship with
- 23 the CAP agency personnel. Through this program, Idaho
- 24 Power and its customers have helped to weatherize over

- 1 3,000 low-income residences in the last decade and achieved
- 2 cost-effective energy savings in so doing.
- 3 Q. What is the current funding level for WAQC?
- 4 A. Idaho Power customers currently fund the CAP
- 5 agencies at \$1.2 million per year. To the extent there are
- 6 unspent funds at the end of the year, the balance is
- 7 carried forward and made available in the next year. In
- 8 addition, Idaho Power funds approximately \$100,000 in labor
- 9 and overheads and some untracked labor funding from other
- 10 departments in the normal course of business (such as the
- 11 Information Technology Department, the Legal Department,
- 12 Human Resources Department, and Regulatory Affairs
- 13 Department).
- 14 Q. How does the Community Action Partnership
- 15 Association of Idaho ("CAPAI") propose to change WAQC's
- 16 current funding level?
- 17 A. CAPAI is recommending that the Idaho Public
- 18 Utilities Commission ("Commission") increase customer WAOC
- 19 funding in base rates from \$1.2 million per year to \$2.7
- 20 million per year, a change of 125 percent.
- Q. Does Idaho Power object to increasing the
- 22 funding for WAQC?
- A. No, provided there is the potential for more
- 24 cost-effective savings. The Company has little
- 25 administrative control over this program, which is operated

- 1 on a day-to-day basis by local CAP agencies. While Idaho
- 2 Power can evaluate the cost-effectiveness of the WAQC
- 3 program after customer funds are spent by the CAP agencies,
- 4 the considerable concerns raised by other utilities and the
- 5 Commission Staff regarding the evaluation of WAQC programs'
- 6 cost-effectiveness and related recovery of amounts spent
- 7 cause Idaho Power concern. If this is judged to be an
- 8 appropriate time to increase WAQC funds collected from
- 9 Idaho Power customers despite the lack of a uniform cost-
- 10 effectiveness evaluation protocol recommended in comments
- 11 submitted in Case No. PAC-E-11-13, Idaho Power believes
- 12 that the relative demand for WAQC services in Idaho Power's
- 13 service territory should be the focus of determining a
- 14 proper funding level. I believe it is prudent to
- 15 understand the needs of Idaho Power's customers based on
- 16 factual information and adjust accordingly. Suggesting
- 17 parity between utilities' funding levels to set such an
- 18 increase is not a good method for determining need, given
- 19 that demand for WAQC services may vary significantly
- 20 between utilities.
- Q. On the issue of cost-effectiveness, does Idaho
- 22 Power believe the WAQC program at its current funding level
- 23 is cost-effective?
- 24 A. Idaho Power's Demand-Side Management 2010
- 25 Annual Report, Supplement 1: Cost-Effectiveness, filed in

- 1 Idaho Case No. IPC-E-11-05, shows that the WAQC program is
- 2 cost-effective under the utility cost test, total resource
- 3 cost test, participant cost test, and the ratepayer impact
- 4 measure test. As stated in Supplement 1, in calculating
- 5 these tests, the Company relies on the savings
- 6 determination from the DOE-approved energy audit programs
- 7 (EA4 or EA5) used by the weatherization managers in the CAP
- 8 agencies.
- 9 Q. Does Idaho Power have plans to evaluate the
- 10 WAQC program in the near term?
- 11 A. Yes. Idaho Power is presently participating
- 12 in a national study of low-income weatherization programs
- 13 performed by Oakridge National Labs. Building on the
- 14 results of that study, to be released in first quarter
- 15 2012, Idaho Power plans to do a third-party impact
- 16 evaluation on the WAQC program in 2012.
- 17 Q. Earlier you stated that increased funding for
- 18 WAQC should be based on need. What did you mean by that
- 19 statement?
- 20 A. Idaho Power believes that if there is a need
- 21 for increased WAQC funding it could be shown by the waiting
- 22 list for WAQC. This could be determined by taking the
- 23 number of homes that actually qualify under the federal
- 24 income requirements, are electrically heated, receive an

- 1 energy audit, and, subsequently, do not get weatherized
- 2 under the WAQC program for a specific time period.
- 3 O. Do you know the magnitude of this waiting
- 4 list?
- 5 A. No, Idaho Power does not have this data.
- 6 Q. Do you agree with CAPAI's claim that there is
- 7 a 20-year waiting list for homes to get weatherized under
- 8 the WAQC program?
- 9 A. No. The information referred to by CAPAI is
- 10 based on applicants who qualify for the Idaho State
- 11 Weatherization Assistance Program ("WAP"), not WAQC. Idaho
- 12 Power believes the waiting list for WAQC is a small subset
- 13 of applicants applying for energy assistance and qualifying
- 14 for WAP.
- 15 Q. There seems to be some confusion about waiting
- 16 lists and how applicants are screened and eventually
- 17 qualified for WAQC. Can you explain the process?
- 18 A. Although this is not Idaho Power's process, I
- 19 will describe it to the best of my knowledge. First, an
- 20 applicant for energy assistance (bill payment assistance)
- 21 is qualified for the Idaho State Energy Assistance Program
- 22 Low Income Home Energy Assistance Program ("LIHEAP"). This
- 23 includes all applicants regardless of heating fuel source
- 24 and includes customers of all major utilities throughout
- 25 the state as well as users of propane, coal, wood, and oil

- 1 for heat. Second, all applicants who qualify for energy
- 2 assistance, regardless of heat source, are placed on the
- 3 WAP waiting List. Third, customers qualifying for Idaho
- 4 Power's WAQC program are determined by starting with the
- 5 WAP waiting list and removing non-electrically heated homes
- 6 and homes that are not in the Idaho Power service area.
- 7 These customers are then prioritized by the CAP agencies
- 8 for weatherization. Applicants from this list then have an
- 9 energy audit conducted by a CAP agency auditor. Through
- 10 the audit process, it is determined if the home is actually
- 11 electrically heated, what weatherization measures are
- 12 needed, and what percentage of the weatherization project
- 13 will be funded by Idaho Power. At this point, only the
- 14 electrically heated, income-qualified customers within
- 15 Idaho Power's service area would comprise a WAQC waiting
- 16 list.
- Q. What percent of the homes that get weatherized
- 18 are funded, or at least partially funded, by Idaho Power?
- 19 A. Idaho Power really does not know exactly.
- 20 However, according to the Agency Waiting List provided by
- 21 CAPAI through discovery and attached as Exhibit No. 49, in
- 22 2008, 1,129 homes were weatherized through CAP agencies in
- 23 Idaho Power's service area. This is before screening for
- 24 heating source or electricity provider.

- 1 Q. Do you believe that Exhibit No. 49
- 2 demonstrates that there is a significant waiting list for
- 3 the WAQC program?
- 4 A. No. To begin with, this exhibit contains a
- 5 CAP agency, "CAP" (Community Action Partnership located in
- 6 Lewiston), in row one of the exhibit that does not service
- 7 homes in the Idaho Power service area. The "Number on
- 8 Waiting List" and the "Pre ARRA Annual Production" provided
- 9 in column one and three of Exhibit No. 49 contain
- 10 applicants that are not all Idaho Power customers and may
- 11 not have electric heat. Consequently, the "Waiting List"
- 12 in column four really has no relevance to the WAQC program.
- Q. Qualifying for WAP and other programs sounds
- 14 like a rather involved process. How does this all work in
- 15 the daily application of Idaho Power funds?
- 16 A. The CAP agencies determine the applicant
- 17 eligibility, prioritize the applicants, and oversee the
- 18 weatherization of homes. Idaho Power's WAQC program
- 19 specialist works with the CAP agency weatherization
- 20 managers to improve the design of the WAQC program, conduct
- 21 quality assurance, and administer and track distribution of
- 22 funds to the agencies. Through this collaboration, Idaho
- 23 Power and the CAP agencies have been able to improve
- 24 services to special needs customers in Idaho. The Idaho
- 25 Power and CAP agency partnership is a productive and

- 1 amiable relationship where program ideas are discussed
- 2 prior to implementation. For example, CAP agency
- 3 weatherization managers provide input to guidelines such as
- 4 determining annual average job costs, leveraging funding
- 5 opportunities, and proposing the inclusion of additional
- 6 measures into the program. Idaho Power also works with CAP
- 7 agency LIHEAP and energy assistance personnel to improve
- 8 communications and to facilitate other important
- 9 informational exchanges that improve processes and benefit
- 10 Idaho's special needs population.
- 11 Q. Has Idaho Power increased the level of funding
- 12 for WAQC or for other special needs customers since the
- 13 Company's 2003 rate case?
- 14 A. Yes. In 2008, Idaho Power began a pilot
- 15 program call Weatherization Solutions for Eligible
- 16 Customers ("Solutions").
- 17 Q. How did this program design come about?
- 18 A. Idaho Power developed this program in 2008
- 19 based on conversations with local CAP agency weatherization
- 20 managers who voiced their concern that often customers
- 21 applying for WAP and WAQC assistance were barely above the
- 22 qualifying income level. From those conversations, Idaho
- 23 Power and CAP agency executive directors and weatherization
- 24 managers worked together to develop a test pilot in one
- 25 region. Currently, the program has expanded to three Idaho

- 1 Power regions with plans to expand into a fourth region in
- 2 2012. For the Solutions program, Idaho Power contracts
- 3 with limited liability corporations developed at regional
- 4 CAP agencies for those same weatherization services
- 5 provided by WAP and WAQC.
- 6 Q. Could you describe this program?
- 7 A. Solutions is an energy efficiency program
- 8 funded by the Rider, designed to serve Idaho Power's
- 9 residential customers who are slightly above poverty level
- 10 and, therefore, do not financially qualify for the
- 11 Company's legacy weatherization program, WAQC. The program
- 12 measures and implementation process mirror those included
- 13 in the WAQC program. Homes considered for this program
- 14 must be electrically heated and customers eligible for this
- 15 program have income just above the federal poverty level,
- 16 which is adjusted annually. The customers typically do not
- 17 have discretionary income to participate in other
- 18 residential energy efficiency programs and live in similar
- 19 housing as WAQC customers. The qualifying guidelines
- 20 target customers whose annual income was between 175
- 21 percent and 250 percent of the federal poverty level.
- Q. Was the Solutions pilot a success?
- A. Yes. In fact, the Solutions pilot evolved
- 24 into a regular efficiency program in 2009. In 2010, Idaho
- 25 Power expended a little over \$220,000 for this program,

- 1 weatherizing almost 50 homes. In 2011, the forecast
- 2 expenditures for Solutions are nearly \$700,000. The
- 3 Company has budgeted \$1 million dollars for the program in
- 4 2012, which will weatherize approximately 139 homes.
- 5 Q. Has the Company funded any other program to
- 6 aid special needs customers?
- 7 A. Yes. In 2009, Idaho Power committed to fund
- 8 the Easy Savings® Program, which is an energy efficiency
- 9 education program for customers receiving energy assistance
- 10 but not prioritized for weatherization services through the
- 11 federal LIHEAP. In both 2009 and 2010, Idaho Power sent
- 12 payments totaling \$125,000 to regional CAP agency executive
- 13 directors. In 2009, 2,594 kits were distributed to
- 14 Idaho Power customers approved to receive energy assistance
- 15 benefits. In 2010, 2,127 kits were ordered.
- 16 Q. How would you summarize these additional
- 17 efforts?
- A. In just looking at 2011, WAQC will contribute
- 19 \$1.2 million, Solutions is forecast to invest \$700,000, and
- 20 the Easy Savings® Program will contribute \$125,000. The
- 21 Company will directly utilize over \$2 million on special
- 22 needs programs, excluding the labor marketing and other
- 23 base rate expenses incurred by these efforts.
- Q. Do you agree with Ms. Ottens' statement on
- 25 page 11 of her testimony that the WAQC program is currently

- 1 the only viable means for low-income customers to reduce
- 2 their electric bills?
- A. No. I have just described two other programs
- 4 offered by the Company to help special needs customers
- 5 reduce their electricity usage. Additionally, Idaho Power
- 6 provides CAP agency weatherization and energy assistance
- 7 offices printed materials on saving energy for special
- 8 needs individuals. The Company also offers other tools at
- 9 no cost to all of its customers to help them manage their
- 10 electricity use. In addition, Idaho Power offers all
- 11 customers on-line hourly energy usage information and
- 12 access to powerful web-based Energy Tools that offer
- 13 individual savings recommendations using customer input.
- 14 Idaho Power's website contains many no- and low-cost
- 15 energy-saving tips as well as a robust ENERGYsmart Library
- 16 to address specific interests. Other printed materials
- 17 like Idaho Power's Energy Efficiency Field Guide go out
- 18 annually to thousands of customers along with their
- 19 newspapers (~162,500 in 2011) and thousands of copies of
- 20 Idaho Power's booklet "30 Simple Things You can Do to Save
- 21 Energy" (~37,000 to-date) have been hand delivered by its
- 22 employees via educational presentations and at community
- 23 events. Recently, Idaho Power worked with the Idaho
- 24 Commission for Libraries, Avista Utilities, and Rocky
- 25 Mountain Power to make kilowatt meters, which are easy-to-

- 1 use meters that allow customers to see how much electricity
- 2 individual appliances use, available for all Idaho
- 3 residents via their public libraries. Presently, all
- 4 libraries in Idaho Power's service territory have energy
- 5 efficiency kits for checkout. Idaho Power continually
- 6 looks for new ways to get educational energy and money-
- 7 saving information out to its customers.
- 8 O. Are there additional means that Idaho Power
- 9 uses to assist special needs customers?
- 10 A. Yes, through Idaho Power Project Share
- 11 efforts. Idaho Power started Project Share in 1982. This
- 12 is a year-round energy assistance program administered by
- 13 The Salvation Army with funding provided mainly by Idaho
- 14 Power customers and shareholders. Project Share assistance
- is available to supplement energy needs and can be applied
- 16 to electric and natural gas, as well as other heating
- 17 commodities like wood, propane, oil, coal, and furnace
- 18 repairs.
- In program year 2010-2011, Project Share provided
- 20 1,708 grants, benefiting 4,955 individuals with an average
- 21 of \$164.51 energy assistance payment on those energy bills.
- 22 Q. To your knowledge, has CAPAI requested the
- 23 Commission increase customer funding of WAQC since Order
- 24 No. 29505 was issued in 2003?

- A. No. In fact, in 2007, Idaho Power and CAPAI
- 2 filed jointly to continue the funding level for WAQC as set
- 3 out in Order No. 29505. The joint application in Case No.
- 4 IPC-E-07-09 stated, "CAPAI and Idaho Power believe
- 5 continuation of the increased funding for WAQC is in the
- 6 public interest and . . . will benefit all of Idaho Power's
- 7 customers. . . ."
- 8 Q. In summary, does Idaho Power support increased
- 9 funding for WAQC?
- 10 A. Idaho Power is willing to collect customer
- 11 funds for WAQC to be administered by the CAP agencies at
- 12 the level the Commission deems appropriate and that
- 13 customers are willing to support. As I indicated earlier,
- 14 the Company desires confidence in an appropriate method of
- 15 demonstrating the actual need in concert with cost-
- 16 effectiveness and evaluation. If funding is increased
- 17 prior to those issues being resolved, Idaho Power seeks
- 18 assurances that it will not be held to a new cost-
- 19 effectiveness standard retroactively. Whatever funding
- 20 amount is ultimately set by the Commission, Idaho Power
- 21 believes it should be based on each utility's need for
- 22 cost-effective WAQC services rather than an unrelated level
- 23 of "parity" across the different regions of Idaho.

24

# 1 II. ENERGY EFFICIENCY RIDER FUNDING

- 2 Q. Please describe Idaho Power's Energy
- 3 Efficiency Rider ("Rider").
- 4 A. Currently, Idaho Power is authorized by the
- 5 Commission to collect 4.75 percent of customers' base rates
- 6 and put it into a liability account. These funds are
- 7 intended to fund Idaho Power's energy efficiency
- 8 initiatives.
- 9 Q. What is the current balance of the Rider
- 10 account?
- 11 A. As of the end of October 2011, the balance of
- 12 this account was approximately a negative \$6 million
- 13 dollars, indicating that the Company has spent more money
- 14 on energy efficiency initiatives than it has recovered
- 15 through the Rider funding.
- 16 O. Is Idaho Power allowed to collect interest on
- 17 this account?
- 18 A. Yes, the Company has been directed to collect
- 19 or pay interest on these funds at the customer deposit rate
- 20 depending on whether the account balance is positive or
- 21 negative. The customer deposit rate determined by the
- 22 Commission for 2011 in Order No. 32109 is one percent.
- Q. Has Idaho Power forecast the Rider balance in
- 24 future years?

25

- 1 A. Yes. Exhibit No. 50 shows Idaho Power's
- 2 forecast of the Rider balance through 2014 under two levels
- 3 of funding. The top half of Exhibit No. 50, lines 1
- 4 through 13, shows the results of a Rider funding level of
- 5 4.75 percent, as is currently approved. Lines 14 through
- 6 26 show the same information under a 4 percent funding
- 7 level.
- Q. Can you describe Exhibit No. 50 in more
- 9 detail?
- 10 A. Line 10 and line 23 show the Rider balance
- 11 under the two funding scenarios. Under a 4.75 percent
- 12 Rider, the balance is estimated to be over \$5 million
- 13 dollars at the end of 2012 and grows to over \$35 million in
- 14 2014. Under a 4 percent Rider, the balance is a negative
- 15 \$1 million at the end of 2012 and \$15.8 million at the end
- 16 of 2014. Lines 13 and 26 show the total level of funding
- 17 of Idaho Power demand-side management programs, including
- 18 Rider funding and other funding through the time period,
- 19 which is the same under either funding level.
- 20 Q. Does the level of the Rider funding determine
- 21 the Company's commitment to energy efficiency initiatives?
- 22 A. No. Idaho Power is on the record in many
- 23 proceedings in front of this Commission and in other public
- 24 forums as being committed to pursuing all cost-effective
- 25 energy efficiency. In the last nine years since the Rider

- 1 began, the Company has made tremendous strides toward
- 2 achieving that goal. Idaho Power has a full portfolio of
- 3 energy efficiency programs offered to all customer sectors.
- 4 The Company has developed a large network of trade allies
- 5 and has developed excellent working relationships with
- 6 organizations that help the Company promote its programs
- 7 and initiatives. One must remember that energy efficiency,
- 8 unlike supply-side resources, is dependent on customer
- 9 involvement and interaction. Based on customer
- 10 satisfaction surveys (included in Exhibit No. 51),
- 11 customers that participate in Idaho Power's energy programs
- 12 are generally more satisfied than customers who do not
- 13 participate in the Company's programs. Idaho Power
- 14 believes customers use energy more wisely and have reduced
- 15 their energy consumption because of the Company's programs.
- 16 Q. Does Idaho Power plan to conduct another
- 17 potential study soon?
- 18 A. Yes, in 2012, Idaho Power is planning on
- 19 contracting for a new potential study to be incorporated
- 20 into the 2013 Integrated Resource Plan.
- Q. Does the level of Rider funding determine how
- 22 much program evaluation the Company conducts?
- A. No. The level of Rider funding does not and
- 24 has not determined Idaho Power's level of spending and/or
- 25 evaluation of demand-side management efforts. Although

- 1 Idaho Power believes in timely recovery of energy
- 2 efficiency investment, the Company's historic level of
- 3 support for energy efficiency programs is evidenced by the
- 4 fact that, in the beginning of 2011, Idaho Power was
- 5 carrying an approximate \$17 million deficit in the Rider
- 6 balance. The Company has been carrying a negative balance
- 7 in the Rider account since it went contra in April 2008.
- 8 O. Does Idaho Power believe the percentage level
- 9 of funding for the Rider needs to be changed?
- 10 A. That would depend on the level of change.
- 11 Q. Can you explain?
- 12 A. Yes. Exhibit No. 50, as described earlier in
- 13 my testimony shows the forecast results of changing the
- 14 Rider funding. As you can see, a modest downward change in
- 15 the Rider funding level seems to decrease the Rider's
- 16 current negative balance, adequately fund the Company's
- 17 current programs and initiatives, and fund increased
- 18 marketing, expand residential programs, increase
- 19 evaluations, and research. In the past when Idaho Power
- 20 has filed for Rider increases, it based the changes on
- 21 similar analysis based on forecasted need. This is
- 22 consistent with past filings.
- Q. What do you mean by "modest" Rider level
- 24 decrease?

- A. As can be seen from Exhibit No. 50 and as
- 2 proposed by other parties in this case, decreasing the
- 3 Rider to 4 percent would provide adequate funding for Idaho
- 4 Power's current initiatives and provide funds for expanded
- 5 efforts in the future.
- 6 Q. Does this forecast include funding for the
- 7 agreement with the Office of Energy Resources ("OER")
- 8 concerning the K-12 Energy Efficiency Project as pointed
- 9 out in Ms. Hirsh's direct testimony?
- 10 A. Yes, but there has been some confusion about
- 11 Idaho Power's level of funding for these projects. OER's
- 12 potential investment in these projects is \$9.6 million but
- 13 Idaho Power's incentives would be a small portion of this
- 14 amount. Although it is still an estimate, the Company has
- 15 included \$3.5 million for incentives for the OER projects
- 16 in 2011 and 2012.
- Q. Why would a four percent Rider support
- 18 existing and new energy efficiency services?
- 19 A. In Case No. IPC-E-10-27, Idaho Power filed a
- 20 comprehensive plan to fund energy efficiency. In Order
- 21 Nos. 32217 and 32245, the Commission authorized the Company
- 22 to account for the incentives from Custom Efficiency by
- 23 placing them in a regulatory asset account and recover \$10
- 24 million of the Rider balance through a one-time adjustment
- 25 to the 2011 power cost adjustment. In this current rate

- 1 case, the Company filed to move the incentive payments for
- 2 the Company's demand response programs into net power
- 3 supply costs. These actions and favorable regulatory
- 4 treatment have allowed Idaho Power to decrease its negative
- 5 balance and remove approximately \$16 million from its
- 6 annual Rider expenses while maintaining its objectives of
- 7 pursing cost-effective energy efficiency.
- 8 Q. What if over time this level of funding does
- 9 not adequately support energy efficiency at Idaho Power?
- 10 A. Idaho Power, as it has done in the past, would
- 11 file with the Commission to increase the funding. Based
- 12 upon its past experience, Idaho Power believes that
- 13 customers prefer this approach rather than accumulating
- 14 large balances in anticipation of future energy efficiency
- 15 expenses.
- 16 Q. The Kroger Co. witness, Kevin Higgins,
- 17 recommended that the Commission reduce the Rider from 4.75
- 18 to 3.48 percent. Does Idaho Power support a reduction of
- 19 that size?
- 20 A. No. Mr. Higgins' calculations neglect to take
- 21 into account the negative balance that currently exists in
- 22 the Rider. Mr. Higgins' proposed level of funding would
- 23 not provide adequate support for existing programs.
- Q. Does this conclude your testimony?
- 25 A. Yes.
