To whom it may concern: Boise, Idaho

Idaho Powers wanting a rate increase is ridiculous!!

Enough is enough!! To say they haven't had a rate increase since 2008 is impossibly unwarranted. We

haven't had a raise in wages since 2003!! I cut back to bare minimum - use less kilowatt hours than previous years and still pay alot more! A person can only cut back so much

what more does Idaho power want - they can't meet operating costs? Well we can't hardly meet our every day

bills either. Everything from taxes, insurance, gas, medical has raised why doesn't Idaho Power just learn to cut back like we all have. They've had the best water year in years but always seem to find a way to increase. You - PUC - will probably grant the increase when have you not!! Are you a help or just there for political reasons - I wonder!!

Enough is Enough
It's time to feel for the consumer for once
