Comment: Please do not cave in to pressure from big utilities by punishing net metering customers who produce their own power with a different rate structure. You should be encouraging clean small scale power production instead of penalizing it.

Name of Utility Company: Idaho power

Comment: I support equal access to the electric grid for all customers, including those with solar or wind power. As a constituent who contributes to the generation of power, especially during peak load times, I feel I should be rewarded rather than penalized.

Idaho Power should add more options for customers to generate and use green energy, not restrict options.

Idaho Power should be fairly compensated for access to the grid by all customers, not just those installing solar. The price of access to the grid should be the same for all.

The public needs full information on the benefits of having distributed energy and more solar as well as the costs. Recent studies have found that renewable power makes the grid more stable.

Cost Increase Proposed by Idaho Power for Customers with Solar or Wind Turbines

Citizen Comment to the Idaho Public Utilities Commission

P O Box 83720 Boise, Idaho 83720-0074; FAX: (208) 334-3762

Case Number: IPC-E-17-13

My power company is Idaho Power

I want Idaho Public Utilities Commission to know:

- ☒ I want to keep solar and wind power **affordable** in Idaho.
- ☒ I may want to put solar power on my property in the future.
- ☒ I like solar & wind power because they will bring **thousands of jobs** to Idaho.
- ☒ I would like to see a ^{better} **state incentive program** for installation of solar and/or wind.
- ☒ Idaho Power should continue to pay for power generated by customers; keep Schedule 84 that provides net metering.
- ☒ Idaho Power should embrace solar power because it reduces the need for power during the day when air conditioners are running the most.
- ☒ Idaho should work with their customers to develop strategies to encourage distributed generation, as other power companies do.
- ☒ Idaho Power should invest in more renewable energy and divest from fossil fuels.
- ☐ Idaho Power should reimburse the cost of a home owner's solar system because they reduce the need for more infrastructure (power lines, power plants, etc.).
