Address:  
Clark Fork Idaho, 83811

Name of Utility Company: ~~Avista~~ *IDAHO POWER COMPANY*

Comment: Idaho residents who use solar panels should be eligible for a variety of incentives for doing so, including rebates and state tax cuts. The state of Idaho needs to ENCOURAGE and PROMOTE green renewable energy sources like solar, wind, and geothermal energy. It would be unconscionable to penalize those individuals who are making an effort to improve our energy generating infrastructure and save money.

Name of Utility Company: Mrs. *IDAHO POWER COMPANY*

Comment: I'm asking the Commission to prevent Idaho Power from billing new customers, who generate some of their own power, an increased cost to access the electric grid. Idaho Power must do more to promote clean energy savings.

Meridian Idaho, 83646

Name of Utility Company: Idaho Power

Comment: Idaho should be growing clean energy options to reduce our reliance on out-of-state fossil fuels. The net metering program is the only means for individual Idahoans to invest money in their own locally generated clean energy.

The Idaho PUC staff looked at Idaho Powers documents and found no reason to segregate solar customers. Instead, I ask the PUC to direct Idaho Power to consider the full range of costs and benefits that arise when customers avoid utility power and meet their own needs with local clean energy.

Because I cant choose my utility, I rely on the PUC to ensure fair programs. Please maintain the current net metering program.

Hailey Idaho, 83333

Name of Utility Company: Idaho Power

Comment: Investing in rooftop solar to control energy bills while supporting Idahos clean energy sector is important to me. Please maintain the net metering program as a simple and fair means to enable Idahoans to meet their own energy needs.

The PUC staff looked at the details and found no evidence to support Idaho Powers request to segregate solar customers. I agree.

Because I cant choose my utility, I rely on the PUC to ensure fair programs. Again, please maintain the current net metering program.

Boise ID, 83703

Name of Utility Company: Idaho Power Company

Comment: I ask that you deny Idaho Power Company's request for a new net metering customer class. Idaho Public Utilities Commission needs to protect consumers who install solar panels from unfair charges and fees. Idaho Power Company is a for-profit company with a monopoly here in southwest Idaho, and because IPC has a monopoly, it should act as a public utility. These actions should include everything possible to make local generation easy and affordable, putting less strain on a far-reaching grid system.

Solar generation provides a peak generating capacity when there is also a peak demand in the summer months. Solar generation should be highly encouraged, not discouraged as IPC seems to be doing. Solar power generating customers pay their own capital expense for their generating system, not asking IPC to make payments for the customer's system. And by generating power in the same region that the power is used, IPC should be able to meet demand without building more very costly infrastructure.

Thank you,  
Tim Yoder

Name of Utility Company: Idaho Power

Comment: Idaho Powers net metering program enables local citizens to support Idahos clean energy sector. Supporting this growing sector of our economic reduces the current reliance on out-of-state fossil fuels for roughly 50% of our electricity.

Investing in local solar power keeps more energy dollars in our communities and allows individuals to meet their own energy needs. Individual control and local economic growth are Idahoan values.

Please stand up for these values by maintaining the current net metering program.

Comment: I would like to understand why IP has continued to put up road blocks against solar power. Safe to say it always comes down to the bottom line, \$\$\$. Why won't they embrace solar power? It's going to continue to grow weather they're on board or not.
