Address: 13135 w scotfield st  
Boise ID, 83713

Name of Utility Company: Idaho Power

Comment: How is it that Idaho Power states their commitment to clean energy and at the same time discourage consumers to install solar energy systems. First, net metering customers are working to delay the need to construct additional power plants or purchase additional power for fossil fuel plants, especially with the number of people moving into the valley. Second, how fair is it punish the individuals who have already made a substantial financial commitment with a solar installation. (I spent over 18,000) Finally, this proposal will discourage job creation and probably affect current jobs in this nascent industry. NOT FAIR NOT RIGHT!!

Name of Utility Company: Idaho Power  
Comment: Net metered power rates should encourage extended generation of this clean power source while treating these customers fairly.

Nampa ID, 83687

Name of Utility Company: Idaho Power  
Comment: I expect Idaho Power to treat net metering customers fairly, by not reducing the rate it credits for any extra power generated by solar customers.

Comment:

As a new retiree, I invested money I have now to pay for my electricity in the future. It's a personal investment but it's also an investment in my community. Nuclear power is not "clean". Hydro is causing damage to the salmon migration. Wind is ugly. Solar is clean, free, and hidden.

Please continue to hold Idaho Power accountable to paying us for any extra power we produce at the same rate we buy extra from then. It's only fair.
