Name of Utility Company: Idaho Power

Comment: Please do not change your net metering rates!

You should be encouraging people to use clean energy not penalizing them.

I understand solar generators need to pay their share for infrastructure but make the fee fair and equitable and encourage users to use clean energy so we all can have clean air and water to live with.

Thank you

Comment: I think Idaho Power should encourage more use of clean energy by treating net metering customers fairly. Do not reduce the rate credited for the clean energy Idahoans produce. Rooftop solar creates jobs and keeps our dollars in Idaho, as well as improving air quality and stopping global warming. Idaho Power should help build Idaho's clean energy future, not hinder it. Thank you.

Comment: Idaho Power wants to reduce the rate it credits for any extra power Idahoans generate. Many homeowners and business owners in Idaho want to reduce their power bills and support clean energy. They have invested millions of dollars into our local economy by installing rooftop solar systems, which support local jobs and workers. These Idahoans are reducing our reliance on out-of-state fossil fuels and protecting our air quality. Do not change net metering as an obstruction to the critical role clean energy can play in creating a vibrant and healthy state.
