Name of Utility Company: Avista

Comment: I respectfully ask that Idahoans who have chosen to install solar panels at their homes or businesses and investing their own money to meet their own energy needs not be penalized by utility companies raising their bills. Our utilities should treat these Idahoans fairly by paying them for any extra clean energy these citizens produce.

Additionally, I ask that Avista speed up its exit from the Colstrip power plant.

Thank you.

Name of Utility Company: Idaho Power
Comment: Hello PUC,

I am writing you on behalf of all home owners who install solar panels on their homes here in Idaho. I'm requesting to have Idaho Power stop rate hikes on these climate change-fighting citizens who invest their own money to help fight an existential threat to all Idahoans. They should not be punished with utility rate hikes or face an unfair meager reimbursement since they are actually generating power and putting it back onto the grid which of course benefits Idaho Power. This utility has made a commitment to shift 100% of it's energy to renewable sources by 2045 and it needs to stand by it's commitment. Thank you.

Sincerely,

Stephen Veals
