To Whom it may Concern

my name is Allen England I've enclosed some Signatures that i have collected to save the coal plants that Idaho power owns shares in these plants are located in the states of Oregon, Nevada, and Wyoming. Closing these plants will cause a poverty situation in these smaller communities with job loss and tax revenue. The decommissioning of these coal plants is very costly to the electric customers. Windmills and solar panels are not reliable and have a huge installation cost. Windmill blades and motor housing have no current recycling program and will have to be buried in landfills. The best option is to install new emission equipment and keep these plants open

Thank you

Allen England
