Dear Idaho Public Utilities Commission:

I am an Idaho Power customer and I am writing in support of clean energy because climate change is the most pressing issue of our time. Clean energy has become cost competitive with fossil fuels, is creating good paying long term jobs and has the potential to create substantially more. It is good for both environmental and economic reasons. But the damage done by fossil fuel is happening on a time scale faster than predicted and therefore I urge that Idaho Power pursue clean energy as fast as is possible. Thank you for your commitment thus far and I again urge you to be an example in the industry make the needed changes with the urgency they deserve.

Regards,
Todd Davis

Dear Idaho Public Utilities Commission:

I am an Idaho Power customer and I support clean energy because I want utility companies to be leaders and take action. Utility companies have a lot of power to make a positive impact on our environment and culture and need to step up and be the leaders we deserve! Public commitment to go 100 percent clean renewable energy is important and we need to see More aggressive actions.

Dear Idaho Public Utilities Commission:

I am an Idaho Power customer and I support clean energy because ... I am a proud fourth generation Idahoan. I own land north of Sandpoint . I grow food and have an extensive orchard. I've been an educator of young children for thirty years . We need to do what ever we can to combat climate change , so that our grandchildren grandchildren can live in as fine a country , WORLS AS WE WERE BROUGHT UP IN.

Regards,
Kristen Goodman

Dear Idaho Public Utilities Commission:

I am an Idaho Power customer and I support clean energy because coal and gas power come with a massive long term detrimental environmental impact, underlying numerous issues, such as but not limited to human health, water pollution, aquifer contamination, social injustice in poor and minority communities, tax payer subsidies, loss of biodiversity, and the accelerating onslaught of rampant climate upheaval, which includes catastrophic wildfires, property loss with human loss of life. CO2 emissions cannot continue to exacerbate all the above accelerating catastrophic impacts not just on Idaho but rippling world wide degradations. Invest in clean energy and accelerate your companies removal of coal and NG energy portfolio.

Dear Idaho Public Utilities Commission:

I am an Avista customer and I support clean energy because I care about preserving what I love about living in Idaho, specifically Coeur d'Alene. I have loved living here for the past 34 years and raised my two sons here. Clean energy doesn't require a fuel source we have to continually pay for, one that is driving climate disruption in our state, and local communities. We must protect for ourselves, our children, and all future generations as stable of a climate as possible, minimizing the worst outcomes of a business as usual climate. We must live within our climate means, something clean energy allows us better to do.

Regards,
William Irving

Dear Idaho Public Utilities Commission:

I am an Idaho Power customer and I support clean energy because it helps us provide for a sustainable future for our kids and their kids. Clean energy is important for environmental reasons as well, including helping reduce climate change impacts, improve water quality and quantity, and clean air. Our home, powered by Idaho Power, currently uses only clean energy as provided by Idaho Power. I would like this to be something provided to all and available to all, without any price or availability differences. The sooner we can make this transition the better. I urge you to move ahead with clean energy and energy conservation actions at the earliest possible time. Thank you.

Regards,
Gregg Servheen
