Dear Idaho Public Utilities Commission:

I am an Idaho Power customer and I support clean energy because of the dangers of climate change on our state. I also support local clean energy which builds more resilient communities. Likewise Idaho Power should not spend money on gas plants but invest in local resources. Companies and families should be able to produce their own solar (or wind) power and connect to the grid and not be charged extra for that. Farmers and ranchers should have the same rights.

Thank you.

Regards,
Scott Friedman

Dear Idaho Public Utilities Commission:

As an Idaho Power customer I strongly support moving to clean, renewable energy as rapidly as possible. There are clear climate change issues which must be addressed as soon as possible and additionally the economics support the change. I urge the IPUC to encourage Idaho Power to pursue these goals as quickly as possible. Thanks for considering my viewpoint.
