Dear R. Idaho PUC,

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Sincerely,

Shiva Rajbhandari

Dear R. Idaho PUC,

As an Idahoan/resident on the planet, it is so important to reduce all our emissions. Idaho Power can achieve much by reaching their goal ASAP by making FAIR opportunities for all to go solar. We have invested in them on our home but it is quite an individual financial endeavor so I know what it takes to do. I believe it is inevitable that we all convert to clean energy.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

---

Dear R. Idaho PUC,

This issue is paramount to anyone who cares about our future and the role of clean energy in reducing greenhouse emissions. We don't have until 2035 or 2040 to get to zero emission energy. We need to enlist the support of private citizens and household solar to get there as soon as possible. Companies that enjoy the benefit of a publicly enabled monopoly, such as Idaho Power, need to be proactive in this endeavor. They should be subsidizing rooftop solar for homes and businesses, including agriculture, and using this excess production to meet more aggressive targets for zero emission energy production.

Unless we make substantive progress soon, the snowfall upon which hydroelectric production depends is at risk.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Dear R. Idaho PUC,

I represent Blue Lightning llc. As a business we were positioned to hire 2 employees including a master electrician level job as early as 2016. Idaho Power and the state has reliably placed severe speed bumps since our inception in 2010. These have taken the form of:

1. Net-metering restrictions, multiple instances over the past decade
2. 2016: Solar specific code changes enforced the same month they were enacted in code with no customary delay to allow industry adjustment.
3. Unique in the entire us: restrictions on Low voltage and journeyman training options
4. Licensing and insurance requirements that the Idaho insurance industry does not offer.
5. City and local resistance to solar installations at the permitting level.
6. Limited or no access to required certifications: 10 hour or 30 hour OSHA card
7. No conversion of military experience to civilian certifications

It is time to reverse this trend. Remove industry restrictions arbitrarily placed by Idaho Power and the PUC.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Name of Utility Company: Idaho Power

Case ID: IPC-E-19-19

Comment: "Please ensure that Idaho Power achieves its 100% Clean Energy goal quickly and equitably. Multiple cities and counties in our area are focused on clean energy commitments (Boise's (2035), Meridian's (2045), and Ada County's (2045)) because this issue is of paramount importance to the people of Idaho. Idaho Power can remain a profitable company while simultaneously moving to 100% clean energy, but they need to be held accountable in order to do so. Please ensure that happens. As a solar owner myself, I know that decentralizing the grid helps strengthen it. Idaho Power will benefit from rooftop solar, utility grade solar, wind and more. Let's make this happen together! "

Dear R. Idaho PUC,

Clean energy can make us healthier, save us money on healthcare, support our local economy and energy, and bring us together. I look forward to working together as Idahoans to make a better future.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Sincerely,

Nancy Basinger

# PORTNEUF RESOURCE COUNCIL

Idaho Public Utilities Commission

Attn: Jan Noriyuki

11331 W. Chinden Blvd.

Boise, ID 83714

January 20, 2021

Re: Case # IPC-E-19-19, Idaho Power Integrated Resource Plan

Dear Commissioners,

The Portneuf Resource Council (PRC) is a southeast Idaho chapter of the non-profit Idaho Organization of Resource Councils (IORC). One of PRC's missions is to promote the adoption of clean energy in Idaho. We coordinated the successful Solarize Pocatello Campaign in 2019 that resulted in more than 80 homes installing residential solar and added ~650 kW of new clean power to the grid. We have weighed in on Idaho Power's previous petitions to the IPUC regarding net metering compensation. PRC is pleased with legacy rates for net metering compensation being granted to existing residential, Ag and commercial Idaho Power customers and applaud the decision of the IPUC to require Idaho Power to complete an evaluation study of customer generated power prior to making further net metering rate change requests. These decisions show a commitment to clean energy in Idaho.

PRC asks the IPUC to continue to facilitate and accelerate clean energy goals in Idaho. It is well documented that clean and renewable energy is more cost effective than coal, nuclear, and natural gas for power generation. Achieving Idaho Power's objective of 100% clean energy will benefit the economic well-being of Idaho Power and bolster Idaho's economy with new, well-paying jobs in the clean energy sector. With the adoption of carbon-free fuels for power generation, Idaho will be part of the solution to catastrophic climate change. This is a win-win scenario for all.

With respect to IPC-E-19-19, PRC requests the IPUC to direct Idaho Power to:

- Accelerate the transition to clean energy and significantly pull in their 2045 goal to 2035. This should include exiting coal and natural gas power plants earlier than originally planned.
- Invest in clean energy projects in Idaho that bring new, well-paying jobs to the region.
- Reject the use of natural gas power plants as an interim step towards the Idaho Power's clean energy objectives.
- Continue to support Idaho citizens, businesses, and communities right to customer generated power.
- Facilitate the many and growing number of communities and municipalities in Idaho making clean energy commitments. (The cities of Boise, Pocatello, and Hailey have passed clean energy resolutions and many other Idaho cities are working on similar commitments).
- Consider funding Community Solar projects in Idaho that help address environmental and social justice issues including the nearer term availability of clean affordable energy to Idaho families of low and middle income.

Thank you for your consideration and your ongoing support of clean energy in Idaho. Your work is greatly appreciated by the members of IORC and PRC.

Sincerely,

Mike Engle

Chair, Portneuf Resource Council

Pocatello, Idaho

Dear R. Idaho PUC,

If we have options for clean energy in Idaho why wouldn't we take advantage of them? I hope to share this lovely state with my grandkids and show them all of the amazing outdoor activities Idaho has to offer! Let's protect this lovely landscape and use clean energy!!

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Sincerely,

Danielle Holley

Dear R. Idaho PUC,

I feel that if individuals, communities, states, nations and of course businesses do not act soon, we will reach a tipping point that will be irreversible for the planet to maintain life as we know it. It is time for Idaho power to develop a fair practice that allows individuals to own affordable solar power and for Idaho power to make a profit. Those should not be mutually exclusive.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Sincerely,

Greg Farmer

---

Dear R. Idaho PUC,

Clean energy is important to avoid polluting our air, waterways and is necessary to protect our wildlife and insure we protect the planet. Please insure that Idaho Power does everything and utilized all technology at their disposal to do their part in protecting out natural resources to protect the planet for future generations.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

---

Dear R. Idaho PUC,

We can debate, if we must, the cause of global warming, but we cannot debate its existence. We are in an era where the average American produces 16 tons of Carbon per year. To put that in perspective, my family installed solar panels that have saved 54 tons of Carbon over 36 months of production. That was a personal choice, but clearly it's made an enormous difference. Why in an era where we refuse to wear masks as a matter of personal choice for personal gain would we ever entertain a policy that eliminates a personal choice for the gain of society, as well as our world and our children. Solar power means no extra cost to our power producers and less cost to power distributors. That would be a ludicrous and illogical policy at best, and nefarious and vile policy at its worst. We can do better.

I support Idaho Power's move toward 100% Clean Energy in its latest Integrated Resource Plan. I hope the PUC will urge Idaho Power to 1) Speed up its plan to achieve 100% clean energy, including earlier exits from its coal plants and gas plants; 2) Invest in local clean energy projects (NOT new gas plants) that benefit Idaho's economy; and 3) Give customers and communities a fair chance to own their own solar energy systems.

Sincerely,
