Comment: "It makes no sense to impose a December 1, 2020 cutoff date for the current solar net metering program with on plan in place for what happens after that date. Idaho Power needs to complete a valuation study of customer generated power like they did for residential customers. Ag and commercial customers have the right to fair rules, to choose energy independence for their property, and stabilize their energy costs. Idaho Power should allow farmers and families to meet their own energy needs. They also need to remove the arbitrary 100 kW maximum for net metering."

Subject: Solar for farmers
Date: Saturday, September 26, 2020 9:34:52 AM

Hi PUC,

I want to express my deep support for maintaining policies that allow farmers to benefit from solar. Farmers should be treated the same as residential customers, giving them 25 years of net-metering guaranteed. We need to encourage solar and other renewable energy throughout the state as we move towards a clean energy grid. Hindering that process and putting extra burden on farmers is not sound policy.

Thank you,
Scott Runkel
Hailey, Idaho

Comment: "I have not read Ithe above referenced petition from Idaho Power. It may be reasonable. I would simply wish to encourage the commission to do al it can to promote renewable energy in our state."
