Case ID: IPC-E-20-26

Comment: "As a fairly new Idaho resident from less sunny western Oregon, we immediately had Solar installed on our home. We were surprised at how little Solar is in our neighborhood but already several neighbors are considering Solar. We have met climate change deniers and human caused deniers but believe that the witnessed climate changes and science both require for the future of our children and grandchildren, Idahoans, Americans, and the world to do what we can. Idaho Power will benefit by lessened need for future generation capacity if more solar enters the grid so why would Idaho Power or the PUC discentivize home solar? For the future of Idaho, the USA, and the world, please help encourage non fossil fuel energy."
