Re: Case No. IPC-E-21-09
*Idaho Power Company's Application for Capacity Deficiency To Be Utilized For
Avoided Cost Calculations*

Dear Ms. Noriyuki:

Idaho Power Company ("Company") has received the letter and attachments from Commission Staff dated June 8, 2022, advising the Company of the updated avoided cost rates for qualifying facilities using the surrogate avoided resource ("SAR") method, which have been recalculated as instructed in Order No. 35422 to reflect Idaho Power's most recent capacity deficiency date as approved in Case No. IPC-E-21-09, Order No. 35415. Idaho Power has reviewed the information and agrees that Staff has correctly updated and calculated the SAR avoided cost rates for Idaho Power using the Commission-approved method and in conformance with Order No. 35415.

Please feel free to contact me if you have any questions. Thank you.

Sincerely,

A handwritten signature in blue ink that reads "Camille Christen".

Camille Christen
Resource Acquisition, Planning and Coordination Manager
