Re: Case No. IPC-E-21-12 Supplemental Filing
In the Matter of Idaho Power Company's Application for a Determination
Acknowledging its North Valmy Power Plant Unit 2 Exit Date

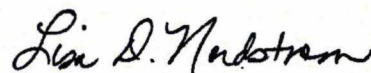

Dear Ms. Noriyuki:

On April 30, 2021, Idaho Power Company ("Idaho Power" or "Company") filed an Application for a Determination Acknowledging its North Valmy Power Plant Unit 2 Exit Date along with the supporting Direct Testimony of Jared L. Ellsworth. As discussed by Company witness Mr. Ellsworth in his testimony, the Company issued a request for proposal ("RFP") on April 26, 2021, for the delivery to Idaho of firm capacity and energy during the summer months through 2025 to test the transmission deliverability and resource market availability of a replacement resource for Valmy Unit 2. Because responses to the RFP were not due until after Idaho Power filed its request in this case, the Company committed to supplementing its filing to inform stakeholders of proposals received.

RFP responses were due to Idaho Power May 4, 2021. However, the Company received no bids and therefore has no proposals to evaluate. The Company's lack of receipt of bids could be indicative of evolving market conditions, which factor into the Company's consideration of reliability. The results of all resource alternative analyses continue to support an exit from operations of Valmy Unit 2 in 2025.

If you have any questions about this supplemental filing, please do not hesitate to contact me.

Very truly yours,

LDN:sh
