Comment: "I have noticed through their past actions that Idaho Power is not inclined to value the economic, environmental and quality of life benefits of residential solar production. Regarding this case, I wanted to comment and request the following three points: - I hope an independent study will be conducted by an objective 3rd party -I hope environmental, health and quality of life benefits of solar production are taken into account and valued by the study - I hope the value of distributed local power production is taken into account (ie grid stabilization) Thank you! "

Dear Idaho Public Utilities Commission,

Although our household is considered low income, we have supported green power through Idaho Power billing options. It is a goal to install solar panels in the future. We are very aware of the threat of climate change and want to do whatever we can as individuals. Thank you for the consideration.

I'm an Idaho Power customer and I care about protecting every customer's right to meet their own energy needs through a fair rooftop solar program, which must be as affordable and accessible as possible. Please ensure that Idaho Power's value of solar study is fair, accurate, thorough, and evaluates the wide range of benefits that local, clean, customer-owned power provides to customers, the utility, and the public at large.

Sincerely,

Ruth Merrill

Comment: "I've lived in Idaho since 2005 and we need to do whatever we can to make solar more economical, efficient and cost effective for Idahoans. It should stay at a 1-to1 ratio for KWh created by solar energy "

Subject: IPC-E-21-21 Idaho Power Solar Study
Date: Monday, November 8, 2021 2:36:47 PM

Dear Idaho Public Utilities Commission,

It is very important to me that we support solar as one of the critical elements in a zero carbon future. That includes private home owners solar systems. Anything that can be done to encourage owners to support solar is very important in continuing to build momentum.

I'm an Idaho Power customer and I care about protecting every customer's right to meet their own energy needs through a fair rooftop solar program, which must be as affordable and accessible as possible. Please ensure that Idaho Power's "value of solar" study is fair, accurate, thorough, and evaluates the wide range of benefits that local, clean, customer-owned power provides to customers, the utility, and the public at large.

Sincerely,

Susan Grieger

Comment: "Regarding the study that Idaho Power is conducting into residential solar, I ask that the cost of carbon or the environmental impacts of carbon based energy sources are considered in the impact study. Looking at this through financial cost to Idaho Power alone without examining the greater context of the benefits of non-carbon energy sources is inherently biased. Please ensure that the study is unbiased, and takes into consideration carbon and cash costs."
