Name of Utility Company: Idaho Power

Case ID: IPC-E-21-21

Comment: "Please ensure that an all-encompassing study of the cost and benefit of residential-generating solar is completed. Idaho Power, out of concerns for maintaining its monopoly, has little incentive to ensure an accurate study is completed. Grateful to have an unbiased committee overseeing this work to ensure a high quality study is completed which will allow for the right solar policies to be enacted. With rising temperatures combined with falling reservoir levels and associated loss of hydroelectric power in the future, combined with population growth and increased annual AC usage, we need to ensure we have access to low cost energy, especially those that don't accelerate carbon dioxide production."

Dear Commission Secretary,

I am an Idaho Power customer that has solar panels. They have cut my power bill greatly. I understand why the IP investors are scared of going green because it will affect their returns. For me, a retiree, I cannot afford them constantly increasing my power bill. Solar panels allow us to break free.

Utility Company:

I acknowledge that submitting a comment in an open case constitutes a public record under Idaho Code § 74-101 (13) and all information provided by me on this form is available for public and media inspection. My comment may be reviewed by the utility.

Ask a question or state your comment:

We were encouraged to move to solar to save money and save much needed energy. Saving energy relieves pressure placed upon hydro generated energy. It makes little sense to discourage savings through solar, when Idaho and the N.W are experiencing a drought. MORE AND MORE pressure is on electrical energy. Why limit the effort to save through solar?
