Address: 8690 W. Atwater Dr.
Garden City, ID 83714

Name of Utility Company: Idaho Power

Case ID: IPC-E-21-40

Comment: "Idaho Power's latest proposal to augment Solar Power in the state does NOT do an adequate job of enabling DER's, including Community Solar, to connect and participate in the energy transition in our state. Benefits of DER's, including Community Solar, include better grid resiliency and reliability, deferred build out of distribution lines, and enabling the participation of customers who might not otherwise be able to tap into solar energy to do so. These are all benefits to customers of IOU's, to whom the PUC is chartered to ensure affordable, reliable and resilience energy."
