Name of Utility Company: Idaho Power

Case ID: IPC-E-21-17

Comment: "Hello, regarding climate change, energy efficiency and distribution I would like to advocate for Idaho Power to work with community groups to develop a community owned solar program. Reasons why this matters and why it is so important are: -Accessibility to low-income community members -Local jobs and economic benefits -Potential lower energy bills -Community driven action on climate change -Profits go to local community members, not corporate shareholders -Electric grid resilience and reliability -Public education engagement opportunities -Local control and oversight -Energy independence Our Planet is running out of time. We desperately need to divert from coal/fossils fuel burning and we have to use solar energy wisely together for our future. (P.S. I didn't know what case number I could use so this might be incorrect for this topic. If it is the incorrect case number please forward to whom it may concern)"
