Address: 4808 Pioneer Road
Ontario, OR 97914

Name of Utility Company: Idaho Power

Case ID: IPC-E-22-12

Comment: "I own a farm in Ontario, Oregon and am an Idaho Power customer. I am hoping to install solar to offset the electricity we need for irrigation. I am surprised to see that the system cap for net metering seems to be 100kW for Idaho Power customers like me when it is 2000kW for non-residential Pacific Power Schedule 135 customers in Oregon (Pacific Power Net Metering Service). I have no choice as to which utility I can use. I feel that is unfair to limit my access to the technology available for managing my farm and my electricity costs for irrigation. This has a big impact on our farm's bottom line. I support modifying this cap as soon as feasible. Thank you, Mark Clark, Pioneer Road Farm, LLC."
