Dear Idaho Public Utilities Commission,

Outrageous! Making alternative and sustainable energy more expensive increases climate change damage by using your heavy monopolized power to further reduce the opportunity to save salmon etc. Greed, greed, greed, indifference to human and wildlife health and lobbying corruption are at the heart of this. Shame on you.

I am very concerned about Idaho Power's newly published cost-benefit study on rooftop solar. It underestimates the value of solar by intentionally excluding measurable environmental and related benefits. This impacts customer rates and threatens fair compensation for Idaho families, businesses, farms, schools, and other local entities that benefit from locally-owned solar.

Please hold in-person public hearings in multiple locations across Idaho Power's service territory (and offer virtual video options and a weekend option) to ensure as many people as possible can participate in this critical proceeding and share their concerns directly with the Commission.

After gaining an understanding of public concerns and the technical flaws in the study, I urge you to reject Idaho Power's study. Idahoans deserve solar rates based on a more fair, credible, comprehensive, and complete analysis.

Sincerely,

Frances Cheston

Telephone: 208-863-0404
Address: 1908 N Lawndale Dr
Meridian, ID 83646

Name of Utility Company: Idaho Power

Case ID: IPC-E-22-22

Comment: "I was notified that Idaho Power has a Customer Generation Study. I am one of the Generating Customers. I have tried to understand what Idaho Power is proposing regarding how it handles the power I generate until I need it and how it counts the additional power I purchase from them. I am at a loss for what they are trying to achieve. I have tried to track my usage vs generation for the past 20 months. At the end of last year, I contacted Idaho Power and spoke with a representative about the fact I could not make my data balance. This included data on my bill and usage data from Idaho Power that did not match. The only explanation I received was that this was due to the hourly monitoring of usage. It is my opinion that before Idaho Power makes any changes to billing or cost to customers, we need to understand how there could be two sets of data for one customer. I know that I would like to understand how my bill, usage, and generation do not balance. Thank you for your attention. Sherepta McLeod"
