Case ID: IPC-E-22-22

Comment: "Idaho Power is requesting a rate increase due to the costs of generation going up. At the same time, they are asking for a reduction in what they credit solar power generation from customers. Idaho Power can charge up to 12.6656 cents for the electricity I generate at no cost to them, this should be a factor in what Idaho Power is required to use as an export credit rate for solar panel power generation. Thank you, L Zufelt"
