Address: 224 N Sherwood Dr  
Nampa, ID 83651

Name of Utility Company: Idaho Power Co

Case ID: IPC-E-23-11

Comment: "Idaho Power's current 8+ % increase states that part of the justification is because of the increased cost of infrastructure. Yet at this time they are in partnership with a government funded utility in which Idaho Power Co. is to build a battery storage system to handle the wind generation and photo cell technology.

Battery technology is very expensive and still untested. Why is Idaho Power taking on the most expensive and least reliable of that type of co-generation system? Is this really the place for Idaho Power, a public utility to, spend it's rate increase and infrastructure expenses? Batteries are some of the hardest green energy items to recycle."
