Name of Utility Company: Idaho Power

Case ID: IPC-E-23-11

Comment: "I am totally against Idaho Power's request for a general rate increase. I'm especially concerned about the huge increase in monthly service charges for each meter at one residential address. I believe Idaho Power has been very sneaky in the manner that they are trying to increase their profits without adequately notifying their customers. Idaho Power's website claims the rate increase would be 10.78% for a residential customer, but they don't mention anything about monthly service fees. I am a residential customer with two meters, one on my house where I have on-site generation from solar panels and one on my shop. If I understand this case correctly, the monthly service fee for each of my meters will increase from \$5 to \$35. If my math is correct, this would be a 600% increase. This increase is totally unjustified. "
