Comment: "I would appreciate the power companies keep their word and honor their promise. The attraction for getting a solar system was in what was being offered by them. Taking the offer away, and going back on their word, leaves homeowners with a broken promise and without incentive. Please consider that honoring the promise is what is being proposed here. It's always best to honor what was promised."

Comment: "In response to the changes requested by Idaho Power to On-site Generation: I signed a contract with Idaho Power and I am not signing a new contract with them to change this program to benefit them even more. The grandfather date should include up to the date before their proposed change would go into effect. This is yet another plan change that benefits a monopoly company against the public who has helped them address the lack of available power in their grid and is monitored/controlled by a group of folks owned by the monopoly. It's wrong and time the PUC actually does their job and stop this nonsense. Thanks,  
Bryon Hunter"
