Comment: "I have been informed of changes to rates of credits for solar producers are being considered for an adjustment. While I don't agree with the reasons for the changes being considered, I want to ask that these changes only be implemented for those in a future date and not yet in contract or production. I would ask that my property get the same rights as those producing solar for the last few years. In an attempt to make things more fair for the community, I ask that this attempt for fairness to also be extended to those who already agreed to a specific set rate and credit. Only after the new rates and credits are set, should the incoming solar producers be required to adapt. Thank you. "
