Comment: "Idaho Power's arguments make little sense:

1. They say they want to make this fair to all consumers...Fair would be to recognize the cost borne by their customers who stretched their budgets to afford on-site generation. My solar panels were very expensive and I have yet to recoup the cost.
2. Their customer base has greatly increased yet they say their expenses have increased by 1% per year. How much has their revenue stream increased?
3. For once, PUC needs to support the citizens of the state of Idaho, NOT a corporate profit-seeking entity.
