Name of Utility Company: Idaho Power

Case ID: IPC-E-23-14

Comment: "I strongly oppose Idaho Power's proposal to substitute net billing for net metering, on the grounds that it will financially discourage anyone from adopting solar power.

It doesn't appear that Idaho Power is having any difficulty in making a profit for themselves. I'm a small business owner and trust me my benefits are nothing compared to Idaho Power's. You would think that they would encourage their customers to invest in some form of green power but no they want to punish us by not giving 1 to 1 credit for the power that we generate via solar, we all know that they will sell the additional power that we generate to another state for a nice profit. It is time for the PUC to stand up to Idaho Power and say no to their plan of net metering. Please don't allow this greedy grab for more money from the customers."
