IDRPS PUBLIC UTILITIES COMMISSION
Dear Commissioners,
I will try to construct
this letter so it is
proper for you. I didn't
know until recently
about the PURPA law.

I believe renewables contracts
are unfair to ratepayers,
and 20 yr. contracts are
unreasonable as they are
not reliable.

Wind & solar especially,
as I believe "Climate Change"
is a farce. These are an
industry and nothing more.
No greenies for me!

Your decisions affect
us all. I would strongly
encourage you to grant IP
Power, PacifiCorp, & Avista
their requests for shorter

contracts.

It also is a distress
to me that the renewable
industry (wands) are on
a path to destroy our coal
facilities in our country.
They have no right.

They just want to force
rate payers to pay for them.
Perhaps Congress will
review the PURPA law,
someday.

Thank you &
Sincerely,
Cowl Meek

(IPC-E-15-01)
