Name of Utility Company: Rocky Mt Power

Comment: Dear Commission Members

I feel disillusioned, and yes betrayed about the proposal regarding successor program of paying out less kilowatts for customer generated energy. This proposal upsets me because my system will take about 15 years to break even on my investment on the current compensation program, but will take 25% longer on the proposed compensation program. I feel that now that more people are trying to be energy efficient as the power companies have requested, Rocky Mtn Power is wanting to penalize us rather than rewarding us! I certainly hope that you see this proposal as against the consumer as I do and vote it down. As a consumer we are trying to help the energy crisis by installing solar panels and we need to continue to have an incentive to make such a large investment to help this crisis.

Thank you,
Glenn Davis
