Subject: FW: Fall River's Chester Hydro - Qualifying Facility Submission

Bryan,

I have reviewed the request for indicative pricing and a PPA for the Fall River's Chester Hydro facility. Due to the size of the facility (1.84 MW) my understanding is this project would qualify for our standard pricing as listed on IPUCs website here: <https://puc.idaho.gov/electric/PacifiCorp%20rates%2006-01-19.pdf>; this looks to be a non-seasonal hydro project. Based on the information you have provided, the project would have a levelized price of \$54.12/MWh over a 20-year contract if PacifiCorp were to begin taking delivery in 2020 (as seen on page 3 of the referenced price list). Please note however that PacifiCorp plans to issue its 2019 IRP in the middle of this month which may impact the current pricing.

Prior to providing a draft PPA we will need to see a completed interconnection study from PacifiCorp transmission demonstrating that the project can be interconnected to our system on the timeline you have proposed for pricing. Your request indicated that

you have begun the interconnection process, please keep us up to date with that progress so that we can move forward with a proposed PPA at the appropriate time. Have you received a queue number yet for the interconnection?

In the meantime, please let me know if you have any further questions.

Thanks,

Kyle Moore

Dear Rocky Mountain Power,

Fall River Rural Electric Cooperative located in Ashton Idaho is requesting a Power Purchase Agreement for the Chester Hydro facility. Attached is the form to request a Purchase Power Agreement (PPA). A hard copy of the submittal will be sent to:

Rocky Mountain Power
Manger – QF Contracts
825 NE Multnomah St., Suite 600
Portland, OR 97232

Please let me know if you need additional information to complete the PPA process.

Thank you,

Bryan L. Case
