CASE NO. PAC-E-21-07

DIRECT TESTIMONY OF DONN ENGLISH  
IN SUPPORT OF THE SETTLEMENT  
STIPULATION

IDAHO PUBLIC UTILITIES COMMISSION

NOVEMBER 8, 2021

1 Q. Please state your name and business address?

2 A. My name is Donn English. My business address is  
3 11331 W. Chinden Blvd., BLDG 8, STE 201-A, Boise, Idaho  
4 83714.

5 Q. By whom are you employed and in what capacity?

6 A. I am employed by the Idaho Public Utilities  
7 Commission as a Program Manager overseeing the Accounting  
8 and Audit Department in the Utilities Division. I am also  
9 the Program Manager overseeing the Technical Analysis  
10 Department, also within the Utilities Division.

11 Q. Please describe your educational background and  
12 professional experience.

13 A. My educational background and professional  
14 experiences are shown in Exhibit No. 101.

15 Q. What is the purpose of your testimony in this  
16 proceeding?

17 A. The purpose of my testimony is to describe Rocky  
18 Mountain Power's ("Rocky Mountain" or "Company")  
19 Application to increase its rates and charges for electric  
20 service in Idaho, describe the proposed Settlement  
21 Stipulation ("Settlement") reached by the parties in this  
22 case, and explain Staff's support for the proposed  
23 Settlement.

24 Q. How is your testimony organized?

25 A. My testimony is organized under the following

1 headings:

2	Background	Page 2
3	Staff Investigation	Page 3
4	Settlement Evaluation	Page 5
5	Settlement Overview	Page 6

6 **Background**

7 Q. Please describe Rocky Mountain's Application.

8 A. Rocky Mountain made its original filing with the  
9 Idaho Public Utilities Commission on May 27, 2021,  
10 requesting authority to increase its revenue by \$19.0  
11 million, or approximately 7.0 percent. The Company's  
12 proposed increase was based on a historical twelve-month  
13 period ending December 31, 2020, adjusted for known and  
14 measurable changes through December 31, 2021. The Company  
15 proposed a capital structure of 47.16 percent long-term  
16 debt and 52.84 percent equity, with a return on equity  
17 ("ROE") of 10.2 percent. The Company proposed to allocate  
18 the price change to customers in line with the class cost  
19 of service results filed in its Application; however, the  
20 rate increases for all major rate schedule classes were  
21 limited to 10 percent.

22 The Company's Application reflected net power  
23 costs ("NPC") of \$1,365.1 million on a total-Company basis  
24 and \$86.4 million on an Idaho jurisdictional basis. This  
25 was a \$120 million, or 8.1 percent, decrease in NPC on a

1 total-Company basis compared to the 2016 NPC update. The  
2 Application also requested recovery of capital additions,  
3 including costs associated with its Energy Vision 2020  
4 project.

5 Q. How was the case processed after the Company's  
6 Application was received?

7 A. The Commission issued a combined Notice of  
8 Application, Notice of Suspension, and Notice of  
9 Intervention Deadline ("Notice") on June 17, 2021. The  
10 Notice suspended the proposed effective date of July 1,  
11 2021, for thirty days plus five months and established an  
12 Intervention Deadline of July 8, 2021. Intervenor status  
13 was subsequently granted to the Idaho Irrigation Pumpers  
14 Association, Inc. ("IIPA"), Bayer Corporation ("Bayer"),  
15 and Pacificorp Idaho Industrial Customers ("PIIC")  
16 intervened. Idaho Conservation League and Community Action  
17 Partnership Association of Idaho also intervened, but later  
18 withdrew from the case.

19 The Company, Staff, IIPA, Bayer, and PIIC  
20 (collectively the "Parties") participated in four  
21 settlement conferences, and on October 25, 2021, a  
22 Settlement Stipulation was filed with the Commission,  
23 signed by the Parties.

24 **Staff Investigation**

25 Q. What type of investigation did Staff conduct to

1 evaluate the Company's rate increase request?

2 A. Staff's approach in any general rate case is to  
3 extensively review the Company's Application and associated  
4 testimony, attachments, exhibits, and workpapers; identify  
5 adjustments to its revenue requirement, revenue  
6 normalization, rate spread, and rate design; and prepare to  
7 file testimony for a fully litigated proceeding. There  
8 were 15 Staff members analyzing this case, including  
9 auditors, engineers, utility analysts, and consumer  
10 investigators, and supervisors. Staff auditors reviewed  
11 the Company's 2020 results of operations, capital budgets,  
12 capital spending trends, operations and maintenance ("O&M")  
13 expenses and trends and verified all of the Company's  
14 calculations and assumptions regarding the overall revenue  
15 requirement. Because of the continued public health  
16 emergency due to variant strains of the COVID-19 virus,  
17 Staff was unable to conduct onsite audits or reviews of the  
18 Company's books and records and they did not have extensive  
19 interviews with Company personnel. However, the auditors  
20 reviewed thousands of transactions, selected samples, and  
21 performed transaction testing in accordance with standard  
22 audit practices. Staff reviewed the Company's labor  
23 expense, incentive plans, and employee benefits to ensure  
24 the appropriate level of expenditures are included in  
25 rates.

1 Staff reviewed both completed and proposed  
2 Company investments to determine the prudence of capital  
3 additions. Expenditures including pension expense,  
4 salaries, and O&M expense were also examined.  
5 Additionally, Staff evaluated the Company's cost of  
6 capital, capital structure, class cost of service, rate  
7 spread, and revenue normalization. In total, Staff  
8 submitted 228 production requests and held several virtual  
9 meetings with Company personnel as a part of its  
10 comprehensive investigation. Staff also reviewed the  
11 Company's responses to 365 production requests submitted by  
12 intervening parties. Based on its investigation, Staff was  
13 prepared to defend over 30 proposed adjustments to the  
14 Company's revenue requirement in testimony and at hearing.

15 **Settlement Evaluation**

16 Q. How did Staff determine that the overall  
17 Settlement was reasonable?

18 A. In every settlement evaluation, Staff and other  
19 parties must examine the risks of losing positions at  
20 hearing and determine if the settlement agreement is a  
21 better overall outcome. Staff must evaluate each  
22 individual adjustment and determine the likelihood of the  
23 Commission accepting or rejecting Staff's rationale for the  
24 adjustment. Ultimately, Staff's intent in every settlement  
25 conference is to negotiate the best possible outcome for

1 customers.

2 Q. Does Staff support the proposed Settlement as  
3 reasonable?

4 A. Yes. After a comprehensive review of the  
5 Company's Application, thorough audit of the Company's  
6 books and records, and extensive negotiations with the  
7 parties to the case, Staff supports the proposed  
8 Settlement. The proposed Settlement offers a reasonable  
9 balance between the Company's opportunity to earn a  
10 reasonable return on its investment and affordable rates  
11 for customers. Staff believes the proposed Settlement,  
12 supported by the Parties, is in the public interest; fair,  
13 just, and reasonable; and should be approved by the  
14 Commission.

15 **Settlement Overview**

16 Q. Would you please describe the terms of the  
17 proposed Settlement?

18 A. The proposed Settlement provides a reduction in  
19 the Company's requested revenue requirement. Instead of  
20 the Company's proposed base rate increase of \$19.0 million,  
21 or 7.0 percent, Idaho base rates would increase by \$8.0  
22 million, or 2.9 percent, effective January 1, 2022. The  
23 increase is further reduced by the refunding of \$8.5  
24 million in excess deferred income taxes ("EDIT") over two  
25 years. The net effect is a first-year increase of

1 approximately \$3.8 million, or 1.4 percent, provided the  
2 corporate tax rate does not change.

3 The proposed Settlement provides the amortization  
4 period for certain deferred regulatory assets; establishes  
5 the NPC, Production Tax Credits ("PTC"), Renewable Energy  
6 Credits ("REC"), and the Load Change Adjustment Rate  
7 ("LCAR") for inclusion in the Energy Cost Adjustment  
8 Mechanism ("ECAM"); the return of the remaining benefits  
9 from the Tax Cuts and Jobs Act ("TCJA"); the value of the  
10 Bayer curtailment products; and rate spread and rate  
11 design. The proposed Settlement does not detail all of the  
12 different components of the revenue requirement  
13 calculation, including the cost of capital, return on  
14 equity, or net rate base balances.

15 Q. Please explain how the proposed Settlement  
16 addresses the amortization of deferred regulatory assets.

17 A. In Order No. 34754, Case No. PAC-E-18-08, the  
18 Commission approved a settlement stipulation allowing the  
19 Company to defer incremental depreciation expense of  
20 \$13,940,303 as a regulatory asset. Under the terms of the  
21 proposed Settlement, this regulatory asset will be  
22 amortized over four years and included in the base rate  
23 increase.

24 In Order No. 33304, Case No. PAC-E-14-10, the  
25 Commission authorized the Company to defer for future

1 recovery certain costs associated with the closure of the  
2 Deer Creek Mine. The Parties agreed to amortize the Deer  
3 Creek Mine regulatory asset over three years consistent  
4 with the Company's initial filing in this case. The  
5 balance in the regulatory asset account is approximately  
6 \$82.4 million (total system), which includes \$14,347,296 in  
7 unpaid royalties and \$6,521,059 of unpaid future  
8 remediation expenses.

9 In Order No. 33954, Case No. PAC-E-17-06, and  
10 Order No. 34104, Case No. PAC-E-17-07, the Commission  
11 authorized the Company to defer the costs for certain  
12 repowered and new wind facilities through a Resource  
13 Tracking Mechanism ("RTM") included as a component of the  
14 ECAM up to the amount of the benefits customers received  
15 from those projects. Any costs above the benefits were to  
16 be deferred as a regulatory asset with recovery to be  
17 determined in the next general rate case. The Parties  
18 agreed to exclude the RTM regulatory asset from recovery in  
19 this case, and the Company will continue to defer the  
20 incremental costs in the RTM through December 31, 2021, as  
21 a regulatory asset. There will be no carrying charge and  
22 recovery of this regulatory asset will be determined in the  
23 Company's next general rate case.

24 Q. Please explain the ECAM components addressed in  
25 the Settlement.

1           A.    Attachment 1 to the proposed Settlement provides  
2 the calculation of certain components for the Company's  
3 annual ECAM filing on a total system basis, which are  
4 summarized below:

- 5           •    NPC - \$1.368 billion or \$24.54/Megawatt-hour ("MWh")
- 6           •    PTC - \$256,612,477 or \$4.16/MWh
- 7           •    REC - \$4,327,004 or \$0.07/MWh
- 8           •    LCAR - \$8.74/MWh

9           Q.    Please describe the tax benefits associated with  
10 the TCJA.

11           A.    On January 11, 2018, the Commission opened Case  
12 No. GNR-U-18-01 to investigate the impact of the TCJA on  
13 utility costs and ratemaking. The Commission reduced the  
14 rates Rocky Mountain Power charges customers in Idaho to  
15 reflect the reduced income tax expense at the new 21  
16 percent corporate tax rate. However, the TCJA also  
17 required companies to revalue their deferred tax amounts at  
18 the new corporate tax rate which resulted in excess  
19 deferred federal income tax reserve balances. Balances  
20 associated with regulated utility operations resulted in a  
21 balance sheet reclassification from a deferred tax to a  
22 deferred regulatory asset or liability. This revaluation  
23 affected plant (protected or permanent tax benefit) and  
24 non-plant (unprotected or temporary tax benefit) balances.

25                   For plant-related EDIT, the utilities had to

1 amortize the balance over the remaining life of the assets.  
2 Non-plant EDIT balances could be returned to customers in  
3 any manner approved by the Commission.

4 On June 1, 2018, the Commission issued Order No.  
5 34072 approving a settlement stipulation that would return  
6 \$8.385 million to customers, either through a separate  
7 tariff schedule, or offsetting deferred amounts in the  
8 ECAM. The remaining benefits of the TCJA were to be  
9 determined in a separate phase of the case.

10 On May 3, 2019, the Commission issued Order No.  
11 34331 approving the Phase 2 settlement stipulation, which  
12 outlined how the remaining benefits would be returned to  
13 customers. Beginning on June 1, 2019, non-protected plant  
14 and non-plant EDIT balances were to be amortized over seven  
15 years (approximately \$2.1 million per year) and be used to  
16 offset the 2013 incremental depreciation expense deferral  
17 approved by Commission Order No. 32910 in Case No. PAC-E-  
18 13-04. However, in that settlement stipulation, the  
19 parties agreed that changes to the seven-year amortization  
20 period for the unamortized balances could be proposed in  
21 the Company's next general rate case.

22 In Order No. 34384, Case No. PAC-E-20-03, the  
23 Commission approved a settlement stipulation, which in part  
24 discontinued the seven-year amortization of the remaining  
25 EDIT balances and used the balances to offset the

1 unrecovered balances of the Company's Cholla Unit No. 4  
2 that closed at the end of 2020. Remaining EDIT balances  
3 would then be used to mitigate the impact of the rate  
4 increase in this case.

5 The Company has approximately \$8.5 million in  
6 remaining EDIT balances to return to Idaho customers. The  
7 Parties to the proposed Settlement agreed to return the  
8 balance to customers over two years through Electric  
9 Service Schedule No. 197. However, if federal corporate  
10 tax rates increase before the balance is completely  
11 amortized, the Parties agreed that the Company will stop  
12 the amortization as of the effective date of the tax  
13 increase. If there is a change to the corporate federal  
14 tax rate before the Company's next general rate case, the  
15 Parties will support the Company's filing of an application  
16 seeking to defer the incremental tax impacts as of the  
17 effective date of the new tax rate.

18 Q. Please explain the value of the Bayer curtailment  
19 products contained in the Settlement.

20 A. The Parties agreed to a credit amount for Bayer's  
21 ability to interrupt and curtail electric service during  
22 times of high demand on the system. The Parties agreed the  
23 amount and method for calculating the credit in this  
24 Settlement should not be construed as precedential. The  
25 Parties also agreed that the terms and conditions of the

1 Energy Service Agreement filed with the Commission as  
2 Supplemental Exhibit No. 36 on September 16, 2021, are  
3 fair, just, and reasonable.

4 Q. Please explain the rate spread and rate design  
5 contained in the proposed Settlement.

6 A. The Parties agreed to a rate spread based upon  
7 the \$8.0 million rate increase as set forth in Attachment 2  
8 to the proposed Settlement. The rate design and tariff  
9 changes are consistent with the Company's proposed methods  
10 to move customer classes toward cost of service utilizing  
11 the normalized billing determinants included in the  
12 Company's original filing.

13 The Parties agreed to increase the monthly  
14 customer charges based on the proposal in the Company's  
15 original filing. This includes, but is not limited to,  
16 raising the customer service charge from \$5.00 to \$8.00 for  
17 Schedule 1 residential customers, from \$14.00 to \$15.00 for  
18 Schedule 36 Time-of-Day residential customers, and from  
19 \$16.00 to \$18.00 for Schedule 23 general service customers.

20 The Parties agreed with the Company's proposal to  
21 migrate the Schedule 401 special contract customer to  
22 Schedule 9. Rates for Schedule 9 will be designed for the  
23 current Schedule 9 customers prior to the migration of the  
24 Schedule 401 customer, based on the system average rate  
25 increase. Electric Service Schedule 9 will be revised to

1 increase the limit on the customer's maximum power  
2 requirement from 15,000 kilowatts ("kW") to 30,000 kW.

3 Similarly, the Parties agreed with the Company's  
4 proposal to migrate current Schedule 19 customers to  
5 Schedule 23, since all new customers that once qualified  
6 for Schedule 19 are currently being classified as Schedule  
7 23 customers. To mitigate the rate impact of migrating  
8 existing Schedule 19 customers to Schedule 23, Schedule 23  
9 customers will use a seasonal difference ratio of 1.20 and  
10 a primary customer charge of \$48.00.

11 The Parties also agreed that Schedule 7, Schedule  
12 11, and Schedule 12 street and area lighting customers will  
13 receive a rate decrease to move rates 50 percent closer to  
14 cost of service.

15 Q. Do you have any other comments on the proposed  
16 Settlement?

17 A. Yes. Staff has reviewed Attachments 1-4 to the  
18 proposed Settlement and verified they are consistent with  
19 the agreement. The agreed upon rate design will offer the  
20 Company a reasonable opportunity to recover the proposed  
21 revenue requirement. As implied throughout this testimony,  
22 the proposed Settlement represents a fair, just, and  
23 reasonable compromise of the positions put forth by all  
24 parties and is in the public interest. Therefore, Staff  
25 recommends the Commission approve the proposed Settlement

1 without material changes or modifications.

2 Q. Does this conclude your testimony?

3 A. Yes, it does.

**Professional Qualifications  
Of**

**Donn English  
Program Manager - Accounting and Audit  
Program Manager - Technical Analysis  
Idaho Public Utilities Commission**

**EDUCATION**

Mr. English graduated from Boise State University in 1998 with a Bachelor of Business Administration degree in Accounting. His studies concentrated on corporate finance and taxation. He was a member of the Alpha Beta Psi honor society for Accounting students. He completed the Annual Regulatory Studies Program, the Advanced Regulatory Studies Program, and the Accounting and Ratemaking Course offered through the Institute of Public Utilities at Michigan State University. Additionally, he regularly attends meeting and conferences sponsored by the National Association of Regulatory Commissioners (NARUC) and the Society of Utility and Regulatory Financial Analysts.

In 2001, Mr. English became a designated member of the American Society of Pension Professionals and Actuaries (ASPPA) and was awarded the professional designation of Qualified Pension Administrator (QPA) and Qualified 401(k) Administrator (QKA). Mr. English was also a member of the Association of Certified Fraud Examinators.

**BUSINESS EXPERIENCE**

Prior to joining the Idaho Public Utilities Commission (IPUC), Mr. English was a trust Accountant with a pension administration, actuarial, and consulting firm in Boise, Idaho. In 1999, he was promoted to Pension Administrator, and in 2001 he was promoted to Pension Consultant. In that capacity, Mr. English performed actuarial calculations and the required non-discrimination calculations for hundreds of qualified retirement plans. He completed and filed Form 5500s and represented clients during audits by the Department of Labor and the Internal Revenue Service. He also participated on the task force that wrote questions for the ASPPA administrator and actuarial exams.

Mr. English joined the IPUC in 2003 as a Staff Auditor. In 2016, he was promoted to Audit Team Lead, and in 2018 he became the Program Manager for the Accounting and Audit Department within the Utilities Division. In 2020, Mr. English also accepted the responsibility of supervising the Technical Analysis and Energy Efficiency team. At the Commission, Mr. English has audited a number of utilities including electric, water, and natural gas companies, and provided comments and testimony in numerous cases that deal with general rates, tax issues, pension issues, depreciation and other accounting issues, and other regulatory policy decisions. Mr. English participates in the Energy Efficiency Advisory Groups and External Stakeholder Advisory Committees for Idaho Power, Avista Utilities, Rocky Mountain Power, and Intermountain Gas Company. He is the Commission's representative on the NARUC Subcommittee of Accounting and Finance and the Subcommittee on Education and Research. Mr. English is also a volunteer on the faculty of NARUC Rate School.

## CERTIFICATE OF SERVICE

I HEREBY CERTIFY THAT I HAVE THIS 8<sup>th</sup> DAY OF NOVEMBER 2021, SERVED THE FOREGOING **DIRECT TESTIMONY OF DONN ENGLISH IN SUPPORT OF THE SETTLEMENT STIPULATION**, IN CASE NO. PAC-E-21-07, BY E-MAILING A COPY THEREOF, TO THE FOLLOWING:
