Dear Idaho Public Utilities Commission,

The most effective way to impact CO2 emissions is to quickly shift to solar, wind, and even gas powered electric production. Limiting the emissions buildup is my #1 priority as an Idaho citizen. It is not, yet, too late to avoid the worst of climate change. I am counting on the PUC to protect our forests, our water and our lives--even while assuring our economy. Please require a much sooner transition from coal for Rocky Mountain.

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. As one of the region's largest utilities and largest polluters, the actions of this utility impact our entire state and all Idaho utility customers like me. Rocky Mountain Power's Plan relies on continued coal use even in the face of declining coal economics and Clean Air Act violations at its coal plants. It also relies on last minute plans to build new gas pipelines and convert some coal plants to gas, even in the face of highly volatile future gas prices. Lastly, it relies on a last minute plan to build a new nuclear power facility using never-before-used technology with an unrealistic timeline and budget. This all represents a huge risk for Idaho's future, from our air and the impacts of climate change down to our pocketbooks.

Our state's other public utilities, Avista and Idaho Power, plan to stop burning coal by 2025 and 2028, respectively, and are doubling down on investments in energy efficiency, renewable energy, and tested storage technology. It's unfair for Idaho customers whose only electric utility option is Rocky Mountain Power to face additional risks and costs from their utility's reckless planning. Idahoans deserve a utility Plan that ensures least cost and least risk energy supply that is based in reality and thoughtful planning, not wishful false solutions. Please reject Rocky Mountain Power's 2021 Integrated Resource Plan.

Sincerely,

Don Kemper

Dear Idaho Public Utilities Commission,

Wow. Just about every, single thing in your proposition is dangerous, toxic and lethal for pretty much anything it touches. Why and how are you people so ignorant and tone-deaf? Wow, again. DO THE RIGHT THING! Research and recommend every, single safe, non-toxic and Earth-PROTECTING, NOT Earth-DESTROYING method you can find.

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. As one of the region's largest utilities and largest polluters, the actions of this utility impact our entire state and all Idaho utility customers like me. Dear Idaho Public Utilities Commission,

Idaho is one of the most rugged, untouched wild regions in the contiguous US. It is not pristine, but it is close. Clean energy is the only way to protect the legacy of wild beauty we hold so dear. Coal is anything but clean, and anything but pristine. To be good stewards of this beautiful land, we must not rely on tools of the past, but jump forward with the tools emerging to create a State where humanity not only lives along side wilderness, but takes action to foster it. Coal is a thing of the past; renewable energy is the only way forward.

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. As one of the region's largest utilities and largest polluters, the actions of this utility impact our entire state and all Idaho utility customers like me. Rocky Mountain Power's Plan relies on continued coal use even in the face of declining coal economics and Clean Air Act violations at its coal plants. Dear Idaho Public Utilities Commission,

Commissioners, when it comes to our warming climate's worsening wildfires all over the planet, including in my area and likely yours, coal energy matters ? in a dangerous way. When it comes to ongoing droughts in the west, which are expected to continue and to worsen, coal energy matters ? in a dangerous way. When it comes to erratic weather, heavy precipitations followed by downtown floods, increasingly above-average hot temperatures, and ravaging storms, coal energy matters ? in a dangerous way. Let's no longer sit on our hands in response to the threats to all life on earth that global warming brings! You are in a position to play an important role by taking steps to begin slowing and reversing planetary warming caused by humanity's use of fossil fuels.

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. As one of the region's largest utilities?and largest polluters?the actions of this utility impact our entire state and all Idaho utility customers like me. Rocky Mountain Power?s Plan relies on continued coal use even in the face of declining coal economics and Clean Air Act violations at its coal plants. It also relies on last minute plans to build new gas pipelines and convert some coal plants to gas, even in the face of highly volatile future gas prices. Dear Idaho Public Utilities Commission,

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. As one of the region's largest utilities and largest polluters, the actions of this utility impact our entire state and all Idaho utility customers like me. Rocky Mountain Power's Plan relies on continued coal use even in the face of declining coal economics and Clean Air Act violations at its coal plants. It also relies on last minute plans to build new gas pipelines and convert some coal plants to gas, even in the face of highly volatile future gas prices. Lastly, it relies on a last minute plan to build a new nuclear power facility using never-before-used technology with an unrealistic timeline and budget. This all represents a huge risk for Idaho's future, from our air and the impacts of climate change down to our pocketbooks.

Our state's other public utilities, Avista and Idaho Power, plan to stop burning coal by 2025 and 2028, respectively, and are doubling down on investments in energy efficiency, renewable energy, and tested storage technology. It's unfair for Idaho customers whose only electric utility option is Rocky Mountain Power to face additional risks and costs from their utility's reckless planning. Idahoans deserve a utility Plan that ensures least cost and least risk energy supply that is based in reality and thoughtful planning, not wishful false solutions. Please reject Rocky Mountain Power's 2021 Integrated Resource Plan.

Sincerely,

Kate Russo

Dear Idaho Public Utilities Commission,

We are obligated to the future of humanity to change how we get our power. Some people and businesses aren't listening or they're disputing the science and our own experience. Using coal has to stop. . Converting from coal to another energy source will not even take 10 years and the feds have given \$ already to get this done and are willing to work with utilities to turn away from coal. Please think of the future.

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. Lastly, it relies on a last minute plan to build a new nuclear power facility using never-before-used technology with an unrealistic timeline and budget. This all represents a huge risk for Idaho's future, from our air and the impacts of climate change down to our pocketbooks.

Our state's other public utilities, Avista and Idaho Power, plan to stop burning coal by 2025 and 2028, respectively, and are doubling down on investments in energy efficiency, renewable energy, and tested storage technology. It's unfair for Idaho customers whose only electric utility option is Rocky Mountain Power to face additional risks and costs from their utility's reckless planning. Idahoans deserve a utility Plan that ensures least cost and least risk energy supply that is based in reality and thoughtful planning, not wishful false solutions. Please reject Rocky Mountain Power's 2021 Integrated Resource Plan.

Sincerely,

Nancy Humphrey

Dear Idaho Public Utilities Commission,

Temperature increase, shifting precipitation and increased forest fire smoke will all impact my home town of Coeur d'Alene. Please limit the impact of climate change by stopping any long term power generation plans that include coal.

I am writing to urge you to not accept the Rocky Mountain Power 2021 Integrated Resource Plan for filing. As one of the region's largest utilities and largest polluters, the actions of this utility impact our entire state and all Idaho utility customers like me. Rocky Mountain Power's Plan relies on continued coal use even in the face of declining coal economics and Clean Air Act violations at its coal plants. It also relies on last minute plans to build new gas pipelines and convert some coal plants to gas, even in the face of highly volatile future gas prices. Lastly, it relies on a last minute plan to build a new nuclear power facility using never-before-used technology with an unrealistic timeline and budget. This all represents a huge risk for Idaho's future, from our air and the impacts of climate change down to our pocketbooks.

Our state's other public utilities, Avista and Idaho Power, plan to stop burning coal by 2025 and 2028, respectively, and are doubling down on investments in energy efficiency, renewable energy, and tested storage technology. It's unfair for Idaho customers whose only electric utility option is Rocky Mountain Power to face additional risks and costs from their utility's reckless planning. Idahoans deserve a utility Plan that ensures least cost and least risk energy supply that is based in reality and thoughtful planning, not wishful false solutions. Please reject Rocky Mountain Power's 2021 Integrated Resource Plan.

Sincerely,

David Muise
