Comment: "1. Ratepayers should not have to fund the transition to renewal energy. It should be cheap enough to support its own conversion and transition. 2. Time of Day is getting very complicated. Doing away with holidays and weekends being off-peak is a significant burden and change to the consumer. You need to keep weekends and holidays. 3. Anyway this is calculated, the bill goes up. What are we getting for the increased costs? 4. The new rate structure needs to be explained better and its overall impact to the consumer. "
