Subject: Notice: A complaint was submitted to PUCWeb - Kristin Tupen

The following complaint was submitted via PUCWeb:

Name: Kristin Tupen

Submission Time: Apr 27 2023 5:07PM

Email: kristintupen@icloud.com

Telephone: 530-680-2962

Address: 11 N 3667 E

Rigby, ID 83442

Name of Utility Company: Rocky Mountain Power

Contacted Utility: Yes

Comment: "Just got my bill and a letter from Rocky Mountain Power letting me know they were asking for a rate hike because of "heat waves" last summer that increased market prices. It wasn't the "heat waves" that increased market prices but these crazy "green energy" polices that we, the taxpayers, are subsidizing and it is killing us, along with inflation. These power companies are getting rewarded by government for switching to "green energy" sources ie solar panels made in China with toxic mined rare earth minerals and wind turbines that are now killing whales and other marine life off the Atlantic coast, not to mention leaking oil etc.... Oh and the panels are made by slave labor in China and the minerals mined by children in Africa as China owns many mines in Africa per a search of the internet. So I am asking that the Idaho Public Utilities Commission to deny Rocky Mountain Power's request as we are already subsidizing this crazy push for "green energy" that has raised rates and increased costs for consumers. Maybe then the power companies will start pushing back, for the good of their rate payers, and start to use reliable clean sources of energy again ie coal, natural gas, nuclear, hydro etc.... if not we are going to become CA where they have rolling blackouts and their energy rates are unaffordable by many because of these same policies and nobody holding crazy PG@E there responsible. Thank you for your time....."
