Comment: "I don't believe all these increases are really needed due to the amount of growth in our state, more people coming in means more revenue for the power company. There has to be a stopping point if you want people to also stay in this state. Everyone from gas, power, water, insurance, groceries, gas, etc. wants more money, but when you are a senior citizen on a fixed income, money can only go so far. I feel there needs to be some kind of break for people over 65 on all these increases if you have a pie sitting there and everyone wants a piece of it, in this instance finally when you get to the end of the pie, there is none left for me due to all these increases and bonds, etc. Find a way to help the seniors of this state and not worry so much about lining your pockets, please. I cannot just call up the Social Security Office and just say I want a raise because of all these increases across the board. Think of the seniors that are struggling with all this and the economy. "
