Please describe your comment briefly:
Please do not grant Avista their latest of many requests to raise our utility rates again and again.

Enough is enough already!

Your consideration is greatly appreciated

Thanks.

Matt Manderville

Please don't raise electricity rates. Even though the economy has a chance of getting better, it doesn't mean I can afford a higher utility bill!

I would like to voice my strong disapproval for Avista's most recently proposed rate increase for electric and gas customers in northern Idaho. I have been an Avista/WWP customer for over ten years and have steadily watched my rates go up at least every other year. The last 3-4 years it seems they ask and are granted a yearly increase. Aside from changing out my meter two years ago (which added a monthly cost to my bill), their service has not improved nor have they upgraded any of their services to the rural part of SW Bonner County where I live. As our country is wallowing in the midst of a nasty economic downturn and most families are struggling, this seems like a horrible time for a utility to be jacking up their rates.

I am asking the IPUC to deny Avista's current electric and gas rate increases for 2009-10 and make every attempt to have Avista and BPA work to agree to restore Idaho's portion of the power generated on the Columbia River. Thank you.

i have lived in this area for 23 years, and i've never had a bill that is 205.87 for one months service. are you guys just wanting to get rich off of your customers? why did we get an 18% increase in our monthly bill? we live in a trailer park, and you guys use the excuse that our insulation is poor, and heat escapes easier. sounds like your trying to excuse yourselves. sincerely, robin wenk p.s. my friend is facing the same problem, but you charge him way too much for his electrigrity; for me its gas. give us a break please.

Please describe your comment briefly:

We object to the proposed rate increase by Avista. The rate that we are charged per kwh has increased 40% in less than 3 years. Now they want MORE. NO. We say enough is enough. The price of coal is down not up, and God has not caused the rivers to dry up. I do not think they use natural gas or oil but even if they do, the price of both is DOWN. This proposed increase is WRONG and should not be allowed.
