IDAHO PUBLIC UTILITIES COMMISSION

It's to increase its energy efficiency public purpose rider. Schedule-191 for increase in the DSM of approx. 2.16%, Meaning \$1.52 based on 66 Therms.

Response To: Larry Naccarato
3144 N. Chelsee Way
Coeur d' Alene, Idaho 83815

Sirs:

This cost increase is not justifiable. Avista wants to increase the rate to make up for the ~~the~~ so called losses from everyone who could afford, or not afford, to participate in the ~~there~~ energy updates. Now that the program has been successful for them, they realize they have lost income from now efficient homes using less fuel and electricity. So what do they want to do? They want us common middle class American people, some of us still working and others retired to make up the difference in this lost income. Do they not realize people on social security received no increase on their funds, people working have not received pay raises in two years, others have lost jobs, homes, insurance, many are now living on the streets, and our seniors are out looking for work when they should be enjoying their retirement. How can this multi- billion dollar company giant even think about putting more stress on our every day budgets, when due to the bad economy they are busting at there seams?

I ASK YOU TO PLEASE SAY NO TO THIS INCREASE. Please also look at page two and three to see how many others feel as I do. Thank you for listening.

Sincerely,

Larry Naccarato
