Name of Utility Company: Idaho Power

Comment: I object to the Avista takeover by Hydro One, for many reasons many have been already brought to your attention by other comments. To allow a foreign company to take over Idaho's wonderful, marvelous system that currently exists; a company whose stated goal is to control all the power in the northwest is dangerous and should NOT happen. Please vote "no".

Comment: I disagree with allowing a foreign company take over control of our utility company. If I wanted to be run by the Canadian government I would move to Canada. We don't have a choice about which utility company we use and should not be forced into this deal. Unlike a retail business we can just choose not to support. I would request this transaction not be allowed.

Comment: I am unequivocally opposed to a foreign government owning/managing or otherwise controlling an infrastructure service in Idaho or anywhere else in America! This is highly dangerous, exposing US citizens indirectly to foreign control.

The guaranteed price hikes because of the Canadian companies outrageous views of conservation are simply unacceptable. We do not contract with American companies to be sold off to foreign exchanges!!

This is intolerable, and beyond belief that it is even being considered. This will be fought tooth and nail, and as American commissioners you have an obligation and duty to the welfare of American citizens first and foremost!

Comment: I am an Avista customer and I am against this merger. It is imperative that we keep our power supply system in the control of American companies. Selling America's power grid to a foreign country exposes us to regulation we have no say in and large tariffs during an unstable time in regard to trade. While I love Canada and the Canadian people I would rather we maintain control of something as vital as our power grid as a matter of national security.

Name of Utility Company: Avista
Comment:
To whom it may concern,

As a resident of Idaho, and citizen of the United States, I would like to voice my opposition to the acquisition of Avista Utilities by Hyrdo One.

My primary objection is that I believe it is not right that a foreign company own such an extensive part of our country's infrastructure which encompasses the entire Pacific Northwest. I do not want a foreign policy, agendas, and politics to affect American power customers.

This acquisition would mean the Province of Ontario (which holds 41% of the shares of Hydro One) will be wielding direct influence and decision making power over 13 dams and much infrastructure in the Pacific Northwest, just before the re-negotiation of an international treaty with Canada (Columbia River Treaty).

This is foolish.

Please, for the safeguarding of American sovereignty, to protect our infrastructure as "our own," and to keep foreign policies and agenda out of Idaho and the United States, reject this acquisition.

Sincerely,
Mila Gaulrapp
Sandpoint, Idaho

Comment: Thank you for taking time to read my comment.

I respectfully implore the committee to decline the offer from Hydro One, Avista Corp., or any of its affiliates from taking over Idaho Power or any other utility company in the United States. United States utility companies should not be run by a foreign organization. This foreign company will not be abiding by United States law, but rather, foreign law. This will put a huge financial burden on current customers through raised prices and an unfair market for Idahoans. This merger would mean the end of utilities for thousands of customers. There are those that depend on Idaho Power prices to maintain heat in the winter or coolness in the summer. Every part of our infrastructure would be negatively affected by this unnecessary merger. This will negatively affect small businesses, hospitals, schools, citizens, corporate businesses, and government buildings. Not only will our power bills be nearly tripled, but all the aforementioned negatively affected areas will be forced to raise their prices on their goods and wares to offset the cost of their power bill. Overall, this is not a good deal for anyone except those that are going to be making money off this deal. I implore you to put the considerations of the people and businesses that this will affect over that of those who will be making money from this deal. Again, thank you for taking the time to read my comment.

Comment: I am against the merger between Avista and Hydro one. I am very concerned about Hydro One raising my rates and having Hydro One a company that has a terrible record taking care of their customers in time of outages. They will subject us to green taxes from Canada. Just say no against the merger.

Name of Utility Company: Avista Utilities
Comment: To whom it may concern,

As an Avista utility customer, a resident of Idaho, and citizen of the United States, I would like to voice my opposition to the acquisition of Avista Utilities by Hyrdo One.

My primary objection is that I believe it is not right that a foreign company own such an extensive part of Idaho infrastructure. I do not want a foreign policy, agendas, and politics to affect Idaho power customers.

This acquisition would mean the Province of Ontario (which holds 41% of the shares of Hydro One) will be wielding direct influence and decision making power over 13 dams and much infrastructure in the Pacific Northwest, just before the re-negotiation of an international treaty with Canada (Columbia River Treaty).

This is foolish.

Please, for the safeguarding of American sovereignty, to protect our infrastructure as "our own," and to keep foreign policies and agenda out of Idaho and the United States, reject this acquisition.

Sincerely,
Daniel Foucachon,
CEO, Roman Roads Media
Moscow, Idaho

Comment: About the Avista, Hydro One merger.

I urge you to say no to this merger. Not only is Canadian power companies under extreme pressure to use failed renewable wind and solar power that has resulted in power outages and sky rocketing rates. It's also just a terrible idea for them to have control of US power grid and rates. This should not be ok anywhere in the US.

This will not be good for Idaho or America!

Please say no!

Comment: This is not a good move for Avista users, our state, or our country. Why would we let a failing company buy our utility? They have shown to be bad managers of their company already. They are trying to bail themselves out of bad decisions they have already made and making the users pay the price! Also, we do not need foreign control of a utility that serves a large chunk of the northwest. You would be hanging the ones who depend on Avista out to dry! No, no, absolutely no!

Comment: Avista Sale to Hydro One

Please be advised that I am completely against the sale of Avista Utilities to Hydro One now or in the future. There is no sound reasoning for the sale of our utilities to a foreign entity, along with all associated dams and water rights. We cannot continue to sell, giveaway or jeopardize our access to vital utilities and infrastructure to foreign entities over which we have little or no control. Hydro one could easily sell or negotiate away our utilities and infrastructure to a hostile foreign entity to use as a weapon against Idahoans and our nation as a whole.

Comment: Avista is about to be bought by a Canadian Company and come under Canadian rules. Canada is about to enter into the sort of Green activism required by the Paris Agreement and which has been repudiated by the USA. As such their holding company will be buying massive amounts of Carbon Footprint credits and these purchases will fall in part on the backs of Idahoans subject to their premiums without redress. It is questionable if this is even legal but certainly it will be tested in court and will cause tremendous expense to Avista which also will be passed to the customer base. Thus I submit that the Commission disallow this takeover since it will render them unable to control the outcome and perhaps place them into the way of untold legal actions and certainly increase the premium that Idahoans pay by about three times for their needed electricity.

Comment: Selling Avista, A US company, to Hydro One, a Canadian company, is just about the worst idea I have heard of when it comes to looking out for the interests of the United States and Avista customers, of which I am one.

This issue is flawed on so many levels, it took Sandpoint and Coeur d'Alene residents several hours to list all the concerns, and they were all of a different nature!

First and foremost for me is national security. How do we propose to force a foreign company to provide for our electric power needs should they become a government hostile to the U.S. This could happen if Hydro One goes bankrupt and sells to someone in a country hostile to the U.S. - such as China, for instance.

The "Golden Share" issue, which has been voiced as a concern at at least two of your hearings, needs to be explained. But so many more questions have been raised that it would be an outrageous, egregious act on the part of the Public Utility Commission to approve this agreement.

Comment: Sir:

I have been a citizen of Idaho USA 81 years. I would hate to see our electric power from Avista sold to a foreign country. We have supported Avista / washington water power and helped build them to the company they are today. How can we be sure a foreign country won't take advantage by raising our electric rates and we will have no control. Close the borders on this issue.. For we stand for the USA.. Thanks. Donald Kern
