RE: Case INT-G-20-03

Dear [RNG Producer]:

Intermountain Gas Company (Intermountain) appreciates the opportunity to work with you as together our companies provide renewable natural gas (RNG) to customers in the western U.S market. I am writing to you today to inform you that on May 4, 2020, Intermountain filed the above referenced Case regarding Intermountain's RNG operations with the Idaho Public Utilities Commission (Commission).

This Case will serve to standardize service terms and conditions for all RNG producers including a monthly O&M charge, a monthly Access Fee, a provision that requires new RNG projects to pay the appropriate income tax gross-up on project costs and other general rules that protect our utility customers from any risk relative to RNG operations. Any change to current operations would only be effective after a Commission ruling. If you are an existing customer, this Case will not arbitrarily change terms or conditions of any executed contract or agreement. If the Commission approves this proposal and a resultant Commission Order conflicts with any existing contract term or condition, we hope to find mutually agreeable common ground to resolve any such difference.

As with all Commission filings, Intermountain's application is a proposal and is subject to public review and comment and to Commission jurisdiction. A copy of this application is available for public review on the Commission's website (puc.idaho.gov) or at Intermountain's website (www.intgas.com/rates-services/comission-filings/). You can follow this Case, review all relevant subsequently filed documents or submit comments on the Commission website.

If you have any questions, please call or email me.

Regards,

David Swenson
