Comment: "As a retired senior citizen, born 72 years ago in Nampa, Idaho and working my whole life in Idaho, I feel that this rate increase is not fair to those of us which have spent our entire lives here.

The letter which I received 6/13/2025 states, "The main drivers of this rate increase are unprecedented growth in our service area."

Then make those responsible pay for this growth! It will slow it down and that will be fair!"

Comment: "Dear Public Utilities Commission,

Intermountain Gas Company has kindly informed their customers that they are requesting a rate increase of 11.46% for residential customers. Intermountain states that the increase is needed due to infrastructure investments resulting in increased depreciation expense.

In essence, Intermountain Gas is asking for a rate increase so customers can pay them more while they enjoy increased economies of scale and larger tax write-offs. This rationale is absolutely ludicrous and is an excellent example of corporate greed that we can use as an object lesson to teach to our children to help them remember what happened economically in this era.

We hope that the PUC will please consider the above economic fact as they consider Intermountain's request. Thank you in advance for denying or considerably reducing the amount of the allowed increase.”

Best regards,

Karl and Carol Ann Moxley
