Please describe your comment briefly:

The IPUC staff has done a tremendous job capturing all aspects of energy affordability. The one thing that is very evident is that Intermountain Gas is not contributing anywhere near what the other utilities do. The only funds that can actually be attributed to I.G. direct efforts are their once a year donations of foundation dollars. All other monies are being raised by the communities involved and customers. \$10,000 in 3 years spread over 17 counties in SE Idaho hardly seems equitable considering what the other major utilities in Idaho and Washington contribute.
