NEWS RELEASE: Commission approves amended certificate that reflects telecom utility changes.

BOISE (July 25, 2024) – The Idaho Public Utilities Commission has approved an application from a telecom utility that reflects the sale of equipment and changes to the services it offers customers.

CTC Telecom, Inc. applied to the commission to amend its Certificate of Public Convenience and Necessity to relinquish its right to provide voice and broadband services via fiber in Ada County. CTC Telecom told the commission it sold telecommunications equipment and facilities that were used to provide those services in Ada County. Millennium Networks, LLC bought the equipment and facilities, and is now the service provider.

CTC Telecom said it will continue to provide fixed wireless services in Ada County under the name “Wildness Wireless” and does not seek removal of the right to provide that service. The commission approved the utility’s application to amend its Certificate of Public Convenience and Necessity
