Equipment Description

Broadband services offered: Tekfinity, LLC offers fixed wireless broadband internet services to our customers, primarily in Southern Idaho.

Network description: Beginning in 2014 Tekfinity, LLC built and engineered a core network with the goal of delivering high speed broadband connectivity to the Treasure Valley and surrounding rural areas. We built a high speed packet switched, carrier class, core network using state of the art wireless technology in order to deliver high speed reliable Internet service to our customers. In 2018 we built several sites in order to bring increased bandwidth to underserved areas desperately in need of Internet access.

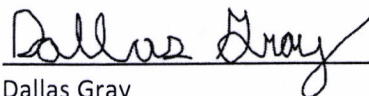

Transmission rate: Our core network is capable of transmitting over 1 Gbps of traffic, which allows us to deliver anywhere from 1Mbps to 50Mbps to our customers.

Number and percentage of Idaho customers served: As of June, 2019, the Tek-Hut group (including this applicant, Tekfinitiy, LLC) serviced over 2,500 customers in Idaho.

Equipment list: See attached broadband equipment list.

I hereby certify that I have read the applicable statutes for broadband investment income tax credit and believe that the equipment listed herein qualifies for the tax credit under Idaho Code 63-3029I.

Please review the above information and the attached equipment list and approve the 2018 equipment purchases of Tekfinity, LLC as being eligible for the three percent Idaho Broadband Equipment Tax Credit.
